Michigan Happenings

ITEMS OF INTEREST FROM MANY STATES

Societies. MANCHESTER LODGE NO. 1047, F. & A. M. ... MERIDIAN CHAPTER NO. 44, O. E. S. ... DONOR COUNCIL NO. 10, F. & A. M. ...

Business Cards. A. F. & M. FREEMAN, ATTORNEYS ... A. J. WATERS, ATTORNEY ... B. A. TRACY, PHYSICIAN AND SURGEON ...

Established the Fined Severity. Friday night Mrs. E. P. Fulmer, the wife of a farmer living some three miles north of Manclona, had her suspicions aroused by the actions of her eleven-year-old daughter and, upon careful inquiry from the child, the latter alleged she had been assaulted by Herman Frickey, the hired man, on the evening of May 30, during the absence of the family, and that the latter, after a son about 10 years of age, was present and witnessed the act, had been kept quiet during all these months by Frickey's threats to kill them if they revealed his crime.

Fire gutted Chubb's city hall. Wednesday morning, leaving nothing but the bar walls standing. The building was erected in 1887 at a cost of \$35,000, and the upper portion was used for an opera house. The origin of the fire is attributed to electric wires, and the upper portion is being dismantled for some time before entering its way to an air vent. The insurance on the building and furnishings amounts to \$27,000. It is thought the old walls will be rebuilt on.

Relief Tax Commission. It was announced Tuesday at a meeting of the special committee that Wayne county supervisors are seriously considering the advisability of automatically refusing to spread the tax commission's findings upon the township assessment rolls, thus forcing the commission to take the whole matter into court in a suit to compel the altering of the local laws. This phase of the matter is now receiving the consideration of the prosecuting attorney.

Scraping Pools of Elmsville. was shot with a rifle in the hands of Pat Connor. There was a social at Connor's home Saturday night, and about 10 o'clock the men were joking, when Connor took down a 22-caliber rifle and pointed it at Vikna, not thinking it was loaded. The ball entered the corner of Vikna's eye and lodged in the bone near the surface. He is expected to recover.

Clinton farmer. After losing many chickens, an owl came to catch the thief. They shot a horned owl which measured five feet six inches from tip to tip, the largest ever seen in that section.

Michigan's hay crop averages 1,727,417 tons on 1,750,228 acres, the annual average in 1932. An Ecumene wood-pulp company expects to get out 27,000,000 feet of hardwood this season.

Michigan's hay crop averages 1,727,417 tons on 1,750,228 acres, the annual average in 1932. An Ecumene wood-pulp company expects to get out 27,000,000 feet of hardwood this season.

Important News Gathered from Abroad for the Benefit of Our Readers. Dowle in New York. "Elijah" Dowle's entrance to New York at the head of his 4,000 crusaders of the "Restoration Host" was not as peaceful as he might have wished.

Compass Warning. A warning to capital-against cutting wages, if financial depression comes by President Roosevelt's American Federation of Labor and the American Federation of Teachers.

Senator Hanna. As did a number of the other speakers, including those for capital and labor, advised conservation in all disputes between both sides, and predicted the element of national organizations. Future success in maintaining industrial peace, said Mr. Hanna, was a greater matter than the question of who is the next president.

Senator Platt's Wedding. Senator Thos. Clatter Platt stole a march on his friends and relatives in getting into the place for his marriage to Mrs. Lillian T. Janeway.

The Alaskan Boundary. The Alaskan boundary commission has an agreement whereby the American contentions are sustained, with the exception of those in relation to the Portland canal, which Canada will do.

Was Acquainted Just? Lieut. Gov. James B. Tillman, who has been on trial for shooting and killing Miss Mae C. Wood, the Washington clerk, had any intention of being against Senator Platt.

The Canadian Soo is in a fever of excitement and the American Soo is to a certain extent, affected by the news from Toronto that some of the plants at least of the Consolidated Lake Superior Co. are soon to be closed.

