**IMPORTANT for men who shave with ELECTRIC RAZORS**

If you're one of the two million moderns who use an electric razor, these facts will interest you and help you get a perfect electric shave every time. No experimenting. No white scuff.

The problem with an electric razor is to dry the oily film off whiskers so your shaver can clip them off crisply and closely. That's why many men need this kind of preparation for a proper electric shave.

A dash of Aqua Velva before electric shaves dries off oily sebum and sweat.

Whiskers are left in position for your shaver to "mow 'em down." Try a cool dash of Aqua Velva before your next electric shave. Thousands agree there's nothing like it to remove gritty oils from your face... bring each bristle smartly to attention. A second dash of Aqua Velva after shaving leaves your face smoother, cooler, more refreshed—and free from all white scuff.

**We'll set you up to a FREE bottle** Find out for yourself (at our expense) how Aqua Velva simplifies shaving with any electric razor. Just send your name and address to: The J. B. Williams Co., Dept. CR-3, Glastonbury, Conn., and we'll send you postpaid a generous free bottle of Aqua Velva.

So graceful... so fashionably smart... Adola will inspire you with new assurance and poise... in bandeaux and long-lines.

Insist upon Adola. At all good stores. See them and marvel.

**59¢**
