The Geneva Handbook

Under Supply of Tubers Culture Price

Drought... The very high price of potatoes is attributed to the Dutch municipalities of all regions for the poor de

in spring deliveries from southern regions.

Reports from sugar buyers in-

formed that stocks of potatoes now on hand probably are not much in ex-

cess of 15,000,000 barrels.

Compared with last year's ship-

ments from Europe, the current supply is very small. A large proportion of the new crop is now in storage for old potatoes, and it is expected that the price for new crop

will not be out of the annual potato crop last year was 200,000,000

barrels, and it is expected that the price for new crop will not be out of the

average of 30,000,000 barrels in 1892.

Help for Old Folks

Old Age Should Be Happy—Not a Time of Sickness and Suffering

Too many people begin to suffer in old age from cardiovascular disease and chronic pain and aches. Weak kidneys are usually the

cause of this and, if neglected, there is danger of kidney failure, damage to the heart, and brain damage. Help your

weakened kidneys with a balanced diet, including foods rich in minerals and proteins, and eliminating foods that are rich in

potassium. After using several doses of Deen's Pills, a pill of choice, I recommend Price Foods, also at all drugstores. Don't

forget to take your pills daily. Also, try to get regular exercise and avoid excessive stress. For more information, please

consult a doctor.

Early Strawberries, Later Strawberries, Good Strawberries

We do not grow strawberries in our garden, but we do grow blackberries. They are not hard to grow, and they are very delicious. We grow them in the same way we grow our blueberries. We plant them in the same soil, and we water them the same way. They do very well in our climate.

The First Garden of a New Home

When a new home is completed, the first task is to plant the garden. It is very important to make sure that the garden is large enough to accommodate all the plants that will be needed. It is also important to make sure that the garden is well-drained and that it is not too sunny or too shaded.

Arenical Sprays Used to Control Fruit Weevils

The wire of the common wireworm is a problem for many gardeners. It is a pest that can destroy vegetables and fruits. To control wireworms, we use a spray made of a mixture of water and a chemical called arenical. This spray is very effective in controlling wireworms.

Early Tomatoes and Their Diseases

Every family loves an early tomato. We should all plan to have a good supply of tomatoes in our gardens. To ensure that we have a good supply, we should plant a variety of different types of tomatoes.

Early Knowledge of the Apple Tree and the Plant

Culturally, people have been growing apples for thousands of years. The apple tree is believed to have originated in Asia, and it was introduced to Europe by the Romans. The apple tree was then introduced to North America by the early settlers.
