A SOLDIER'S LOVE STORY.

We were at Cham when our delayed mail was received. There was a monthol i letter from my young nephew, Reg-ined Travers, containing sad news. My dear old friend Oswald Hamilton was dead: his affairs left in a bad way. The arrangement of his papers.stra ening accounts, and settling up of the estate were left in my hands. A second was to the effect that Josepha (the only and motherless daughter of my old

I cared little for society (though thank God! never unfriendly or cold to my kind, like my brother). The surmy kind, like my brother). The sur-rounding country families who would have lionized me on account of a few sears and decorations met with small encouragement, and but for the fiving visits of my young Lieutenant and an evening cigar on one of the wide verandas of Hamilton Place, my time was

The notes of the corporation were given to the bridge confractors as the work progressed, and were discounted by the Federal Bank of Winnipeg. These notes were to be retired by the corporation as soon as they could sell their bonds. It appears that there was a disposition on the part of the Federal Bank and others in Winnipeg to get these bonds at a "shave" of seventeen cents on the dollar, and when worst) abused men in the world, and the corporation of Emerson employed a financial agent to sell the bends in Scotland, the Federal Bank, in order to spoil the sale, got out an execution when the concentration of the skill. were given to the bridge-confractors as

It is very apparent to an outsider that our energetic little neighbor, in undertaking to build a \$200,000 bridge, went beyond its ability, and its present aspect, with half its stores and dwellings empty, speaks loudly. There is no question that this undertaking frightened away the money of the Ontario hanks and loan companies from the city, tensing the hankrupter of nearly every limit the place, and the suspension of all improvements, and the sinking out of sight of real estate. WHOLE NO. 841.

The Italian Soldier.

The Italian soldier, as a rule, is short and square built and his general appearance conveys the impression of a not over robust physique. But see him marching and it soon becomes apparent that he processes more stamins than one would give him credit for. How unmurmuringly he trudges for hours at a time along a dusty road under a hot sun with rifle slung across his shoulder. And our surprise is increased when we find what meager rations he has to sustain him under all his toil,

him under all his toil,

His chief meal consists of soup made with lard, meat and maccaroni or some other kind of paste. His mess is prepared in large cauldrons, round which at a given signal the men gather each with a tin can, into which is poured a not very abundant supply of soup and an almost invisible lump of meat. In setting out on a long march the soldier setting out on a long march the soldier drinks the soup and keeps the meat to eat on the road. Besides this he gets coffee without milk in the morning and about two pounds of bread to last him throughout the day. A tumbler of wine is served out to him on an average every

third or fourth day in the year.

If his food is Spartan in its simplicity his dress is equally exempt from the change of luxury. A loose coat of coarse, grayish blue cloth covers the infantry soldier from neck to knee. trousers are of the same material, but when marching the latter are exchanged for canvas trousers, and when working in camp a canvas tunic is donned in-stead of the coat. His beadgear is a kepi, very like that in use in the French

army.

The uniform of the Bersaglieri is somewhat more 'exp essed in fancy.'
This army consists of picked men: ind'ed, only strong fellows could march at the rapid pace they are tained to. Of e wise their drill is much the same as that of the ordinary infantry regi-rents. They was a black tunic with rest facings, and black broad brimmed hat, with a bunch of green feathers stuck at one side. They are armed like the infantry, with Wetterly rifles. The cavalry and artillery are comparatively weaker armed than the infantry. The former are poorly mounted, and the guns and trains of the latter are below nar. red facings, and black broad brimmed

par.

The cavalry are divided into heavy cavairy or dragoons, lancers, and light cavalry. The dragoons are easily distinguished by their helmets. Both they and the lancers are armed with lance and (Wetterly) musket. The light cavand (Wetterry) misket. The light cavalry- of Cavalleggieri have revolvers instead of lances. Singularly enough, the cavalry have their swords and miskets fastened to the saddle, so that if unborsed they are defenseless. I have already remarked that the physique of the men is better than outward appearances would denote.

As regards their general disposition.

I may remark that they are docile, obedient to their superiors, well-behaved, cheerful and laborious. In times of danger and disaster, as during the cholera of 1867, the inundations of last year and the occasion of the recent earthquake at Ischia, they work with an ardor and self-devotion which is gratefully recognized by their fellow
