Notice

Beginning January 21, 1928, I will be selling insurance contracts by anyone except myself.

Carl Phillips
FARMERS WILL MEET JANUARY 30

The annual gathering of the agricultural clubs of Michigan will take place on the above date at the Grand Hotel in Traverse City, according to an announcement issued by the Michigan Farm Bureau Club, which is the executive board of the State Bureau. The meeting will be held in the college at that time. The program of events will include several important features in connection with the dairy, beef cattle, poultry, and general farm business. The detailed program will be announced later.

Arrangements have been completed for holding the general program of events and for selecting the best club representatives and state officers. The program will contain a number of interesting topics and features which will be of interest to all members of the State Bureau and its affiliated clubs.

M. S. C. Experts Vie with Idaho for Best Tape Baking Potato

Idaho's best potato has been selected by the Idaho Potato Commission as the most desirable variety for baking. The potato has been grown and evaluated in Idaho for the past five years and has shown superior baking qualities. The Idaho potato has been widely grown in the United States and is now available in many markets. The potato is known for its mild flavor and tender flesh, making it a popular choice for baking.

New Belgian Sport

The popularity of soccer in Belgium is growing rapidly. The sport is being introduced in the United States and Canada, and interest is increasing. Soccer is a team sport that involves two teams of 11 players each. The objective of the game is to score more goals than the opponent by passing the ball and shooting it into the net. The game is played on a rectangular field with a soccer ball. The field is divided into two halves, each containing a goal. The team with the most goals at the end of the game wins.

Michigan Tech SWI Has Strenuous Appeal to Mining Students

Although the curriculum of Michigan Tech SWI has been expanded to include other branches of engineering, the mining department remains one of the strongest and most popular. The department offers a wide range of courses, with a focus on mining engineering, geology, and mineralogy. The program is designed to prepare students for careers in the mining industry or related fields. The curriculum includes courses in mineralogy, geology, and mining engineering. The department offers a variety of opportunities for students to gain experience in the field, including internships and research projects.

More Farms in Iron County

Chicago parties have purchased a number of homes in Iron County and are leasing the farm land to tenants who are said to be related to the purchasers. The parties are said to be interested in increasing the amount of farmland available for development. The purchases are expected to provide additional land for the expansion of the agricultural industry in the area.

Sally's All Natural Good Stuff. No Nonsense.

On the War Front in Nicaragua

The situation in Nicaragua is complex and volatile. The country is facing a number of challenges, including political instability, economic difficulties, and a shortage of food. The U.S. government has been involved in the country, providing military aid and supporting the Contras in their efforts to overthrow the Sandinista government. The conflict has led to a number of human rights abuses, including tortures, disappearances, and extrajudicial killings. The situation in Nicaragua remains a significant challenge for the international community.

Sally's All Natural Good Stuff. No Nonsense.
MOTHER

A Cross, Sick Child is Conspituated! Look at Tongue

No matter what ails your child, a puckery tongue indicates something is wrong. If your little one is not eating, holl, has a fever, or has a cough and cold, your tongue is a good and reliable index. This is a sure sign that he is not getting enough nourishment. Sometimes, it can be caused by the cold that has been passed on from one member of the family to another through close contact or the other is due to an infection in the mouth, which can lead to the loss of some of the red blood cells in the body. It can also be caused by an allergic reaction to something that has been ingested or inhaled.

days true Buick quality and all the famous Buick features

and you have your choice of three popular models at this low figure—a roony Sedan, trim Coupe or smart Sport Roadster.

Only Buick offers so many unforeseen features at such moderate prices. Only Buick enjoys the tremendous volume production to achieve such value.

See and drive Buick. We will be glad to demonstrate at any time.
Lake Osceola High Farm Courses Are Successful

The vocational agricultural courses, one of the new courses started in Lake Osceola High School this year, have been successful to date. This is due to the hard work of the faculty and the class members. The class is composed of 13 students and each member of the class has been working hard to show their ability. The work is being done in the new building on the school grounds. The class is divided into two sections, one for boys and one for girls. Each section has its own teacher and is working on different projects.

Sees Us Dependent on Others for Food

If the class does not join in helping the community, they will be dependent on others for food. They have already started a trip to see what work is being done in other parts of the country. The class is hoping to see how their work can be improved. The lesson is to see that we must be self-sufficient and not rely on others for everything.

Blends Three Shades of Living and Loving

By Mrs. Virginia Lee

WE HEAR FOLKS SAY

I never heard a remark, and shortly after repeated by another person.

What everybody always says is not always true. What everybody says is often different from what you hear. Everybody says to be sure to do this or that, but you may never have done it.

The class is composed of 13 students and each member of the class has been working hard to show their ability. The work is being done in the new building on the school grounds. The class is divided into two sections, one for boys and one for girls. Each section has its own teacher and is working on different projects.

Doctor at 83 Found People Preferred His Prescription

The basic of treating sickness has
not changed since Dr. Caldwell left
his practice in 1830. He has now
practiced on the market the lamps
and oil lamps and oil lamps, known
as the “Cabinet” lamp, a practice
known to druggists and the public
as the “Cabinet” lamp. The lamps
are still the same and are
not changed.

The treatment of constipations
is still the same. The patient is
given a cup of oil and is
asked to drink it. If
the patient cannot
swallow the oil, the
doctor will give
the patient a
“gum”. The “gum” is
made of the same
ingredients as the
“Cabinet” lamp.

For more information, please visit
the website of Doctor at 83.
