VOL XXXIX

GOBLES, MICHIGAN, THURSDAY, JANUARY 17, 1929

NO. 18

Trade in GOBLES and save the Difference

LOCAL BREVITIES

A. Watts is still on the sick list. Mrs. L. O. Graham is on the sick list.

9 below and plenty of snow Sunday night.

John Mahieu has a new Chevrolet truck purchased of L. & C.

The M. E. Aid will meet with Mrs. Ferguson next Wednesday.

Oratorical contest at Community church Sunday evening at 7:30.

Mr. and Mrs. Will Ferguson spent Sunday at C. D. Rendel's.

Mike Mahieu has a new 4-door Chevrolet sedan purchased of L. & C.

Nick Macedon of Grand Rapids visited Will Langer for the week end.

George Powell, who has been very sick at his home northeast of Kendall is reported some better.

Frank Fairfield is gaining steadily and hopes to be able to tell his doctor where to get off very soon.

Next Monday night at school-house, the yearly feature event of the P. T. A. with Prof. Henderson as speaker.

Masonic rally and district conference January 24 at Masonic temple, Kalamazoo, commencing at two o'clock.

Mr. and Mrs. Cecil Leedy announce the birth of a daughter, Donna Marie, January 11, 1929. Congratulations.

Mrs. Vern Knight is at Bronson hospital recovering from an operation. Her many friends hope she will receive permanent benefit.

Frank Sackett, our former townsman, was elected vice president of the County Bankers Association at their annual meeting at Paw Paw.

Mr. and Mrs. Leon A. Feely of Chicago, announce the birth of a daughter, Ruth Ellen, Sunday, January 13, 1929, weight 8 1/4 pounds. Congratulations.

The Milling Co. are shipping another car of beans to Heinz Packing Co., Pittsburgh, Pa., the home of the 57 varieties. This is a 500 bag car and at price of beans it means around \$5000.

Willow Carter, Mable Van Alstyne, Clarence Skillman, Jack Hodgman and R. G. Hayden are from this vicinity selected for jury duty for the January term called for January 28.

M. L. Wilmot's registered Jersey cow, Wilmotwood's Loretta has a production record for the month of December 1928, of 1225 pounds of milk containing 78.2 pounds of butterfat, equaling over 90 pounds of butter. Next.

Mr. Jay Culp of Grand Rapids called on Mildred Keller last Friday and she returned with him to spend the week end with his mother, Mrs. Mary Culp and Sunday returned to Kalamazoo to spend Monday with the former's aunt, Mrs. James Harkins.

Jan 6 being the occasion of Pearl Ferguson's "25th birthday" several of her sister and brother Rebekahs surprised her and helped her celebrate it. They presented her with a lovely water set. After partaking of a nice lunch they all departed for home wishing Pearl many more birthdays.

WAGERTOWN

The Grange Ladies Aid elected the following officers for the coming year: Pres. E. V. Wood, Vice-Pres. Mrs. Kate Cleland, Sec., Mrs. Ethel Eastman; Treas., Mrs. Grace Healy, Work Com., Mrs. Cleland, Mrs. Skillman, Mrs. Hodgman.

Mrs. Lester Woodruff, Mrs. Robert Banks and son spent Thursday afternoon with Mrs. Wm. Jacobs. Alfred Sprague spent Monday night with Fred Holderman.

Mr. and Mrs. Leonard Gobles spent Saturday night at George Leach's.

Announcement

As is usual to an editor, we hear many aggravating rumors and adverse criticisms of nearly everything under the sun, and we have learned to let them go by default and most of them generally right themselves.

Last Saturday we were informed a statement was being spread by some persons that The News refused to advertise for a certain store in our midst because of an agreement with our other advertisers, so that it seems advisable to make this statement:

(First) The News is possible because of its paid advertising and we are constantly trying to increase the portion of live advertising that we may continue to send the same at \$1.50 per year.

(Second) Our field of circulation is largely in the field supplied by Gobles, Pine Grove, Kendall and Mentha and every merchant in these towns is entitled to use our paid advertising service and we urge them to do so.

(Third) Any legitimate business in these towns can force us to accept their legitimate advertising provided they pay for same and get it in on time and no publisher can stop the same, and any person who has any acquaintance with us and tried to advertise with us will tell you that the only fight they ever have is to keep from advertising with us.

(Fourth) In our efforts covering over 23 years as publisher of The News no advertiser has yet approached us with a proposition in an attempt to restrain anyone from advertising with us, except that during one local option campaign a dry advocate bought all our available space so that we had no space for wet arguments and we were pleased to accommodate him.

(Fifth) Don't be misled by rumors that reflect discredit upon the people whom you have learned to trust and with whom you have had satisfactory business relations over a period of years and don't try to force legitimate paid advertising upon us expecting us to refuse it, for we won't.

The Editor.

Jewell-Leversee Nuptials

Last Friday evening at the Methodist parsonage Miss Margaret Jewell, daughter of Fred Jewell, was united in marriage with Estus Leversee, only son of Mr. and Mrs. Emmett Leversee of Kendall, Rev. Hayes officiating.

The bridal pair were accompanied by Miss Emma Thayer and Henry Williams.

Both the bride and groom were Gobles students and very popular with the younger set.

Mrs. Leversee has been the genial assistant at the telephone office for some time and Mr. Leversee is one of our new Chevrolet sales company.

We are glad that they both will continue with us although at present at home in Kendall.

The News joins with their many friends in best wishes.

Golden Wedding

Mr. and Mrs. Frank A. Leversee of Kendall celebrated the 50th anniversary of their marriage at their home January 11.

Mr. Leversee, who is over 71, was born in Richland, and Mrs. Leversee, whose maiden name was Cora Buell, is a native of Pine Grove and nearly 67.

Over 46 years ago they purchased the home where they now live.

They have one son, Clyde, of Kendall, a daughter, Mrs. Phebe Headler of Detroit, eight grandchildren and a host of friends who rejoice at their many happy years and hope they may have many more.

To the Republican Electors of Van Buren County

I desire to announce that I will be a candidate for the nomination of Judge of Probate in the primary election to be held March 4, 1929 to succeed myself. If nominated and elected, I will continue the same courteous, impartial and business-like administration of the Probate Court which the people of this county have had the opportunity to appreciate and enjoy for many years, and I will give my best efforts and undivided attention to the duties of the office.

Merle H. Young

Creamery Burns

While Manager Hutchins was unloading milk at the receiving station of the Pet Milk Company here just before six Monday evening, fire was discovered near the engine room.

The alarm was given but the fire had made such headway that all efforts were without avail and the building and contents were consumed.

The building originally constructed by the Gobleville Creamery Co. at a cost of about \$12,000, was sold to the Pet Milk Co. who removed the machinery and equipped it as a receiving station.

Last summer they installed modern machinery for handling milk automatically, making it one of the finest stations in this section and many tons of milk were received daily and taken by tank cars to the Allegan plant.

The plant was valued at about \$25,000 but we were unable to find amount of insurance.

The loss to the community can hardly be determined but it is hoped the Company will rebuild at once.

Farm for Rent

Will rent the 68 acres, known as the Valleau place, located inside Gobles village limits for term of years—cash or grain rent. Good buildings, silo, running water in house—good general farm land. For information write L. V. Simmons, 7347 Evans Ave., Chicago, Ill.

Resolutions

Resolutions of respect passed by Hudson Lodge No. 325 F. & A. M. on the death of Brother Walter H. Lewis, a member of our fraternity.

Whereas, The Supreme Ruler in His wisdom has seen fit to remove from his field of usefulness and from our Lodge this Brother, and

Whereas, It is becoming to our fraternity to give expression to our feelings of this great loss, and to the high regard in which this Brother was held by the brothers of this fraternity. Therefore Be It

Resolved, That we, the members of Hudson Lodge No. 325 F. & A. M. of Gobles do hereby record our feelings of loss and high appreciation of his noble character. And Be It

Further Resolved, That our charter be draped for a period of thirty days and a copy of these resolutions be spread upon the minutes in this lodge and copies sent to the family of our deceased brother.

Committee.

Insects Spread Disease

Many kinds of insects spread plant and animal diseases.

School Notes

Are you saving money regularly by using the "School Bank?" Mrs. Niles' room banked 100% last week.

