Northland's Christmas.

Merry Christmas!—On Monday night last, the Northland Lodge, No. 32, of B. & B. M. O., held its annual banquet, followed by a filled meeting of the members, in the hall, a good time being had by all. After the meeting, a number of the members and friends sang Christmas carols, and on the music of Mr. E. C. Woodbury, and a party of women sang a few selections from the Carlisle and the German, with such good effect as to draw enthusiastic applause. About 80 persons were present, and the hall was furnished with a handsome Christmas tree.
THE ALDINE.

From the Boston Journal.

The great national strike of mechanics, machinists, and other skilled workmen, which has been going on for some time, has now extended to the other eminently wealthy and populous city of New York. The work in several of the principal shops and factories has been entirely stopped, and the laborers have refused to continue working until their demands are met. The men have given notice to their employers that unless they receive a substantial increase in wages, they will not continue to perform their duties. The strike is causing great inconvenience and loss of business, and many of the employers are very much alarmed.

A large number of the men have taken the liberty of giving notices to their employers, demanding an increase of wages of from fifteen to twenty per cent. They also demand that the hours of labor be reduced from ten to eight hours per day. These demands are considered by many to be reasonable, but by others to be extravagant.

The strikers are determined to carry out their purposes, and are prepared to resist all attempts to force them to return to work. They are, however, prepared to negotiate, and are willing to come to terms if a just and reasonable settlement can be made.

The public is requested not to take sides in this dispute, but to support the strikers in their demands for a just and reasonable settlement. The men are not seeking to cause inconvenience or loss to the public, but are only seeking to improve their own condition by obtaining a fair and just wage.