A great strike in the coal fields of the western states will be called, according to President Mitchell, of the United Mine Workers.

Nine men were killed as the result of the breaking of a traveler crane on the Pittsburgh end of the new Wabash bridge over the Monongahela river Monday morning, and many injured.

J. E. Lelmer, cashier of the First National bank, has been arrested and taken to Hartford, where he was charged with the murder of Mrs. L. B. Burch.

Russell Sage still clings to his old residence in the heart of the noise and dirt of New York's business district.

John Chase of the Colorado National Guard has been summoned before a military court in Denver, as perjury in the discharge of orders.

That the British race is deteriorating from a too liberal use of soap is the argument of a writer in the London Times who says he has never used soap himself in 30 years and has therefore avoided rheumatism, chills and colds.

The only condition on which the Colombia government is now prepared to conclude the pending treaty for the canal is the payment of \$25,000,000 by the United States and an agreement to let the territory remain as a part of Colombia.

The charges on which Brig. Gen. John Chase of the Colorado National Guard has been summoned before a military court in Denver, as perjury in the discharge of orders.

That the British race is deteriorating from a too liberal use of soap is the argument of a writer in the London Times who says he has never used soap himself in 30 years and has therefore avoided rheumatism, chills and colds.

Washington Letters Read.

For the first time since the commencement of the famous Adams-Baker breach of promise case on trial in Grand Rapids several letters written by the pretty plaintiff were read in court Saturday. The first dated October 6, 1901, and was mailed to the defendant while the latter was working in the northern part of Minnesota.

My Dear Stuart: You would not have kissed me tonight for you had been standing on the sidewalk. You would have to take me up to the house in the windows. I am very leucous tonight. O. Stuart, darling, I cannot stand it much longer. I hope the lumber camp will break up soon, so that you can return to me. I am proud of my love for you. I wish you were near me. I would give anything to hold you close. There is nothing so good as to care for one like I do you. I love you so. You must feel it way off where you are. Here is a close kiss for you. Yours lovingly, HENRIETTA.

Mrs. Adams on the stand testified that there was nothing indelicate in her position. Her position was close. In explanation of what she meant by certain parts of her letter that are omitted, she gave a reason that need not be elaborated upon.

The letters of the defendant read were of such a character that they cannot be printed. During the reading of them Miss Adams wept. Her brother who sat beside her looked angrily at the defendant and it seemed that he was exercising the greatest control over himself to prevent himself from doing something rash.

The Blockade at the Plains. The steamer John N. Glidden, sunk in St. Clair Plains canal by the barge Magna, of the steel trust fleet, will be a total loss and may be blown up by the government as an obstruction to navigation. The work started by the Magna Friday morning, when she crashed through the bow of the boat and carried away everything back almost to the pilot house and the feet down from the main deck was completed by six other boats which struck the wreck in passing and practically broke her to pieces.

Two negro women inmates died from fright as the result of a fire in Grand Rapids hospital. Senator R. A. Alger and Cornelius H. Bliss, ex-secretary of the interior, have left Prescott, Ariz., for Los Angeles.

AMERICAN IN DEPT. Week Ending October 22. Detroit-Cattle-Choice steers, 14 1/2 to 16 1/2; good to choice, 14 1/2 to 15 1/2; light to good, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

Chicago-Cattle-Good to prime steers, 14 1/2 to 15 1/2; poor to medium, 14 1/2 to 15 1/2; stockers and feeders, 14 1/2 to 15 1/2; calves, 14 1/2 to 15 1/2; hogs, 14 1/2 to 15 1/2; sheep, 14 1/2 to 15 1/2.

A man does not get married to his wife. He gets married to her.

The lowest feeding stations are the most effective stations—Mexico.

Every time we hear about the war, we make the mistake that the Secretary is not the war.

It is not the war that is the war. It is the war that is the war.

It is not the war that is the war. It is the war that is the war.

A wagon of two Mr. Pittman, now a man of two Mr. Pittman.

