SHOPS ALL OVER CHICAGO AND SUBURBS

"Lead on, cowboy!" Dinner is ahead and there'll be plenty of Pabst-ett. Pabst-ett is a good traveler and contains health building vitamins and milk minerals, sugars and proteins of whole milk.

Pabst-ett Supper Delights

Toast slices of bread (crusts trimmed) on one side. Spread the untoasted side of each slice with Pabst-ett. Cover with a thick slice of peeled tomato, then with a strip of partially broiled bacon. Place under low broiler heat until Pabst-ett is melted. Serve hot.

Two Varieties: Standard, Pimento

(Left) Does this feller need a friend? Not he. He's got two right beside him. His dog for company and under his hat a lunch fit for a king—two man-sized sandwiches richly spread with Pabst-ett.

(Below) This lively threesome is rushing the season just a little, but they don't seem to mind. Pabst-ett is always in season—as digestible as milk, as spreadable as butter, melts without getting stringy, they gear around.

Three Cheers For Pabst-ett!

Pabst-ett has made millions of friends. It's the scientific cheese food—as easily digestible as milk, mild in flavor, as smooth and spreadable as butter—all in one.

Serve it, in a hundred delightful ways—in soups and salads, soufflés and rarebits, on sandwiches and crackers, with macaroni, potatoes and vegetables—serve it to your children.

Pabst-ett is so easy to use, by itself and with other foods. It slices neatly when chilled. It mixes, spreads and creams like butter. In cooking it melts quickly, smoothly, without getting stringy or lumpy.

Eat lots of Pabst-ett. It is a good source of Vitamin A (same as found in cod liver oil, cream, butter, spinach) and contains the valuable milk minerals (including calcium), milk sugars and milk proteins of whole milk. It's a nutritious food with a real taste thrill.

Sold at food stores everywhere.

Its Visible Column of Ink—like the Gas Gauge on your car—Lets you choose your own time to refill—ends running dry!

Not only does Parker's revolutionary Vacumatic hold 102% more ink than a rubber sac pen of equal size, but it also shows when your ink supply is running low. Hence it doesn't irritate you by suddenly going dry. You can always refill it when and where ink is handy.

It's a basically new invention—guaranteed mechanically perfect.

A famed designer created this shimmering laminated Pearl Beauty—an utterly original, smart, and alluring style—design patented, hence wholly exclusive.

Now that the world can have the sacless pen it has always wanted, rub-

ber sac pens and piston-pump types are being laid aside as rapidly as silent pictures went out when talking pictures came in.

"What a point!" exclaim those who try it. Precious Platinum and Gold, tipped with a polished pellet of rare Iridium, perfectly formed on both

sides, smooth as a watch-bearing, and slightly turned up so it cannot possibly scratch or drag—even beneath the pressure of big-listed writers.

Give your hand the pleasant adventure of trying this at any nearby pen counter. All stores that sell pens are daily demonstrating this new wonder of science. The Parker Pen Company, Janesville, Wis.

Notes: All Fountain Pen owners should use Parker Quink, the new pen-cleaning ink.