Those who missed the basketball game with Lawton last Friday night missed a real game. At the end of the first period Gobles was in the lead 7 to 1, but Lawton came back with a determined effort which placed the score at 12 to 16 at the end of the game. Lawton has a strong class C team, and this game does not count toward the Class D Championship. The boys played a good game, and presented the best example of good team work that has been shown this year. We are counting on a Class D championship, it is up to everyone to get back of the team and help. Your support will do a lot.

The debate with Decatur last Thursday night ended with a 2 to 1 decision for Decatur. It was anyone's victory up to the last minute, and we are sure that those who saw the contest will agree that the Gobles Debaters were going strong. The students representing Gobles were: Roberta Dorgan, Cleah Woodhouse and Chester Ray. Max Brown is back as an alternate and acted as timekeeper last Thursday.

We debate Mattawan one week from tomorrow. The debate will be held at the schoolhouse and is free to the public. It is hoped that a large delegation will turn out, as this debate will decide whether or not Gobles will make the eliminations. A victory over Mattawan will place us in the eliminations. A victory over Mattawan will place us in the elimination, and we need your support. Are you going to be there?

Semester examinations next week Wednesday and Thursday. Now is the time to study.

All must pay their class dues before taking the semester examinations, unless special arrangement is made with Mr. Ojala.

January Meeting of P. T. A. Next Monday

The January meeting of the Parent Teachers Association will be held Monday, the 21st—next Monday—at eight o'clock in the school auditorium. A program has been arranged that no one can afford to miss. High school orchestra will furnish music and Prof. W. D. Henderson of the University of Michigan will deliver his lecture on "Education for Democracy." Prof. Henderson was on one of our programs last year, and all who heard him then will certainly want to hear him this year. Be sure to save next Monday night for this important event of the year.

School Library Books

The following new books have been placed in the School Library for this year. You are welcomed to use the school library.

The Story of the Philippines, Halstead.
History of Henry Esmond, Esq., Thackeray, 2 copies
Border Beagles, Simms
Catcher Craig, Mathewson
An American History, Muzzey
Short History of English People, Green
New American History, Hart
Historical Source Book, Webster
American Nation—Vol II, Federalist System, Bassett
American Nation—Vol. XII, Jeffersonian System, Channing
American Nation—Vol. XIV Slavery and Abolition, Hart
Pride and Prejudice, Austen (TO BE CONTINUED.)

If your subscription to The News has expired, please call at once and settle.

We are ready for your job work. Bring it in today.

Woodman dance at Kendall every Saturday night.

Obituary

Walter Hooker Lewis was the youngest son of Frank and Adeliza Lewis was born in Middleville, Barry County, Michigan May 29, 1869.

At the age of eight years his father was killed, his mother being left with five children. He went to Wheatland, Ia. where he stayed with his uncle until the age of 14. Then he returned to Galesburg, Mich where he worked on a farm. In 1892 he and his brother went to North Dakota where they took up claims and later they took up ranching.

January 16, 1905 he was united in marriage to Lura Foster. To this union was born one son, Franklin.

In 1911 he returned to Michigan and purchased the farm south of Kendall where he resided these past eighteen years.

He became a true and loyal member of Hudson Lodge No. 325 F. & A. M.

He passed away Thursday noon, Jan 10 at the age of 59 years, 7 months and 12 days. Besides a widow and one son, he leaves to mourn, one sister, Mrs. Otto Richter of Buffalo, N. Y. and one brother, Albert Lewis of LeRoy, Minn., besides many relatives and a host of friends. Two sisters, Ida and Stella have preceded him.

He was a kind and loving husband and father and will be greatly missed by his loved ones, neighbors and friends.

Funeral services were held Monday afternoon at the home, conducted by Rev. Hayes. Interment at Fitch cemetery, Mattawan.

Card of Thanks

We wish to express our sincere thanks and appreciation to all our friends for their thoughtfulness and sympathy extended to us in the loss of our beloved husband and father. We wish to thank the Hudson lodge neighbors and friends for the beautiful flowers. We are grateful to Rev. Hayes for his words of comfort.

Mrs. Walter H. Lewis, Franklin J. Lewis.

CAMERA NEWS

They Pay "Heavy" Money for Baseball Thrills

The thrill of being baseball magnates has cost this quartet a "pretty penny." However, being millionaires, they haven't minded it a bit. One, Jake Ruppert, top center, has, by producing pennant winning teams, recovered much of the money he sank into the New York Yankees. William Wrigley, Jr., left, owner of the Chicago Cubs, estimates his baseball connections have cost him \$6,000,000; William F. Kenny, right, New York contractor, has just parted with \$750,000 for a fifth share in the Giants. Alva Bradley, lower, center, kissed one fortune good-bye in buying the Cleveland club for himself and associates and is spending another buying players.

Big Bridge Cables Put Into Place

Compacted to
19 Inch
Diameter

Undeterred by icy blasts far above the Detroit river, workmen are shown using powerful hydraulic clamps, "compacting" steel cables that will support what is described as the longest bridge span in the world—between Detroit and Windsor, Ont. Inset shows how the 7,622 wires of each cable are laid, in 87 strands, each three inches in diameter. The intense pressure changed the shape of the cable from a hexagon 21 inches across the corners into a 19-inch circle.

Deer Dodge Coolidge Bullets

Unaware of the fame they were missing, deer aimed at by President Coolidge successfully ducked two presidential bullets during a hunt on Floyd's Neck Peninsula, near the Sapelo island estate of Howard E. Coffin, who had as holiday guests the President and Mrs. Coolidge. Photo shows Coolidge returning in an ox cart from the hunt and looking somewhat depressed over his failure as a hunter, the score at the end of the hunt being: Deer, 2; Coolidge, 0.

Inspects Air Force

In order to study the operations of aircraft squadrons, of the U. S. battle fleet, Gen. Italo Falbo, Italian under-secretary of state for aeronautics, has been inspecting the naval base at San Diego, Cal., where the navy has shown him full courtesies. He is shown at San Diego.

May Race Nurmi

Edvin Wide, Swedish schoolmaster and running star, arriving in the United States again, may be pitted against Paavo Nurmi, the flying Finn, in races in New York and elsewhere. Nurmi is now in New York and is working out every day.

USE OF MARL SAVES MONEY

A saving of \$500,000 through the use of marl by Michigan farmers in 1928 is the estimate made by the agricultural engineering department of Michigan State College.

Members of the department believe that the average gain made is a dollar a ton and the farmers used a half million tons last year. Five years ago farmers in this State used only 6,000 tons of this material.

The Geological Survey has completed a study of the marl deposits in 14 Michigan counties and it has been found that a plentiful supply of good quality marl is available for the use of a majority of farmers in those counties.

A great deal of the marl is in close proximity to the sandy soils which are the most acid of Michigan soils. The possibility of the economical use of marl is determined by its percentage of calcium carbonate and the cost of getting the marl to the field.

Some deposits are readily accessible and the materials can be excavated very cheaply. Other beds are inaccessible or contain marl with a low calcium content. Agricultural engineering specialists from Michigan State College have given excavation demonstrations at 150 locations in the State.

Ground limestone and marl are equally valuable for use in treating acid soils. Each farmer should find which is the cheapest for him to use. County agricultural agents and college specialists will assist in deciding which is the most economical.

Conservation Dept. Seeks Pheasant Information

Replies to questionnaires regarding the status of the ring-necked pheasant in Michigan are being received at the department of conservation. Sportsmen from all sections of the state have been asked to submit their views on many angles of the bird's success in meeting the natural problems that confront him in the state. Many farmers are volunteering information that is being tabulated faithfully and it is probable that valuable conclusions may be drawn when all the material is at hand.

Anyone who did not receive a questionnaire but who feels that he has learned something about the pheasant is invited to forward his information to the department. It is not necessary to answer the questions contained in the list submitted by the department, although any expressions in that direction are welcome.

The belief that it is illegal to shoot a banded bird seems to persist despite all efforts of the officers to correct the mistake. This situation developed during the duck hunting season and from some sections word has come in that banded pheasants were not reported. The department is very anxious to receive these bands. The information gained from these tags is considered invaluable.

Favor Closing Deer Season Every 2 Years

A bill for the purpose of closing the deer season every two years will be introduced in the state legislature this winter by Representative John Holland of Bessemer, according to the following report from the Ironwood Globe:

"Active support to a bill that will be introduced in the state legislature by Representative John Holland of Bessemer for the purpose of closing the deer season every two years will be given by local sportsmen and organizations, it was decided by a committee that was appointed at the close of a mass meeting under the auspices of the Gogebic County Advancement Association.