Young Chamberlain's muscle evictly chooses his chief point of resemblance to his strenuous sister.

A hard fate confronts Court Tolson. The Russian government has decreed that he shall stay at Yassanopolis.

Notwithstanding the football field marked off like a checkerboard, the season is a most successful one.

The arbitration tribunal has decided that Venezuela must pay Germany \$112,500, but carelessly neglects to explain how.

And now Canada may vote \$125,000 to aid of any other country.

Chicago is only a hundred years old, and it must make Editor Stead shoulder to think what she will be at a hundred.

The Eastern ladies insist on getting married. They must give up the idea of holding the girl championship for that reason.

The prison missionary did counsel to get out of the prison.

The really honest and honorable man is really honest and honorable.

A Jersey City electrician accuses of being a second-class marriage.

At a New York wedding the day ago a boy said to the bride's well-wishers.

That defensive one Thomas Curtis by her should have got even with the monster by quoting, Marie Curie to him.

It is not enough that bowmen know how to shoot. They must know how to aim.

The method adopted by a nurse in Texas to strike the child was a—stuffed in mouth, ears and nose full of mud—may be effective, but it is not true commendation.

If women had more sense of humor, they could get along more in life by promising to obey, and then watching the efforts of their husbands to keep the goods.

With thirty-nine million carrying of American dollars and English titles, the pretensions of the new men of men of millions the English invasion of America seems to be on its edge.

A New York chauffeur charged with driving his marquis at a high rate of speed, successfully pleaded in extenuation that he was on his way to call on a doctor.

The discovery of a letter from a service at New Haven, at which he was to be married, recalled the clergyman to his senses.

Don't be afraid to enter and settle upon the "Chippewa" Indian lands. The money in the mine and marketing of bullion. About \$25,000 of the 733-27 acre mine.

A New York society leader is quoted as saying that it is dangerous, and people are not to be trusted.

At a meeting of women over in Germany, the speaker said that she was a woman.

There is a widespread belief that Sir Thomas Lipton ought to be appointed British ambassador to the United States. But why not let a young man do it?

WITH THE WILHELM'S

My Lady. This was the fact that discouraged the Confederates. It is the fact that is uppermost in the minds of the living veterans of Chickamauga today.

There were hundreds of them. There were hundreds of a mysterious character on both sides. But when you ask an old soldier who fought under Thomas or Palmer or Turner at Chickamauga, you will say: "We were whipped."—he answers you know.

Monument to Wilder's Brigade. The most important factor in the history of the battle of Chickamauga was the mounted infantry, which was one of the most important factors in the history of the battle.

Chickamauga Forty Years Ago. Forty years ago a young man made the name Chickamauga famous in the character and number of troops engaged in the battle.

Young People

A COMFORTABLE HOME

BRICK STRUCTURE CAN BE BUILT AT SMALL COST.

Two-Story Habitation Large Enough for the Average Family Constructed at an Outlay Not to Exceed One Thousand Dollars.

H. K. Please publish the plans of a brick dwelling that would not cost less than \$1000, nor more than \$1000. We can furnish the rafters, sheathing and joists without buying them. The brick will cost us from \$11 to \$12 per

Front Elevation.

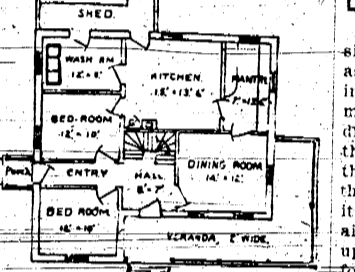

thousand for outside work, and from \$8 to \$9 for the inside. We would like a kitchen, dining room, one or two bedrooms, pantry and wash room on the ground floor. I prefer a two-story house with the chimney in the center. I would also like one or two small verandas.

Answer.—The accompanying plans and elevation are for a brick house. The height of the ceiling on the ground floor is 9 feet, and on the first floor 8 feet 6 inches. The arrangement of the rooms on the ground and first floor are as follows:

Ground floor.—Contains hall, dining room, pantry, kitchen, washroom and two bedrooms.

