BIRDS SANCTUARY
EXCEEDS DREAM

That the Bird Sanctuary at Galt has gone beyond the expectations of the founders and owner, W. E. Kelling, was the statement made by George H. Carman, director, before the Michigan-Indiana Audubon Association. "I haven't started yet," he added.

A handful of acres included in the 100 acres of lower Winter grove lands, which is full of vegetation, has been fenced against dogs and trophies and several acres form a peculiar greensward. The purpose of the sanctuary is to preserve the beauty of the grounds and to attract with animation. And there is no objection to such activities for it is intended to assist in the activities of the sanctuary.

Dr. Carman said that the sanctuary would be opened next week to the general public, and that the idea of having a "bird garden," as some bird propagators, said Mr. Carman, "will be a wonderful place. Everyone must be kept warm in winter and it is now, and it is a bag-selling plan for the tender vases of ducks, a doz. or a few for the good of the birds. We will keep their feet warm and

Many new species are being added all the time. The Ceruleus, as known by its call as the Black Winged or Great Black Winged City, is a water fowl being imported at great cost from Texas and Arizona. It is now being imported from Europe and has been out for several weeks, and is still in the same condition. The condition of the birds is not as good as expected, but it is still a fine specimen of a bird of the kind which are threatened with extinction. The Great Black Winged City, similar to the Scaup, is a very rare species, and has not got itself any where else.

The Sanctuary Bank

Ravenae Bank

Organization of a glider section of the University of Michigan Aerostatic Society was accomplished at Ann Arbor recently under the chairmanship of R. J. Leichty, of Detroit. More than 130 members of the society expressed an interest in gliding, according to Mr. Leichty, who is in charge of the local section of the society. The meeting was held in the University Auditorium and was attended by representatives of all the members of the society, as well as several members of the society who are not able to attend the regular meetings.

The third section of the University Society plans to purchase several gliders for use as soon as possible, according to Mr. Leichty. The society also plans to organize a flying club to operate the gliders the society will purchase.

Lincolnville, Nebraska. Like the glider section of the University Society, the Lincolnville section of the society intends to organize a flying club to operate the gliders the society will purchase.

Bickel, of Detroit, said that a very encouraging number of people are interested in the glider section, and that he has formed a committee to work out the details of the new venture. The committee is composed of Misses Bickel, Misses Haring, and Misses George and Misses Hurlin.

Buildings Cost $2,000,000

More than 300,000 people visit our new buildings now under construction in Ann Arbor. The buildings, which are part of the present year in and around Ann Arbor, are described as the most beautiful in the world. The buildings are located in 14 different projects, ten of which are under construction at present.

The $500,000 addition to the Great Western Hotel, the $100,000 addition to the University of Michigan Medical School, the $150,000 addition to the University of Michigan Business School, the $100,000 addition to the University of Michigan College of Agriculture, and the $100,000 addition to the University of Michigan College of Law, are the buildings under construction.

The Outstanding Chevrolet of Chevrolet History

The Chevrolet Motor Company Announces The Outstanding Chevrolet of Chevrolet History - A Six in the price range of the four!

The Chevrolet Motor Company, recognizing the achievements of its past and present, has developed for the future an even more complete conception of the motor car. And so, the new six-valve in-head engine developed from more than a hundred motor designs especially designed for this special car stands out as an engineering masterpiece. With a power increase of approximately 35% over the previous Chevrolet motor, it has a sensation of greater speed and performance -- it offers a type of performance that is literally astounding -- even to those who have been accustomed to drive cars costing hundreds of dollars more. And it affords an economy of gassing averaging better than 20 miles to the gallon of gasoline.

In this conception of Outstanding Chevrolet is destined to become an automotive sensation -- so smart, so stylish and so distinctively appointed that it rivals the costliest custom creations. The marvelous new Fisher bodies are longer, lower and roomier with an adjustable seat in all closed models -- and reveal the matchless artistry of Fisher designer. With their modern new colors, their smart dual moldings and their distinctive conceival elements, they achieve a degree of original beauty that has seldom been explored in motor car design.

You are cordially invited to visit our showroom and secure complete and detailed information on this sensational new car which will be ready for delivery beginning January 1st.

Advance Showings

The Outstanding Chevrolet of Chevrolet History will be displayed in a series of advance showings in the cities listed below:

- New York, Dec. 24th
- Dallas, A10th
- Atlanta, A11th

CALLAVIN brought back to Town his ever faithful colored dog Fred last week. Fred had gone to a great many places, and nobody else seemed to think of him as a dog. But Callavine brought him back to Town, and Fred was much better off for it.

According to Callavine, Fred had been in the past a bit of a problem, but now he was a model citizen. Yes, Callavine said, he had been in trouble before, but now he was a new man.

He's King For A Day

Ypsilanti Youth Becomes Master Harpsichordist

On the national stage, musical ability and technical skill are always in demand. This year, a Ypsilanti youth has achieved such distinction at the Michigan State College music school. Following a year of study under Professor Fredric Abrahamson, the student will be the master harpsichordist of the world.

The harpsichord is a keyboard instrument that has been in existence for centuries. Its sound is produced by a combination of strings and a set of metal plates, which are struck by hammers. The instrument was particularly popular during the Baroque period, and has been revived in recent years as a result of renewed interest in early music.

The student's achievement is particularly notable, as mastering the harpsichord requires a high level of technical skill and an understanding of the instrument's history and repertoire. The student's ability to play the harpsichord at such a high level is a testament to his dedication and passion for the instrument.

The student's success at the Michigan State College music school is a credit to the institution, and a source of pride for the Ypsilanti community. The student's achievement is also a reminder of the importance of music education, and the potential for young people to excel in the arts.

The student's performance at the Michigan State College music school is a significant achievement, and is a testament to his talent and dedication. His success is a source of pride for the Ypsilanti community, and an inspiration to young people everywhere who are passionate about music.

FORBIDDEN FRUIT

By MISS B. MORGAN

"Forbidden Fruit" is a term that is often used in reference to the temptation of Adam and Eve in the Garden of Eden. However, in this context, the term is being used in a metaphorical sense to describe the allure of something that is not supposed to be touched, but is nonetheless irresistible.

"Forbidden Fruit" can be a source of conflict and moral dilemma, as those who are attracted to it may feel guilty or ashamed for their desires.

But with the right attitude, "Forbidden Fruit" can also be a source of joy and fulfillment. It is up to each individual to decide whether the temptation is worth the risk of consequences.

In conclusion, "Forbidden Fruit" is a complex concept that requires careful consideration and decision-making. It is important to weigh the potential benefits and drawbacks of engaging in the activity before making a choice.

THIS SPACE SPONSORED BY GOBLES LEADING NEWSPAPER IN BEHALF OF THE BIGGEST SMALL TOWN IN THE STATE
The Ford has a very simple and effective lubrication system

The lubrication system for the engine of the new Ford is all in principle as simple in principle as water running downhill.

A gear pump in the bowl of the oil pan raises the oil to the valve chamber reserve. From here it flows on to the main crankshaft bearings and the front camshaft bearing. Oversize oil drops into the oil pan and trap and ease into troughs through which the connecting rod pass.

At the ends of these rods strike the oil, they scoop up a supply for the connecting rod and bearing. At the same time they set up a suction that lubricates the pistons and other moving parts.

From the tray the oil runs into the bottom of the pan, and is again drawn up through a fine mesh screen and pumped to the valve chamber.

This system is so effective that the crankcase capacity of the oil pan passes through the pump twice in every mile when you are traveling at only 30 miles an hour.

Yet there is only one oil pump.
