Better than a mustard plaster

"Those bilious headaches can be prevented"

Consequences of a Mountain

Dr. Peterson's Vegetable Compound

"Doctors have people told me, too, that Peterson's Compound has a globular action and they expect certain cases of headache and nervousness to be affected.

The mountain will make you sick in the stomach in a short time and have you feeling like you want to vomit. It will also make you feel as if you had a cold sweat, and then you will have a feeling of nausea and you will want to vomit.

CHAPTER 36

In Which That Happen at Maybrick Hall.

The Blackie came into the room in a hurried and almost panicky manner. It was evident that something had happened that was causing him great concern.

"What is it, Blackie? What has happened?" asked the others, gathered around him.

"It's the man who was found dead in the stable," replied the Blackie.

The room fell silent, and the others exchanged glances, their faces reflecting their concern.

"What happened to him? How did he die?" asked one of the others.

"I don't know," replied the Blackie. "I was just told that he was found dead in the stable. I didn't see anything, but I heard the commotion and came running here.

"Did you see anything on your way here? Did you hear anything unusual?" asked another.

"No," replied the Blackie. "I didn't see anything, but I heard the commotion and came running here."

The others exchanged glances again, their concern growing.

"We need to find out what happened," said one of the others. "We need to investigate and find out what caused his death."

"Agreed," replied another. "Let's get to work and find out what happened."
COLD\n
By millions ended\n
25 per cent of a nation's working force is estimated to have caught colds this year, in comparison with 25 per cent last year, in other national surveys made over the years.

Windsor Heights\n
True wisdom is to know what is going on, and to know that the best of all is always north wind.

CARE GIVING\n
IF MOTHERS ONLY KNEW\n
New study by Mayo Clinic says that 313,000 new mothers have a fatal flaw in their care of children in the first year. They do not know how to give proper care. The study was made by the American Red Cross, which found that 95 per cent of the mothers were not aware of the mistakes.

IF MOTHERS ONLY KNEW\n
If you take a newborn baby and put it in a hospital bed, give it a bottle of milk, and put it to sleep, you are doing all you can for it. But you are not doing all you can for yourself.

IF MOTHERS ONLY KNEW\n
The only way to make a good mother is to take a newborn baby and put it in a hospital bed, give it a bottle of milk, and put it to sleep.
