# ISO=VIS

## Makes New Lubrication Records

1000 miles—2000 miles—without changing oil! It is possible this summer with Iso-Vis. Draining and flushing once each 1000 miles is all that is necessary with Iso-Vis under normal operating conditions if you check the oil level every hundred miles and keep the crankcase not less than three-quarters full. If your car is new and equipped with effective oil filtering devices you may motor 2000 miles or more without draining the oil.

Iso-Vis has revolutionized the lubrication of the automobile—made dilution trouble a thing of the past—relieved the motorist of all the worries that thin oil can cause.

*Iso-Vis is sold everywhere in the Middle West for 30c per quart. You will appreciate its efficiency.*

**Standard Oil Company, 910 So. Michigan Ave., Chicago, Ill.**
