Facts About the Great Majestic Range

It is the best range in the world made of Malleable and Charcoal Iron.
It has beyond any question a doubt, the largest and best reservoir.
It uses about half the fuel used on other ranges, and does better work by far.
The Majestic All Copper Nickel Reservoir heats the water quicker and hotter than any other. It is the only reservoir with a removable frame.
The Charcoal Iron Body of the Great Majestic Range lasts three times as long as a steel body.
Being made of non-rustable material, there is practically no expense for repainting the Majestic.
As for baking, it is perfect: not only for a few months, but for all time to come.
A Great Majestic Range lasts three times as long as a cheap range, but cost three times as much.
