It will be found in good time that the United States treasury can go a long way.

The treasury has been treated by the press as a money bag. It is now time it was treated by the powers.

With Germany at his back, President Krueger ought to be the most formidable figure of the time.

The census of Germany, just completed, shows the population of the empire to be 51,554,844, an increase of 2,225,894 during the last five years.

The King of Corea is constantly surrounded by Japanese spies, and fears that he will be assassinated. The Japanese are now in the hands of the American minister.

Dr. G. Frank Lydson, a distinguished nerve specialist, gives the following recipe for rheumatism: "I always cure myself of rheumatism by holding the ends of my two index fingers as close as I can without allowing them to touch. And that way I concentrate my mind so closely on the fingers I forget the rheumatism."

Dispatches say that Mayor Strong did not like the bride at the Vanderbilt wedding. The strength of the suspicion that the bride was not the dream the New York society reporters and artists would have us simple mortals believe. Still, a Chicago magistrate would have had the moral courage to do his duty even if it pointed to a New York face.

Plans are in progress for the settlement near Phoenix, Ariz., of a large Mormon colony. Brigham Young, Jr., of Salt Lake City is now negotiating for the purchase of the Buckhorn irrigation canal and a large area of land adjacent thereto for the purpose. The canal runs on the Gila river, twenty-five miles from Phoenix, and 100,000 acres can be irrigated, extending it across the Hampanys.

Those who know just where the shoe pinches will be interested by the information that the United States Department of the Interior has discovered a new and sure "corn cure," that may be resorted to by the corned man. The corn was on his little toe, and after Mr. H. had suffered as he stated, "the torment of the corn" he told his wife to cut off the toe. She performed the operation as delicately as she could with a butcher's cleaver, whereupon Mr. H. returned to school greatly for several days. At length blood poisoning set in, and today the poor man is swelling, where mortal woe is no more.

Official calculations made in Russia and transmitted to the State Department of the United States Consul-General at St. Petersburg show that the present year's harvest of cereals in the whole world is much smaller than last year's, and compared with 1894 the decrease is in wheat 150,467,000 bushels, and rye 128,521,000 bushels. Other grains turned out better. In Russia the harvest was short 52,717,728 bushels of wheat and 8,245,428 bushels of rye. The financial report, therefore, commends the policy adopted by Russia of holding back their grain to obtain better prices later on.