"Decision to lend support to the bill was arrived at by a committee consisting of Y. H. Hanson of Wakefield, A. L. Hibel, B. C. Hayes, Martin Kopnick and Harry Barr of Ironwood, J. M. Price of Ramsay and John Rowett of Bessemer.

"The Advancement Association committee will ask other counties in the upper peninsula to join with Gogebic county in the support of the bill. The county board and civic organizations will be asked to aid in the movement.

"Although the idea of closing the season for two years met with the approval of the majority of Friday night's speakers, several hunters expressed the idea that much more will be accomplished in the line of deer preservation if the season is closed for five years.

Citing figures which he obtained from cruisers after they made a study of the matter, Martin Kopnick of Ironwood said that Gogebic county had 52,000 deer in 1886, but that this total was cut to 17,000 in 1908 and 4,000 in 1926.

"C. W. Richardson, state senator-elect of Marquette, said he has always been a conservationist and not a hunter. He said the program of closing the season met with his approval and that residents of this section could expect his aid to pass favorable legislation. He expressed the opinion that much work must be done before the law will be included in the statutes.

"The one buck law was criticized by several of the sportsmen, who maintained that Pennsylvania repealed the statute after it was found that the plan was not satisfactory."

Michigan's Farm Crops Brought \$9,000,000 More In 1928 Than in 1927

Michigan farm crops returned farmers approximately \$9,000,000 more in 1928 than the same crops did in 1927 it was shown in figures released by V. H. Church, federal and state statistician for Michigan. Farmers collected \$236,000,000 for crops this year; last year it was \$227,000,000.

Corn showed almost one-third greater production and the revenue was \$10,000,000 greater than in 1927. Wheat production was less and the revenue was about \$5,000,000 below last year.

Potato production was more than one-third greater this year, but revenue fell from 20 million dollars to 14 million. Beans showed a considerable gain in production and a similar change in revenue.

Returns from fruit crops, based on the seasonal farm price, were considerably less than last year, although the crops were larger.

Possum Moving Into Michigan

Reports being received from the southern tier of counties in the lower peninsula indicate that Bre'r Possum is moving into Michigan. This animal, so often spoken of as the favorite dish of the southern darkies usually makes his home in the vicinity of or below the Mason-Dixon line. But he is appearing in large numbers, particularly in Berrien county. Those acquainted with the possum's migratory habits say that he is moving into Michigan and Ohio where he has come to be a familiar figure in recent years. One has been sighted as far north as Clinton county in central Michigan.

As a potential game and fur animal, the department of conservation has listed him among those slated for proposed protection in the re-codification of the state's game and fish laws. The fur is not of great value in the eye of the pelt seeker, but is occasionally used for commercial purposes.

Important to Keep Record of Insurance Policies at Hand

Among the necessary fixed household expenditures in most family budgets there are usually those for insurance of several different kinds, with premium payments occurring on definite dates. As the policies themselves are best kept in a safety-deposit box or safe, it is wise to have an accurate record at home, showing each kind of insurance owned, the face value and policy number, the amount of premium payable, and due dates. If there are many such payments to be made, some sort of calendar reminder is also needed, so that the necessary sums will be set aside at the right time.

The Bureau of Home Economics suggests, in connection with planning and recording family expenditures, that a record of all insurance policies be kept on a special page in the household accounting book.

The important point is to have readily accessible information about every policy owned, with inescapable reminders of premiums due in any current month.

Bad Judgment to Let Horses Grow Thin During Winter

Maintaining the farm work horse in a healthful condition over winter is the first step in fitting it for spring work. The farm horse (except brood mares or growing stock) does well over winter on a ration made up largely of the coarser hays, straws, or corn fodder, supplemented with limited amounts of legumes such as alfalfa, clover, vetch, soybeans, or cowpeas. Where a legume hay can be fed, a small amount of grain, preferably oats, should be given. Large amounts of water will increase the utilization of the dry roughages. A mare in foal should be given leguminous feeds high in protein and ash.

Keep the horses in a thrifty condition; it is bad management to let them lose weight over the winter and then try to bring them back to normal just before the beginning of spring work.

Berrien Fruit Growers Winners at State Meet

Three prominent fruit growers of Berrien county are very proud of the blue ribbon awards they won at the State Horticultural Society gathering at Grand Rapids. Herbert Gowdy of Union Pier, one of the blue ribbon winners, is a member of the Michigan state board of agriculture. Dr. Ira H. Roe of Harbert, one of the pioneers of the fruit industry in the county, won the first blue ribbons on a plate of five handsome Baldwins. L. A. Lloyd won first place on plates of Kings, third on Baldwins and third on Rhode Island Greenings.

Sturgis Pullet Lays 34 Eggs in as Many Days

Sam Kern, Sturgis farmer, is bragging about his flock of White Leghorn chickens. One pullet has laid 28 eggs in the last 23 days, the last one having a double yolk.

Another hen of the same flock has just spoiled its record of consecutive laying by failing to produce its thirty-fifth straight egg.

Poultry

KEEPING BOOKS ON THE POULTRY BUSINESS

Many farmers feel that poultry keeping is just a side line to be watched over and cared for by the women on the farm and as a consequence they pay very little attention to keeping an account of the income and expenditures involved in the management of the poultry flock. Often this condition exists even though the flock may be getting the best of care and may be receiving a very well balanced ration.

Such a feeling should not exist, however. Poultry flocks are one of the big sources of farm income. Furthermore, they furnish, under proper management, a very steady income from week to week throughout the 12 months of the year. It would be an easy matter to keep a record of this income, and in many instances this is done. Too often the poultry flock bookkeeping ceases with the record of the income and does not take into account the cost of keeping the flock.

The bookkeeping job would not require a great deal more time, however, if the flock owner were to record the cost of the various feeds consumed. If a more accurate record is desired, the poultryman should jot down on a permanent form the number of eggs produced each day so that he might check up on his totals at the end of each month. The total amount of feed consumed each month should be put down in dollars and cents and if the balance is not in favor of the eggs produced during the month, an investigation should be conducted. Poultry can be made to yield a nice income any month in the year if the flock is properly managed.

If the flock does not pay its way at any time, feeding methods should be changed, non-producers should be culled out, or some step should be taken, depending upon the needs in the particular flock, to make it pay. No farmer cares to feed hogs or cattle or milk dairy cows at a loss and it is equally important that the farmer or the farmer's wife display the same mercenary feeling in regard to the poultry flock.

SPROUTED OATS

A reader asks: Please explain the process of preparing germinated oats for chickens. How long is it necessary to soak them? Are oats germinated which have been soaked in warm water 24 hours?

Germinated and sprouted are synonymous terms except that as applied to oats for poultry, sprouted may mean anything from the first appearance of a tiny shoot to a leaf two or three inches long. Germinated oats are fed as soon as the shoots begin to appear and before they are an inch long. Since growth is very rapid, that usually means within 24 hours of the bursting open of the seed envelope. We prefer to soak the oats not over 12 hours, and 10 hours is long enough; therefore we prepare them at bedtime and drain them in the morning. It depends on the temperature of the place they are kept which is the easier or better method of management.

In a fairly warm basement they can be handled nicely on the floor, if there is a floor drain. If not, it is better to use candy pails or shallow boxes. They will sprout faster in the pails, but need more careful watching to prevent undue heating. If they are turned from one pail to another after the first 24 hours, and then twice a day, adding a little water whenever they appear too dry, they will not usually get too hot. We find that a box for the last two days, with the oats spread to about four inches in depth, removes the danger of overheating during the rapid sprouting period.

A row of pails across the end of the kitchen, with pie pans under the pails, (all but one of which should have a hole in the bottom for drainage) will take care of the germination of oats for 300 hens, with a minimum of labor and steps. Pails should be scalded out daily to prevent mould. For a small flock, gallon cans can take the place of pails and boxes.

HOW MUCH COD LIVER OIL SHOULD BE FED?

Only in cases of extremely mild winters and with an exceptional amount of direct sunlight or sunlight through glass substitutes will poultrymen find it unprofitable to feed cod liver oil to some extent in the ration. In view of the fact that some benefits accrue from the use of cod liver oil in the ration even when the hens receive some direct sunlight or sunlight through glass substitutes, one must assume that under conditions less favorable, as they usually are, greater increases in egg yields and hatchability would be attained.

