### LOCAL BREVITIES

Arvin Myers is home again and looking fine.

Herman Theophile was calling on friends here over the week end.

Harry Bingham left yesterday for Charlevoix to resume his school duties.

Mrs. D. G. Huhn of Saranac was a week end guest of her daughter, Mrs. J. B. Travis.

Ed. Doe drove Mrs. Doe to Port Huron, Monday, where she has resumed her school duties.

Masters Junior, Bobby and Richard Watson of Kalamazoo are spending a few days at Ed Covey's.

One of Mrs. Grauman's daughters of Kalamazoo has been quite ill at her mother's and is gaining very slowly.

Mr. and Mrs. Clarence Sheldon accompanied Pansey back to Romeo Thursday, to stay with her another school year.

Mrs. Nellie Pierrard who has been spending the month of August with relatives and friends left Sunday for her home in Hollywood, California.

Week end guests at the home of Mr. and Mrs. Frank S. Powers, Gerald Powers and friend, Miss Kathern Palmer and Mr. and Mrs. Arthur Davis of Kalamazoo, Mr. and Mrs. Barden and son, Fred of Jackson, Mich. Labor Day Mr. and Mrs. Floyd Barden and daughter and husband of Wauseon, Ohio and Mr. and Mrs. Wes Milner of Fayette, Ohio called on their way home from a trip North.

The following were week end guests of Mr. and Mrs. Richard Parks: Mr. and Mrs. Chas. Clough and sons, Robert and Donald from Spokane, Wash., Frank Enos and Mrs. Boman of Flint, Mr. and Mrs. L. R. Speese and daughter, Viola from Benton Harbor, Clifford Bingham from Milwaukee, Mr. and Mrs. Irving Parks of Fenwick, Mich. and Mrs. Julia V Gibson of Jonesboro, Ark.

Labor Day at Barbers proved another real battle. The American Oils came loaded to win but had to be content with the small end, 5 to 4. They fought hard to the last minute and missed tying the score in the ninth by only two jumps. We'll venture that no better game was played anywhere than this one. See the Ramblers try to break Base Line's winning streak next Sunday at this popular resort.

East Grand Rapids proved a disappointment Sunday when they came without a pitcher and the first baseman substituted for six innings and with indifferent support allowed Base Line 11 hits and 10 runs. An outfielder finished the game and stopped the scoring. The visitors in turn made 6 runs with only 6 hits, 3 passes and 3 hit by pitcher. We understand that Reigle who pitched for the locals was the one the visitors intended to use but previous contract mixed things a little all around. Grand Rapids Ramblers, one of the city's best Sunday will make the locals step to win.

Carleton Van Voorhees left Sunday p. m. for a ten days trip to Richmond, Va. as a guest of the Atlantic Life Insurance Co. of that place. This trip is given by the company, with all expenses paid, in recognition of the volume of business done by him before Aug. 1, 1929. Outstanding features of the trip are a visit to the historic shrines of Jamestown, Williamsburg and Yorktown and two days of entertainment at the Hotel Cavalier at Virginia Beach. Carleton is well known in local insurance circles and his many friends are congratulating him upon earning this trip.

He with Clarence Merrifield and two other young men of Kalamazoo are making the trip by auto.

Homer Connery is home from Ann Arbor.

Mrs. Ray Wise is visiting her sister in Milwaukee.

Myrtle Clark has returned to her school work at Detroit.

The Harrelsons are home from Iowa after a fine vacation.

Mr. and Mrs. VanStrien spent Sunday and Labor Day at West Baden, Ind.

Mr. and Mrs. McCune of Detroit were Sunday guests at the Fairfield and Davis homes.

Mrs. S. E. Loveless and sister left yesterday in their new Buick for a trip to Montreal.

Zoe Herman has returned to her home in Manchester after visiting her sister, Mrs. Gamboe.

The Sunny Day Club will meet at Mike Mahieu's Thursday, Sept. 12. All members urged to be present.

Clayton Stafford, Myron Pilbrow and Don Barber are with James, Jr. at the Lake Mill home of the Hartley's this week.

