Investigate Forestry Conditions. Investigate Forestry Conditions.

Wesley Bradfield, first assistant.
United States forestry service, and
A. A. Winne, an expert in timber
and lumber, both from Washington.
have been in Lansing and procured
data that will enable them to investigate forestry conditions in Michiand forest fires. One of the documents from which they took copious notes was the report of the special forestry commission appointed by Gov. Warner, which report stirred up a zensation in connection with the state land office when it was published. The investigators from Washington left for the upper peninsula, planning to go over that field before snow flies and to work back through the lower peninsula.

ono Hill, 14, was shot and instant silled Saturday by his brother Sam tiel; 12, at Spur 454, on the Soo line while shooting at a squirrel. The but boys were after squirrels and birds on opposite sides of a clump of bushes and could not see agen after. Their parents are prostrated. Shariff Lipset made an investigation and decided that an inquest is not necessary, as the affair was purely accidental.

Losing his balance in attempting

SOUNDER

HOMAS A EDISON known as the "lather of invention in America," is

worth close to \$50,000,

of turning out thousands

is steering clear of the commer-

them which was previously at-shed to his inventions. He figures that he has already bee than his share of werldly ods and it is his aim to live from

early accumulations for the rest

his life. All his life he has been

evoting himself to the invention of money-making de-lices, which, when put upon the market, drew rato his

ath little or no sleep, on some problem which had been him for solution.

The country men of money declaration

the few puzzies which Edison failed to solve, whether they were of chemical, electrical or mechanical nature.

The puzzies which Edison failed to solve, whether they were of chemical, electrical or mechanical nature.

The puzzies which Edison failed to solve, whether they were they were they be the puzzies of the money they are the puzzies of the money they are the they are the they are they are they are the they are they are they are they are they are they are they

way so easily in the past few years that there are

his own amusement. No man in the world's history has

blved as many intricate puzzles in the realm of inven-tions as has Edison, and most of his achievements have been in the line of electricity; but despite his many mar-

rels with the mysterious currents, he has not the love for

that study that he has developed for chemistry. While

there was plenty of mysteriousness about electricity to draw the whole intellect of an inventor, Edison has taken far more interest in the study of chemistry, and, it is re-

corded, no chemist the world ever is quite as efficient m. Edison.

Chemistry was the first science to captivate the would derful intellect of this man, but he says himself that he has never had the chance to delve into its mysteries with the full power of the fertile mind he possesses.

And now he is taking advantage of the opportunity

Pacific coast with his family, and he announced on leaving New York that he would be there perhaps a mount of the west interested him to that extent. It is small contrivances which few persons know as his infamily know it. He has seen so much more of the wanderful accomplishments of mechanics chemistry and electricity that there are few problems which can prove of interest.

That the life of Thomas A. Edison has entered a new

NEW

epoch was evidenced by his recent visit on a fun-mak-ing four on Long Island, where he spent three days. Soon after that visit, however, the spell of delving into chemistry took possession of him and he repaired to his hisometry and was not seen for several days And now he is taking advantage of the opportunity which made itself by reason of his marvelous success in all lines of invention.

To the art of telegraphy Edison has given many inventions of a lad of his age, and having had a fairly good education of a lad of his age, and having had a fairly good education of the inventions of the greatest imaginable efficiency. The automatic repealer was an evolution of Edison's ideas automatic repealer was an evolution of Edison's ideas.

At the age of 12 years home ites were broken and which be had known since his birth among his friends. Then he departed for the Pacific coast, and Florida will see him early in 1909. Be started out to earn his living as a newsboy at the automatic repeater was an evolution of Edison's fixed the essentials of a started out to earn his living as a newsboy at the annual asso the quadruple telegraph, printing telegraph.

At the age of 12 years home ties were broken and also the quadruple telegraph in the soon after he left the hearth which he had known since his birth to take up a position as newsboy on the Grand Trunk retirement he would give up slaving days, nights. Sunder the establishment of the country of the telegraph companies of the country.

AGAINST AMBIDEXTERITY.

