So many accidents had happened in the mines that a number of miners determined to join the local ambulance class.

"Suppose one of your mates should be badly frostbitten, how would you treat the case?" asked the examiner.

"Why, rub him with a man who's had a touch of sunstroke. That 'd bring 'em both around."

NEW ORDERS FROM PRUDDEN IN EFFECT

Grocery Stores Required to Close at Noon on Mondays During the Period of Ten Weeks.

Lansing, Jan. 25.—Fuel Administrator Prudden has issued a new fuel order which goes into effect today.

The order follows: "All wholesale and retail stores, office buildings and all places of amusement, not otherwise herein excepted, may be heated and lighted and opened to the public nine consecutive hours only, except Saturday, when the limit of time may be 12 hours.

"Section 1. Churches, time limit, nine hours each week. Time may be divided.

"For Red Cross or other war work, parish house or church or rooms can be heated separate and may be open a reasonable number of hours each week.

"Section 2. Theatres, vaudeville and moving picture shows close on Tuesday. On other days total hours not to exceed six consecutive hours. On Monday no restriction.

Restaurants and Cafes.

"Section 4. Restaurants and lunch rooms may open hours heretofore customary, but after expiration of nine hours selected in accordance with section 3, they shall serve or sell nothing but food.

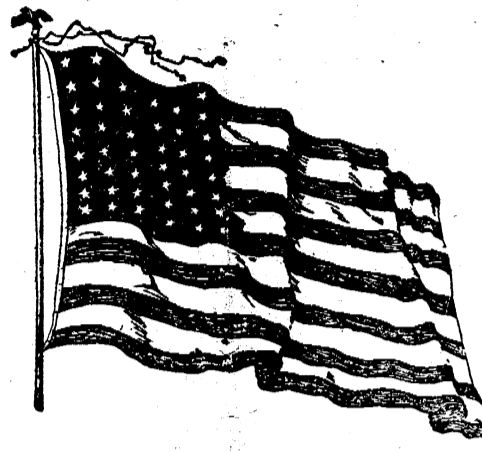

"Section 5. All hotels, restaurants and clubs may keep bars open nine consecutive hours, and shall not sell or serve liquor after 11 p. m.

"Section 6. Garages and electric storage stations may be operated as usual. Temperature in garage storage room not to exceed 40 degrees.

"Section 7. On Monday beginning Jan. 21, 1918, and continuing up to and including March 25, 1918, all business or professional offices, wholesale or retail stores and other stores, business houses or business buildings shall be closed for business except (a) offices used by the United States, state, county or municipal government, transportation companies, public utilities, telephone or telegraph companies, banks or trust companies, physicians and dentists,

BATTLE HYMN OF THE REPUBLIC

JULIA WARD HOWE.

Mine eyes have seen the glory of the coming of the Lord, He is treading out the vintage where the grapes of wrath are stored.

Glory, glory, hallelujah! Glory, glory, hallelujah! Glory, glory, hallelujah! His truth is marching on.

He has sounded forth his trumpet that shall never call retreat, He is sifting out the hearts of men before his judgement seat.

In the beauty of the lilies, Christ was born across the seas, With a glory in his bosom that shrouds our heads.

NEED BIG HERDS

Warring Nations Have Depleted Live Stock at Enormous Rate, Even Killing Dairy Cattle For Food.

American stock breeders are being asked to conserve their flocks and herds in order to meet Europe's tremendous demands for meats during the war and probably for many years afterward.

The United States food administration reports that American stock raisers have shown a disposition to co-operate with the government in increasing the nation's supply of live stock.

Germany today is probably better supplied with live stock than any other European nation. When the German armies made their big advance into France and then retreated virtually all the cattle in the invaded territory—approximately 1,500,000 head—were driven behind the German lines.

But in England—where 2,400,000 acres of pasture lands have been turned into grain fields—the cattle herds are decreasing rapidly. One of the reasons apparently is the declining maximum price scale adopted by the English as follows: For September, \$17.76 per 100 pounds; October, \$17.28; November and December, \$16.08; January, \$14.40.

In France the number of cattle as well as the quality have shown an enormous decline during the war. Where France had 14,807,000 head of cattle in 1913, she now has only 12,341,900, a decrease of 16.6 per cent.

And France is today producing only one gallon of milk compared to two and one-half gallons before the war. Denmark and Holland have been forced to sacrifice dairy herds for beef because of the lack of necessary feed.

BRITISH GOVERNMENT HELPS PAY FOR BREAD

There has been much misunderstanding about the bread program in England. It is true that the Englishman buys a loaf of bread for less than an American can, but it is poorer bread, and the British government is paying \$200,000,000 a year toward the cost of it.