Albert Chase, secretary and treasurer of the Tri-County Telephone Co., was calling on friends in town Saturday.

Mr. and Mrs. M. H. Kruse and Mildred Alway of Chicago were week end guests at Ed Alway's and at their Base Line cottage.

Sunday guests at the home of Frank Austin were his daughter, Margaret and her friend, Mr. William Boorke, both of Adrian, Mich.

Mrs. Ila Yunker entertained several ladies at bridge last Wednesday in honor of her guest, Mrs. Simmons of Chicago. A fine time is reported.

Mr. and Mrs. Willie Wesler, Mr. and Mrs. Art Stineman and Herbert Rhodes returned Monday from Niagara Falls where they spent the week end.

Mrs. Nina McElheny entertained several tables of ladies at bridge Friday afternoon, honoring Mrs. Ileta Schutt. Another pleasant time is reported.

Charles and Frank Petty attended an all day radio school at Grand Rapids last Friday. The boys are determined to be fully efficient in all radio service.

Mrs. Glen Camfield and children returned to their home in Elgin, Ill. last Friday, after spending the past three weeks with her parents, Mr. and Mrs. Bud Keller.

Mrs. O. E. Harmon, for many years a resident here, but later of Kalamazoo, passed away suddenly at her home in Kalamazoo, Saturday. She has many friends here who will learn with regret of her death.

Mrs. Ernest Beardsley, who has been ill at the home of Edward Beardsley for several weeks, underwent an operation at Bronson hospital, Kalamazoo, Tuesday. Although it may not be very serious it will keep her there for quite some time.

Mrs. Lila and Miss Lillian Calkins from Longmont, Cal. were surprise visitors with their new Marmon car at Mr. Edward Beardsley's last Wednesday evening. Miss Calkins is a nurse at University hospital, Ann Arbor.

A. M. Wilcox, Donnetta and Harold arrived home from the west last Thursday and report a most wonderful trip in a wonderful country and all relatives and friends coming fine. Mrs. Wilcox stayed for a longer visit with her son, Monroe and family.

Last week end took most of our summer colonists but some are still with us and others will come for short vacations later. We are sure sorry to see these people go as it reminds us that another summer is passing and the winters are long until we meet again.

Still hoping for rain.

Ernk Philips has moved into the Felts house in town.

Mr. and Mrs. Clarence Quick of Kalamazoo visited at Geo. Bell's Monday.

Mr. and Mrs. John McDonald and Sara Jane, spent the week end in Eaton Rapids.

Mrs. Ann Hasker, an old friend of Kankakee, Ill., visited Mrs. Knowles over the week end.

Rev. and Mrs. Penoyer announce the birth of a daughter, Joan Laurie Monday, September 2, 1929. Congratulations.

B. G. Wait, for many years a resident of Bloomingdale, passed away suddenly at his home there, Tuesday evening.

The Bank has decorated their entrance. The work was done by Emil Keller, and as usual with his work it is most attractive.

Gobles schools opened Tuesday with a good attendance in all departments. There are more pupils paying tuition this year than ever before which is the real proof of the school's merits.

We are pleased to announce the marriage of Miss Florence Hudson, daughter of Mr. and Mrs. Earl Hudson, to Mr. Olin Brainard of Kalamazoo. The bride is one of our popular Gobles graduates and has a host of friends who will join with the News in best wishes.

Mr. and Mrs. James Neeson entertained seven Michigan Central section foremen, several other employees and Roadmaster Burns Saturday evening in honor of Mr. Neeson's father of Williams, who has been with the company for 39 years and Saturday was retired from service and placed on the pension roll.

### BASE LINE

Guests of the week at the Wilmot home were Ralph Havens and family of Los Angeles, Calif., John Clinton and family of Detroit and the Philly sisters of Chicago.

Mrs. Georgette Smith of Bloomingdale called on Mrs. Merriam Sunday and Fred Winkler of Kalamazoo called there Monday.

Mrs. Walker called on Mrs. Merriam Tuesday afternoon and Lester and Mable Woodruff called on her Wednesday.