The hall is large enough to allow hat rack and other necessary articles without in any way crowding the staircase plan finished.

The dining room is well lighted and is entered from the hall, and by the

Ground Floor Plan.

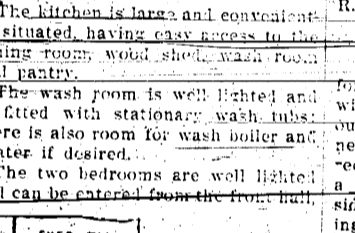

pantry through a double swing door. It does not open direct to the kitchen, but through the pantry, thus avoiding the odor of the cooking in the dining room.

The pantry is large and provided with plenty of shelves and is well lighted.

The kitchen is large and convenient, situated having easy access to the dining room, wash room, and pantry.

The wash room is well lighted and is fitted with stationary wash tubs. There is also room for wash boiler and heater if desired.

The two bedrooms are well lighted and can be entered from the front hall.

The Upper Story.

the front one can be used as a sitting room if desired.

The stairs we have a large hall centrally situated, and from it are four bedrooms, a sewing room and bath room. The bedrooms are all provided with closets and are nice size, two of them being double rooms. The interior finish of the house can be made to suit the builder. We would suggest burp being used in the halls, three feet high with a suitable molding. It would add very much to the appearance and would not add much to the cost of the house.

The outside appearance can be left plain or can be added to either when building or later, according to desire of the owner.

Whitewashing a Poultry House.

Whitewash needs to be well made to do its work effectively; too often it comes off in flakes, once the house is dry, if the woodwork is touched. Finely slacked lime should be dissolved in hot water, making the lime as thick as possible; add a little soft soap and some paraffin, and we get a whitewash that will kill the lice and stick to the woodwork. It should be applied hot, the walls of the poultry house being first swept down to clean them of cobwebs and dirt, and the perches and nest boxes removed. Dabbing the walls with a thin mixture of lime and water does little or no good. The perches and nest boxes should also be treated to a coat of whitewash; the work should be done in the morning, so that by nightfall the house and perches and nest boxes are dry again.

Laying Tile.

When the bottom of the drain has been brought to the proper grade and shape, the tile should be laid very carefully to secure perfectly close joints. With the aid of a trowel they may be placed rapidly and accurately without getting into the ditch. Some prefer to place the tile with the hand, standing in the ditch, and stepping carefully on each tile as laid. In covering it is preferable to put the surface soil next the tiles, for if properly packed, it will prevent the subsoil from getting in at the joints. The laying should begin at the outlet of the main drain, and where connection is made with branch lines, enough of the branch should be laid to permit the main to be partly filled in.

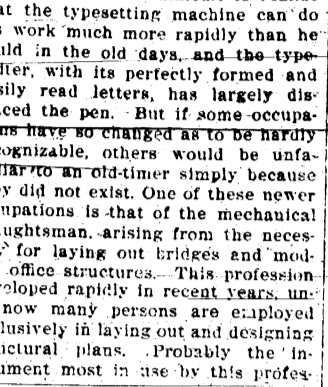

A dog's bark may be worse than his bite, but give us the bark, please.

NOTES ON SCIENCE

Device for Draughtsman.

While some classes of occupation have undergone little change in many years, and would be familiar to one who lived fifty or a hundred years ago, other occupations have so changed as to be scarcely recognizable. Thus an old printer finds it difficult to realize that the typesetting machine can do his work much more rapidly than he could in the old days, and the typewriter, with its perfectly formed and easily read letters, has largely displaced the pen. But if some occupations have so changed as to be hardly recognizable, others would be unfamiliar to an old-timer simply because they did not exist. One of these newer occupations is that of the mechanical draughtsman, arising from the necessity for laying out bridges and modern office structures. This profession developed rapidly in recent years, until now many persons are employed exclusively in laying out and designing structural plans. Probably the instrument most in use by this profession is the draughting pen. This tool, as is well known, cannot be dipped in the inkwell like a writing pen, but must be inked from the interior by dropping the marking fluid between the points. To facilitate this work the pen inking device illustrated in the picture has been designed, making it possible to fill the pen without the aid of some other implement to take up the ink and insert it in position for use. With this invention the pen is held with its central aperture beneath the discharge spout, and a slight pressure on the plunger with the other hand forces a drop or two of the ink to fall between the points. The spout, it may be noted, leads its way back to the reservoir through the small inlet beneath the discharge spout.

