The Ride From Winchester.

A few days after the great Chicago fire I visited that city from St. Louis, in company with Orville Grant, the president's only brother. Sheridan's headquarters were located there a the time, and through his active instrumentality thousands of famishe citizens received food, and sheiter. General Lee was one of the most prom sing young officers of the famous Second cavalry in the old army before he became an officer of the Confederacy. He had been in half a dozen ugly Indian fights even then. At the famous action at Wichita village, October 1, 1858, where Major Van Dorn with four troops of the regiment fought is described. troops of the regiment fought 1,600 Comanche, Lipan and Aranahoe war riors, and but for his sagacity would have met with the fate of General Custemn his last fight, l'itzhugh Lec distinguished himself.

Just then Zymanski, an officer in the regiment, came up. He had not known that Lieutenant. Lee was so badly wounded, and as he approached the group that was very sorrowful, for it was hardly possible, the surgeon said, for Lee to live. Zymanski said, taking off his soft slouch hat, 'That was a pretty close call, wasn't it?" pointing to where a big round bullet and two burkshot had gone through within two inches of each other, cut-ting off some locks of his abundant hair at the same time.

It was long past midnight when I was awakened from a refreshing sleep by somebody fumbling with a st the lock of my door.

Several possessed of a burning desire to relate his adventures to somebody. I had been looking at him with one eye; the other, nearest him, I kept tightahut, and did not move, for I had no desire to enter into conversation with him. But my friend was not so easily shaken in his nurrose; he came close to my in his purpose; he came close to my bedside, stepping on my bodtjack so that it fell over with a terrible noise, and held the lighted candle within a few inches of my nose. It was im-possible for even the most shameless possible for even the most shameless shammer of sleep to hold out any longer. I opened my eyes and said in the sleepiest tone I could assume: "Enjoyed yourself?" "Famously, my dear fellow," answered Balder, seating himself on the side of my bed, although I forestailed his intention and left head like.

his intention and left hardly an inch for him to sit on. Then he' entered for him to sit on. Then he entered into a long and not very lucid rigmarole on souls which are destined to come together. The story was rendered all the more difficult to understand from the fact that I kept falling asleep and dreaming between his rhapsodies but I gathered that Balder had met with a young Spanish lady the mask ball, who apparently had met with a young Spanish-lady & the mask ball, who apparently possessed the soul which he was fated to meet, and that she was the only person on earth who could make him happy. He had seent the whole evening with her, and she had promised to meet him at the next ball. At his request she had lifted her, veil for one instant, revealing a face of Madonna like leauty. It was a simple story, but when a man's brain is fired with love he lingers over it. The with love he lingers over it. The words grace, southern coloring, eyes like a gazelie, etc., must have been repeated very often, for I dreamed later on that I was repeating them to

No impossibilities for Fairagut.

While preparations were being made for the attack on New Orleans, the navy department came into possession.

"Sleep if you can," he said; "I can manage it all for myself." He then

removed his coat, dressed himself in the dressing gown which acted as his mattress, and started to get some water from the kitchen, knocking things down on the way, and opening and shutt ng the wrong doors. I became resigned and made up my mind not to waste my breath on fresh warnings. Somebody else coughed. It was the Fraulein Lieschen this time, my landlady's daughter. He thought no more of the surger but sat at the table and drank silencing whatever else was on his tongue. He thought no more of the sugar, but sat at the table and drank his self-brewed coffee without it. When he had finished it he lighted a cigarette, at which he puffed away till the room was full of smoke. As I lay and looked at him'l fell into that peaceful state in which dreaming and reality are so much mixed that it is hard to distinguish between them. And then Balder disappeared in clouds of smoke, and I heard and saw no more. I was awakened again by a light being held near my face. Balder was standing at my bedside with the candle in his hand. "Ah! I'm glad you've been sieep again! he said, as I half opened my eyes and looked at him. "I want to make spoem to my Spaniard. Have you got a rhyming dictionary anywhere about?"

There, on the lowest shelf of the book case, but do be quiet."