Mrs. Sadie Smith has been entertaining a sister and brother and their families from Chicago the past week.

Mr. and Mrs. Elmer Fuller of Bloomingdale visited Sunday at the Wilmot home.

Mr. and Mrs. Clair Woodruff were out from Kalamazoo for Labor day.

Elmer Forster has moved his family to Gobles and will continue his work in Kalamazoo.

### BROWN DISTRICT

Several families from this neighborhood attended the Allegan fair last week.

Week end guests at John Thayer's home were Mr. Laudbeck and son of Schoolcraft, Mr. and Mrs. Don Thayer and family of St. Louis, Mr. Randolph Thayer of Detroit, Mr. and Mrs. O. B. Powell and Jewell Powell of Miami, Florida.

Julia Watts spent Monday with Leva Camfield.

Sunday guest at Geo. Pike's were Mr. Robert and Frank Worthing, Mr. Church and son of Hillsdale and Donald Post and lady friend of Battle Creek.

Mr. and Mrs. G. Pike called at Chas. Woodard's Sunday evening.

Mrs. Davis and Mr. Conover of Detroit are visiting at Dave Gilbert's.

Harley Camfield spent Labor Day at F. E. Camfield's home.

Patronize our advertisers.

### KENDALL

Leone Youngs had her tonsils removed recently at her home.

Mr. and Mrs. Carl Harris of Kalamazoo spent last Thursday evening with her parents, Mr. and Mrs. P. M. Waber.

Mrs. Diana Kirshman of Newark N. J., who has spent the last three weeks here visiting her parents, Mr. and Mrs. Henry Young and other relatives, returned home Sept. 1. She was accompanied as far as Niagara Falls by a brother-in-law and sister, Mr. and Mrs. McAlpine, of Michigan City, Ind.

Mr. and Mrs. Owen Emmons and family who have been visiting at Dr. Wilkinson's, returned home via Albion, Tuesday. The Sunday School pupils of the M. E. Church gave them a farewell party at the home of Mrs. Walter Becker, Monday afternoon.

Mrs. John Shirley of Kalamazoo and Mrs. Bertha Shirley of Kendall spent Wednesday with Mrs. Charles Adams at Bloomingdale.

Clyde Laversee and family spent a part of last week visiting in Detroit and attending the State Fair. They returned home Friday.

Mr. and Mrs. Russell Smith and children returned to their home in Clawson, Monday. Mrs. Alma MacGregor accompanied them for a 10 days visit.

Mr. and Mrs. Henry Waber, daughter, Louise and son, Clarence came Saturday from Kalamazoo to stay over Labor Day with his mother, Mrs. M. K. Waber.

Mrs. Clinton Myers of Bloomingdale spent a few days visiting her son, Raymond and family in this village.

Virginia Green, daughter of Mr. and Mrs. Fred Green, spent last week in Kalamazoo, the guest of her uncle Milton and other relatives.

Mr. and Mrs. Irving Cole of Marshall came Saturday evening to spend Sunday with Mrs. Cole's mother, Mrs. Cestia Lewis.

Mrs. Henry Biedenkopf of Fort Wayne, a travelling salesman, took his nephew, Eldon Ruell, on a weeks trip through the country, last week.

Otis Pifer of Kalamazoo was in town Sunday, calling on old friends.

Mr. Lyall Nordahl came from Frankfort, Mich. to teach our 5th 6th, 7th and 8th grades this year. Mrs. Elta Chamberlain will teach the Quail Trap school.

Mr. and Mrs. D. F. Jones of Elwood City, Pa. visited at the home of James Heffernon over the week end.

Neighbors and friends turned out in time Monday afternoon to help put out the grass fires which were fast sweeping towards the old Crosby buildings northeast of Kendall and also threatening the Jay Yount farm. Only very prompt action on the part of those present prevented a serious conflagration.

Glenn Wilkinson returned to his school work at Cooley High in Detroit, Monday.

Mr. and Mrs. Clarence Blanchard and family who have been occupying the Bowles cottage at North Lake the past two weeks returned to Detroit Monday to his school work at Cooley High.