Trials conducted to determine what amount of cod liver oil should be added to the ration show that as much as 4 to 5 per cent of the ration may be made up of cod liver oil, with increased egg yields for every increase in percentage of oil in the ration up to this amount. Beyond 5 per cent, however, does not bring about more favorable results, and in some cases, where more than this amount of cod liver oil was fed in the ration, there was a tendency for the hens to stop laying in December and January, although they did not molt. Total egg production was lower than for the hens receiving less than 5 per cent cod liver oil in their ration.

Some people couldn't kick any more if they were centipedes.

GRAND RAPIDS LISTS CONVENTIONS

Grand Rapids Convention Bureau reports that more than 20 district, state and national conventions will meet in Grand Rapids in 1929, bringing approximately 8,000 visitors. Among the larger meetings listed, together with an estimate of the visitors expected are: Michigan Engineering Society, 400, Feb. 1; Michigan Retail Lumber Dealers' Association, 800, Feb. 6-8; Michigan Retail Clothiers and Furnishers, 350, Feb. 3; National Shrine Directors Association, 700, Feb. 20-22; Central Regional Savings Conference of the A. B. A., 500, in March; Michigan Manufacturers of Carbide Beverages, 300, March 6-7; Michigan Retail Grocers and Meat Dealers, 300, March 12-14; Michigan Retail Jewelers, 400, in May; Michigan Knights of Pythias, 350, in August, and Women's Home Missionary Society of the Methodist Episcopal Church, 1,000, Oct. 9-10.

Walker Candy Assets Are Sold at Owosso

The assets of the defunct Walker Candy company of Owosso, appraised at \$245,437, were sold at a bankrupt sale for \$21,507. The sale is subject to confirmation by the referee in bankruptcy at a hearing set for Saturday in Detroit. The Union Trust company bid the building, real estate and machinery in at \$6. The sale was made, however, subject to mortgage bonds totaling \$263,000, back taxes of more than \$10,000, and interest of about the same amount. The Detroit Merchandising company purchased most of the other assets.

**OLD FOLKS SAY
DR. CALDWELL
WAS RIGHT**

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles. Write "Syrup Pepsin," Dept. BB, Bantico, Illinois, for free trial bottle.

Who Wants to be Bald?

Not many, and when you are getting that way and loosing hair, which ends in baldness, you want a good remedy that will stop falling hair, dandruff and grow hair on the bald head **BARE-TO-HAIR** is what you want.

Where the Hoovers Will Worship in Washington

This will be the most talked of church in Washington during the next four years. It is the Orthodox Friends' meeting house, which President-elect Hoover and Mrs. Hoover, both inset above, will attend.

BATTLE CREEK TO SEE LEGION PLAN

Battle Creek is to witness "The Belle of Barcelona" as the annual offering of the Gen. George A. Custer post, American Legion, it has been announced, and talent from Battle Creek College is to co-operate.

This musical comedy is expected to far exceed anything yet undertaken and the date announced for its presentation at Post theater is Feb. 6, 7 and 8, three nights having been set aside for it.

"The Belle of Barcelona" is written around the love quest of a young American customs inspector, Lieut. Harold Wright, whose adventures in the land of the toreadores furnish any amount of amusing incidents.

Lyrics and music are catchy and haunting, and "The Belle of Barcelona" airs will be hummed for many a day after the play has come and gone.

Shoots Deer in Barry County; Pays \$81 Fine

Charged with shooting one of the four deer which have been making their homes in Barry county, Harvey Babcock, 23, Dowling, pleaded guilty in justice court at Hastings and paid fine and costs totaling \$81.

According to information given Glenn Bera, conservation officer, Babcock borrowed a shotgun and made an unsuccessful attempt to kill the deer, following which he borrowed a rifle and succeeded in shooting it.

The deer have been in the hill country near Gun and Bassett lakes in Yankee Springs townships since early last summer and Sheriff George Leonard and other officers have been urging citizens to protect the animals. One of the deer wandered into the vicinity of Dowling, officers state.

New Metal, Aelium. Impervious to Friction

Aelium, a newly discovered sedimentary mineral, has been developed during the last three years by its sponsor, Jean D'You, Los Angeles metallurgist, to a point where its use in engine fittings may make possible a revolution in the entire automotive industry.

Claims made for the new metal are that it will hold lead in suspension in copper or cast iron; will change the structure of all metals; will fuse lead and copper with any metal; will increase the conductivity of copper and acts as body lubricant to all metals fused with it.

The metal has been the subject of experiments by various schools of mines, the United States Bureau of Standards and metallurgical experts, and while they are agreed on what it will do, none of these agencies have been able to determine of what it is composed. However, D'You holds out the belief that before the known deposit is exhausted—a matter of twenty years—experiments with the metal will show how it can be manufactured in commercial quantities.

The experiments show that engines having bearings made from 45 per cent lead and 55 per cent copper fused with aelium require practically no oil or lubrication to keep them from burning out.

Aelium has a hydrocarbon base and radio-active elements. It gives to the lower melting metals the much desired carbon body and allows the higher melting metals to absorb more of the carbon element which up to the present time have been the backbone of finer metals.

The radioactive elements which enter into aelium impart to the non-ferrous metals as well as to the ferrous metals the much desired element in causing the fusion of ferrous and non-ferrous metals. For illustration: Copper and lead may be fused in any percentage; copper and lead may be fused with cast iron or steel in most any percentage, and aluminum is fused readily with any metal.

2,000 Facing Life Sentences In Wayne

Approximately 2,000 violators of the prohibition law in Wayne county will face life imprisonment if a plan of wholesale prosecutions mapped out by Robert M. Toms, prosecuting attorney, is carried out.

Attorney General Wilbur M. Brucker estimated that about 2,000 persons in Wayne county have been convicted of four or more dry law offenses. Toms said that as soon as a list of such persons is compiled he will begin prosecution of every person on the list under the habitual criminal clause of the Michigan criminal code, which makes a life sentence mandatory upon conviction of a fourth felony.

"Under the law," said Toms, "it is mandatory for the prosecutor to go into court and ask for the imposing of a life sentence. There is no alternative as far as my office is concerned, and upon receipt of the list from the police bureau we will take action along these lines."

James Sportt, superintendent of police, said such a list was placed in Toms' hands several weeks ago.

J. C. Penny to Add 500 New Stores

The J. C. Penny Co., operators of 1,078 retail department stores, will negotiate 500 leases for new store locations this spring for stores to be opened as rapidly as store units can be developed in a special expansion move just authorized by the board of directors. This expansion will involve an increase in retail sales of between present \$190,000,000 a year. The \$40,000,000 and \$50,000,000 over the store locations will be confined to cities and towns of from 2,500 to 5,000 population.

10,000 PLANES TO BE BUILT

The year 1929 will see a production by the various aircraft companies in the United States of between 10,000 and 12,000 airplanes, with a total value of more than \$100,000,000, Ray Cooper of the aircraft bureau of the Detroit Board of Commerce, told members of the industrial property division of the Detroit Real Estate Board.

Basing his statement on a survey made by the Aeronautical Chamber of Commerce, Mr. Cooper said the expected production compares with a production of approximately 4,000 airplanes, valued at about \$5,000,000 in 1927.

Mr. Cooper predicted a great future for Detroit in aircraft and said that in Detroit more people are "air-minded" than in any other city of similar size. He also said the industrial reators of Detroit will find a prominent place in the city's aircraft growth when they are called upon to aid in the selection of locations for aircraft manufacturers and other manufacturers allied with the industry.

Five air lines are now operating out of Detroit. They were named by Mr. Cooper as follows:

Stout Air Service (between Detroit and Cleveland and between Detroit and Chicago).

Ford Motor Co. (carrying freight only between Detroit and Chicago and between Detroit and Buffalo).

A new line just established and operating between Detroit and Indianapolis and owned and operated by an Indianapolis concern.

Thompson Mail Line (operating between Detroit and Chicago and including a number of smaller cities in the state).

National Aid Transport (operating between Detroit and Toledo to connect there with the Transcontinental Line).

New All-Time Mark Set By Oldsmobile

The production and shipments of Oldsmobiles gained 60 per cent during 1928, according to factory reports. This increase was over the 1927 figure, which was the previous high mark, and sets a new all-time record.

Oldsmobile is entering 1929 with increased manufacturing schedules and officials of the company are optimistic regarding the outlook for the new year. It is expected that another substantial increase will be reported at the end of the year.

The attitude of the Oldsmobile officials is in line with that of Alfred P. Sloan, Jr., president of the General Motors Corporation, of which Oldsmobile is a division. Mr. Sloan has declared his belief that more automobiles will be sold during the new year than 1928.

