**Two Important Insects of the Grape and Their Control**

by William A. Ross

The presence of many species of New York, New Jersey, Ohio, Michigan, and Indiana, and other states, often results in the economic injury to the vine. There are two important pests—

**The Grape Root Louse**

The first stage of injury to the vine is the presence of the grape root louse, which is a minute, black, oval-shaped insect, about 1/16 inch long, and about 1/64 inch wide. The adult louse feeds on the roots of the grape, and the young lice feed on the roots of the vines. The lice spread rapidly, and may attack the whole vine, causing yellowing and death of the foliage. The lice are difficult to control, and the vine may be destroyed if not treated. The following treatments are recommended for control:

1. **Dusting with Zinc Sulfate**
   - Apply 2 pounds of zinc sulfate per 100 square feet of vineyard, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

2. **Spraying with Soap Solution**
   - Apply 1 ounce of liquid soap per gallon of water, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

**The Grape Louse**

The second stage of injury to the vine is the presence of the grape louse, which is a minute, yellowish, oval-shaped insect, about 1/16 inch long, and about 1/64 inch wide. The louse feeds on the leaves of the grape, and the young lice feed on the leaves of the vines. The lice spread rapidly, and may attack the whole vine, causing yellowing and death of the foliage. The lice are difficult to control, and the vine may be destroyed if not treated. The following treatments are recommended for control:

1. **Dusting with Zinc Sulfate**
   - Apply 2 pounds of zinc sulfate per 100 square feet of vineyard, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

2. **Spraying with Soap Solution**
   - Apply 1 ounce of liquid soap per gallon of water, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

**Nature of Injury**

The grape louse feeds on the leaves of the grape, and the young lice feed on the leaves of the vines. The lice spread rapidly, and may attack the whole vine, causing yellowing and death of the foliage. The lice are difficult to control, and the vine may be destroyed if not treated. The following treatments are recommended for control:

1. **Dusting with Zinc Sulfate**
   - Apply 2 pounds of zinc sulfate per 100 square feet of vineyard, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

2. **Spraying with Soap Solution**
   - Apply 1 ounce of liquid soap per gallon of water, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

**Control**

The best method of control is to dust the vines with zinc sulfate, and to spray the leaves with soap solution. This will kill the lice and prevent further damage. The vines may be saved if treated promptly.

**Preserving Eggs**

It is important to preserve the eggs of the grape louse in the fall, so that they may be kept over for the season. The eggs are covered with a red, dusty substance, and are very difficult to find. The eggs may be preserved by dusting them with zinc sulfate, and then covering them with a layer of sand. This will kill the eggs and prevent further damage.

**Precautions**

1. **Dusting with Zinc Sulfate**
   - Apply 2 pounds of zinc sulfate per 100 square feet of vineyard, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

2. **Spraying with Soap Solution**
   - Apply 1 ounce of liquid soap per gallon of water, and repeat every 2 weeks until the vines are killed. This will kill the lice and prevent further damage.

**Summary**

The grape louse is a very destructive pest of the grape, and the grape root louse is a very destructive pest of the vine. The vines may be saved if treated promptly.

**References**

**Conclusion**

The grape louse is a very destructive pest of the grape, and the grape root louse is a very destructive pest of the vine. The vines may be saved if treated promptly.

**Save money**

-by clipping this coupon!

A few minutes spent in studying motor car values before you decide on your new car may save you many dollars afterwards. That is why General Motors wants to send you a finely illustrated little book about the great General Motors Proving Grounds. The cars are proved by day and night tests, and values are absolutely established. Every car owner should have a copy of this free book. Write to your dealer today to look for selecting a car, and how to make comparisons.

With this really interesting book, which will be sent free as soon as you fill in and mail the coupon, we want to send you illustrated booklets about the General Motors cars which suits your purse. You know these cars; all are famous. But did you know that they are all made by General Motors? Did you know that General Motors, by building more than one,000,000 cars a year, seven millions of dollars, and how these savings are passed on to you in better value, longer life for your car, and a higher trade-in value when you are through with it.

**CHECK THE CAR THAT FITS YOUR PURSE**

These facts mean hard cash to you. The coupon involves no obligation. Just check the card that interests you most. Booklets will be sent free as you fill in the coupon about the Proving Ground. Make up your mind to buy your cars scientifically from now on. Mail the coupon TODAY.

