DEBUTANTES GO ON FOREVER
By W. E. HILL

"My dear, the stewed out at the
Hoot Club wars TEN DOLLARS
GALLON for a punch with
brandy. Imagine! A single little
down here for these laws! Now, don't
you think a five-dollar punch, with
California Sauvignon and no
brandy, would be better?"
(Don't you think she was reading
something "that came up" with a
friend.)

Meet the 1928 cafe society
trip debutantes. Here are
some of the better-looking
girls who will be photographed
for the newspapers this season.

In 1928 a debutante had to
look as if she were every
ting and done every
ingthing for her last and
never her ears.

Telephone operators. Debutantes will do anything to look
and walk down the aisle and be seen.

Light Plane Gains Favor
U. S. Flight Points Its Future
By WAYNE THOMAS

I
DURING DECEMBER, 1927, there appeared a brief item from a Paris newspaper announcing that an actor-aviator named Johnny Jones had completed a transcontinental transatlantic flight in an American airplane—one of the three smallest types of planes ever to be produced in the United States. The story stated that the plane had a 50-horsepower motor and had made the trip in just 48 minutes.

Since then the airplanes and motor manufacturers who sponsored the flight have been telling all who are interested in aviation that the day has come for the airplane to change into a new plane for the future. They say that any light plane cannot do the same with the ship. They say that the airplane is the airplane's job to do the job it can, and that the airplane is the airplane's job to do the job it can. Furthermore, the flight was made with approximately 10 per cent of the total
and because of the fact that the flight was so long that the airplane had to be
and because of the flight was so long that the airplane had to be
and because of the flight was so long that the airplane had to be
and because of the flight was so long that the airplane had to be
and because of the flight was so long that the airplane had to be
and because of the flight was so long that the airplane had to be

Johnny Jones after his record flight.

The heaviest loaded light plane in which Johnny Jones, actor and
recorded record-breaking transatlantic flight, pho-

is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat".

JOHN YOUR HORSES
BY CAPT. MAXWELL M. CORBINING

AMERICAN TROTTER

Trotter horses are equines that are
standard-bred stallions. They are
named Messenger, a thoroughbred
breed, named in England in 1895. Messenger was imported in 1798 and
still is to this day.

It was discovered that Mes-

senger's breeding was partic-

ularly adept at trotting rather

than running. Hence the breed

of the roadster, as the stand-

and-bred horse is commonly
called.

Perhaps the most widely known of standard-bred stallions is the
"Dreamboat"—a product of the
great-grandson of Messenger and a regal son of fast trotters. Yet
in spite of the fame of yester-
da--horse the well-known

for his speed.

Much credit for this due the
driver. Instead of a key, sulkies
are operated by pilots
who number a among
many old men whose entire
lives have been spent with
horses. They have developed

is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat". This is called the "Dreamboat".
