If you want big, sturdy, fluffy chicks, you must first know what condition the chick was when hatched. Many chicks are all hatched in the best of incubation, but where moisture, heat and air are not quite right during the first few days on these vital points your chick's life depends.

Our chicks are guaranteed to be true to breed. Come and test our chicks. We will deliver chicks to you. We deliver chicks to you.

Chick delivered. Hatch every day. Bob Williams.

Trends in Fruit Growing

State's Maple Sugar Industry On Decline

The maple sugar industry of Michigan is facing a decline after years of growth. The reason is the wet weather, which has affected the maple trees. The tapping season was shortened, and the sap was稀薄.

Manistee Farmers to Raise 100 Acres Beans

Several dozen area farmers have been notified by the Manistee County Extension Service that they have been selected to participate in a new project to promote the growing of beans. The project is aimed at increasing the production of beans in the area and improving their quality.

Chewing Gum Helps Fliers in Desert

Chewing gum is recommended for fliers in the desert. It helps to keep the mouth moist and prevents dehydration. It is also a useful source of energy.

Costs Money to Sound

At $50,000 or more, the cost of sound is a serious consideration. The cost of sound for a large theater or concert hall can be very high. The cost of sound equipment and installation is also significant.

Poultry

FEEDING CHICKS AFTER THE FIRST WINTER

Most people feed their chicks' eggs for the first winter when the chickens are young. This is to ensure a proper diet for the chicks. The diet should be rich in protein and essential fatty acids. A variety of feed sources should be provided to meet the nutritional needs of the chicks.

FEDERAL LIST REDACTS

582 Species of Trees

There are 582 species of trees listed in the federal register. This list includes trees that are native to the United States and trees that are introduced. The list is updated periodically to reflect new research and information.

At Far Farming

The Michigan Canners Association is now operating an improved peacap plate, with a full-scale chemical plant and refrigeration. All of the canned goods that are processed in the plant are of the highest quality, according to tests made in the United States and Canada. The canning of milk has been made much more efficient in recent years by the use of efficient refrigeration equipment.

The canning industry also has been making great progress toward a full-time chemical inspection and the use of improved canning equipment and processes in operation.

FACTS about used car allowances

Most new car sales now involve the trading-in of a buyer's used car. More and more people are asking: "Why should my used car seem to have several values?... Why should dealers in different makes of cars offer me allowances differing materially?... Does the largest allowance offered mean the best deal for me?"

Here are basic facts:

1. Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.
2. Your used car has only one fundamental basis of value: what the dealer who accepts it in trade can get for it in the used car market.
3. The largest trade-in allowance which is offered on your used car is not necessarily the best deal for you. Sometimes it is; but sometimes it is not.
4. An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.
5. Judge the merits of the new car in comparison with its price, including all delivery and financing charges. Then weigh any difference in allowance offered on your used car.

When you are ready to trade in your present car, remember that after all you are making a purchase and not a sale. You are buying a new car and simply applying your present car as a credit toward the purchase price of a new car.

NEW Paw Paw Theatre PROGRAM

DO YOU REALIZE

that a good young horse is worth so much or more today than it has been for the past twenty years? Do you realize that most of the horses in use and on the farm are from 8 to 20 years old? Are you going to depend on a mismatched, poorly cared for or even other sorts of horses or will you raise some good native colts? If the latter, be sure to see the

A L i v i n g a n d L o v i n g

"There was a small girl..." is a beloved and nostalgic story about a simple yet profound moment of connection between children. It has been adapted into various forms, including a popular musical, to capture the essence of childhood innocence and the power of reading.

Alden Rootary, the protagonist of the story, is a young girl who discovers the magic of reading. She finds an old book in a trash can and begins to read it,transporting her to a world of adventures, dreams, and discoveries. Through her reading, Alden learns the importance of imagination, empathy, and the joy of sharing stories.

The story has resonated with generations, inspiring readers to value the simple pleasures of reading and to pass the love of books on to future generations. It is a reminder of the transformative power of literature and the enduring bond between books and the people who love them.

The story also explores themes of curiosity, independence, and the importance of nurturing a child's imagination. It encourages parents and educators to foster a love of reading and to recognize the value of a child's world. Through Alden's journey, the story has become a cherished part of many children's lives, offering a glimpse into the power of reading and the magic它可以 be.
