Mammoth Corset Enterprise.

One of the leading and largest manufacturers in the Upited States has hit upon the very novel plan of making corsets for e ch season of the year. It has been known to the ladies' themselves for years, how cumbersome and uncomfortable the average corset is in the summer. This company now manufactures a fine of open mesh specially stiffened corsets, warranted to keep shape perfectly and add gracefulness to the figure. The goods are being adopted throughout the country, and are becoming absolutely indispensable for summer wear. The publishers of the Housekeeper of Minneapolis, Minn. with characteristic enterprise have placed an open order for thousands of pairs of these corsets to distribute among their lady friends throughout the entire country. It is the boldest step yet taken by any newspaper publishers, and it will be impossible to estimate the number of ladies that will be directly benefited. No leaders of fashion or authorities on dress, have failed to endorse these summer corrects. In this day of modest dress and correct taste it is to be hoped that comfort will always reign supreme in the matter of our ladies' wear.
