She betrayed him by cutting his hair, which was the source of his strength. Samson was blinded and taken to Gaza, where he died.

DISEASES OF ALFALFA AND THEIR TREATMENT

Red rot, although not so present, is likely to become the most destructive disease of alfalfa. It has long been known in Europe, where the death half the crop within one or two seasons has been recorded. It now rapidly spreading in the alfalfas in Kansas and will in the near future most probably demand the most serious attention of both the farmer and the experimental station, authorities.
