GOBLES, MICHIGAN, THURSDAY, MAY 13, 1926

NO. 34

## LOCAL BREVITIES

Watch for dates for Senior Play!  
Bake sale at Hudson's store Saturday.  
Base ball here today, Hopkins vs Gobles.  
Be on the lookout for Jimmy Yohnson's Yob.  
Mrs. Colby is visiting her sister, Mrs. Roy Wise.  
Freshman class bake sale Saturday at Hudson's store.  
Mrs. H. S. Sheldon is home after spending the winter in Lawton.  
See Peg, the Irish Cook, shake a wicked rolling pin in Senior play.  
Frank Powers and Gerald were home from Grand Rapids Sunday.  
A. M. Wilcox and family drove to Nouth Adams and return Sunday.  
Base ball here tomorrow afternoon. Bloomingdale vs Gobles, 3:30.  
Mrs. Emmett Thomas of Milwaukee is visiting Mrs. L. E. Churchill.  
See ten dashing Seniors in "Jimmy Yohnson's Yob." Watch for date.  
If you are interested in the home team, come out to the games today and tomorrow. We plan to win both games.  
Miss Marilynn is the new daughter of Mr. and Mrs. Orville Reigle, born Thursday, May 6, 1926. Congratulations.  
Masonic banquet at six standard time at Masonic Hall Saturday evening. Degree work to begin at 7:30 at the Oddfellows Hall.  
Mr. and Mrs. Ed. Mann are home from Chicago where they were called by the illness of Mrs. A. Mann. The latter is much improved.  
The Marriotts were home the first of the week after four successful weeks in Detroit in vaudeville. They are playing in Jackson for balance of this week.  
Mr. and Mrs. M. F. Cole, and Mr. and Mrs. Will Young of Ferndale and Roger Cole of Alma college were Sunday visitors at the home of Al Wauchek.  
Messrs Berkeley and Berkey of the Cassopolis Vigilant were callers at the News office last Friday morning. They were here to inspect a job at the Marble & Granite Works.  
A wire from Representative Kirby advises that arrangements have been made for an early completion of M 40 as far as Allegan. Bids will be asked for next week for entire unconstructed portions. Hurrah!  
Doom again—the locals lost to Bloomingdale there last Friday by the score of 19 to 5. Guess the only Gobles boys who failed to err were the ones who failed to get a chance. Too bad. Nice boys, too.  
Percy Petty had the misfortune to lose the ends of two fingers between two stones while setting a monument last Thursday. While the result is painful and quite a nuisance with the rush of business this month, yet it might be worse and Percy takes it very philosophicaly.

**Sixty-Three**  
A very pleasant surprise occurred Sunday at the home of Wm. Hofacker when a number of relatives gathered to help celebrate his 63rd birthday. Sweet peas were used as table decorations and a delicious dinner was served at 2 o'clock, a feature being the birthday cake made by a niece Mrs. Edgar Hanson.  
Those present were Mr. and Mrs. Will Hofacker and son Forde, Mr. and Mrs. M. G. Champion, Mr. and Mrs. V. E. Cairns and children of Kalamazoo, Mr. and Mrs. Edgar Hanson and Mrs. Millie Clemons, Otsego.

**Village Board of Review**  
The Village Board of Review for reviewing the assessment for 1926 will be in session one day only at Bruce & Lohrborg's market, in the Village of Gobles, on Tuesday, May 18, 1926, for the purpose above mentioned.  
Said board will be in session at the place designated and on the day above mentioned, from eight o'clock in the forenoon until five o'clock in the afternoon of said day. Any person who might be aggrieved by such assessment, or who are

entitled to exemption from taxes under the homestead law are urged to appear before said board on the date above mentioned and will be heard by said board as their interests appear.  
Otis Lohrborg,  
Village Assessor.  
Dated May 10, 1926.

**WAVERLY**  
Mrs. Emmet Johnson and son Burton of Kalamazoo have been visiting her mother, Mrs. A. B. Frisbie.  
Leonard Brown of Kalamazoo and Mary Stratton of Lawton spent Sunday in L. G. Brown's.  
Vernon Root and family of Kalamazoo spent Sunday at A. C. Blakeman's.  
Henry Cross of Detroit was calling on old friends in this neighborhood last Saturday.  
Harry Batt and mother entertained Luther Batt and family of Three Rivers and also relatives from Detroit, Sunday.  
Mr. and Mrs. Herbert Playford entertained their daughter and family of Kalamazoo Saturday night and Sunday.  
Ada Mae Frisbie is the happy possessor of a new Cable-Nelson piano.  
John White lost a good horse.  
Tracy Cross has traded his farm for one near Hopkins and moved.  
Mr. and Mrs. Robert Taylor entertained Glen Dornan and wife of Glenn and Luther Taylor and wife of Kalamazoo, Sunday.

**BELL SCHOOL**  
Mr. and Mrs. E. J. Fenton and children, Forest, John, Loyal and Helena, of Paw Paw, spent Sunday at the home of Lloyd Richardson.  
Claud Daniels had a sick horse a few days last week.  
Mr. and Mrs. Jake Ringle and daughter motored to Kalamazoo Thursday. While there Mrs. Ringle and Dorothy called on Mrs. Bills and report her in very poor health.  
Mrs. Richardson and two sons, John and Clifton, of Paw Paw, and Mr. and Mrs. Robert Hyames were Tuesday evening callers at Lloyd Richardson's.  
Mrs. Renfer and son of Bangor and Mrs. Smith and son of Bloomingdale were Sunday guests in the Walters' home.  
Mrs. Eugene Allen is spending a few days in Kalamazoo at the home of her daughter.  
Mr. and Mrs. Glenn Markillie spent Sunday with their mother in Gobles.  
Jake Ringle and family entertained Frank and Eva Peabody of Allegan, Ralph Jennings and wife of Paw Paw and Mrs. Gooch and three children of Bloomingdale Sunday.  
Mr. and Mrs. Mark Kesler ate Sunday dinner with their grand parents, Ike Coffinger and wife. In the afternoon upon invitation Gladys drove the new car and took the others for a joy ride, stopping at Otis Kessler's and Bert Coffinger's.  
Mr. and Mrs. Rolla Eastman took Sunday dinner with his mother. In the afternoon they called at George Johnson's, Lee Confer's and Otis Kessler's.  
Mr. and Mrs. Deyo Thayer and Mrs. Wilson were Sunday evening callers at Mark Kesler's.  
Mr. and Mrs. Thornton Walters were Kalamazoo visitors Sunday.  
Mrs. Ed. Carter spent the week end in Kalamazoo at the home of Mr. and Mrs. Ellis Wilkins.  
Aunt Mary Van Winkle has gone to Shelby, Mich., to visit her daughter. Mrs. Effie Thayer and Ralph Baxter accompanied her on the trip. They report she stood the trip fine.  
Mr. and Mrs. John Banker entertained his brother George and a niece, Mrs. Orlie B. Ray, and baby a few days last week.  
Mr. and Mrs. Glen Dormon of Glen, Mich., visited at the home of her sister and family, Mr. and Mrs. Lee Carter, over the week end.  
Mrs. Cora Bell Wilkins and friends, Mr. and Mrs. Al Fitchet of Kalamazoo, were Thursday afternoon callers at the Ed. Carter home.

**Chamber of Commerce Banquet**  
Truly one of the best entertainments this town has had in years was the one at the Chamber of Commerce meeting last Thursday evening.  
After the fine banquet and a short business session Pres Riley introduced Dr. Boys of Kalamazoo who showed a moving picture of scenes taken by himself while hunting with two others in the Canadian Rockies last summer.  
The pictures were both interesting and unique, the doctor's descriptions and interpretations interesting and instructive and all together made up an evening most enjoyable and enlightening.  
The scenes in general were of the wildest, seldom even visited by man, much less photographed, and to have them explained by the photographer himself as they appeared and appealed to him were very close to seeing the originals and much easier for few would attempt the trials and tribulations necessary to a visit to these regions.  
An effort will be made to have Dr. Boys with us again that more may enjoy the pictures and talk.  
We appreciate Dr. Boys' efforts in our behalf as well as the fact that we have a President whose influence could bring him here.

**Fortnightly Club**  
The Woman's Fortnightly club met at the home of Mrs. Wauchek May 6, 1926. Following the business meeting, the program for the day was given.  
Vocal duet, Mrs. Harrelson and Mrs. Styles.  
Talk on Club Work by Mrs. Swartz of Otsego.  
Vocal Duet, Mrs. Gilchrist and Mrs. Smith.  
Life of Robert Louis Stevenson, Mrs. E. Hudson.  
Solo, Mrs. Odell.  
A very interesting and instructive talk was given by Mrs. Swartz and we hope she may meet with us again some time.  
Last meeting of year May 20, 1926 to be held with Mrs. Miller. Pot luck. Dinner at 12 and election of officers in afternoon.

