

Another Case for —

Bayer Aspirin! The universal antidote for all sorts of aches and pains!

The worst case of "nerves" is soothed away the same half-hour a tablet is taken. A bad headache is stopped completely, in the same short space of time. So are the aches and pains of bone and body which come from exposure to wet and cold; neuralgia and rheumatism.

Women in every walk of life depend on Bayer Aspirin. In increasing numbers, they are making use of these tablets every month in the year; avoiding much pain and discomfort which was once unavoidable. They may be used freely—they do not affect the heart. Children don't suffer from toothache and earache as they used to—for parents have learned to use these harmless, effective tablets. The only caution necessary is to be sure they really are genuine. *Bayer is genuine.* Call for "Bayer tablets" and you will get the product which has proved itself safe for over twenty-eight years.

For your own good, look for the name on cover and proven directions inside each box. Any drugstore.