LYDIA E PINKHAM'S **VEGETABLE COMPOUND**

Mrs. Maggie Gilmer, of West.
Union, S. C., writes to Mrs. Pinkham:
"I was greatly ran-down in health,
from a weakness peculiar to my sex,
when Lydia E. Pinkham: a Vegetable
Compound was recommended to me. It
not only restored me to perfect health,
but to my delight I am a mother."

Mrs. Josephine Hall, of Bardstown,
Kv. writes:

Ky, writes:

"I was a very great nufferer from
Bemale troubles, and my physician failed
to help me. Lydia E. Phikham's Vegetable Compound not only restored me
to perfect health, but I am now a proud
mother."

FACTS FOR SICK WOMEN For thirty years Lydia R. Pink-ham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills. standard remedy for female life, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, flavoid tumors, irregularities, periodic pains, backache, that bearing down feeling, fistulency, indigention, dizziness or nervous prostration. Why don't you try it?

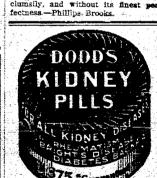

A Queer Harvest.

It was little Ethel's first visit to therch, and the sermon had for its text, "As ye sow, so shall ye resp."

But on her return home she could not remember it, and in consequence was chided by her mother for being stundiremember it, and in consequence was childed by her mother for being stupid.

A formicht learn A fortnight later a seamstress came to the house to do a day's work. After watching her for awhile fashion cid-style garments into those that were th evogue, Ethel suddenly exclaimed: "O mamma, I know now what the preacher said. It was: What you see

was appointed honorary chief consulting engineer of 320 Acres of Wheat

Sir James Crichton-Erowne, lecturing recently at Cambridge, said that in the present movement in England and Germany in favor of ambidexterity he fancied he detected the old taint of faddism. Ambidexterity on a large scale is impossible and undesirable, according to Sir James. It was by the superior need of his right hand that man gained the victory and to try to unde his dextral preeminence is simply to fly in the face of evolution. There has been no instance, said Sir James.

The development of the country has made may tribe, community or people that has grown out of it or broken away from it and found salvation in ambidexterity. A recently published book alleged that the Japanese were by law and practice ambidextrous, but he had the authority of the Japanese ambassador emphatically to deny this.

The grain crop or 1908 will net many tarmers \$20.00 to \$25.00 per acre. Grain-realing, including and dairying are the principal industria. Climate is excellent, excellent productions countries and developed and dairying are the principal industria. WHOLE NUMBER 2123.

GOTHAM BANKERS GUILTY W. MORSE AND A. H. CURTIS

ARYLAND'S EIGHT FLECTORS ARE BOLLT BETWEEN HIM AND BRYAN.

Morse, until a year ago a dominant ngure in the world of finance, and Alfred H. Curtis, former president of the National Blank of North America, were found guilty Thursday night in the criminal court branch of the United States circuit court on charges of missipplication of finds and faisifying the New York Nov. Towilliam Talt New York, Nov. 7.—William Talt will receive 221 votes in the electoral college that will choose the next president of the United States. William J. Bryan gets 162 votes.

This division of the electoral college is due to the splitting of Maryiand's vote. That state, wille giving Taft a plurality of 561, yet elects six Bryan electors and two Taft electors. The total vote cast in the state was: Taft, the great of Morse of Mor

electors and two Taft electors. The total vote cast in the state was: Taft, 115,471; Bryan, 115,910. These figures represent the electors receiving the most votes.

Missouri, which at first was believed to have returned to the Democratic fold at the presidential election, was found to have given Taft its 18 electoral votes by a plurality of 3,172 over Bryan. These returns are complete from all but three of the 114 counties, and include estimates based on partial returns from the missing counties.

Nine of the Middle Western States

electors and two Taft electors. The total vote figures figures figures from fine control when sentence was pronounced by Judge Hough was a most dramatic one. Mrs. Morse, who through all the trying day of the trial had preserved an unrulfed demeanor, collapsed in her seat found to have given traft its 18 electoral votes by a plurality of 3,172 over Bryan. These returns are complete span to sob convulsively. Stiff weep fing she was led away to an anteroom, when sentence was pronounced by Judge Hough was a most dramatic one. Mrs. Morse, who through all the trying day of the trial had preserved an unrulfed demeanor, collapsed in her seat found to the Countes, and include estimates based on partial returns from the missing counties.