**WAGERTOWN**  
Grange Saturday evening. Everyone bring something for the grab bag.  
Ladies Aid will meet Wednesday afternoon, May 19 with Mrs. Nora Holderman.  
Emma Eastman spent the first of last week with her mother, Mrs. Ethel Eastman.  
Lewis Mertz returned to his work in Milwaukee Friday after spending a few weeks with his parents.  
Mrs. Pearl Skillman and Mrs. Blanch Hodgman spent the week end in Kalamazoo.  
Bernith and Lyle Minkler of Kalamazoo spent the week end with their grandmother, Mrs. Grauman.  
Robert Skillman spent Sunday with Charley Eastman.  
Mr. and Mrs. Rolla Eastman and family, Geo. Leach, Ethel and Bernith Eastman called Sunday at Geo. Johnson's near Plainwell.  
Mr. and Mrs. Albert Ayres of Chicago spent the week end with his parents, Mr. and Mrs. I. D. Ayres.  
Mr. and Mrs. Geo. Fritz, Mr. and Mrs. Dave Gilbert visited Sunday at L. Confer's.  
Frank Reed and family spent Sunday with his parents, Mr. and Mrs. Reed of Allegan.  
Ethel Eastman, Charley and Bernith Eastman spent Friday evening with Mrs. Grauman.  
Mr. and Mrs. Joe Holderman and Mr. Trux of Kalamazoo visited Saturday at Frank Reed's.  
Rila Carpenter of Grand Rapids called Sunday at Geo. Billington's.  
Frank Reed and family visited Sunday evening at Geo. Neal's.  
Mrs. Blanch Healy and children and Mrs. Bell called Sunday afternoon on Mrs. Dora Haven at Bloomingdale.  
Helen Beeman and son spent Thursday with her mother, Mrs. Verna Day at Gobles.  
Rolla Eastman and family took dinner Sunday at Geo. Leach's.  
The Sunday visitors at Arch Holmes were: Mr. and Mrs. Lester Rhoades, Willard Rhoades and friend of Benton Harbor and Mr. and Mrs. Harry Shryock and family. Afternoon callers were Mr. and Mrs. W. D. Holmes, Mr. and Mrs. Ralph Willis and Mr. and Mrs. Geo. Bishop.

**KENDALL**  
Mrs. McLain was a visitor in Kalamazoo last Monday.  
Mrs. Frances Kane invited Mrs. Frances Way to a chicken dinner one day last week.  
Leo Freeman and wife of Kalamazoo spent Mother's Day with his mother, Mrs. Celestia Lewis.  
Estus Leversee of So Bend came to spend Mother's Day with his parents at Brook Farm. He was calling on friends here Saturday.  
Mrs. Mabel K. Waber spent Thursday in Kalamazoo.  
Mrs. Aleda Champion returned to her home last week from a three weeks' visit with her sons Ralph at Mattawan and Claude of Lawton.  
Jake Wesler and family of Kalamazoo were week end guests at J. N. Waber's.  
Mrs. Wicket of Bloomingdale spent Monday with Mrs. Carrie Waite.  
Mr. and Mrs. Arzie Goodrich and children of Decatur spent Sunday with her parents, Mr. and Mrs. John Bowers.  
Mrs. Eetla Becker is helping care for her sister, who is ill in South Haven.  
Phil May is ill at his home with grippe.  
We had a near accident on our streets Tuesday afternoon. Some Kalamazoo boys on their way to play base ball in Bloomingdale ran into a large touring car. Some damage done to both autos but no one hurt.  
Ray Barringer and wife of Grand Rapids and Rex Graham and family of Kalamazoo spent Mother's Day at Elmer Barringer's.  
Mr. and Mrs. Fred Sweet spent Sunday with their son Glen and family near Oshkemo. Mrs. Carrie Sweet stayed with Mrs. Miller while they were away.  
Mrs. Harry Kellar's children all came home Sunday to spend the day with her.  
Mrs. Mabel K. Waber and mother went to Kalamazoo Saturday afternoon to spend Mother's Day with her son Henry and family out on Portage Road.  
Mr. and Mrs. D. V. Chamberlain had their children and grand children with them Sunday. There were sixteen in all present.  
Mrs. Aleda Champion's children and grand children came to see her Sunday. Mrs. Claude Champion and children could not come, being detained at home with measles.  
Mr. Mike Mahieu is building a large barn to replace the one burned two years ago.  
Some people from Lacota on their way to Battle Creek late Sunday afternoon overturned at the corner below the overhead bridge. The sedan was but slightly damaged and the passengers some bruised. The driver was going too fast to make corner. Other people passing helped lift the car and waited to see the tourists safely on their way.  
The Merson Ladies aid put on a pleasing entertainment at the M. E. church Wednesday evening. It was well attended and was appreciated by the audience. Especially did we enjoy the soprano soloist who rendered her parts very sweetly.

**The Methodist Church**  
There will be a clinic held in Gobles soon. Watch announcement.  
Next Sunday, May 16, is National Scout and Good Will Day. All the boys, their dads and the scout committee and all others are invited to the service at 10:30 a. m. Let us all boost for this great national organization.  
Church school 11:30. Evening hour 6 to 7—Anniversary Day. The hour will be followed by a social hour. yours,  
A. S. Williams.

**Patronize our advertisers.**

Wanted, Young man to work on farm near Kalamazoo, by the month Good wages, must be good milker. Write or phone George Deerpamer, Route 8, Kalamazoo, Michigan.

# The Home Garden

What is Home without a Garden?

## THE CARE OF TOOLS

Mislead trowels and weeders lead to considerable profanity during the garden season. A handy rack into which they can be stuck when not in use will save a lot of tools and temper. One look at the rack and the absence of a tool will be noted and the gardener can start retrieving.

Strong nails driven in pairs just far enough apart to catch the shank of trowels and weeders will serve the purpose excellently; but a notched shelf, the notches cut deep enough and just wide enough to hold the shank of the tools is better. On this shelf place the cans and bottles of insecticides and fungicides, and the garden paraphernalia is at hand and concentrated.

A small angled trowel, a small, round-bladed trowel, and the standard heavy trowel are all handy tools to have ready for the first digging. The collection of weeders now offers wide choice. All are excellent. The long-tined type is excellent for keeping the soil stirred and with it you can reach well into beds. The smaller, clawed cultivators are excellent for working at closer quarters among smaller plants.

The dibber is almost indispensable for making the holes to transplant and speeds up the work remarkably. It will also come into play in the fall for bulb planting. One stab of the dibber makes the hole for the little plant, another movement of the hand firms the soil around it and transplanting is made easy.

One of the novelties in garden accessories which has become popular during the last two years is the hand

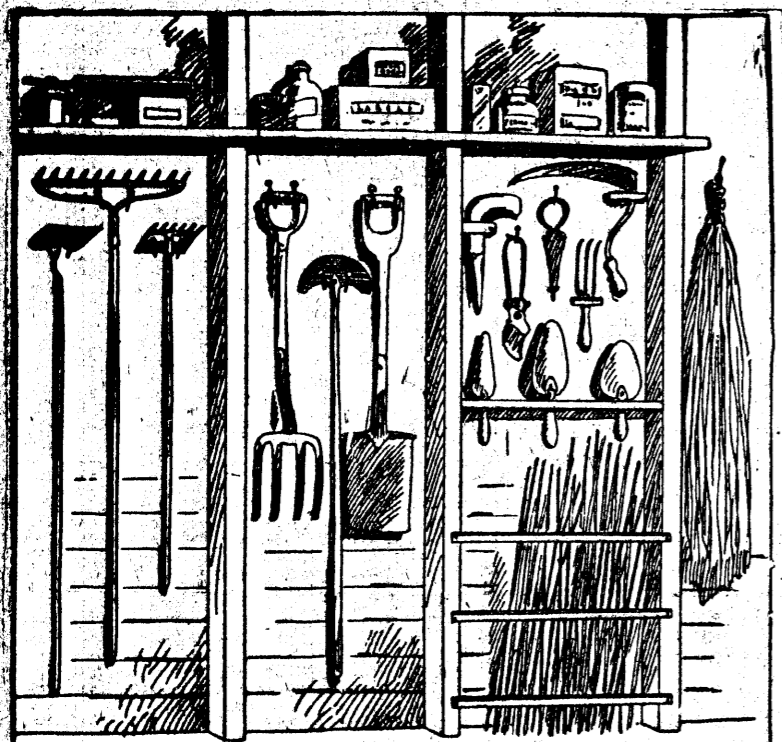

skill of their inventors has succeeded in breaking them of the habit of running up to seed as speedily as their old-time relatives. They give a bigger and better supply of leaves for early greens. These new types are known as King of Denmark, Antvorsk, Thick Leaved, and Savoy types. All are great improvements over the thinner, smaller leaved types

SCORZONERA OR BLACK OYSTER PLANT

that have been grown for years. White Portugal is now a popular onion to grow for young onions from

## HANDY RACKS FOR GARDEN HAND TOOLS

KEEP YOUR GARDEN TOOLS IN A HANDY RACK. IT IS ECONOMY.

seeder, a little apparatus into which the seed is poured which enables an easy distribution without the risk of spilling it all in one place that is always present when sowing directly from the packet.