—Harford W. H. Powell of Newport, R. I., is the inventor.

Inks the Pen Automatically.

Attachment for Bicycles.

This invention has been designed for attachment to any bicycle and will carry considerable weight without adding materially to the power necessary to propel the vehicle. It requires only a light steel frame, with a third bicycle wheel to support one side of the carrier, the other side resting on the frame near where the latter is clamped to the bicycle. There is, of course, sufficient space between the bicycle and the box of the carrier to permit free motion of the foot, and the position of the clamps which attach the auxiliary frame is such that the bicycle is steered and balanced practically the same as though the carrier were not in position. As the tightening of a few screws is all that is required to attach the carrier, the invention practically does not interfere with the use of the bicycle for ordinary purposes.

William Mosley of Washington, Ill., is the patentee.

Box for Packages.

Radiators and Insulators.

A new electrical radiator, intended to supersede the steam heater, is formed by enameled iron plates, the space between being filled with powdered carbon, kept in position by asbestos cardboard. Into this radiator are laid three copper strips, one at each end and one in the center, and a continuous current of electricity is passed from the center to the end strips. With a current of eight amperes, at 200 volts, a heating surface of twenty-five square feet can be kept at a temperature of 150 degrees Fahrenheit.

The new material of Jorgen G. Maardt, an engineer of Copenhagen, is not only effective as a heat and electric insulator, but has the advantage of being incombustible and insoluble in hot or cold water or steam. The material is made from cork dust or cork waste, peat dust or small peat, or other like substance, which is saturated with waterglass. The resulting mass is poured into molds, and is afterward boiled in a solution of some chloride, like chloride of calcium or chloride of magnesium. This treatment gives hardness. The mass is then washed to remove any chloride of sodium that may have formed in boiling.

Benefit of Sunshine.

An important meteorological factor, affecting the public health for good or ill, is the amount of sunshine. Fresh air and sunshine are nature's most potent disinfectors and disease germ killers. Especially are the direct rays of the sun deadly to the microscopic forms of vegetable life.

Tattooing by Electricity.

Tattooing is now done by a needle driven by electricity.

Special Fall Dress Goods

IN ALL COLORS AND PRICES.

Zibeline Cloth per yd. 50c, \$1.00
Cheviots 75c, 1.25

Fancy mixed Suitings 50c to 1.00 per yard.
Broadcloths, Venetians, Snow Flake goods, Henriettas, etc., from 50c to \$1.50 per yard.

LACE CURTAINS

Our Douglas Shoes for Men and the Strootman line for Ladies have all arrived now.

Roller & Breitenwischer.

Don't be led astray by the reports of irresponsible strangers.

We have just received 200 Bundles of Bale ties. Enough to bale 1000 tons of Hay. This looks as if we were still in the Hay business. Hay will soon be ready to bale and we will be ready to buy all grades of Hay at the highest market prices. Parties having stack Hay will leave their addresses at our office so our buyers can see it as early as possible.

—Harford W. H. Powell of Newport, R. I., is the inventor.

TUBULAR DRIVE WELLS

A Pure, Permanent Well is what everyone should have. They are cheap in the end and prevent sickness.

put down by me are the very best obtainable. They go down to a pure and plentiful supply of water, are free from sewerage and surface water, and they last for generations. I get

WATER OR NO PAY.