Oldsmobile also is in physical condition to take full advantage of the prosperous conditions. During the past year eight large buildings have been erected and large quantities of machinery and equipment installed to permit the large production increase called for by the 1929 manufacturing schedules.

From the time of the announcement of the new Oldsmobile at the automobile shows in 1928 sales steadily increased and were limited only by the ability of the company to manufacture.

Murray Gets Plant Site

Murray Corporation of America, Detroit, auto body manufacturers, will start construction at once of a plant at Memphis to cost approximately \$2,000,000, it is announced officially.

The factory will stand on a forty-five acre tract which has been purchased by the firm, according to C. W. Avery, president.

Grand Rapids Plant In \$1,000,000 Spring Merger

Plants and businesses of two Grand Rapids spring plants, the National Spring and Wire Company and the Marshall Company, producers of automobile upholstery springs, upholstery supplies, bedsprings and mattresses, have been sold to the Nachman Spring Company of Chicago. The sale price is understood to involve about \$1,000,000. The plants have 350,000 square feet of floor space and employ 700 people.

The Grand Rapids plant will be operated as a unit of the Chicago company under the name of the National-Marshall Spring Corporation, incorporated a short time ago. James L. McInerney, principal owner and head of the Grand Rapids business, will be president of the new Grand Rapids unit and will direct its operations as a subsidiary of the Chicago firm. He also will be an executive of the holding corporation.

The Chicago firm has plants at Chicago, Los Angeles, New York and now Grand Rapids. The holding company is one of the largest in the spring manufacturing field. The Grand Rapids unit will concentrate upon automobile orders for which it has larger contracts for the next six months than for all of 1928. It will also make mattress centers and other spring products and specialties, increasing the volume of its output. The retail business in mattresses will be discontinued.

Last Reindeer In U. P. to Detroit

The last remnant of the conservation department's ill-starred project to stock the upper peninsula with reindeer was shipped to the Detroit zoo recently. In 1921 the conservation department purchased 60 reindeer in Norway, shipped them to this country at great expense and placed them on the state forest reserve in Luce county. The only excuse ever offered for the experiment was that it was designed to furnish new food supply for the state. The "deer people" were just harkening for reindeer milk and meat don'tcher know. Anyway, the experiment proved a huge failure. The animals became afflicted with a strange malady, due, it was thought, to a lack of some certain food element, and they died off slowly one by one, until only one was left. This was a poor crippled runt which had finally become inured to its new surroundings, and also become so tame that it was a nuisance to the caretakers at the reserve. Now it has been shipped to Detroit to be gazed upon by the gaping multitude and if the conservation department will only hang a cost tag around its neck it may possibly serve as a warning against any future fool experiments.

Charter Changes Up To Voters of Sturgis

Sturgis voters on January 21 will vote on a change in the city charter, which, if carried, will provide for appointment of city officers by the commission under which they are to serve. Under the present plan officers are appointed by the commission, which goes out of office at each April election. Officers thus named are city attorney, assessor, and two county supervisors.

The citizens will also vote on a proposed change which would require that the lawyer appointed city attorney should have been qualified to practice in the supreme court of Michigan for three years prior to his appointment.

At this election also, the citizens will vote a bond issue of \$85,000 for installation of a sewage disposal plant.

OFFICERS CAPTURE MANY FISHING NETS

Vigilance of conservation department officers recently resulted in a big haul of illegal fishing nets in the Great Lakes. Nearly five and one-half miles of net fell into the hands of the law when Capt. E. J. Ellers of the department's craft, Rambler, cruised down upon a scene in the vicinity of Manitou island. There were 3,000 pounds of whitefish in the net when it was hauled to the surface. One-third of the poundage total was under size. The officers made a clean sweep of the entire equipment.

Gets Big Paper Order

Sutherland Paper Company, Kalamazoo, has just received an order for 250 carloads of cartons from a large national concern for delivery during 1929. The carton division's business is so good and advance bookings are so great that additional plant facilities will have to be built in the immediate future, the company announces.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Cuticura
OINTMENT

How to Escape FLU

- 1 Avoid so far as possible the places where flu germs are most apt to be; crowded cars; public meeting places; warm, stuffy rooms.
- 2 Be careful of close contact with others and beware of all coughers and sneezers; breathe through the nose.
- 3 Get lots of rest. Eat plenty of citrus fruits. Keep the bowels open. Take every precaution to keep in good physical condition, so your system will have high resistance against germs.
- 4 Above all, avoid catching cold. Any cold may be the forerunner of flu. Take Bayer Aspirin at the first sign of a cold and you can ward it off. Gargle with Bayer Aspirin at first sign of sore throat as this will remove the infection.
- 5 If you have any reason to suspect even a touch of flu, call your doctor.

DETROIT'S MOST FRIENDLY HOTEL

Located in the heart of the downtown theatre and shopping districts, opposite beautiful Grand Circus Park.
800 clean, comfortable rooms with bath. \$2.50 and up.
Beautiful Arabian dining room. Detroit's finest restaurant. Dancing to charming music by Jack McGay's Orchestra.

HOTEL MULLER

Her Sailor Boy Lover

By AD SCHUSTER

MARILYN MORTIMER sat in her room looking out over moonlit meadows.

"I wonder," she said and quite in the manner of heroines of fiction, "I wonder what Roger is doing tonight."

Roger was a sailor on a battleship. He had enlisted for the training and the period of service was almost up. He waited for his return and as she waited she wondered.

Her thoughts for the dim blue battle dress which gave a weird glow between decks the fleet of superdreadnoughts was in darkness. It was not the black silence and inaction, for the ship quivered with suppressed excitement. Bare feet thudded and thumped on the deck, depending on whether their owners carried heavy loads or slipped to carry a message.

The men and the ships were stripped of color. The officers, in their shirt sleeves, peered over charts, murmured into telephone receivers, nodded at one another and even argued. The engine room was somewhere to the west and the admiral in the same pall of night. The enemy fleet, according to the reports and the conviction that was being fed into the minds of the distinguished officers, had all the best of the position.

Roger was one of those who toiled because he could not know what was going on, but he knew it was hot and it was working as he had never before. They would start fighting soon. Some one said the great torpedoes were ready to launch. It was going to be a great battle, a supreme test. Roger glistened like a seal fresh from the water. He knew the ammunition was moving and then he heard the guns.

They all seemed to speak at once, under his feet the great mass of steel vibrated.

"Harris buck," said Roger. "that's the Harris buck." The thunder of guns was heard.

The order came with appalling suddenness. No one expected it for this meant the shells were dropping into the enemy and yet the word which sent the spirits of every man down into his boots put them to work the harder.

It was: "Everyone of his post now to save the ship from sinking!" A torpedo had smashed the seams, the water must be checked. The big ship heeled, turned, and twisted and still, from the distance came the "wham-wam" and "boom" of guns.

And all the while the fleet, except for the sudden bursts of flame when the guns spoke out, was in darkness. The thousands of men below decks, working as Roger worked, to save what was left, were—the life, invincible and desperate, the soul, heart and sinew of the battle craft.

Then they left the depths, left the work and the sweat and breathed the cool air. Steam arose from their bodies. They jumped into a new task. It was overboard with the small boats, barges and rafts, every man to the open sea.

"Abandon ship!" the last word in the "tough luck" catalogue. And over they went into the quiet night and the same moon that shone in the garden of Marilyn Mortimer found its reflection on the glistening body of her sailor lover.

There was another signal and a cheer arose. That would be all for the night. The fleet rode easily off the Farallones and practice, until the morning, was over. It was, as the officers said, a highly successful maneuver.

After three years' experiments, "a magic carpet" spread over the soil is said to have increased the yield of gardeners' crops more than 500 per cent.

The carpet is of heavy waterproof paper, and covers all the ground not occupied by the plant stems themselves. It increases the soil temperature, prevents loss of moisture, distributes water among the plants, and smother weeds.

The increase in yield varies from 11 per cent for peas to 516 per cent for spinach. Lettuce crop is doubled, green corn trebled, and potatoes almost quadrupled.—London Tit-Bits.

"Oh, Well, What's the Use?"
"Can you tell me what time it is?" asked the woman commuter of the conductor.

"Here's all the time there is, lady," said he as he pulled his watch out for inspection. It had three hands. One, a red hand, pointed to central standard time, while the other two designated daylight-saving time.

"Well, I can't make anything out of that," the woman said after a few minutes of perplexity.

