

## COLORFUL LURES FOR THE FLY FISHERMAN

### BLACK BASS LURES

### SALMON LURES

### TROUT PATTERNS

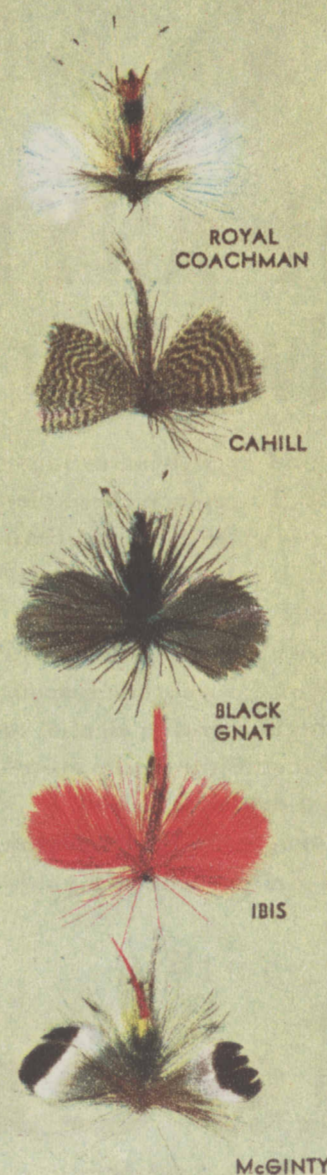

### HAIR FLIES

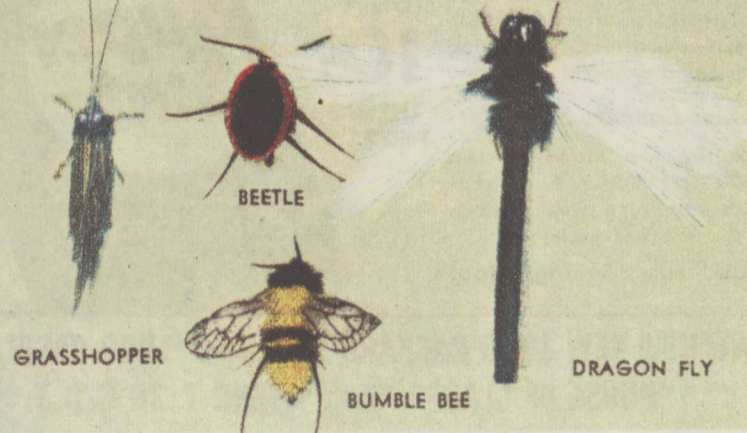

### BLACK BASS FLIES

### FAN WING DRY FLIES

### NATURE LURES

Literally hundreds of fly rod lures, many of them made to imitate real insects, are available for use by fishermen. This page portrays a few of the famous patterns found in the fly fisherman's kit, and also some of the newer lures of vivid color or ingenious design. A story on fly rod lures, by Bob Becker, will be found elsewhere in this issue.
