OVALTINE
The Swiss Food-Drink
Manufactured in the United States according to the original Swiss formula

Not good after July 25, 1933

MOTHERS! Ovaltine is a delicious pure food concentrate, first created in Switzerland—and now made over here. Since its discovery, its use has spread to 54 different countries—and it is highly recommended by over 20,000 doctors and child specialists. It contains more than 18 important food elements in which the average child's diet is often deficient—and is particularly valuable because of the rapid way it adds weight while curbing nervousness and increasing appetite, too. Thousands of nervous people, men and women, use Ovaltine to restore vitality when fatigued. It is also highly recommended by physicians for sleeplessness—and as a strengthening food for nursing mothers, convalescents, and the aged.