"Naw," replied the conductor, "I don't pay much attention to it either."
—Indianapolis News.

Preaching and Practicing

I lately spent an evening with a woman who was as gentle a creature as I have ever known. Her ideals were high; her conception of motherhood as noble as I have ever heard a woman express. Yet I knew of terrible rows she had had with her husband, children and neighbors, where in she had said as bitter things about them all as was ever put in a degenerate book. — E. W. Howe's Monthly.

Founded Great Order

The Y. M. C. A. was founded by George Williams, in London, England, in 1844. The first association in America was founded in 1851. Its purpose is to minister to spirit, mind, and body of young men. It provides for the benefit of its members, libraries, reading rooms, baths, gymnasiums, lectures, and special instruction in various branches of learning, and frequently homes for young men far from their own homes and friends.—Grit.

Polo Ponies

The Field says that the superhigh-priced mounts used for polo are never allowed to get out of condition. As soon as the matches are over, the shoes are taken off and the ponies turned loose in a soft soil grass paddock, which is free from stone. Two or three months later they are shipped South, and worked into condition for the early spring matches.

African Rodent

The ground rat or ground pig is a burrowing, ratlike rodent of South and West Africa. It is two feet long and has a very harsh, bristly hair, flattened, grooved, and brown in color. It is a near relative of the spiny rodents of tropical America, such as the coypu, hutia, and others of the family Octodontidae.

Odd Curriculum

One of the world's curious schools, the college of fisheries at the University of Washington at Seattle, teaches students how to fish, how to prepare fish for market, how to raise them and how to combat diseases to make the finnies thrive better.

Took Discoverer's Name

The sable antelope is called the "Harris buck" because it was discovered by Sir W. C. Harris, author of "Portraits of the Game and Wild Animals of Southern Africa," issued in London in 1840 as a magnificent folio book, with colored plates.

Cosmopolitan Group

The first settlement in Georgia was made January 13, 1733, by James Edward Oglethorpe at Savannah. The early colonists were German Lutherans, Piedmontese, Swiss, Scottish Highlanders, Portuguese Jews and Englishmen.

From Old Saxon Word

"Brand-new" is equivalent to "fire-new," meaning fresh from the fire, bright and new. "Brand" was an old Saxon word meaning "burn." Hence an article fresh from the forge was said to be brand new.

Effort Seldom Rewarded

"Why tell a man of his faults?" said Hi Ho, the sage of Chinatown. "To do so may prove an effort to offer instruction of inestimable value, which is certain to be unrewarded."—Washington Star.

Long Arctic Night

In the Arctic and Antarctic regions the sun does not go below the horizon for six months in summer. Likewise it does not appear above the horizon for six months in winter.

Actuated by Vanity

We are not convinced of the value of an idea unless we are persecuted for it. Then it is no longer our idea that we are defending, but our vanity.—Plain Talk Magazine.

Casualties at Waterloo

In the battle of Waterloo the French lost, in killed, wounded and missing, about 31,000 men, while the losses of the allies were about 23,000.

Not All Turned Into Beef

One authority says that 54.3 per cent of the finished product of a slaughtered steer is beef and 45.7 per cent is composed of by-products.

Best of Endowments

The finest endowment policy ever bestowed upon a man is the ability to work, the desire to work, and the enjoyment of work.—Exchange.

Be Silent on Faults

One ought never to speak of the faults of one's friends. It mutilates them; they can never be the same again.—W. D. Howells.

The Muscle Record

A man has 520 muscles. The muscle record is held by the elephant; in its trunk alone it has 40,000.

Getting Squatter's Right

Starting at the bottom of the ladder is all right; it's camping there that's wrong.—Boston Transcript.

Mind and Matter

"A man is as old as he feels fit." And a woman as old as she thinks fit.

United States' Seal

The seal of the United States was decided upon June 20, 1782.

Obituary

Mrs. J. Z. Coleman was born October 14, 1840 in Auburn, N. Y. and passed away in Gobles, January 11, 1929 at the age of 88 years and almost 3 months.

When a girl her parents, Eben and Amy Allis moved the family to Port Byron, N. Y. and when she was 16 to Kalamazoo. At this place she joined the Baptist church. When past 21 she married Columbus Coleman and settled in Allegan for many years. At this place she taught a class of girls in the Sunday school and later a class of young boys.

In 1884 the family moved to Muskegon, where her church membership remained till now.

She was among the earlier visitors who sang and prayed in the saloons of Allegan before the W. C. T. U. attained its great influence. In later years she was a member of the Missionary Society and of the Woman's Club of Muskegon.

Mr. and Mrs. Coleman had no children but adopted a daughter at whose home she spent her last years. She was a widow for 36 years.

The affliction of blindness which darkened the last 12 years of her life, though very keenly felt, was borne with great patience and she retained until the last week her interest in friends and family.

Officer's Dignity Cut

No Figure With Pat

A young man who had spent three years at different C. M. T. C.'s was reminiscing. He told several of his experiences in the camps and wound up by relating the following:

"We were all scared to death of an officer that first day in camp, but not so with 'Pat,' whose name, by the way, was Abraham Levinski. The general rode up on his horse to observe the procedure of our being mobilized into service. On his appearance officers snapped to attention and we remained motionless until the general gave the customary 'At Ease.'

"'Pat' stepped out of line with a camera in his hand and took the general's horse by the bridle and turned it around. The horse shied back and 'Pat' turned it around again. Then he stepped off about ten paces, and with much deliberation focused the camera on the puzzled officer.

"'Now, smile,' 'Pat' soothingly requested, while the company broke into a roar, joined by the general on the horse."

A Land of Faery

A most marvelous sunset this evening, outside the Bab Djedid. The vast plain in its arid desolation gave the impression of a desert, flooded with the gold light of the level sun. The clouds hung over the mauve mountains of Trozza and Serdj, impregnated with purple and rimmed with bright gold. It was a land of faery, dissolving under the enchantment of the sun, whose power drew forth such fantasies in blue, red, green and yellow. Behind us lay the walls of the city, in the rosy light of evening, which fell upon towers and cupolas. Then in the still air, as the world faded under an emerald sky, came the clear voice of the muezzin calling the faithful to prayer, while through the gates the shepherds slowly led in their flocks.—From the Diary of Russell Beresford.

Inventions by Women

One woman had the idea to make silver forks and spoons with a curving handle, which prevented their slipping into the plate, such a good idea that it is strange no one ever thought of it before. The traveler who finds his portable desk a joy has a woman to thank for the invention. A lock faucet for metal containers is an invention in practical demand for hotel storerooms and an important safety device. The same woman, inventor also a handy needle threader to use on sewing machines.

Love of Open Inherent

The impulse to get into the open is primitive in us. We love the breath of the spaces not cluttered with houses and rank with the odors of civilized life. Under the stars and the moon we can think clean thoughts. From the busy fields we can drink inspirations unknown to the office and the counting house. In the song of the winds we may hear the cradle lullabies of our infancy or the strange melodies which thus come, different and alone, to the individual soul.—Kansas City Times.

Wonderful Microscope

A microscope capable of magnifying an object 12,000,000 times is being used in the detection of disease germs.

Odd Names for Bananas

Before the sixteenth century the banana was known as the "apple of paradise" and "Adam's fig."

Can Get Away From That

We can't all be heroes, but most of us can at least avoid being zeros.—Boston Transcript.

The Outstanding Chevrolet of Chevrolet History — a Six in the price range of the four!

represents 4 years of Development and over a Million miles of Testing

Years ago, the Chevrolet Motor Company designed and built its first experimental six-cylinder motor. This far-sighted step was taken because Chevrolet engineers knew that the six-cylinder motor is inherently the most perfectly balanced motor—the ideal power plant to meet the growing public demand for greater reserve power, faster get-away and, above all—smooth, quiet performance.

During the last four years, over a hundred six-cylinder motors were built by Chevrolet engineers and tested on the General Motors Proving Ground.

Day and night, through winter's cold and summer's heat, the incessant testing went on—until the present motor was developed and finally pronounced correct.

At the same time other Chevrolet engineers were perfecting other parts of the chassis. And another great automotive organization—the Fisher Body Corporation—was devoting its gigantic resources to the creation of the finest, sturdiest and most beautiful bodies ever offered on a low-priced automobile.

As a result, the Outstanding Chevrolet offers an

order of well-balanced excellence—a combination of performance, comfort, beauty and handling ease that is truly remarkable—with a fuel-economy of better than 20 miles to the gallon of gasoline.

