HANGARS GO MODERNISTIC—and for a purpose. This hexagonal structure at Los Angeles has self-opening steel doors and sloping floors, which are supposed to make it possible to get all planes out in one minute. (Photograph from Underwood & Underwood.)

O-O-O-O!  
**Madam should have used her Mum**

Practically every woman uses Mum "on occasion" for there are times when no woman would chance underarm offense.

But is there ever a time when personal daintiness may be neglected? What a mistake to make only occasional use of something one knows is essential to a fastidious bodily condition!

You probably use Mum. It has never failed you when you have used it. You have found that refreshing dab of Mum as harmless as cold cream. Be sure, then, to use it often enough to provide continuous protection.

Mum does nothing to stop the important process of perspiration. It stops only the odor. Not a taint remains, or can return for hours.

A doctor developed Mum's formula, so it never irritates. Indeed it soothes the skin. Naturally, such a preparation could not injure the most delicate fabric.

Women who believe soap and water sufficient protection from perspiration odor should investigate the armholes of the garments in their closet. Even those worn but once.

And Mum is so easy to use! 35c jars and 60c jars containing nearly three times as much, sold everywhere.

*The Sanitary Napkin Use:* Mum performs another service for which many women are grateful beyond expression. Just a thin spreading of Mum on the sanitary napkin, and protection against odor and embarrassment is complete.
