

## Lubrication up-to-date—Rich and Sturdy!

Today a new race of motor cars is speeding over the land—sleeker, swifter—with engines that demand different, richer, sturdier lubrication. As ever, the Standard Oil Company (Indiana) supplies it.

For twenty years this Company has anticipated every demand for better lubricants. As engines were improved, it developed richer, sturdier oils to meet their needs. It has kept lubrication always up-to-date.

It produced the sensational advance of the century in lubrication—an oil that will not thin out—that you need not drain for a thousand miles or more—that wears and wears and wears—the famous Iso-Vis!

Likewise Polarine has been kept abreast of modern developments and, like Iso-Vis, it provides lubrication up-to-date for the modern car. By draining the crankcase every 500 miles you can keep your motor lubricated efficiently and economically with Polarine.

Both Polarine and Iso-Vis are rich and sturdy—able to stand up under all conditions of modern driving. They lubricate thoroughly the remotest frictional surfaces. The Standard Oil Company of Indiana recommends these trusty two!

At any Standard Oil Service Station and at most garages.
