Three Grand Rapids Banks Plan $6,500,000 in Expansion

Grand Rapids financial circles have been interested in the proposed constitution of the Industrial, the Bank of Commerce and the Michigan Guarantee Corporation.

The two latter banks have been interested in the possibility of forming a third bank, and the constitution will now be opened.

The new and reformed Industrial will make the second largest bank in the state in Michigan, with a capital stock of $6,500,000.

F. L. H. Fogg, president of the Industrial, will head the new bank, and the directors will include some of the leading bankers in the state.

Automobile Jolls Being Studied Now

A hunting "stalking house" is being studied by the board of health for the purpose of improving our future hunting season.

The idea is to have a "steering" house in which the hunter can sit and look out for game.

The hunting "stalking" house is a combination of a hunting blind and a "driving" house.

It is hoped that this system will make hunting more enjoyable and less tiring for the hunters.

MIDWESTERN FARMERS VISIT BERKLEY COUNTY

ECONOMIST SEES "STABLE BUSINESS"

Business in 1927 will be good but not quite as good as in 1924. The brokerage business will probably be more than the retail business of the past few years, producing a record for the nation, the national association of the International Purchasing Agents association of Grand Rapids.

Banks, which are in a low interest rate, will not be in business, as the national association of the national brokerage association, which is the main business of the nation, is not in business. HEALTHY OLD MEN AND WOMEN
NEED NEVER HAVE GRAY HAIR

As Long as Color Glands Remain Normal and Active Plenty of Pigment Will Keep Hair Its Natural Shade

IF HAIR IS FADED AND STREAKED WITH GRAY BEGIN USING COLOR GLODS

REMARKABLE DISCOVERIES

Simple Treats Start Youthful Color

Returning Again

Everybody knows if their color begins to fade, or if it never was good, that no amount of soap or shampoo, no amount of combing, or washing, or trying different powders, will return the hair to the original color. As long as the scalp glands are normal and functioning, the hair is dark and black, with no streak of gray. If these glands become inactive, or go wrong, the color fades, and streaks of gray are evident. The hair pigments are derived from the color glands of the scalp and cannot be replaced by artificial means. The only way to return the natural color to gray hair is to keep the color glands active and normal by proper treatment. This is what Color Glands do. They maintain the color glands in an active condition, preventing the loss of hair pigment, and returning the hair to its natural color. The results are permanent and lasting. When a person starts using Color Glands, the hair begins to turn black and all streaks of gray disappear. It may take from two to four months to see a marked improvement, when the hair becomes pure black. After this, the hair will remain black as long as the Color Glands are used. The cost is about $2.50 a year, and the results are worth many times the price. The Color Glands are sold by druggists and hairdressers. The person who uses them should take good care of his hair, and also use a good shampoo and a good comb. The results are very satisfactory.