That is certainly a fair plan. Let me put down one for you. That old well may be the cause of much sickness in your family. Typhoid Fever generally comes from bad drinking water. You cannot afford to run the risk.

The Way That Wins.

Ascs are filled with the dreaming
Of verses the poets have sung.
Flooded with the anguish and sorrow
Tragic moods have wrung
From the loom of fanciful misting.
But the essence of all the wit,
The lesson of all the lessons
Is the lesson: Get up and git!

While searching the archives for knowledge
While after the rarest of lore,
While seeking the richest of jewels
In wisdom's radiant store,
Remember this as you rummage
For a word of the Sage's wit,
The best and rarest of lessons
Is: Get up, git up and git!

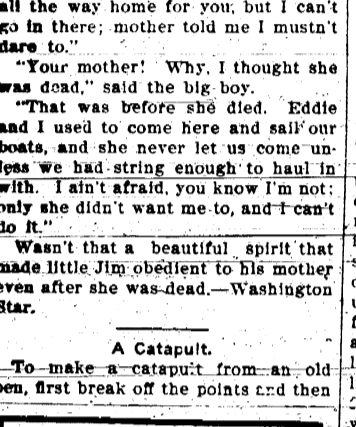

—New Orleans Times-Democrat.

The Obdient Boy.

James B. was out sailing a boat the other day with a playmate a good deal larger than he was. The boat had sailed a good way out in the pond, and the big boy said:
"Go in Jim, and get her. It isn't over your ankles, and I've been in after her every time."
"I daren't," said Jim. "I'll carry her all the way home for you, but I can't go in there; mother told me I mustn't dare to."
"Your mother! Why, I thought she was dead," said the big boy.
"That was before she died. Eddie and I used to come here and sail our boats, and she never let us come unless we had string enough to haul in with. I ain't afraid, you know I'm not; only she didn't want me to, and I can't do it."
"Wasn't that a beautiful spirit that made little Jim obedient to his mother even after she was dead.—Washington Star.

A Catapult.

To make a catapult from an old pen, first break off the points and then

stick it into a piece of wood. Use one of the points for a spring, as shown in the illustrations, and you will have a catapult that will throw peas or small wads of paper.

The Men.

This game can be played by any number of persons, who sit in a row. The leader, who is at the end, says to his neighbor, "I have a hen," and each in turn must repeat the words to his nearest neighbor. When they have reached the farther end of the line the player at that end asks of the one next him, "Has she feathers?" And when this question has traveled back to the leader, he returns the answer, "She has feathers." Then follow in like manner the questions and answers, "Can she walk?" "She can walk." "How does she walk?" "Wiggly-waggledy, wiggly-waggledy." As each player says this he imitates the walk of a chicken with his hands. "Can she crow?" "She can crow." "How does she crow?" (Each then imitates the crowing of a rooster.)

The object of this game is to keep from laughing, which is usually difficult. Any one who laughs or makes a mistake in repeating the questions and answers must pay a forfeit.

The Angry Tree.

Did you know that a tree can be angry? There is a kind of acacia in Nevada that not only is as "touchy" as the sensitive plant, but as a gardener put it, "goes very mad."

It is about eight feet tall and is a very rapid grower. When the sun sets it is ready to go to sleep and shuts its leaves together and calls the ends of its twigs just like a girl. If any one pulls that tall-well, the tree doesn't squeak but it ratters and moves up and down and seems to be deeply agitated. If it is ever disturbed by a shock, such as transplanting, the leaves stand out in all directions and quiver violently. Strangest of all, they send out a pungent, nauseating odor that is most unpleasant.

It takes this bad-tempered tree an hour or two to get back into good humor.

Tick With Egg and Glasses.

To remove an egg from one wine-glass to another without touching either the egg or the glasses: Place two wineglasses touching each other and in a direct line from you, and in the one nearest to you must be placed an egg with its smaller end downward. Then blow with the mouth suddenly and sharply and strongly against the side of the egg but in a downward direction and the egg will be lifted up and falling over into the other glass.

