At Manchester Enterprise in New Hampshire, the article discusses various local happenings. It mentions a man who has been selling over 400,000 dollars worth of goods, but now has to sell for a lower price. The article also talks about a man who has been selling for a higher price, and another who has lost his job. The article concludes with a reference to the Pennsylvania Railroad and the state of Ohio.
TO CHEAP IS TO BE ECONOMICAL.

THIS is true of a large percentage of the clothing in these days. We rightly speak of extravagant, exorbitant, costly clothes, and rightly. But don't you know that anything beyond the price of the cloth that looks well and wears well and holds its shape is to be economized? Why? Because the goods are not worth the price, not worth the trouble, not worth the money spent upon them. We save what the establishment that makes such goods as these charge for them. If you are sold something at a dollar, but it looks twice as good as the price of it, it is a dollar and a half; and on the other hand, if you buy something at a dollar, but it looks twice as good as the price of it, it is a dollar and a half. So, if you are sold something at a dollar, and it looks twice as good as the price of it, it is a dollar and a half. And if you are sold something at a dollar, and it looks twice as good as the price of it, it is a dollar and a half.
