AN ILL WIND.

Yesterdays Russian Crown Crown Crown was very much displaced yesterday by the

story of the new Russian Crown. The new Crown is a very much larger

Crown than the old one. It is made of solid gold and weighs about

two and a half pounds. The old Crown was made of silver and

weighed less than a pound. The new Crown is decorated with

jewels and is much more valuable than the old one. It is

expected to cost about $50,000.

WINDMILLS.

The windmills of the world are being

greatly improved by the use of new

materials. The new materials include

aluminum and magnesium. These mate-

rials are much lighter and stronger

than the old materials. The new wind-

mills are much more efficient than the

old ones.

TECHNICAL ACHIEVEMENTS.

The technical achievements of the past

year include the development of the

jet engine, the computer, and the

antenna. These developments have

greatly improved our ability to com-

municate and travel.

HOLD UP YOUR HANDS

A STAGE TAKEN IN BY CALI-

FRAGILE.

The story of how the new Russian

Crown was robbed near Redding, Cali-

fornia, is a very interesting one. The

Crown was being transported from

San Francisco to New York. The

Crown was held up by a gang of rob-

bers. The robbers succeeded in getting

away with the Crown.

THE GREAT INVENTIONS.

The great inventions of the past

year include the computer, the jet

engine, and the antenna. These inven-

tions have greatly improved our abil-

ity to communicate and travel.

FROM DUST COMES GOLD.

The process of turning dust into gold

is a very complex one. It involves

the use of a special chemical reagent

and a high temperature.

GOLD WASHING.

The process of gold washing is a

very important one. It involves the

use of a special chemical reagent

and a high temperature.

ON THE MOUNTAIN TOPS.

The mountain tops are a very

beautiful place. They are covered

with snow and ice all year round.

The mountain tops are a very

important place. They provide

water for many of the rivers in the

world.

DIVERSE HUMOR.

Rude: "What’s that?”

Mild: "Oh, that’s just a
tiny birdie."
