Lakers anticipate 30% value drop

By AMY HEIDEN

Faced with the need to renew 12.5 mills and continued farmland value declines averaging another 30%, the Lake School Board is seeking advice on academic program changes—should a millage renewal and proposed increase fail this year.

The School Board Monday night agreed to get recommendations from the education and school improvement committees on how to change school operations and academic programs to make fewer dollars go further. Officials say the 7.5-mill increase approved by voters in 1986 will expire this year and will have to be approved again to keep the current curriculum intact.

MORE IS NEEDED: Lake Superintendent Harry Brunstad said the current 24.5 mills would not generate the income it has in the past four years, as ag property values continue to decline.

"People say their kids are held hostage by the school district, but the district is held hostage by a millage vote," Brunstad said Monday.

Officials say the improvement group will meet Feb. 26 with the education sub-group, to recommend any possible academic cuts. Board member Dr. Richard Leckard said he opposes academic cuts, and Brunstad replied there could probably be cuts elsewhere, but they wouldn’t make much of a difference since the academic program accounts for the majority of the school budget.

HARDEST HIT: Officials noted the Western Thumb has been hardest hit by declining ag values in the past three years. Figures from the County Equalization Department wouldn’t be available until Tuesday and several board members said they would be attending the County Commissioners’ meeting to get the latest tax news directly.

Board member Sid Smith said several lawmakers have proposed various changes in the school financing system, but that none are being introduced into the legislature presently.

Pineg’s Active Feed hosts South Korean ‘egg’sperts!

By AMY HEIDEN

Active Feed Company’s egg-producing facilities came under intense scrutiny last Monday as 17 South Korean commercial poultry and egg producers toured the plant on Hasit Road.

Active Feed’s Manager Joe Maust Jr., says the visitors had attended the Southeastern International Poultry Convention in Atlanta in January and were touring various facilities in the United States to study construction of poultry and egg laying facilities and their management.

VERY UNIQUE: Wayne Denard, marketing director for the East East for Hy-Line International, which breeds the parent stock for Active Feed, said the visitors were particularly interested in Maust’s operation because "Active Feed is one of the best managed and unique egg production facilities in the United States. It’s unique because of the many different types of construction used in the buildings.

The itinerary for the Korean visitors included trips to Niagara Falls, farms in New York state, and a visit to New York City.

Hy-Line provides the parent stock to Greenville Poultry Farm in Cassville, which then hatches the layers for Active Feed.
These Laker kids have more good spells than bad spells!

God's Valentine

Read 1 John 4:18

God is love. He who abides in love abide in God, and God in him.

For we loved him and he loved us. Let us love one another, just as he has loved us.

This is commandment, that whoever loves God must love his brother also.

One Love, Two, Three, AIREX

A VALENTINE EXPRESSES YOUR LOVE

BUT DOES NOT REPLACE IT

A Valentine expresses your love,

So long as we live as very little,

Our dearest ones to whom we are bound by other, we are unremembered.

—Robert Leam Stewart

"It is not love, it is duty and a debt."—John, 3:18

 пользуются сладистями. Он был известен своими сладостными блюдами. Его наслаждение было таковым, что его сладости считались уникальными в своем роде. Он также был известен своим особым способом приготовления сладостей, который делал их еще более вкусными. Приготовление сладостей было его любимым хобби, и он потратил годы на изучение различных рецептов и их усовершенствование. Он был увлечен своим делом, и его сладости были признаны лучшими в городе. Ему был нужен помощник для того, чтобы он мог удовлетворять спрос на его сладости. Он начал обучать своих помощников, и они быстро проявили себя как лучшие сладисты. Он также начал продавать свои сладости на рынке, и они быстро завоевали популярность. Он был счастлив, видя, как его сладости приносят людям радость, и он продолжал создавать новые сладости, чтобы удовлетворить самый взыскательный вкус.

Farming aid offered soon

The new buzzword in farm and business planning is "conservation" and it continues to grow in importance. Farmers are urged to conserve their resources, which will eventually bring more production per acre.

In FARMING, 4-H clubs, in a special report issued, are urging more conservation. The plan is to offer a series of conservation courses to 4-H club members in the Upper Peninsula.

LARRY Sian of the 4-H Club will speak at the conservation meeting. The plan is to offer courses in the Upper Peninsula.