With a hand tool rack on the back porch, in the garage or in the barn, the list of tools is easily kept under control. It is a garden economy.

## EARLY VEGETABLES

Every gardener in the land has his early seeds in hand or has ordered them or expects to buy them over the counter this month if he is a fore-handed gardener. In some of the more favored sections of the country seeds of the early vegetables are already in the ground and other sections are waiting for the first chance to put them in.

Radishes, spinach, lettuce, early peas, and onions are the staples of the early gardener and the first harvest of the home garden patch. The radish supply can be sowed at one time now instead of the usual repetitions with an extra early, early,

THICK LEAVED SPINACH.

mid season and late variety, to mature in succession. The same succession can be put in two weeks later and the work is done for the season.

Head lettuces should be sprouting in boxes or hotbeds by this time to be ready to transplant into permanent quarters as soon as it is safe to do so. Many gardeners refuse to bother with headless lettuce any longer and have taken to the fine new varieties of cos lettuce, which gives as high quality salad material with none of the bother which the head varieties need to be brought to a satisfactory decapitation.

The cos lettuces grow upright with long leaves which enclose the heart and are self-blanching. A little tying up will hasten the process.

The new slowed-up spinaches are a big advance over old types. The

seed, a fast developer, tender and mild flavored. It is also a popular sort for pickling onions.

## The Dormant Spray

University of Tennessee  
By J. L. BASKIN

From the term applied it would seem that the dormant spray might be applied any time while the tree is inactive, quiescent or dormant. In some instances this will hold, let under different circumstances we may make this application while the tree is dormant and yet fail to get the desired control. In applying the dormant spray to the peach orchard, be sure to finish before the buds begin to swell. The fungus causing leaf curl creeps between the loosened bud scales caused by the swelling and cannot be reached by the dormant spray. Those who have not applied this spray to their orchards should do so before February 15. Standard commercial lime sulphur diluted (1-7) one gallon concentrate to seven of water will give satisfactory results. If oil emulsion is used be sure and follow the manufacturer's instructions. Where oil emulsion is used in the peach orchard it will be necessary to make up a solution of (4-4-50) bordeaux mixture and then add the required amount of the oil stock solution to make a two or three per cent solution according to manufacturers' directions. In using oil emulsion in the apple orchard it is advisable to apply it as a delayed dormant spray. Applied as a delayed dormant, it will do much to control both the green and the rosy aphid and will control scale just as well as if applied earlier. Apply just as the leaf buds that enclose the flower cluster are unfolding and are about the size of squirrel ears. Be sure and finish in time to be ready for the pink bud spray, which is so important for scab control.

The question is often asked, "Shall I apply my spray before or after pruning?" This is apparently a very important question, but after several years' observation the writer is inclined to believe that it makes very little difference which comes first. In the peach orchard I would suggest spraying first, since the plowed ground is not so soft at this season as it is after the winter rain. If applied before pruning, you will very likely be through before the buds swell. Where a delayed dormant is being applied to the apple orchard, of course the pruning will come first. It is easier to do a good job of pruning during inclement weather than it is to do a good job of spraying in like weather. The dormant spray, like all other sprays, must be of the right materials and applied thoroughly to be effective.

## Rapid Growth of Fruit Auctions Noted

American fruit auctions now occupy an important place in the machinery of distribution. Approximately \$150,000,000 worth of farm products were sold in 1923 by these auctions, compared with less than \$50,000,000 in 1912. The auctions provide a rapid sales medium, and are used particularly by the large private and co-operative organizations which must keep their large volume of production moving in a continuous stream.

These facts are brought out by the United States Department of Agriculture, which has been making an extensive study of the fruit auctions. Twenty-four companies were engaged in the business in 14 leading distributing centers in 1923. The principle of auction selling, the department points out, is predicated upon the necessity of assembling in one place a sufficient proportion of the market supplies to attract a large body of the buying trade.

"Numerous changes have taken place in the auction business in recent years," the department says. "Reorganizations, consolidations, and the establishment of new companies have occurred in several cities. Most of the changes have resulted from the demands of the trade for impartiality in the services rendered and the charges imposed, and from their desire to participate in the profits earned by the auctions. The tendency is toward greater uniformity in methods and practices."

"Auctions in the receiving markets occupy a position in the channels of distribution between the shippers and the retailers. On the one hand the functions of the auction are identical with those of the carlot wholesaler or the commission merchant, while on the other the auction operates in much the same manner as the jobber and other less-than-carlot wholesalers."

"A great variety of commodities are sold at the auctions, but most of the supplies consist of citrus and deciduous fruits. The sales are open to the public, and anyone may buy. Charges and commission rates by the various companies lack uniformity, but in most cases are less than the cost of selling by private sale. Another factor appreciated by growers is that the companies customarily forward net returns to the shipper within 24 to 48 hours after the sale is made."

Detailed results of the department's study have been printed in Department Bulletin No. 1362, entitled "American Fruit and Produce Auctions," copies of which may be obtained upon request to the Department of Agriculture, Washington, D. C.

## Advice on Fruit Varieties

Horticulturists at the New York State Agricultural Experiment Station at Geneva stand ready to give expert advice on the selection of fruit varieties for planting next spring. Most of the varieties of hardy fruits offered for sale by American nurserymen and many sorts from foreign countries have been grown or are now being tested on the Station grounds, it is said; and from the results of these tests and with their knowledge of fruit growing in this and neighboring states, the Station specialists are able to predict with a fair degree of accuracy the behavior of almost any variety brought to their attention.

"During the coming weeks both professional and amateur growers will be making up orders for their spring plantings," says the Station horticulturist. "The Station fruit specialists will advise freely on the varieties best adapted to any given locality or will pass judgment on proposed plantings. Neither the large fruit grower nor the man with only a few trees or a small berry patch can afford to waste time and money by setting out varieties that are not adapted to their conditions. Through long-continued tests with every variety of fruit that will grow at Geneva, the Experiment Station has made it possible for the fruit grower to avoid disappointment or failure by planting varieties that will not thrive under New York conditions."

## Fresh Fruit Helps Teeth

Dentists now come to the front with authoritative statements that fresh fruits are the best desserts for the teeth and that they act as a dentifrice. Pastry and other sweets are well known to be not so good for the teeth.

Fresh fruits have a cleansing effect on the teeth, the dentists say, not only because of their cellulose fibers but also because the vegetable acids they contain stimulate a flow of saliva which keeps the mouth clean. Fruit juice in infancy is known to be a valuable adjunct to the proper development of the teeth and continued through childhood to furnish the sweets for which the youngsters crave instead of candy keeps up the work of keeping the teeth sound, and continued into adult life serves the excellent purpose of keeping them clean and sound.

## Apple and Juice Pressure

Select apples of tart flavor; pare quarter and core the fruit; weigh the prepared apples and allow three-fourths of a pound of sugar to each pound of fruit. Add water to the parings and cores, cover and let boil about half an hour, then drain the liquid over the apples; let cook until the apples are soft, then strain through a fine-meshed sieve; add sugar and let cook until thick and clear. The addition of two or three quinces to a half-peck of apples may be used to give changes in flavor and also texture. If scales for weighing are not at hand, measure the cooked pulp and allow three-fourths of a cup of sugar to a cup of pulp.

# Creating a Discriminating Demand for Fruit

THIS is a complicated and intricate in which we live. A fruit grower in Idaho plants an apple tree. A woman in New York City eats an apple grown on that tree. Many professions, sciences and lines of business are called into service to make it possible for the woman in New York to eat an apple grown in Idaho, and the grower of that apple must be interested in each and everyone of them if he is to continue growing apples.

And your interest in your fruit must continue, from the time you engage in the growing of any kind of fruit until that fruit is sold to the ultimate consumer and that ultimate consumer satisfied with both quality and price.

You are no different from the manufacturer who makes any article used in the American home. If his interest does not follow his goods out of his factory through the hands of the wholesaler, his jobber, the retail merchant, and the consumer—if he does not see to it that his goods satisfy the buying public both in quality and price—what happens? The buying public will buy something else.

So, if your interest does not continue until your fruit reaches the ultimate consumer with both quality and price to his liking, your consumer will buy something else. Then what happens? The same thing that happens to the manufacturer. There is a traffic jam through which it is useless to attempt to send any more goods to the market.

