The recent news of the fire at the Fortnightly Club has caused a great deal of concern among the members and friends of the club. The Fortnightly Club, located at the home of Mrs. Corney, was visited by the fire. Those who know, real how this can happen to the club are still in shock and are grieving. We are relieved to know that the owner, Mr. and Mrs. Corney, are not affected by the fire.

First Spring Training Gets Under Way on Coast

Prospect of another favorable year for baseball is indicated by the United States bureau of sports.

The 1939 market supply of hops is expected to be the smallest in years, largely due to the fact that in 1921, the bureau says, there was no improvement in the forests of the western states, and the smaller demand for hops is anticipated. Hops during 1929 are expected to be of a quality considerably higher than in 1928.

Annual Statement
For Village of Gobles

In Compliance with Act 22 of 1882, R.S. Mich., for the year ending Dec. 31, 1928.

Tires for the new Ford are specially made to give long wear.

Though the Tire Force is designed to 30 or 45 lb. pressure, the ridges are ample square of much larger size and the proper density of the steel under the tire.

For best results, the tire Force is maximized by being inflated to 60 pounds pressure. This pressure is the proper one for all tires.

If a tire is punctured, repair it immediately. In the event of a puncture, the rubber is built into its six air bands of 35 pounds. These bands are the key to the tire. When these bands are punctured, it simulates the action of the tire, with consequent separation of the core.

At the end of 5000 miles, when you have the tire Force, when you have the Force, it is a good plan to have the tires turned over and the Force re-examined. This will prevent unnecessary wear.

When punctures come, as they will, any tire you will find the Ford tire Force is particularly well-equipped to make repairs quickly and at small cost. See him, too, for replacements. Then you will be sure of getting your Force of tires and the Ford car according to the manufacturer's specifications.

Netballing isn't just a game. It's a scientific art that can make you a better person in every way. Here's how to get started:

1. Find a coach. Look for someone who is passionate about the game and willing to share their knowledge.
2. Learn the rules. Understand the basic principles of the game and how to apply them.
3. Practice, practice, practice. The more you play, the better you'll get.
4. Stay healthy. Make sure you're eating right, getting enough rest, and staying active.
5. Have fun. Remember that netball is all about enjoying the game and having a good time.

As snow was falling round and round.
An angel appeared from above
With a promise of eternal love.

The snow and Jesus stood for a while,
But soon were swallowed up, for there
Three falling on her knee's heart,
Two fell from heaven in a gin.

Miniature 1928-1929 TALMUD TORA

"There is nothing new under the sun," is a statement as old as the world. The new era of this year, however, has brought forth a series of events that have been unprecedented in the history of mankind.

Goodwill in 1928 is born on the broad-shouldered, indomitable spirit of the American people, who, through the energy and ingenuity of their leaders, have been able to overcome the obstacles that have tried to stand in the way of their progress. This Goodwill is the result of the efforts of all the people, who have worked together to build a better world.

Dr. Porter, a Civil war sur-

vivor, in his speech on the occasion of the celebration of the 50th anniversary of the Civil War, expressed the sentiments of all America.

"Our country has never known anything like this," he said. "We have fought for our country and we have fought for our freedom. We have fought for our liberty. We have fought for our peace. We have fought for our prosperity. We have fought for our progress. We have fought for our future. We have fought for our world."

Dr. Porter said that the American people are the backbone of the world. He said that they are the only people who have the courage to stand up for what they believe in. He said that they are the only people who have the strength to stand up for what they believe in.

"Our country has never known anything like this," he said. "We have fought for our country and we have fought for our freedom. We have fought for our liberty. We have fought for our peace. We have fought for our prosperity. We have fought for our progress. We have fought for our future. We have fought for our world."

He said that the American people are the backbone of the world. He said that they are the only people who have the courage to stand up for what they believe in. He said that they are the only people who have the strength to stand up for what they believe in.

The incident of the Goodwill spirit is an example of the American people's determination to build a better world. It is a symbol of the American people's faith in the future. It is a symbol of the American people's hope for the future.

WEEK OF MARCH 18

A marked storm center is expected to be over most parts of Michigan during the opening days of the week beginning March 15. In general, colder conditions accompanying this storm will bring widespread patches of snow and chill through the middle of the week.

Precipitation will be moderately heavy at times and there is a chance of snow showers and perhaps some snow blizzards.

About Tuesday or Wednesday the snow will be gone but cold air will remain. Beautiful days will follow, but the cold will hold for several days. sunny conditions are expected to be the rule during the middle of the week.

We look for fair and cold weather all week long except for a snow shower or two which will not be severe before the weekend.

Best Time This Week

For fishing: fishing will be excellent Monday, 9:18 to Wednesday, 9:18, 1:52 to 6:46 at 6:46, then 9:18 and 9:18. For fishing: March 18 and 11.

Old Dogs Can Be Taught New Tricks

Extension work on the college and extension work in connection with health service are being done on a smaller scale in the counties of the University of Michigan. In the county of Washtenaw, there is a great deal of interest in the work and the colleges are doing a good job.
