30 years ago, a young man became interested in photography. He spent his weekends developing film in a darkroom and dreaming of a career behind the camera. As he grew older, he juggled a steady job while continuing to shoot film during his free time. Eventually he made the switch to digital. His artistic eye for composition and aesthetics developed at a young age. His subjects were anything he found interesting - landscapes, portraits, wildlife. He took his craft seriously, constantly learning and improving. His work has been praised and awarded by various photography organizations. He continues to shoot, but he no longer spends his evenings and weekends in the darkroom. He still loves photography, and he remembers the fun and joy he found in it at a young age. He hopes to pass on the passion to his children and grandchildren one day.
An easy win for the Lady Lakers

BY AMY HEDDEN

Last week was very much like a vacation for the Lady Lakers. Last week was a break from a hard week of games against former league champions, Lakeview High School and Battle Creek Middle School. The Lady Lakers finished the week with a record of 2-0, with victories over Lakeview and Battle Creek Middle School.

Lakeview
Lakeview was not at their best on Tuesday, October 23, losing to the Lady Lakers 37-23. The Lady Lakers dominated the game, with a 20-point lead at halftime. The Lady Lakers' defense was key in their victory, holding Lakeview to just 11 points in the second half.

Battle Creek Middle School
The Lady Lakers continued their winning streak on Thursday, October 25, beating Battle Creek Middle School 38-28. The Lady Lakers were led by their talented guards, who scored a combined 24 points in the game. The Lady Lakers' defense was also a key factor in their victory, holding Battle Creek Middle School to just 28 points.

The Lady Lakers have now won six consecutive games and are in excellent position for the league championship.

Lakers blank Vulcans in TBA win

By AMY HEDDEN

The Lady Lakers continued their winning streak on Friday, October 26, beating the Vulcans 36-24. The Lady Lakers dominated the game, with a 12-point lead at halftime.

The Lady Lakers' defense was key in their victory, holding the Vulcans to just 24 points. The Lady Lakers' offense was also strong, with a balanced attack led by their talented guards.

The Lady Lakers have now won seven consecutive games and are in excellent position for the league championship.

Lady Eagles drop one more

By KATHY MEYER

The Cassville Lady Eagles dropped another game last Tuesday, October 30, losing to Aurora High School 46-35. The Lady Eagles were led by their talented guards, who scored a combined 20 points in the game.

The Lady Eagles have now lost six consecutive games and are in need of a win to turn their season around.

The meeting will begin at 6:00 PM at the Bay Port Area Chamber of Commerce. For more information, please contact the Bay Port Area Business Association at 218-555-5555.

Soybeans

Soybeans are an important crop in the Midwest, and their production is essential for the local economy. In 1989, the state of Michigan produced 1.8 billion bushels of soybeans.

Dry Beans

The Midwest is a major producer of dry beans, with Ohio leading the way. In 1989, Ohio produced 1.3 billion bushels of dry beans.

Small Grains

Small grains are a significant crop in the Midwest, and their production is essential for the local economy. In 1989, the state of Michigan produced 600 million bushels of small grains.

About 23% — or 127,000 tons — of beans had been harvested at the Dawes plant by Monday morning. With cooler weather predicted for this week, the factory was scheduled to resume taking beans this week.

FARMWAYS Claim 14 In Michigan...

As of mid-August, 1969, Michigan had recorded 14 farm accidents that had resulted in death or serious injury. This list was compiled by the Michigan Agricultural Education and Safety Foundation, a non-profit organization that monitors and reports on farm accidents. The list includes accidents that occurred between June 1 and August 15, 1969.

The accidents include:

1. A farmer was injured when a piece of farm equipment fell on him.
2. A farm worker was killed when a tractor overturned.
3. A farm worker was injured when a piece of farm equipment struck him.
4. A farm worker was injured when a piece of farm equipment fell on him.
5. A farmer was killed when a piece of farm equipment struck him.
6. A farm worker was injured when a piece of farm equipment fell on him.
7. A farm worker was injured when a piece of farm equipment struck him.
8. A farmer was killed when a piece of farm equipment fell on him.
9. A farm worker was injured when a piece of farm equipment fell on him.
10. A farm worker was injured when a piece of farm equipment struck him.
11. A farmer was killed when a piece of farm equipment fell on him.
12. A farm worker was injured when a piece of farm equipment struck him.
13. A farmer was killed when a piece of farm equipment fell on him.
14. A farm worker was injured when a piece of farm equipment fell on him.

The Michigan Agricultural Education and Safety Foundation urges farmers to take precautions and to be aware of the dangers associated with farm equipment and farm operations.
FARMWAYS

Follow The Rules... Make It A Safe Harvest

SAFETY ON YOUR FARM

Continued From FARMWAYS Page 3

Afraid it's too late? There is still time to safeguard your harvest. Here are some tips...

- Check your equipment. Ensure all guards, shields, and safety devices are in place and working properly.
- Be alert to the hazards of electrical and mechanical systems. Make sure they are properly grounded and insulated.
- Use proper protective clothing. Wear gloves, eye protection, and hearing protection when necessary.
- Watch for obstacles. Clear the area around the silo and watch for children or animals that might be tempted by the silage.
- Keep children and animals away from the silo.
- Keep flammable materials away from the silo.
- Regularly inspect the silo and personnel safety equipment.

IT'S SIMPLE

We've got what you need to make your farming operation successful.

Controlling Canada Thistle...

When controlling weed fields with glyphosate, many weed growers are likely to overlook a major ingredient in the formula: Canada thistle. Inadequate control of this broadleaf weed can result in a 30% to 50% crop yield loss. The seed can last 2 decades, and even a 2-year-old stand can produce 100,000 seeds per square meter. Spring grazing may add additional crop yield losses among existing weed stands. Canada thistle ranks among the most persistent weed species in the upper Midwest, and it can reduce the yield potential of crops by up to 70%.

New 4-H Group Is Chartered...

A new program, named FarmWays, has been established at Michigan State University. This program is designed to promote the importance of farm safety and diversity. The program is open to all students, regardless of their background or experiences. It is a great opportunity for students to learn about the various aspects of farm safety and diversity, and to develop leadership skills.

Another Centennial Farm Honored in Area

Every Michigan farm, including one located in Eaton County, has been certified by the Michigan Department of Agriculture and Rural Development. The farm has been in the same family for over 100 years, and it is a great example of the value of family farms. The farm is located in the community of Edsel, and it is a great example of the importance of family farms in our state.