There are as many definitions of advertising business. Here is my definition: "Advertising is applied common sense." The longer I stay in the advertising business the more cautious I become. I regard advertising much as I regard a gun. In the hands of someone thoroughly familiar with its workings it can be made to hit the mark—but in the hands of an amateur it is more apt to kill the marksman. And I recommend as much common-sense caution in the handling of advertising as you would find in the handling of a gun you were dead sure was loaded.

Carelessly handled advertising has laid many a business low usually because too many people wanted the handling of the gun. This is especially true of association advertising. Suppose you have the gun—an advertising appropriation. What do you want to hit with it? At least 95 per cent of your product is bought by the women in the homes. Then it is pretty good common sense to aim the gun in that direction, isn't it?

Here is a word of warning. The moment you or any other association or business start out with your advertising gun you're going to be surrounded by a horde of people who want to shoot it off for you, or at least do the aiming—for a consideration of course. You will be told to aim in every possible direction—that no matter which way you aim you will hit your mark.

If you want to shoot something, aim at it. And if you wish to reach the ultimate consumer the woman in the home, direct your message at her instead of around Robin Hood barn. A straight line is the shortest distance between two points, and its usually the least expensive.

What does a woman want to know about the food she buys? First: Does it taste good? Will my family like it? Then, in succession but in no fixed order, come these questions: Is it good for the health? Is it expensive? Is it easily prepared? How can I prepare it? Or, summed up, "What will fruit do for me and for my family? If you would reach the buyer these questions must be answered to her satisfaction. The first question is easily answered, for nearly everyone like nearly every kind of fruit. But it never hurts to emphasize the pleasant fact, and it is well to constantly remind the buyer how really delicious the fruit is.

Is fruit good for the health? This is a question generally answered in the affirmative—but few women can give you very definite reasons why fruit is good for the health. On this point a great deal of splendid information can be given which will prove of tremendous interest, but always remember this is not the first question a woman asks.

There is too often an over-emphasis on the health value of a food to the exclusion of the appetite appeal. People rarely eat what is good for them. They eat what they like, and if it is good for them, fine! If not, well, it's fine for the doctor.

So much of the advertising today makes duty out of something that would otherwise be pleasant. From every newspaper, from every magazine, car card, and bill board we are shouted at to say this, eat that, don't do this, don't do that, until it has become not only monotonous but irritating.

Now comes a most important question—one that is sure to be asked by nearly every housewife: "Is it expensive?" When you consider the unnecessary difference that too often exists between the first selling price and the last buying price you will find one mighty big reason why the sales of fruit are not as heavy as they should be. The question of price control is intricate and difficult but by no means hopeless. In a carefully worked out advertising campaign much can be done to educate the buyer on the subject so that a great deal of profiteering can be done away with.

In all the fruit advertising that I have seen—I have yet to read a simple, instructive statement telling the woman how to buy fruit in bulk, and how to care for it after she buys it. Of course there are many small apartments where there are just small refrigerators where it would not be possible to store a box of apples or a half crate of oranges, but

how about the people with homes and larger apartments. All too often national advertising is written in large cities by people who have been born and raised in these cities who think only in terms of city buying and who forget that Main Street is longer than Fifth avenue. No advertiser who has nationwide distribution of his product should overlook Main Street and its tremendous possibilities.

Don't take it for granted that women know how to use your product. Maybe they do know one way or two ways, but there may be another dozen of ways in which your product may be used and it's your business to tell them about that other dozen. That means recipes.

Now there are two kinds of recipes—the kind that will sell your fruit and the kind that won't. The type of recipe that will sell your fruit is an advertising recipe and must have the following qualifications: It must be appetizing. It must be simple. It must be seasonable. It must be inexpensive. It must be easily prepared. It must be fool proof. And—it should use the maximum of fruit with the minimum of other ingredients.

Summed up, then, your task of educating the buyer is a comparatively simple one. Remember your buyer is the woman in the home. Talk to her in person. You do not need an interpreter or a go-between. Don't send your message to some other member of the family and expect it to be brought home. Sometimes it is—but why choose the indirect route which you can be sure of a direct route? Concentrate on the buyer. Educate her. But don't shout. Don't bully her into buying. Regard the buyer as you would your own wife and use discretion in delivering your message. It's wiser and more productive of good results.

Fruit publicity in any form that goes direct to the woman in the home is good business—but if recipes are used be certain that they measure up to the standard set for them. Get your message to the domestic science teachers—give them your recipes, but don't wait for the coming generation to grow up to use your product and don't expect the school girls to change the cooking habits of their families overnight. And don't try to change the buying habits of the nation overnight with a little advertising.

The age of miracles is past. Remember that fruit is only one kind of food and that every other kind of food competing with it. But also remember that the women of the nation are buying only about one-tenth as much fruit as they should—and as they will if you take time to educate them. Plan your advertising carefully. Make every dollar give an account of itself. But don't expect your dollar to raise a family overnight. You don't pick apples from your trees the day after you plant them.

# The Essentials of a Good Power Spray Rig

THE average automobile driver of today knows very little about the mechanism of his car. He usually knows how to start it, speed it up, stop it, and about the only other thing that interests him is whether or not he can depend on it to get him where he is going. Of course, there are those of the mechanical mind who know the minute details of just how the motor and gears operate. Drivers in this class are quick to sense the failure of parts to function that may cause rapid deterioration or low motive power.

Modern machinery, although designed and built by man is far more accurate than man himself and for this reason we find them more durable, accurate, economical and efficient than man power, because the human error has been eliminated. Notwithstanding all the concessions to modern machinery, it is essential that it be placed in the hands of someone who understands its principles of operation if we are to expect efficient and economical operation of a long period of time.

The orchardist of today who owns several spray machines knows far more about their mechanical devices than he does about the car he drives. Acquainting himself with these devices is not a matter of choice, rather it is a matter of necessity. If his car should break down he could readily find some other method of transportation; but if the sprayer breaks down and he has no knowledge of how to fix it, he will very likely lose a crop of fruit. Again, if the car breaks down a skilled mechanic can be secured from a nearby town who thoroughly understands the operation of the car and can put it into working order. However, this is not true with a spray machine as the average auto mechanic seems ill at ease in the presence of a spray machine.

machine in a cultivated peach orchard, situated on a rough hill side. Even though its capacity is great and is proportionate to the orchard, it would be far more economical to operate two lighter, more flexible machines of less capacity. Generally speaking, where growers operate only one machine, its capacity should be in direct proportion to the acreage under cultivation and the size of the trees. Nowadays labor is one of the most expensive items put into orchard operation, so consider well the amount of labor required to operate a given machine before making your final selection.

Spray owners are like automobile owners, they laud the virtues of their machines, because it is the only one they have ever owned and consequently the only one with which they are familiar. Spray machines are now pretty well standardized and there are many that will give excellent results IF PLACED IN THE HANDS OF COMPETENT OPERATORS. Very frequently the writer finds that orchardists have purchased machines that although dependable they are entirely unsuited to the orchardist's needs. In order that prospective purchasers and those contemplating replacement may have a basis on which to make their selections, the writer has made a rather exhaustive study of the essentials of a food spray machine.

The bosch high tension magneto seems to be the most dependable. The way of determining the power of the engine is by the size of the pistons, length of the stroke and revolutions per minute.

## The Pump

The number and size of the cylinders should be in proportion to the horse-power of the engine. The pump furnishes the high pressure to break the liquid into a mist which will cover every part of the tree. Its function is indispensable and its parts which are subject to wear should be made of durable material. All parts should be easily adjusted and cheaply replaced. There are three methods of connecting pumps with engines, namely: Direct gear-drive, Chain-drive, and Belt-drive. Each has its advantages and disadvantages. The direct gear drive is more compact and needs less adjustment, but is more expensive to repair in case the gears are stripped. The chain-drive is less compact, needs adjusting more frequently than does the direct gear but not so frequently as the belt drive. Some orchardists claim that belt driven machines slip when the belt expands, but manufacturers of belt driven pumps claim that this feature is overcome by belt adjusters which regulate tension. Some people like the belt drive, stating that it is more flexible and there is less danger of accident if the gears get hung.

In order to give the desired results the machine must first, be adapted to the particular needs of the grower. Its parts, especially those exposed to greatest wear, should be made of durable material. Its weight should be light. The engine and pump should work as a unit. Its mechanism should be simple, adjustments should be easily, quickly and cheaply replaced, all parts should be as compactly put together as is consistent with good service. Granting that my readers are commercial orchardists and assuming that they know the type and class of the machine they need, it will be my purpose to further explain the mechanisms of a modern spray machine.

It is generally conceded that compactness and unity of action between engine and pump with the least lost motion is desired. Compactness gives rigidity and this makes alignment easy and operation smooth, which is essential to consistent pressure. A pressure regulator which operates automatically when the nozzles are closed is essential to having a constant pressure on opening the nozzles. All valves should be readily accessible and easily adjusted without loss of time. The agitator should be fitted into the tank and so connected with the pump that its work shall be constant. There are two types of agitators, the Propeller and the Rotary, and both are successful.