### Gravel Notice

Starting April 15, 1929 all grout gravel removed from my pit will be 50c per cubic yard and please make arrangement before hauling same.

J. R. VanVoorhees.

### Card of Thanks

We take this opportunity for thanking all who assisted at the time of our loss by fire and afterwards. Their kindnesses are greatly appreciated.

Mr. and Mrs. Ed. Markillie.

### Business Locals

Veal calves wanted. See or phone Lester Woodruff.

Home in Gobles for sale. Inquire at Dixie Inn.

Two used baby carriages for sale. Inquire at Hdwe store.

Beautiful 3 piece Walnut Bedroom Suite for only \$89.00. This is a real buy. Chaffee Bros. Furniture Co., Allegan, Michigan.

For Sale: Oak sideboard, chest of drawers, small dresser, rockers and center stands. Elma Carpenter. 2t

Yellow Freestone peaches for sale at Lauren Babbitts. Call 3K Bloomingdale.

For auto insurance see Stanley Styles.

50 cords good dry hard wood for sale. See Frank Schoolcraft 1 mile south of Kendall. 2t

Oak Piano in fine condition, just the Piano for beginners for only \$134.50. Terms \$5.00 down, balance easy terms. Chaffee Bros. Furniture Co., Allegan, Michigan.

Kitchen cabinet, Ice box and heating stove for sale. Mrs. Jud Wormeth.

Rosén rye and vetch seed for sale See Frank Veley.

Must sacrifice two choice lake front lots at Barber's Bathing Beach. See or phone Ed Alway. 2t

Many women can more 95 c apples than usual now. Cheap white sweet onions go well instead of so many potatoes. Nursery has both.

Chickens for sale. Mrs. C. Lamphere, Pine Grove Corners.

### WAVERLY

Mrs. Arthur Herfon and granddaughter, Marian spent the week end in Kalamazoo.

Mr. and Mrs. Roy Sage accompanied their daughter, Mildred to Kalamazoo last Saturday and had her tonsils and adenoids removed. She is doing nicely.

Leon Laws and family of Grand Rapids spent the week end at John Russell's.

R. E. Sage spent a part of last week at the homes of his daughters, Florence Schwieman and Alberta Coffinger of Kalamazoo. Mr. and Mrs. Jess Coffinger accompanied him home Sunday.

Lynn Simmons of Lansing has bought the Frank Clark farm.

The house on the farm formerly owned by Will Carr in the Austin district burned to the ground Sunday afternoon. Cause of fire unknown. It was unoccupied.

Ed Markillie and family are nicely located on the little place west of Armstrong Corners known as the Charles Baker farm.

The Christian Endeavors will hold their social and business meeting at the home of Floyd Stauble Friday evening.

Mr. and Mrs. J. A. White spent Sunday at Bert McCarty's of Glenn.

Mr. and Mrs. Tinkham, Mrs. Frie and daughter, Edith of Kalamazoo were callers at Ed Markillie's Sunday.

Mr. and Mrs. Seba Powers attended an I.G.A. convention in Indiana Monday.

Mrs. Meda Pearl Wiltse nee White of Chicago entertained some of the older and newer generations of the White-Emery-Powell families at Reece's cottage at Maple lake near Paw Paw last Sunday. Mr. and Mrs. John White of Paw Paw, Mr. and Mrs. C. H. White and son, Roy and daughter, Irene of Kalamazoo, Mrs. Martha Emery and daughter, Nellie of Kendall, Mrs. Eva Powell and daughter, Jennie of Kencall, Chas. Tabor, Fred Philley and Mr. Hadaway and daughters of Kalamazoo. All report a good time, plenty of eats and hope for another reunion soon.

### GOBLES NEWS

EVERY THURSDAY MORNING Entered at the Post Office at Gobles Mich., as second-class matter. J. BERT TRAVIS, Publisher. SUBSCRIPTION PRICE, \$1.50 A YEAR IN ADVANCE. IN CANADA, \$2.00.