Well-Known Proverbs.

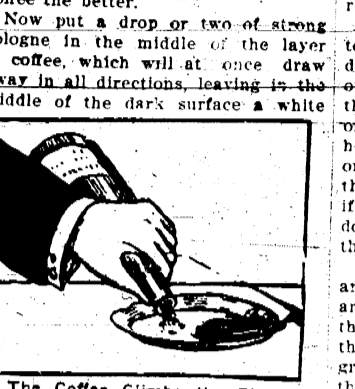

Answers to Last Week's Puzzles.

1—Bumpy vessels make the greatest sound.
2—Pride goes before a fall.

A Trick for the Breakfast Table.

Here is a little trick for the breakfast table which is warranted to surprise every one. Turn a saucer or plate upside down and pour upon the under side just enough coffee to cover it. The stronger and blacker the coffee the better.

Now put a drop or two of strong cologne in the middle of the layer of coffee, which will at once draw away in all directions, leaving in the middle of the dark surface a white

The Coffee Climbs the Plate.

spot of bare porcelain—for the coffee not only moves away, but drags the cologne away with it. I suggest coffee of this little trick, because it is dark colored and convenient. Ink will serve as well, and brandy or alcohol may be substituted for the cologne.

The explanation of this peculiar action is that every liquid has what is called "surface tension," which simply means that it behaves precisely as if its surface were an elastic skin, like sheet India rubber. But the amount of this tension varies in different liquids. It is greater for water than for alcohol, or a mixture of alcohol and water. So, dropping the alcohol liquid in the center of ink (which are like water in the strength of their surface tension) makes so to speak, a weak spot in the skin, which, being pulled in all directions, gives way or tears at that point. If you pour coffee on the right side of a little saucer and add a larger quantity of spirits than in the first experiment, you will see the coffee climbing up the edge of the saucer as if attempting to escape, and rolling back again in drops.

So, too, if a glass is partly filled with strong wine, the whole inside of the glass being wet with the liquid, and allowed to stand a little while, drops of liquid will be seen rolling down the side of the glass.

Talking With Flags.

The signal corps plays a very important part in modern warfare—so important that army and navy officers say they could not possibly do without it. In spite of the fact that great campaigns were carried on and great battles were fought before it was ever dreamed of.

There are several systems of signaling in use by the army and navy, the simplest of which is that commonly called "wigwagging," a term that was invented for it. Nearly everyone knows, perhaps, that the signaling is done by means of small flags, but a brief description of how the flags are handled to convey a message may not be amiss.

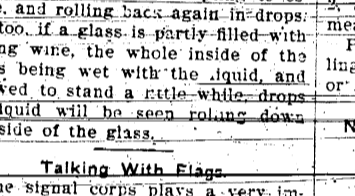

The system is an adaptation of the Morse dot and dash telegraph alphabet.

Names of Eight Kinds of Candy.

Notice the tusk, the trunk and the eyes.

Could an artist more truthfully depict the head and the open mouth of a dog than the accompanying picture shows? And yet see how simple and easily made the shadow is. Let us fancy that the dog is hungry, and has his mouth open for the bit of meat you are about to throw him.

But the next picture shows that the bit of meat was too large for him to swallow, and has lodged in his throat, for see the lump there! And there is

CLEVER SHADOWGRAPHS.

How the Shadowgraphs Are Made.

ed to produce results that will surprise those who look at them. Here are a few illustrations which speak for themselves so plainly that you may soon be able to make them all.

First, there is a swan. Both hands and one arm, you see, are required to make this shadow, but the picture is so perfect in detail that a few minutes' practice will enable you to get the exact pose.

And then we have the neck and head of an elephant, and even part of its body, made by placing one hand on top of the other, as shown in the picture, with a cloth thrown across and hanging from the upper arm, representing the fore part of the elephant's body. This shadow is particularly effective, the shape being almost true to life.