## The Engine

The horse-power of the engine and the capacity of the pump should be in direct ratio. The piston should be made of very durable material in order that good compression, which is essential to high pressure, can be maintained. The engine being required to run continuously for twelve hours or more should be equipped with a good cooling system. The carburetor should be protected from water and other foreign matter. The engine should be rigidly attached to the frame work and in direct line with the pump. It should be easily removed and used for other farm duties, such as: baling hay, cutting corn, grinding feed and other farm activities requiring power. The ignition should be simple and dependable. Gasoline lifter to the carburetor is more dependable than gravity flow.

## The Tank

Much depends upon the tank. It should be made of light durable material well bound with steel hoops, which not only give rigidity but protection also. The agitator should be so located in the tank as to keep all material in suspension. When full it should have a low center of gravity. The pump should be connected from the bottom in order that all the power may be utilized in driving the liquid through the nozzles. It should be easily filled and easily drained. The truck acts as a foundation for all of the parts. It should therefore be strong, rigid and light in weight. It should be so adjusted as to never throw the pump and engine out of line even though it pass over rough ground. Lightness and the ability to turn in narrow rows is a distinctive advantage.

# State News Briefs

**Big Rapids**—A boulevard lighting system is to be installed on four blocks in the business section here. The poles and equipment will be furnished by the business men and the city commission has contracted with the Consumers Power Co. to furnish electric current required at \$1,800 per year.

**Ionia**—The Ionia county board of school examiners has relieved the local sparsity of eligible school teachers by granting 10 certificates to applicants who passed the examination.

**Fremont**—The chamber of commerce at a recent meeting raised \$525 as its share of Newaygo county's \$2,000 quota for the Michigan Tourist and Resort association.

**Paw Paw**—Co-operating with the local school the Paw Paw Savings bank is promoting a rose carnival. The bank is furnishing the bushes with the purpose of adding to the beauty of the community.

**Hastings**—A campaign to immunize all school children against diphtheria is being carried out here. The council voted \$400 to provide free toxin antitoxin treatments.

**Baldwin**—The village council has voted to submit the question of granting a franchise to the Home Electric Co. of Ludington at a special election May 15. Baldwin is now served by a small plant owned and operated by the Pere Marquette railroad. This soon will be discontinued. Granting of the franchise will open the way for unlimited power for small manufacturing.

**Watervliet**—After inspection of the Watervliet railroad yards and equipment John Bojardis of the engineering department of the Pere Marquette railroad reported favorably toward the erection of a new depot, brick platforms and driveways and increased trackage for the loading and unloading of cars.

**Sturgis**—Unsuccessful in obtaining a Browning machine gun by grant from the federal or state governments Newman-Wenzel Post, American Legion, has ordered one from the manufacturers. Delivery has been promised before Memorial day.

**Allagan**—A flag pole 50 feet in length will be erected in Oakwood cemetery by the patriotic organizations of the city. The city council will appropriate \$50 toward its purchase.

**Paw Paw**—The \$300,000 slander and blackmail charge brought by the House of David against Walter M. N.

Nelson, Detroit lawyer and several former members of the colony, has been transferred by Judge White from the Berrien county court to the VanBuren county court and will be heard before Judge Glenn Warner.

**Grand Haven**—The Ottawa county road commission recently received 5,000 seedling trees from the state for eventual planting along the state trunk lines in the county. These trees composed of spruces, maples and elms, were set out in the county nursery at Ferrysburg with 2,000 black walnuts and red oaks. The latter are nearly ready for replanting.

**St. Johns**—St. Johns chapter, No. 7, Izaak Walton league, is no more. The chapter has voted to withdraw from the national organization but will continue as the Clinton County Rod and Gun club, which will become affiliated with the Michigan Conservation league.

**Fremont**—Governor Groesbeck is expected as the guest of honor at a banquet in the Community building here the evening of May 20. The governor is scheduled to speak at the noonday luncheon at Muskegon that day and is to come here for the evening to deliver an address at the close of the banquet.

**Iron River**—Nine thousand acres of virgin hardwood timber lying on Keweenaw Point has been transferred to John Nelson, Detroit real estate dealer, and Wick O'Connell of L'Anse. The price was \$250,000.

**Holland**—The proposition to replace the Washington school with a new building at an approximate cost of \$130,000 was carried by a vote of 614 to 87.

**Greenville**—Mrs. L. Edward Thompson and Mrs. Wellington Clark, Greenville delegates to the Ionia convention of the Federation of Women's clubs, have obtained for this city the 1927 convention of the Michigan west central district.

**Ionia**—Warden Shean this week assigned 91 Michigan reformatory inmates to the various road construction camps, this number to be increased gradually during the coming weeks. The men are being sent to camps near Monroe, Ypsilanti and Cambridge Junction.

**Nashville**—Glen Bera, conservation officer, has planted 8,000 German brown trout fry in Buxton creek just west of Nashville.

**Charlevoix**—South Point, a beautiful tract of 90 acres jutting into Lake Michigan joining this city on the southwest, was sold recently to Charles Latimer of Muskegon. The price paid was approximately \$30,000.

**Central Lake**—The dates for the northern Michigan roundtable are May 21-22, to be held at Charlevoix. Superintendent W. Roger Zinn of the Central Lake schools, president of the body, announces Dr. William Henderson of Ann Arbor as one of a large list of speakers. The new East Jordan high school band will play for the association on Saturday morning.

## "I'm Going Amilking Sir," She Said

## Anti-Masonic Party Once Captured Voters of Michigan Territory

Lodges Closed, Grand Lodge Dissolved, and by Majority of 800, Pioneers of 1829 Showed Their Aversion to Secret Fraternities—First "Third Party" Soon Dissolved.

By JAMES L. SMITH

(Continued from last week) It was the aim of Seward and Weed and other leaders of the party excepting a few of the more fanatical middle of the road bunch, to utilize the Antimasonic movement in combination with the badly depleted National Republican party in forming a combination which would defeat Jackson in 1832. The fact that gradually the excitement over the William Morgan abduction faded gave these manipulators an opportunity. Henry Clay was the big obstacle. Clay refused to bend or subscribe to the Antimasonic creed, but his enthusiastic following in the states not infected with the new party demanded his nomination and felt confident that regardless of the Antimasonic attitude he could defeat Old Hickory. Clay's friends also detected the rapid falling off in Antimasonic fanaticism and enthusiasm and generally believed that when the test between Jackson and their favorite was made that most of the Antimasons would rejoin their old party, the new party having been largely recruited from the ranks of National Republicanism.

Calhoun was in high favor with the Antimasonic politicians, for a time, but his attitude on nullification put him out of the list of possibilities. Richard Rush was courted but declined. Judge John McLean of Ohio was also considered, and John Quincy Adams had some admirers. Finally Weed, Seward, and other practical politicians of the cult waited on William Wirt, who had been Attorney General of the United States for 12 years and induced him to accept, although he was a Mason and had never renounced the society. However, in his letter of acceptance he indicated that he could trim his sails to suit the wind. He did not denounce Masonry, saying that he had grieved over "wild and bitter attacks on so harmless an institution as Free Masonry," but admitted that he had changed his mind in some particulars and saw harm in the actions of over zealous members. He then indulged in a sort of apology for Antimasonry.

His associate on the ticket was Amos Ellmaker of Pennsylvania, and as both men were of German origin the Antimasonic politicians made earnest appeals to the "Pennsylvania Ditch" to stand by their racial representatives, but the appeal was generally unheeded.

The Pennsylvanians of German origin might vote for local Antimasons at times, but they were dyed-in-the-wool Democrats generally and they went to the polls in 1832 shouting for "Sheneral Shackson."

In New York an alliance was formed with the Clay people and in 1836 the alliance between the Clay National Republicans was closely cemented in the new Whig party. Because General William Henry Harrison had said "that Masonry was a moral and political evil" he was the candidate favored by the Antimasonic element that year.

In the Methodist, Baptist, and to some extent the Presbyterian churches Antimasonry received its most aggressive support. Many Episcopalian ministers were Masons and the movement received no support in that quarter. The Roman Catholics gave the party no encouragement, and it is curious that in this Antimasonic party the "nativism" movement which every now and then breaks out so violently was cultivated.

The Antimasons made wonderful use of the printing press. In 1832 there were 141 Antimasonic newspapers in existence. New York had 45 weeklies and one daily, while Pennsylvania had 55 weeklies.

