

CUTTING ICE BY ELECTRICITY—A new and highly efficient type of sawing machine at its work of providing 60,000 tons of ice for the houses of a Boston ice concern at Wellesley, Mass. The ice reaches the machine in twenty foot squares and four circular saws cut it into cakes of the regulation size. (Photograph copyright by Underwood & Underwood.)

UNCLE SAM'S NEW COBBLER SHOP ON WHEELS—These two army trucks have been fitted up to transport a shoe repairing outfit which, with its crew of seven men working day and night, can tap 800 pairs of shoes a day. The truck at the left contains the machinery, while the other is used as a supply truck and has sleeping quarters for the men. (Photograph copyright by Underwood & Underwood.)