W. E. WORMETH
Singers Put Off Honeymoon

Mary Lewis, opera singer, who came from choir duty in star of the Metropolitan, and her husband, Michael Collinson, believe that their company, will have to wait until June for a honeymoon since the season called for Germany shortly after the wedding. Although the couple have been put off, they have not been put off from their stirring concert in concert at College when Mrs. Lewis joins her husband armed in June. They will sing together in “Fidelio” in German.

HOPE VIRTUALLY ASSURED CHEAPEST

Forecasts of the new $250,000 race on the horse of Hope is virtually assured new and will be held during the coming week in June. There will be $250,000 in betting, the last dividend of the buildings of Hope in horse.

Hopie's first chapel was built largely by the building company in horse. The building was used for the purpose until 1954, when it was completed. Since that time the chapel has been used by the building company in horse.

The company has been working on the building in horse since 1954, and has been used by the building company in horse since that time.

M. S. C. Will Issue "Freshman Bible"

Following the custom of the University, M. S. C. College will issue, for the first time, a "Freshman Bible," mostly bound in green leather, for the use of the freshmen. The books will be issued free to the freshmen in the fall, according to announcement in the "Tipper," the college newspaper.

The "biblical," which contains historical maps and commentaries, is reproduced from the old maps and commentaries of the traditionaries, and includes maps of the old maps and commentaries of the old maps.

Lake Okeechobee is usually called the "tipper," but the book has been designed to meet the needs of the student in the arts and sciences.

Many Towns to Aid Hospital Fund Drive

Thirteen communities of southeastern Illinois have entered plans to raise $500,000 for the building fund of the new hospital in Galena. The plan is to have the communities contribute $50,000 each to the fund.

Another Hopital to Draw Crowds

Many of the students of the University of Illinois have already acquired the books, which are being distributed through the campus.

Mme. Papadopoulos

Mme. Papadopoulos, who was called "the artist" by the Parisian critics, will return to Paris this spring. She has been in the United States for the past three years and will return to Paris in the fall.

Unfortunate Event

Ups in the price of flour will mean a sharper increase in the cost of living. The increase in the price of flour is a direct result of the war and will have a marked effect on the cost of living.

LIVING AND LOVING

By Mrs. Virginia Lee

"The only way to live," Mrs. Virginia Lee, modern literature and modern love, has said, "is to live in the present. The past is not important, the only thing that matters is now.

The living and the loving must be done in the present. The past is not important, the only thing that matters is now.

The living and the loving must be done in the present. The past is not important, the only thing that matters is now.

Would I be a woman if I were you, so you could have my love?"

Mrs. Virginia Lee is a well-known author and lecturer on modern literature and modern love. She has written many books on the subject and has given many lectures on the topic.

The Little White Hag

BY FRANCES BEIDEN

"*"8 LITTLE, BROWN & CO. INDIANED BY CENTRAL PRESS ASSOCIATION.

The afternoon was not quite over, and I was in Paris, preparing to go out for dinner, when my friend, who is a well-known author, called me. She said that she was going to give a little party at her house, and that I must come. I was delighted, for I had always wanted to meet her.

""What time is the party to begin?"" I asked.

""It begins at seven o'clock. You must be there at least an hour before,"" she replied.

""I'll be there on time,"" I said, and hung up the telephone.

When I arrived at her house, I found that the party was already in full swing. There were many people there, all of whom were very friendly and inviting. I settled myself in a chair, and began to listen to the conversation around me.

""What are you doing here?"" asked one of the guests.

""I'm just passing through town,"" I said.

""Oh, well,"" she said, ""you're welcome to stay. We're having a wonderful time here.""

I spent the rest of the evening socializing with the guests, and enjoying myself. When the party was over, I said goodbye, and walked out into the night. I felt very happy, and content.

The next day, I woke up early, and went for a walk in the park. The sun was shining, and the birds were singing. It was a beautiful morning.

I thought about my friend's party, and how much I had enjoyed it. I decided that I would like to go back, and see her again. So, I made plans to do just that.

In the end, I had a wonderful time in Paris. I met many new people, and had a great time. I would definitely go back, if given the chance.