Lecturers campaigned in every favorable community and the wildest kind of charges against Masonry and what was denominated its step-child, Odd Fellowship, were made. Some of the resolutions written by Stevens and others sound absurd now. However, it must be conceded that the intense air of mystery with which Masonry was then surrounded by its votaries gave an air of consistency to many of these wild charges. Men could easily be made to believe almost anything of a mysterious fraternity which so many professed to receive benefits from. Was it not easy to believe that this mystery, these advantages, the value of membership, was based upon favors granted at the expense of the rest of the population in the way of business favors, employment, political favors, privileges in courts and verdicts by courts and juries.

Probably, however, the passage of the order through this sea of fire in the end done much to make its merits known and overturn popular prejudices among the great mass of uninformed citizens.

Pat—O've traced my ancestry back to an Oirish king.

Mike—Sure that's aisy. What chanst has a dead man to defend himself?—Detroit Free Press.

## Hastings Factories On Fast Time, Rest Of City Stands Pat

Hastings.—Although adoption of eastern standard time during the summer months was turned down at the spring election Hastings factories are running on fast time.

The voters defeated the proposition by a majority of 23, but a poll of the employes in the various factories disclosed an overwhelming majority in favor of daylight saving time. In some of the plants the men voted 4 to 1 and 5 to 1 in favor of the new time.

Consequently industrial Hastings will operate on one time and the rest of the city, including the schools, on another. Considerable confusion is anticipated. Whether business houses and offices will adopt fast time is problematical.

"Harold says that all he wants is a chance to express himself."

"Fine! Where to?"—Judge.

## Michigan Filling C. M. T. C. Quota

Detroit.—Michigan soon will have filled its quota for the citizens military training camp, the officers in charge of recruiting for this year's training camps at Camp Custer and Fort Brady believe. The quota for the Fort Brady camp already is filled.

With the quota for the Fort Brady camp filled the county committeemen in all Michigan counties and the officers in charge of procuring students for the training camps are striving to fill the Camp Custer quota within the next three weeks. After the quota for Camp Custer is filled a waiting list of several hundred will be established as alternates.

Michigan as a whole has more than 50 per cent of its quota filled and in comparison to population this state is 200 per cent ahead of Illinois or Wisconsin, the other two states besides Michigan composing the Sixth corps area.

Col. Raymond Sheldon, who will be the commanding officer at Camp Custer this summer, says every effort is being made to give the students in training the best mess this year they ever have had.

## Trufant Indications Point To Active Resort Season

Arufant.—Preparations are under way for an active resort season here this year and many pieces of property are changing hands.

N. P. Rasmussen has sold to Detroit interests his Trufant lake frontage, Jens Larsen has been made a substantial offer on his grove on Long lake and John Buchanan has been offered \$22,500 for his property on Cowden lake.

The newly decorated and remodeled hotel will be opened Wednesday. Among other changes the resorts at Blue and Lincoln lakes are under new management.

## relieves poison ivy

Zonite is a specific in the treatment of poison ivy. Although this affliction is rarely serious in itself, it is most irritating and there is great danger of infection wherever the skin is broken. Zonite not only relieves the inflammation and irritation in a remarkably short time, but also keeps the skin in a safely disinfected condition. If at all susceptible to poison ivy, you shouldn't be without a bottle of Zonite. Your druggist has it in bottles—fifty cents and one dollar.

### Council Proceedings

Regular meeting May 4, 1926.  
Called by Pres. Fairfield, Aldermen Graham, Harrelson, Schowe, Lohrberg and Ryno present.  
Minutes of last meeting read and approved.  
Following bills read: Standard Oil, \$6.45; C. Lamphere, \$22.50; C. Day, \$6.65; Gobles News, \$3.60; Merrifield Store, \$21.83; Mich. Gas & Electric Co., \$57.75; Doubleday Bros., \$53.30; Casualty Ins., \$27.00. Graham yes, Harrelson yes, Schowe yes; Lohrberg yes, Ryno yes. Carried.  
Motion by Graham that the following budget be adopted for the coming year:

Gen. Fund 4 1-2 mills, bond and interest 3 1-2 mills, water 3 1 2 mills, street 2 mills, fire dept. 1-2 mill. Supported by Lohrberg, Graham yes, Harrelson yes, Schowe yes, Lohrberg yes, Ryno yes. Carried.

Motion by Harrelson that the clerk buy necessary books for keeping treasurer's and clerk's accounts. Supported by Schowe. Schowe yes, Harrelson yes, Graham yes, Lohrberg yes, Ryno yes. Carried.

Motion by Harrelson that the village send David Anderson check for \$25 for retaining fee for one year. Supported by Graham. Schowe yes, Harrelson yes, Graham yes, Lohrberg yes, Ryno yes. Carried.

President instructed clerk to write Frank Rogers, State Highway Commissioner at Lansing informing him that the village has raised necessary money for paving and find out what state is going to do.

Moved and supported to adjourn. Carried.

Special meeting called May 10 for purpose of electing Board of Review and take action on water ordinance. Ryno acting clerk pro tem.

Roll call. Members present Fairfield, Lohrberg, Otten, Schowe, Harrelson, Ryno. Graham absent.

Motion by Lohrberg, supported by Harrelson that P Petty and Ray VanVoorhees act as Board Review. Motion confirmed.

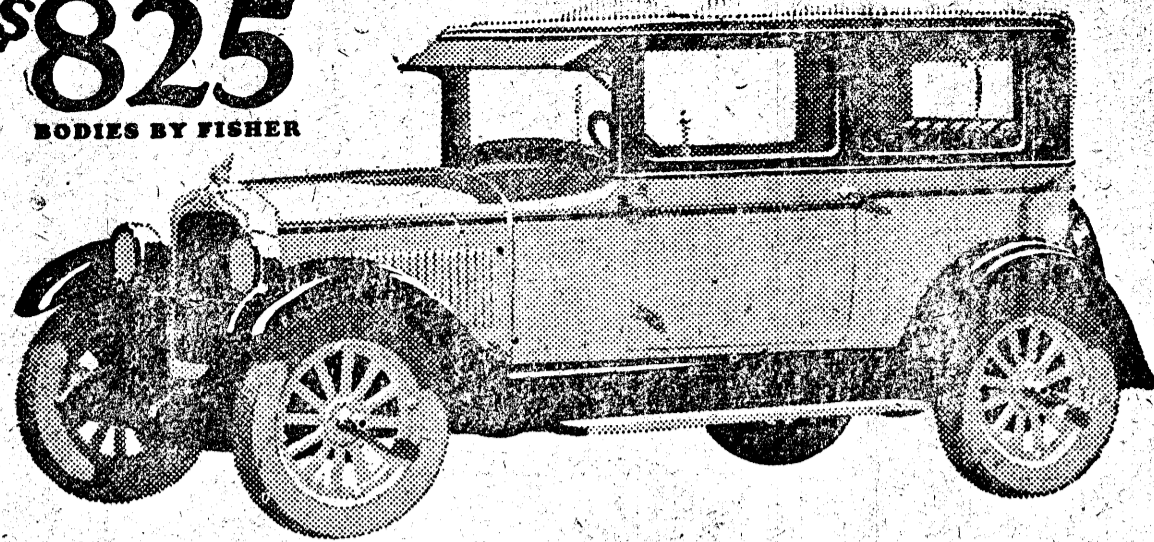

Motion by Lohrberg and supported by Harrelson that all former water ordinances be repealed and the following ordinance be adopted and in force 20 days from date

- (1) The village of Gobles ordains that all water used shall be metered.
- (2) That the minimum charge shall be \$3.75 for 6 months for 11000 gallons and 50c meter rent for 6 months.
- (3) Over the minimum 22 1.2c per 1000 gallons.
- (4) The Superintendent of Water Works to read meters from the 20th of May to 26th of May and November 20th to November 26th.
- (5) All water tax to be due the first of June and the first of December and if not paid by the 15th of June and the 15th of December the clerk shall notify the Superintendent of Water Works and he shall turn the water off. If turned off the patron to pay \$1.50 to turn on again. All water tax to be paid to clerk of village.
- (6) All taps to be made by the Superintendent of water works for which he shall charge \$15 to bring water to curb and keep record of all taps and their location.
- (7) This ordinance to go in effect June 1, 1926.

## Solves the Problem of "Six" versus "High-priced Four"

"Shall I buy a high-priced four and forego six-cylinder performance superiority; or is there a low priced six which is free from the penalties of ordinary appearance, ordinary comfort and ordinary stamina?"

For several years this question has been widely debated by motor car buyers. That it has been finally solved by the Pontiac Six is clearly revealed in the spectacular triumph of this new General Motors car in scoring the nation over.

General Motors devoted over three years to the development of a six that offered high quality at an unexpectedly low price. But every Pontiac Six owner will tell you that it was well worth waiting for—

—because from the very first time he took possession of the wheel he was convinced that he had made a sound investment, unequalled in the industry—a value that only General Motors could possibly achieve!

