Mrs. T. Smith, 1029 2nd Ave.
Results of Fruit Pollination Investigations

In the fruit Orchard, it is often necessary to pollinate flowers with a pollen brush. This is because the fruit trees are often not able to self-pollinate. The pollen brush is a small, soft bristle brush that is used to transfer pollen from one flower to another. It is a simple and effective method of pollination, and it can be used on a variety of different fruit trees.

The apple tree is one of the most important crops in the world. It is grown in many different parts of the world, and it is used for both food and forage. The apple tree has a long history of domestication, and it has been cultivated for thousands of years. The apple tree is a deciduous tree, and it produces small, round fruits that are usually red or green in color. The apple tree is a hardy plant, and it can survive in a variety of different environments.

The apple tree is a moderate producer of flowers, and it is pollinated by bees and other insects. The flowers are small and white, and they are found in clusters of five. The fruit is a globose, flattened, red or yellow apple. The apple is a very important fruit, and it is used for a variety of different purposes.

Only Ten Cents

will bring this big, illustrated farm magazine, postpaid to your address, EVERY MONTH until you send in your ten cents. It is now a big Farm Magazine with a new idea behind it. A magazine for farmers. It is being produced by an expert in the dictation of "green thumbs" for their kind.

Two articles in every number, and with the growing season opening up, the first article is practical advice on how to start the season off on a right foot.

New Postmaster at

Fennville Takes Reins

Fennville—Fennville's new postmaster, Charles S. Barnett, took over the post office duties on July 1st.

The new postmaster has been well received by the people of the community. He is a hardworking, efficient, and friendly man who is popular with all.

He has already made several improvements to the post office, including the addition of a new sorting machine and the installation of a new addressograph machine.

He has also introduced several new services, including a new system of mail sorting and a new system of mail delivery.

In addition, he has taken steps to improve the efficiency of the post office and has already seen a marked improvement in the speed of mail delivery.
