If Your Child “Eats Poorly” In Summer

Here’s a Way to Make Him Hungry Even for Vegetables and Milk

I have used Ovaltine with perfect results for stimulating the appetites of my two children, one five and the other three. They seem to be better and are able to maintain their food much better than usual. Both my children are very choosy eaters. I have found a way of getting Ovaltine at night before bed to eat and drink better.

This Swiss Food Discovery By Actually Creating The Sensation of Hunger Offsets Loss of Appetite In Summer . . . Adds Weight At The Rate of A Pound A Week . . . Curbs Nervously Remarkable Accept a Trial Package — Note the Coupon Below

FREE SHAKER

A delectable taste that the fussiest child is unable to resist.

Start Today

For the sake of your child, we urge you to try Ovaltine. By doing so, you can make this a real health-sustaining for him.

Results will surprise you. Note the almost immediate difference in appetite — in the way he acts at meals. Note, too, the increased interest in weight, in nerve power and in strength.

Give Ovaltine at breakfast always — at meals and between meals. It is extremely economical to serve. For it is a food-concentrate which stores up the energy of milk and orange juice in the form of carbohydrates. Since there is no need to add sugar to give it bulk and change its color, you add your own sugar at home. Don’t be misled if you’re offered the starchy-tasting “energy-sustaining.”

You can get Ovaltine at any drug or grocery store. Or send the coupon below for a government trial supply . . . Notice the offer of a life insurance policy which is now being given free.