Oakland Six, Companion to Pontiac Six—\$1025 to \$1295. All prices at factory. Easy to pay on the General Motors Time Payment Plan.

E. A. MARCY, Gobles, Mich.  
Carroll Hendricks, Mgr.

CHIEF OF THE SIXES

### Notice of Hearing Claims

STATE OF MICHIGAN—The Probate Court for the County of Van Buren.  
In the matter of the estate of George J. Waber, deceased.

Notice is hereby given that four months from the 27th day of April, A. D. 1926, have been allowed for creditors to present their claims against said deceased to said court for examination and adjustment, and that all creditors of said deceased are required to present their claims to said court, at the probate office in the Village of Paw Paw in said county, on or before the 30th day of August, A. D. 1926, and that said claims will be heard by said court on Monday the 30th day of August, A. D. 1926, at ten o'clock in the forenoon.

Dated April 27th, A. D. 1926.

WM. KILLEFER,  
Judge of Probate.

Order for Publication  
STATE OF MICHIGAN—The Circuit Court for the County of Van Buren—In Chancery.

Paul N. Waber,  
Plaintiff  
vs  
Asa White and  
Ursula L. Harrison and  
their unknown heirs,  
devises, legatees,  
and assigns, and  
Harry VanAuken,  
Defendants

Suit pending in the above court on the 24th day of April, 1926.

In this cause it appearing from the bill of complaint and the affidavit of David Anderson filed therein that the defendant Harry VanAuken does not reside within the State of Michigan but resides in the City of Washington, D. C., and that the whereabouts of the defendants Asa White and Ursula L. Harrison, after diligent search and inquiry, cannot be ascertained; neither can it be determined whether they are dead or alive or whether they or any of them left any heirs or representatives surviving them;

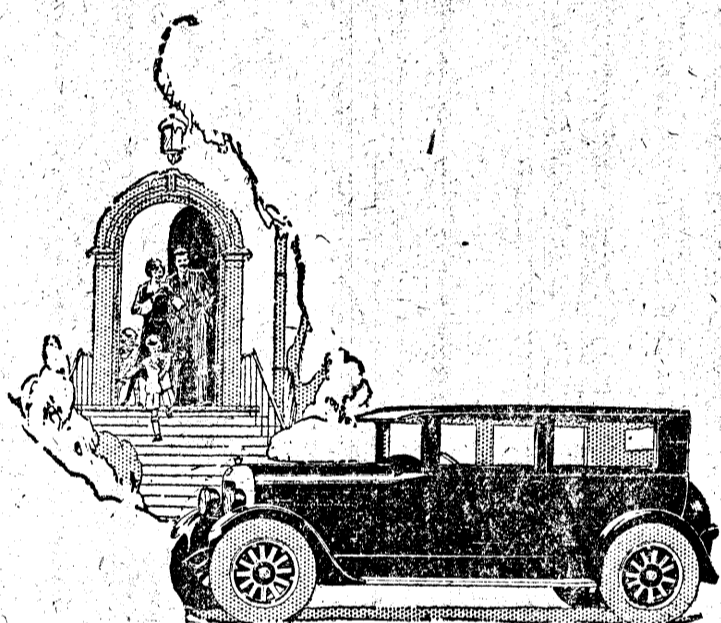

On motion of David Anderson, plaintiff's attorney, it is ordered that the said defendants and each of them cause their appearance to be entered, herein within three months from the date of this order and in case of their appearance that they cause their answer to the plaintiff's bill of complaint to be filed and a copy thereof to be served on plaintiff's attorney within fifteen days after service on them of a copy of said bill and notice of this order, and that in default thereof said bill be taken as confessed by the said non-resident and absent and concealed defendants.

It is further ordered that within forty days the said plaintiff cause a notice of this order to be published in the Gobles News, a newspaper printed, published and circulated in Van Buren County, and that such publication be continued therein at least once each week and for six weeks in succession, or that he cause a copy of this order to be personally served on said non-resident or absent and concealed defendants, or that the same be served by registered mail at least twenty days before the time above prescribed for their appearance.

GLENN E. WARNER,  
Circuit Judge.

To the Above Named Defendants:  
The bill of complaint is filed in this cause to quiet plaintiff's title to the lands described as the South Half (1-2) of the Southwest Quarter (1-4) of Section 13 Town 1 South, Range 13 West, except commencing at the Southeast Corner thereof, thence West 40 rods, thence North 40 rods, thence East 40 rods, thence South 40 rods to beginning.

DAVID ANDERSON,  
Attorney for Plaintiff.

## Betty Takes Burned Finger to Court

Betty Blythe, American movie actress, has told the court here a sad tale of how what appeared to be an advantageous contract to appear in the leading role of the filming of Rider Haggard's novel, "She," proved to be a dismal failure. She is suing G. B. Samuelson, the producer, for breach of contract and arrears in

salary. She says that she and her maid were forced to sew gowns promised her in her contract; that she was unable to collect her salary at stipulated banks and that she burned her finger seriously with a calcium "diamond." Samuelson denies the charges and insists Betty broke her contract and made erroneous statements regarding his character.

## Some Fashion Hints

By SOPHIE TUCKER

New York shop and importing agencies continue to be flooded with charming and original French designs which are rapidly finding their way into American fashions.

Among these novelties is the use of the flat bow, one or several in a row, which is identified with the name of Chanel. This idea is exemplified in a blue chiffon evening frock with bateau neckline, cape back, a godet in the front and flat tailored bow at the waistline. A more determined exploitation of the idea is in a daytime frock of French blue with four bands encircling the bodice, ending in a vertical tier of four flat bows of velvet ribbon.

The flounce design has made an inroad on the tailored severity of the two-piece suit in a model of dark blue cloth, the skirt of which ends in two small circular ruffles. Metal clips outlining the jacket's lapels furnish another gay and frivolous touch. The blouse worn with the suit is of box pleated silk.

A decidedly boyish suit is one that has a short jacket bound with braid which opens wide in the front to show a vestee of corded silk with a short silk scarf tied around the neck in mannish fashion and folded into the front of the vest-ee.

Something new in hats is one fresh from the French workrooms which revives felts again. The contour is not so new, nor yet the colors. But the smallish shape carries a large velvet bow at one side of darker color than that of the hat itself.

One way in which the ever present scarf has adjusted itself to new high colors is shown in a plain tailored model. The scarf, which is the only note of decoration, is drawn around the neck and tied with a small bow in the front, the long ends cascading down to form a sort of jabot that reaches below the knees almost to the edge of the skirt.

Belts are shown on dress and coat models in profusion. There is no limit to their variety or colors of leather. Some of the newest ones widen out at the front, where they are fastened with buttons placed over concealed clasps to simulate a very low cut vestee.

Prints are shown in many small close-set patterns. For the small woman these new flowered materials are specially recommended.

### SUGGESTIONS

Very old tea stains can be removed with a bleach of javelle water. Javelle water can be bought. If made at home use one pound of washing soda, one quart boiling water, one-half pound chloride of lime, two quarts cold water. Add the boiling water to the soda in an enamelware pan. Mix the lime with the cold water; then mix the two solutions, stirring well. Let it settle and clear; then bottle it and keep in a dark place. When using as a bleach, soak the stained article in equal parts of this javelle water and hot water until the stain disappears. Rinse thoroughly, adding a little ammonia to the final water.

So many women who are little above the average height have found their kitchen tables, sinks and coal and kerosene stoves too low for comfort. It is easy to raise them, and

### PRESSING COATS

Often when pressing a coat the question of achieving a smooth shoulder becomes difficult. Try using a small bowl covered with a piece of Turkish toweling. Push this into the shoulder of the coat and go over the shoulder with an iron, using a dampened cloth.

It will make the kitchen work much less wearing. The stove can be set up on blocks, the table raised by means of casters, and at the cost of a few dollars a reliable plumber can lift the sink.

Half a teaspoon of salt added to the vinegar cruet when it is filled will prevent the formation of "mother" in the bottle and keep the vinegar clear and unclouded.

An excellent way to use up cold meats is to combine them with cheese and tomatoes, the juice of which has been drawn off, adding bread crumbs. Bake in the oven for half an hour.

### MENU HINT

# PETER'S ADVENTURES IN ANIMAL LAND

BY MRS. FLORENCE SMITH VINCENT

## RED SQUIRREL AND ROLY-POLY.

"Good gracious, Juniper! Where is Roly-Poly?"

Mother Growley, very much excited, began to dash about among the corn stalks, pushing them down and trampling them under foot.

"Where can she be? She was certainly following close at my heels when we were coming through the corn. Ssh! Hark! What is that? Ah, ha! Red squirrel is in trouble again. I have heard his chatter too

"GIVE ME BACK THAT NUT!" SCREAMED RED SQUIRREL.  
"SHANT DO IT!" GRUNTED ROLY-POLY.

often not to know it at once. What a scold he is! And 'tis Roly-Poly he is scrapping with. Don't you hear her grunt? What a commotion! Oh dear me, what can the matter be?"