2 months, in advance.....\$2.00  
4 months, in advance.....\$3.50  
6 months, in advance.....\$5.00

Copy for advertising must reach this office not later than Tuesday noon. All that comes in later can be laid one side until the issue of the following week.

Copies of the paper, 5c each. Copies of the paper are not included in obituaries or cards of thanks.

Wanted to Buy: an old fashioned long knife feed cutter. F. S. Powers, phone.

At Lancaster's Store, Saturday 3 p. m., I will sell Guineapigs; also rare old coin collection.

125 Wauchek strain white Leghorn yearling hens for sale. Good layers. See or phone W. A. Jacobs.

Fordson tractor, in good condition for sale cheap at Cash Supply.

Cows and horses for sale at Cash Supply.

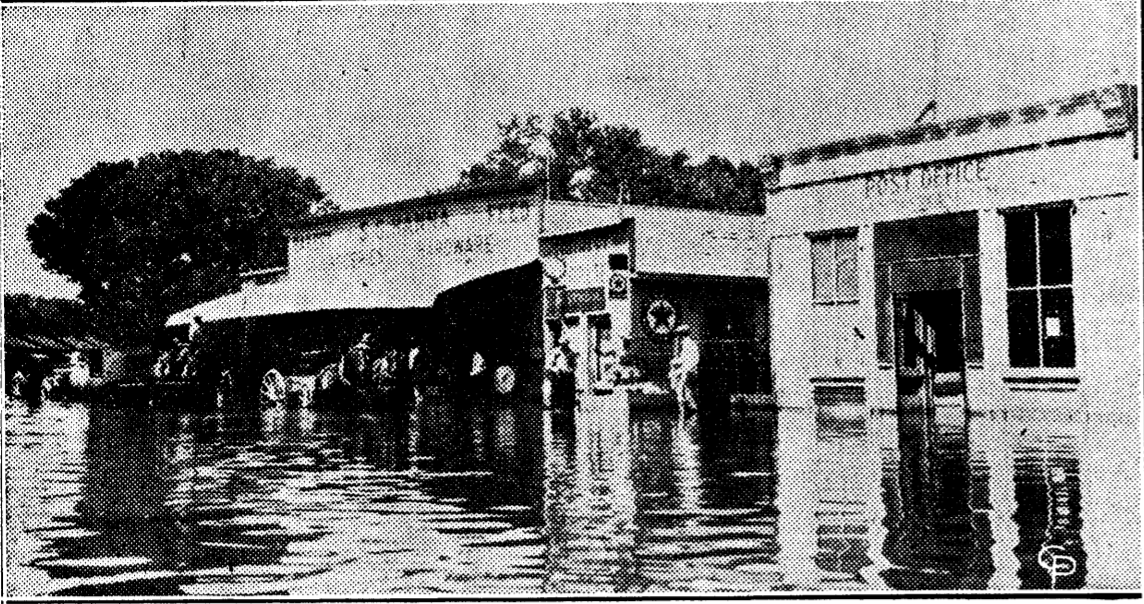

25 good ewes, and a stack of wheat straw for sale. See Mrs. W. H. Lewis, Kendall.

For well work of all kinds see Frank Veley. Call I. Stockwell.

6 pigs, 8 weeks old, for sale. John Staken, on Chet Wesler farm, 1/2 mile north of Veley schoolhouse.