All the grain grown in Great Britain is taken over by the government at an arbitrary price and the imported wheat purchased on the markets at the prevailing market price. This is turned over to the mills by the government at a price that allows the duterated war bread loaf of four pounds to sell at 18 cents, the two pound loaf at 9 cents and the one pound loaf at 5 cents.

In France, under conditions somewhat similar, but with a larger extraction, the four pound loaf sells for 16 cents.

Children Should Be Given a Place in All the Activities of the Home

By GEORGE E. FARRELL, Government Leader of Boys' and Girls' Club Work

We are striving to place the children of this generation on a better footing than ever before. We desire to make every child feel the importance of his position in his family.

The great difficulty with the American family lies in the fact that it does not recognize its sons as men early enough in their careers. To the average father and mother they are youngsters from the time they enter school until they complete their education and go to work.

That is why they seek to make their way outside of the home so often. They crave their place in the home and all the home activities, be it patriotic service or conversation. Parents who recognize maturity in their boys and girls when it begins to make its appearance will reap the reward so often missed.

Every boy should be given a plot of ground to work. If it is only ten feet square. If he is a boy of ability he will realize \$10 from it at least. From the 86,000 reports sent in to the government office at Washington last year by boys and girls more than \$1,000,000 was realized.

In the old days, when a boy had the chores to do on the farm and the girl had her charming and patchwork, children were "members of the firm." City life changes all that, and the sooner we get back to the good old farm notions the better it will be for the government.

THE SISTER

Was there ever a game we did not share, Brother of mine? Or a day when I did not play you fair, Brother of mine?

You are playing a game that is straight and true, Brother of mine, And I'd give my soul to stand next to you, Brother of mine.

If the last price must needs be paid, Brother of mine, You will go forward, unafraid, Brother of mine? Death can so small a part destroy, You will have known the fuller joy— Ah! would that I had been born a boy, Brother of mine!

Fearing the possibility of a fire during the severe weather of last week, members of the Chelsea fire department remained at the engine house all night, kept a span of horses harnessed ready for use, Saturday night. Fortunately they were not needed.

WHEATLESS BISCUITS.

Parched cornmeal is the feature of these excellent wheatless biscuits. First, the cornmeal—one-half a cup—is put in a shallow pan placed in the oven and stirred frequently until it is a delicate brown. The other ingredients are a teaspoon of salt, a cup of peanut butter and one and a half cups of water.

Save your dollars by investing in good American Thrift Stamps, at the post office.

The efficiency of the telephone system was proven here a few days ago when a call was booked for Cleveland, Ohio, and within seven minutes connection was received and the conversation begun. It was reported that the words came through as plain and loud as though on one of the local lines.

To "reach your objective" mass all the forces at your disposal. In the face of this scarcity of farm labor the most efficient ally you can have is a reliable, economical, powerful gasoline engine.

The "New-Way" ENGINE GOES AND GOES RIGHT

With it you can solve every power problem on your farm. Gasoline power can be made to do the work of human brawn and muscle or a team of horses. And, an engine is cheaper than either—it demands no pay and must be fed only when working.

WATER NUISANCE ELIMINATED

The "New-Way" is direct cooled, perfectly lubricated and free from the many complications and troubles usual with the common type of engines. It is handled by your local dealer whom you know personally. When you buy a "New-Way" you buy an engine you know is right and guaranteed for life. It is not like buying from a picture in a catalog and paying your money in advance. Buying from your dealer you see what you get. It is a better engine.

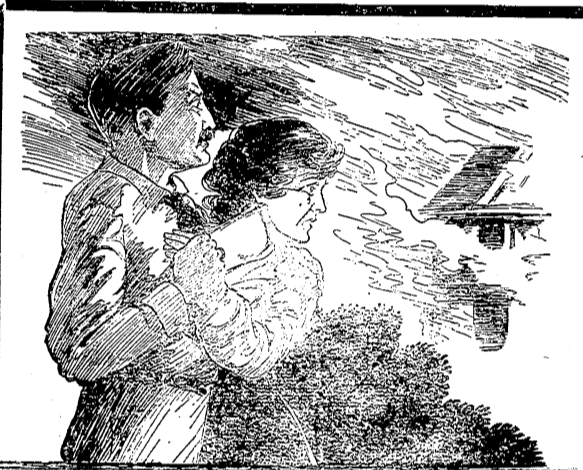

PRICES WILL BE HIGHER—BUY NOW

The Government needs in steel and iron must be met first. The resulting shortage in material is bound to force up the prices of engines. The time to buy is now. Go see your dealer tomorrow, or better TODAY..