You owe it to yourself to see and inspect this remarkable car. Come in today!

Mortgage Foreclosure

Notice is hereby given that the mortgage dated February 26, 1927, given by Harriet E. Dahlman as mortgagor to the First State Bank of Gobles, Michigan, a Michigan Corporation as mortgagee, covering the land described as

The East Half (1-2) of the Northeast Quarter (1.4) of Section Fourteen (14), Town One (1) South, Range Thirteen (13) West, Van Buren County, Michigan,

which mortgage was recorded in the office of the Register of Deeds of Van Buren County on February 28, 1927, in Liber 122 of Mortgages on page 586, will be foreclosed by sale of said premises at the North Front Door of the Court House in the Village of Paw Paw, Michigan (that being the place of holding the Circuit Court in said county), said sale to be held on the thirtieth day of March, 1929, at ten o'clock in the forenoon of that day.

The amount claimed to be due on said mortgage at the date of this notice, is the sum of \$1128.33 besides costs of foreclosure and attorney fees.

Dated December 30, 1928.

Order for Publication

STATE OF MICHIGAN—The Probate Court for the County of Van Buren.

At a session of said Court, held at the Probate Office in the Village of Paw Paw in said County, on the 15th day of January, A. D. 1929.

Present, Hon. Merle H. Young, Judge of Probate. In the Matter of the Estate of James E. Ferguson, deceased.

Edward E. Ferguson, son of said deceased, having filed in said court his petition praying that said court adjudge and determine who were at the time of his death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized;

It is Ordered, That the 15th day of February, A. D. 1929, at ten o'clock in the forenoon at said probate office, he and is hereby appointed for hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order for three successive weeks previous to said day of hearing in The Gobles News, a newspaper printed and circulated in said County.

MERLE H. YOUNG,
Judge of Probate.
A true copy. Mamie L. Shafer, Register of Probate.

Notice of Mortgage Sale

Whereas, Maxwell M. Benton and Carrie A. Benton, husband and wife, made and executed a certain mortgage bearing date the 29th day of October, 1923, to Mrs. Carrie L. Benton, which was recorded in the office of the register of deeds, Van Buren county, Michigan, on the 31st day of October, 1923, in Liber 128 of Mortgages on page 358, and whereas the amount claimed to be due upon said mortgage at the date of this notice is the sum of eight hundred and forty eight dollars and eleven cents and no suit or proceeding at law has been instituted to recover the debt now remaining secured thereby or any part thereof and whereas default has been made in the payment of the moneys secured by said mortgage whereby the power of sale contained therein has become operative.

Now Therefore, Notice is hereby given that by virtue of said power of sale and in pursuance thereof and of the statute in such case made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises at public vendue to the highest bidder at the north front door of the courthouse, at the Village of Paw Paw, Van Buren county, Michigan, that being the place of holding the Circuit Court within the said county of Van Buren, on the 2nd day of March 1929, at ten o'clock in the forenoon (central standard time) the description of said premises contained in said mortgage is as follows:

The following described land and premises situated in the village of Gobles, county of Van Buren, State of Michigan, viz: commencing forty five rods, fourteen and one-half feet East and thirteen rods South of the Northwest corner of section thirty, town one south, range thirteen west; thence south twelve and one-half rods; thence East forty feet; thence North twelve and one-half rods; thence west forty feet to place of beginning.

Dated November 19, 1928.

MRS. CARRIE L. BENTON,
Mortgagee.

Carleton W. Benton, Attorney for Mortgagee.
Business Address, Lawton, Mich.

HOLD UP PLAN FOR DORMITORY

Construction of the proposed \$800,000 women's dormitory at the University of Michigan will not be started for several weeks, it was decided at a meeting of the university's Board of Regents in Detroit.

It was announced that the regents wish to ascertain whether the bonds will be income tax exempt, which would make a considerable saving in cost. This can not be determined for a few weeks. The regents also agreed that a considerable saving in construction costs can be made after a further study.

In view of these things there is "grave doubt" whether the building could be finished for use next fall, it was said. The matter will be given further consideration at the January meeting of the board.

The proposed women's dormitory is to be the first of a group of dormitories planned for the university. It is to be a five-story structure and will provide living quarters for 500 co-eds. The dormitory plan, as outlined by Dr. Clarence Cook Little, president of the University, has met with bitter opposition from Ann Arbor rooming house proprietors.

A petition signed by several thousand Ann Arbor residents, protesting against the dormitory plan on the grounds that it would cause Ann Arbor property values to depreciate, was sent to Gov. Fred W. Green some time ago.

Hungarian Student Enrolled at Tech

Paul Beck of Budapest, one of nine Hungarian students selected by the Institute of International Education to continue their studies in American colleges and universities, has enrolled in the Michigan College of Mining and Technology as a candidate for a master's degree. He is majoring in physical metallurgy, doing special research in copper and its alloys.

Mr. Beck is the son of a well known Hungarian sculptor. He was born in Budapest, where he attended grammar school and high school. After completing his high school work, he attended the University of Technical Science in Budapest from which he was graduated in 1927.

This year he was selected by the American-Hungarian exchange, which is administered by the Institute of International Education, to continue his studies in the United States. Because of his interest in mining and metallurgy, he was assigned to the Michigan College of Mining and Technology as a fellowship student.

The Institute of International Education is an agency for promoting international understanding and good will through the medium of education. Since its origin in 1919, it has been interested in the development and administration of a series of international educational exchanges similar to the one with Hungary. At the present time such exchanges are maintained between the United States and seven European countries—Austria, Czechoslovakia, France, Germany, Italy, Switzerland and Hungary.

When this student exchange was initiated several years ago, the Hungarian ministry of education offered several scholarships at the University of Budapest and other professional schools in that country. Four American students will enjoy the advantages of that arrangement this year.

Olivet College Loses Pastor and Professor

Rev. Charles Cecil Smith, for the past seven and a half years pastor of Olivet Congregational church and professor of religious education on the faculty of Olivet college, has accepted a call to First Congregational church of St. Paul, Minn., and will leave Feb. 1 for his new parish.

The St. Paul church, also called Olivet Congregational church, is one of the oldest in the city and has a membership of 700 members. It carries a decided increase in salary for Mr. Smith and also an assisting staff of secretary and director of religious education.

Poems That Live

CHANSON DE ROSEMONDE
The dawn is lonely for the sun,
And chill and drear;
The one lone star is pale and wan
As one in fear.

But when day strides across the hills,
The warm blood rushes through
The bared soft bosom of the blue
And all the glad east thrills.

Ah, come, my King! The hounds of joy
Are waiting for thy horn
To chase the doe of heart's desire
Across the heights of morn.

Oh, come, my Sun, and let me know
The rapture of the day!
Oh, come, my love! Oh, come, my love!
Thou art so long away!
—Richard Hovey (1864-1900)

Star Keeps Play Record Clean

Rather than risk marring her record of never having had a failure, Ina Claire, Broadway star, above, has done an unusual thing by having her play, "The Gaoler's Wench," scrapped before it reached Broadway. The play was given only a week's tryout in Brooklyn.

GIRL, HYPNOTIZED, REGAINS MEMORY

Miss Louise Gibson, 17-year-old Rochester high school girl, the amnesia victim whose identity was discovered through hypnosis employed by Dr. George W. Stevens, Flint psychiatrist, today is back in her home, which she left after a quarrel with a young man.

Dr. Stevens, who termed the girl's case as "very rare," decided to use medical hypnosis when other means of solving the puzzle of the girl's lost memory had failed.

Under the hypnotic spell the young woman began to talk in the women's detention room at police headquarters. She related having quarreled with her sweetheart in Rochester, and said she had told him she would run away. Then, she said, she boarded an interurban car and came to Flint. She declared her memory failed her when she left the interurban. She also gave the name of her parents, Mr. and Mrs. Henry Gibson, and their street address in Rochester. The girl's mother came to Flint and took her home from the Hurley Hospital, where she had been placed for further observation after awakening from a natural sleep which followed the hypnosis.

Miss Gibson was found by Martin Day, a patrolman, huddled against a tree. He was attracted by the sound of her crying. The girl said she could not remember her name or anything about herself.

Movie Fashions

This girlish little frock worn by Lois Moran, cinema player, is fashioned of light blue silk crepe with bandings of dark blue crepe. The neckline is interesting, the two-toned trimming running toward the waistline, and a group of self-toned buttons finishing it. A light-blue hat with darker blue band and blue kid slipper complete the costume.