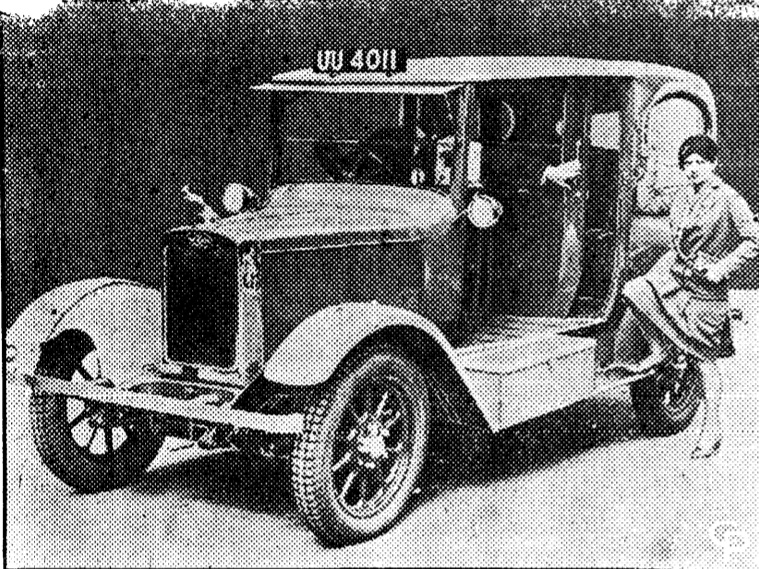

# CAMERA NEWS

## Rio Grande, On Rampage, Damages Ancient Town

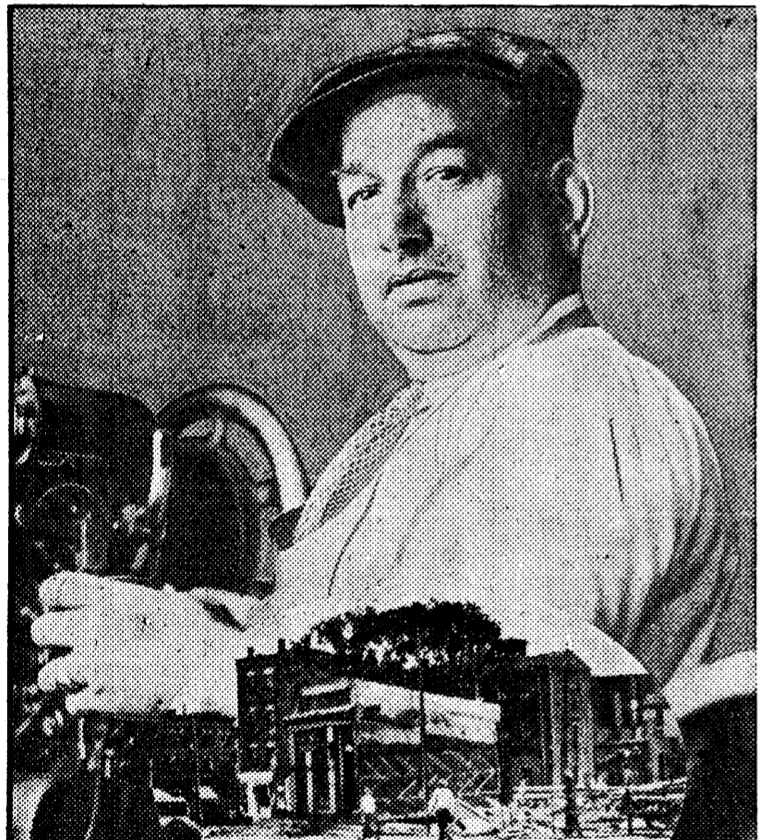

View of the main street in San Marcial, 300-year-old New Mexican town, damaged to the extent of \$500,000 when the Rio Grande went on a rampage and overflowed its banks. The buildings of the town are of adobe and are slowly crumbling away.