Before Growley had a chance to make a guess a second little Cub dashed head first into Mother Bear, and after it, as fast as he could tear, scampered Red Squirrel.

Oh, how mad was that little Red Squirrel! Roly-Poly tried to hide behind her mother, but the noisy chatterer was not a bit afraid of Mrs. Growley, and scolding away at the top of his lungs around after the Cub he whisked and drove her before him into the open.

"Give me that nut, you little sneak thief!" screamed he. "Give me that nut or I will tweak your ears with my sharp teeth. It belongs to me."

"Doesn't either!" grunted Roly-Poly, and she grinned a saucy Cub grin. "Finding is keeping, and I found this nut, so now it is mine."

"Found it, did you? Yes, you found it right in the very hole in the tree in which you saw me put it. You stole it that's what you did! Spying

on a fellow—prying into his business with those sharp eyes of yours! Watching him stock up his storehouse against a time of need; waiting 'till he has gone to gather more, and then paddy-pawing over to steal his supplies. Nice kind of a find, that is! Give me back that nut!"

"Shan't do it!" grunted Roly-Poly, the Cub, as soon as she could make herself heard above Red Squirrel's chatter. And she stuck out her tongue at poor little Reddy. This, of course, made him more furious than ever, and the only things he left unsaid were the things he couldn't think of.

"Such a din! Peter clapped his hands over his ears. Father Bear growled low in his throat and half raised a paw as though he would like to cuff the noisy disturber of the peace. Then Mother Growley took command of the situation. She leaned over and grasped Roly-Poly by the paw.

"Is Red Squirrel telling the truth?" demanded she. "Did you steal from his storehouse?"

Roly-Poly squirmed, but she boldly nodded.

Ugh, huh! I noticed Reddy running back and forth from a head of leaves to a hole in a tree and I wondered what he was doing, so I went over to find out. Reddy had scampered off, but I saw a heap of nuts, and so I took one. But only one, Mother; I never thought he'd miss it. Stinky little bush-tail! Just one nut I took and he makes all this fuss about it!"

Next—"On Trial Before the Family."

### A GAME TO PLAY

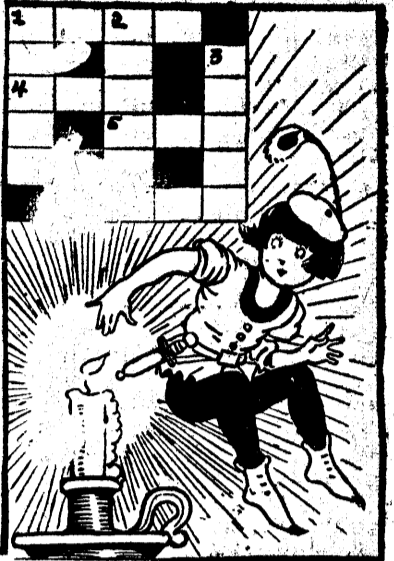

Japanese Crab Race

The players are lined up behind the starting line in from two to five single files, each containing the same number. Opposite each file at a distance of 25 to 40 feet there should be drawn a circle of about 3 feet diameter. The game consists of a race running backward on feet and hands, or "on all fours," to the circle. To start, the first player in each file gets in position with his heels on the starting line and his back to the circle for which he is to run, and all start to go at a signal, the player who reaches the circle scoring one point for his team; the others follow in turn.

**Vegetable Soup**—Shank bone of beef. Boil three hours. Add shredded cabbage, diced potato, cellyery, carrot and canned tomato. Season and boil another hour.

**Spinach**—Fry in olive oil (without water), salt and serve with chopped, hard boiled egg.

## Children's Pictorial Cross Word Puzzle

### Running Across.

Word 1. " — be nimble; — be quick."

Word 4. What the boy of the family is called.

Word 6. A garden vegetable. Plural.

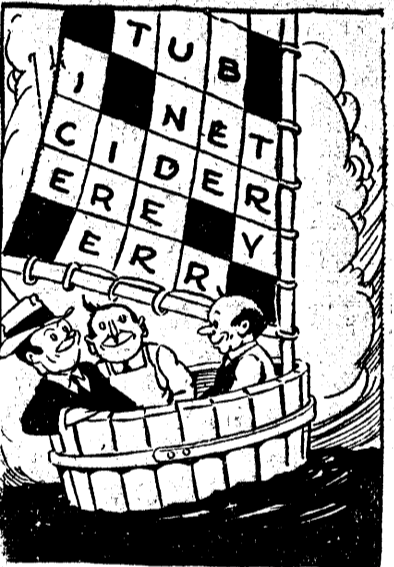

### Running Down.

Word 1. Christ.

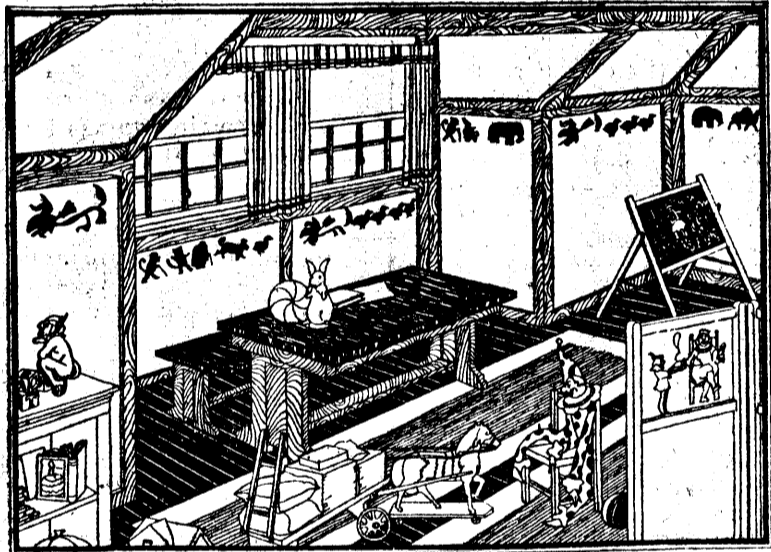

Word 2. An old-fashioned household light.

Word 3. Birds of any kind. Plural.

## ANSWER TO LAST WEEK'S PUZZLE

## New Uses for the Attic

If one has a gabled roof, one has an attic. In these days of small houses and growing families, waste space under the eaves is an expensive luxury. If you have not already done so, why not convert your attic from a barren, unattractive place that is used for storing useless odds and ends, into one or more attractive useable rooms? This can be done easily and at small cost with wallboard and paint. Dormers are probably already cut into the roof; partitions as desired may be erected with a few two-by-four timbers and wallboard. The rooms thus created may be used as

rainy-day playrooms for the children, extra bedrooms, workshops, sewing-rooms, dens and offices for husband and grown son.

In the skitch, an attic playroom or nursery is shown. The furniture is made to suit small bodies. It is sturdy and finished in white enamel, which is sanitary and easily cleaned. Walls and woodwork are done in ivory, upon which the Mother Goose figures are stencilled in blue.

When the attic is finished in the manner suggested, it will be found that the house will be warmer, because heat is prevented from escaping through the roof.

## Daintily Styled Frocks Are Fashioned From Lace

### By MME. LISBETH

The quaint little period frocks are particularly charming developed in lace and other sheer fabrics. They are also effective in the much liked taffeta, and these taffeta gowns with full skirts have a most enticing rustle which is music to the ears of most of us.

The frock on the left above is built of organdie. The rest of the bodice is made of the lace to a normal waistline. Then the very full skirt is blue organdie and American made ecru shadow lace. The first band at the top of bodice forms a shallow yoke of alternating bands of periwinkle

gathered on to this tight little bodice with a band of organdie followed by a much wider band of lace, then another of organdie and a second of lace and the skirt, which is much longer than the average modern frock—coming quite to the ankles—is finished with a slightly wider band of the organdie.

Almost anyone could make such a frock and worn by the slender girl especially if she be small and slightly old fashioned in appearance, is irresistible. It was designed for garden party wear.

An evening gown (right) is a combination of champagne and gold American novelty metal lace with matching scarf. This frock has a

square decolletage and, contrary to most of the newer evening frocks, has long sleeves. The bodice section is cut below the hips in deep scallops, the skirt section being joined to this in a deep ruffle. Artificial flowers in delicate shades ornament the front of the bodice.

A nobby little toque (center) revives the artificial bird trimming. This little hat is black, close fitting and the bird is posed low at the right side. This type of hat is always popular no matter what the particular vogue. The larger hats are practical mostly in fair weather while these small shapes may be worn in all weathers, as they resist the wind and are easily protected from the rain.

Miss Dorothy Dysart, above, has just been chosen queen of the May by students at the University of Missouri, which she attends. She is one of the most popular girls at that university.