NEW M. E. A. HOME NOW OPEN

Thirty thousand teachers in Michigan have a new home. The Michigan Education Association has opened its new office building in Lansing. It is a three-story brick structure in American Colonial style, costing approximately \$73,000. It is nine blocks from the center of the business section.

The new building will house the offices of the executive secretary, Ernest T. Cameron; the assistant executive secretary, Miss Christina MacDonald; the Michigan Educational Journal, official publication, in charge of Mrs. Ceva Lock, and the Michigan Reading Circle, in charge of Miss Dorothy Keast. The third floor will be used by the Michigan Retirement Fund Board, of which Mrs. Georgiana Larabee is secretary. Room for expansion of association departments is provided.

Coincident with the occupancy of the office-residence is the appointment of Arthur H. Rice as managing editor of the Michigan Education Journal, and the enlargement of the service of the Michigan Reading Circle.

The Reading Circle will endeavor to supply at cost any of the 1,400 books on the preferred list for school libraries, published by the superintendent of public instruction. The purpose of the Reading Circle is to encourage young people to read good books. The movement was first known as the Michigan Young People's Reading Circle. With it was combined the Teachers' Reading Circle. It was taken over by the Michigan Education Association in July, 1928, although it had been affiliated with the association for two years.

Although the exterior of the building is in keeping with its residence environment, the building itself is designed and equipped for business efficiency. Aditograph interior telephone system provides direct communication among the departments and offices. The latest type of automatic elevator and oil heating system have been installed. The interior decoration scheme is tan and cream with trimmings in green and gold. The woodwork is in magnolia. There is a library and reading room, where copies of text and reference books will be available to teachers and a large committee room for educational group conferences.

HOUSEHOLD HINTS

MENU HINT

Roast Pork with Apples
Creamed Onions Mashed Potatoes
Cabbage and Green Pepper Salad
Marshmallow Pudding
Coffee

When the family has entirely gotten over the flu and all members are back on their jobs or at school, they need hearty food, especially if the weather is cold. Roast pork should not be served to an invalid, but with all strong and rosy, it makes an appetizing meal as one could wish, especially with apples, creamed onions, etc.

Today's Recipes

Marshmallow Pudding—Beat a cup of double cream until stiff. Add three tablespoons sugar and one-half teaspoon vanilla. Fold in these fruits—one cup malaga grapes, 24 marshmallows cut in pieces, one-half package pitted dates, one-half package figs cut in small pieces, one-half can shredded, drained pineapple, cut up one-half cup nuts; put in a cold place for an hour. Serve in individual glasses and garnish with cherries. This recipe will serve six or eight people.

Knee Cushion

To protect the knees when wiping up linoleum, make a cushion of black oilcloth, 15 inches square. Cover the edges with bright bias tape, leaving a loop on one corner so that it may be hung up when not in use, and stuff with cotton. This cushion will also be useful in summer when working among the flowers, and makes a nice, inexpensive shower present.

Seeks Solomon's Gold

Tales of King Solomon's gold mines have led Miss M. Kenyon, daughter of the director of the British museum, and two companions, from London, to explore the ruins of Zimbabwe in southern Rhodesia, Africa.

The World and All

By CHARLES B. DRISCOLL

FOR WISE CHILDREN

"Alice in Wonderland" is about the most entertaining book, all around, that I have read to my children. Entertaining all around, I say, because it entertains me even more than it entertains the children, and they didn't miss a line of it.

"Alice" is hard to beat, and maybe it never will be beaten. But there is no good reason why somebody shouldn't try his hand at doing something just as good along similar lines, modernized.

That's just what has happened. I've just finished reading to the children "Cinderella's Garden," by W. Macneile Dixon, published by the Oxford University Press, American Branch. I read it in chapter installments, one chapter each night, after the girls had been tucked in. It was great medicine.

Strange it is, but true, that the best books for children are books that make a strong appeal to adults. There is much sly satire in "Alice," and also

in "Cinderella's Garden," and this satire escapes the child, but the adult, reading the story aloud to the children for the story's sake, gets a great kick out of the satire that the children miss.

"Pilgrim's Progress" is a great book because it has a powerful appeal to the child and the adult alike. Hendrik Willem Van Loon owes much of his popularity to the fact that he can write history for children in language that is appreciated by the parents, too. Dr. William T. Hornaday's "Wild Animal Interviews" is popular because, while children can understand it and appreciate it, it conveys much valuable information to adults who like animals.

On my list of children's books "Alice" comes first, but "Cinderella's Garden" comes second, without any apologies whatsoever. And for reading aloud to modern American children, there is very little choice between the two. In fact, both are absolutely essential to the educational entertainment of modern children.

Living and Loving

By MRS. VIRGINIA LEE

Takes a lot of courage even for everyday living, doesn't it, what with the flu flooring the members of one's family one by one? Getting all set for a happy holiday, only to have one or more members of the family circle ill in bed, has been the experience of countless families this year. There is one thing that you must not do, which, I presume to say, the blessed doctors may not have stressed, and that is, worry while you're down and out. Make yourself realize that you're not in a normal physical or mental condition and consequently can't see things as they are. Therefore, crush down all tendency to mean, and know positively that when you are on your feet again you'll see your way clear to take care of things, whatever they may be.

"Dear Mrs. Lee: I am writing to you for advice. I am a girl 16 years of age, am going with a man 65 years of age. He is wealthy. He doesn't mind spending money on me. He wants to marry me. I am staying with my brother. He objects to me marrying. He says I am too young. Do you think it would be all right or just wait awhile?"

"Brown Eyed."

I should consider a man of 65 altogether too old for me to marry no matter how much money he had, Brown Eyed, and I have a son 19. So you can see how big your proposition would go over with me. Thank goodness you have a good brother who is not blinded by wealth. Sixty-

Lillian Gish is looking forward to starring in the movie which Max Reinhardt, famous German producer, is going to make in the United States. When she was abroad recently she visited Reinhardt to discuss the production with him.

Star Gazing

Max Reinhardt, world-famous German producer of spoken plays and pageants, master of spectacle, in the United States to make his first picture, told me he will make a simple picture. Scattering to the winds all flapdoodle concerning himself, he modestly says the picture may even be a flop. Which must about drive the movie company's press agents and those of the star, Lillian Gish, crazy. It probably will be an extraordinary picture—but award Reinhardt the palm for being the first director to declare he doesn't know everything. This from the producer of a thousand plays throughout the world!

With the dawn of the New Year comes word of new pictures from many studios. Among them:

Mary Astor in "New Year's Eve."
Monte Blue in the talkie, "Skin Deep."
Tom Mix's "Dude Wrangler."
George Arliss in "Disraeli."
Barbara Bennett in "Stepping High."

Lita Grey, who used to be Mrs. Charles Chaplin, says she is contemplating marrying Roy D'Arcy in March.

Hollywood is becoming known as "The Silent City." Since talkies have driven silence from the movies, studios have changed from bedlams to churchly sanctity.

Grant Withers is to play opposite Corinne Griffith in "Prisoners," by

Housewife Plans Her Silverware Collection

Silverware has a dual personality. First it represents a period in which it is made and second it reflects the character of the housewife. A preconceived idea of what style to use helps the homemaker immeasurably. Elsie R. Culbertson reveals some useful facts in an article for the January number of "Successful Farming."

"In selecting your silver pattern," she says, "it is well to consider it from the practical standpoint. A perfectly plain pattern shows scratches quite easily. Highly decorated pieces are rather difficult to keep clean and polished in the raised designs and they sometimes become darkened. A rather plain pattern broken with a simple design perhaps is the most practical." "Now that I have my silver," continues this "Successful Farming" writer, quoting a friend, "I am de-

termined to give it the best of care. I have found that it is best to keep it in dark flannel cases, or to wrap each piece separately in waxed paper. I try to be very careful in using silver: to wash it as soon as possible in warm soapy water, rinse it in clear hot water, and wipe dry while hot. If I do this and keep it in cases I very seldom have to use polish. One should not use polish excessively because with each polish a tiny bit of the silver is worn off. A very fine polish should be used and not the coarse, gritty kind. I have never found it necessary to use the "electrolytic" method of cleaning silver, and hope I shall not because it has its dangers. However, if silver is hopelessly tarnished it may be resorted to."

He: "I've come to St. Louis to make an honest living."
Her: "Well, there's not much competition."