## London Has Latest in Taxicabs

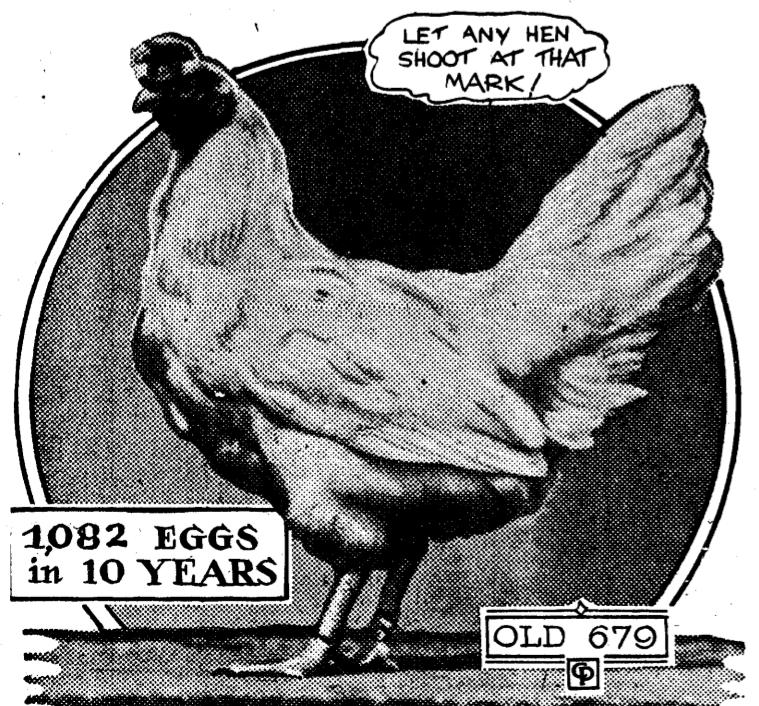

London's new two-seater taxis may invade the United States. Instead of a door, the cab has a sliding panel which can be opened by either driver or passenger.

## Sticks to His Last to the Very Last

Giacomo Como, above, proprietor of a dilapidated cobbler's shop, inset, in a building being torn down to make way for Yale university's great medical center in New Haven, Conn., has refused to vacate until his lease expires in 1932, holding up construction.

## Little White Hen Gives Advice

She has passed her tenth birthday, and this little White Leghorn known as Hen 679, who spends her time in the poultry yard of Oklahoma A. and M. college at Stillwater. Despite her age, Hen 679 recently laid egg No. 1,082. Her advice to young pullets for longevity is to lay at least 200 eggs her first year and to look like the pictures in the American Standard of Perfection.

## NITROGEN LOSSES MAY BE AVOIDED

Nitrogen loss from the soil by leaching is largely avoidable, say soil scientists of the U. S. Department of Agriculture, if farm practices are planned so as to prevent the accumulation of nitrates during the late summer. This can be done by planning the rotation so that a crop in an active growing condition is present at the time nitrate formation is proceeding most rapidly, or shortly thereafter. Nitrate formation is usually at its maximum during the hot summer months. Cowpeas and soybeans are good hot weather crops, and rye is an excellent fall and winter clover crop. Cowpeas, soybeans, velvet beans, wheat, or rye may be drilled or sown between rows of corn after the last cultivation. These catch or cover crops not only protect the soil from erosion and leaching, but may be used as hay, pasture, or green manure crops.

## Certain Odors Keep Out Rats

Rats appear to have a strong aversion to certain odors, such as creosote, carbolic acid, and other coal and wood-tar derivatives, kerosene, and peppermint and wintergreen oils, and this fact may be taken advantage of in protecting stored grain from the rodents, or in preventing reoccupation of old rat burrows. Flake naphthalene scattered on the floor and over the bags of sacked grain will keep away the rats and won't injure the seed. Non-odoriferous compounds that rats avoid can be used where an odoriferous material would be objectionable, as where foodstuffs are kept. Among these are powdered sulphur, lime, lye, and coppers. Sulphur, particularly, has been found to be excellent in protecting stored grains from the ravages of rats.

## More Moose Seen In U. P. This Year

Moose seem to be more in evidence this year in certain parts of the upper peninsula than at any recent time. At least two of these animals have figured in automobile accidents on upper peninsula highways during the past three months, and several others have been seen.

Two mappers of the land economic survey operated by the conservation department recently reported meeting a large bull moose with five-foot antlers in Luce county on the Two Heart river near Hemlock Dam.

If the reports of moose this spring and summer indicate an increase of these animals north of the Straits, some hunters may get the surprise of their lives this fall should they encounter in place of the white-tailed deer, the six-foot spread of an antlered bull moose. Lest the finger itch too strongly on the trigger on such an occasion, let it be remembered that the moose, all moose, are strictly protected in Michigan.

