THURSDAY, JAN. 3, 1907.

According to Sir Lauder-Brunton, writing in the Lancet, the average sength of life has rapidly become greater. "There has been a continincrease in the expectation of life from a little under 40 years 1854 to a trifle less than 48 years in the figures could be, of course, more significant still if we applied the com intangible, but certainly important ent, that should enter into all our attempts at formulating historical perspectives. However unconscious the average mediaeval man may have been of what his worth as an insur ance risk was at any particular time, his acts and thoughts must have been profoundly influenced by the fact that teenth centry, says New York Tost. The violeged of primitive Willitation may be due to the institute during the force and the difference of the state of the st he had on an average 15 years less to

of them to use his tools needed to till the land and to was captured and if he had not ticularly good piece of prepare the crops for consumption Eighteen families have been put in the houses, and are now cultivating

the soil and attempting to establish a center of British influence and the nucleus of g-large British settlement WHO FELL TO THE FLOOK If the enterprise proves successful the duke does not expect to net more than two per cent. interest on his in-vestment. But when the Orange River Colony is thickly settled the new district of Westminster-it is named after the duke-will yield turns to future dukes.

Dr. Morrison, the well-knewn correspondent of the London Times at in went to see the recent mane ers of the moderfized Chinese army in the neighborhood of Changtefu hem as a repetition of the performance of last year-a setpiece carefully prepared long before. hand by a number of Japanese advisers. The general opinion formed by, the military attaches was not, he says, unfavorable, though m work, without official jobbery will be needed before the troops can comnare with those of more advanced na tions .