## Towers Visited By 12,000 Last Year

Over 12,000 people visited the fire towers in Michigan last year, and in spite of the slightly precarious climb by means of an unguarded steel ladder, mounted to the tops. This number represents only those who reached the "crows' nests" and signed the tower registers. Many more were satisfied to remain at the bottom. These fire towers are serving as one of the best means of cautioning the public against the danger of fires, according to the forest fire division of the conservation department which has control over one hundred and forty towers located on strategic positions throughout the state.

The division is encouraging towermen in their effort to beautify the land immediately surrounding the structures. This work is done by the towerman in times of low fire hazard when constant attention is not required on the tower.

## Gets Brown Trout Weighing 5 Pounds

The up-the-river honors appear to be held by William Nelson, farm youth of Garfield township, near Traverse City, who took a five-pound German brown trout measuring 24 1/2 inches in length from the Boardman river at the Michigan Public Service Co.'s dam five and one-half miles from the city. It is the largest German brown trout on record from the Boardman this season, according to the statistics at Trude's, where it was on display.

The youth took his prize still-fishing with grasshoppers.

## Osceola Hay Crop Best in Ten Years

County Agent Ralph Trafelt reports the 1929 hay crop in Osceola county exceeds all yields for the past 10 years. However, other crops have suffered from lack of rain. Potatoes benefitted from rains Wednesday. Oats and corn are about average and wheat is in excellent condition.

"They say over at the frat house that you are like Dempsey."  
"How come?"  
"You both pack a wicked sock."

## Overcrowding Of Muskrat Farms Is Often Disastrous

Muskrat farmers should maintain a careful balance between the available food supply and the number of rats in a given enclosure, says H. D. Ruhl, of the game division of the conservation department. Evidence of overcrowding has already been noticed on rat farms in Clinton, Saginaw, Kalamazoo, St. Joseph and Jackson counties. In these places the houses had been built last fall where the vegetation was heaviest. Over considerable areas the cattails have now been entirely killed out.

When the increase of stock in an enclosure begins to crowd the food supply, either the farm area should be enlarged, some of the rats should be removed, or artificial food should be provided. In many cases muskrat breeders have had good increases during the first year or so, and have not trapped their enclosures in the hope of further increasing their breeding stock. During the third or fourth year, however, the rats often decreased instead of continuing to increase. In most cases this was due to shortage of food.

Such shortage, says Ruhl, may result in an increase of losses from disease, makes rats very active in trying to escape from their enclosure, and may even involve straight starvation, even though the marsh may still be green with plants which supply little or no food for muskrats.

## Make Horse Eat Slowly To Keep Him Healthy

The method of feeding, as well as the feed itself, has a good deal to do with keeping the horse in good condition. A horse that bolts grain should be made to eat it slowly. This may be done either by spreading the grain out in a large, flat box, or by placing several smooth stones in the feed box or by mixing the grain with bran, cut hay, or similar feed. Some horses waste hay by pulling it out and trampling it under foot. This is often caused by feeding two kinds of hay, one of which is especially palatable. In his case, the hay may be fed so that the horse will eat the more palatable first; or the good hay may be withheld until the other is eaten. Over-feeding, rather than under-feeding, is a common mistake when horses are working irregularly. The amount of feed should vary not only between winter and summer but from day to day, according to the work.

## Tests Alone Give Livestock Truths

Livestock are not necessarily free from disease because they are fat, sleek, and apparently in good health, and it is well to keep newly purchased animals under observation for a few weeks before adding them to the farm herd. Many tuberculous cattle that appear to be in perfect health transmit the disease to other animals. The tuberculin test is the only means of detecting the disease in the early stages. Animals infected with infectious abortion seldom seem to be sick, and the disease can be diagnosed only by blood tests, bacteriological examination, or the act of aborting. Animals that have only mild attacks of diseases may spread infection that causes severe attacks in other animals.

## Ammonium Sulphate Destroys Weeds and Helps Lawn to Grow

Anyone who has weeded the lawn by hand methods will be glad to learn that ammonium sulphate, applied broadcast to the lawn, discourages the weeds. The acidity imparted to the soil checks the weed growth, and at the same time the ammonium sulphate stimulates the grass. This fertilizer salt is a combination of ammonia and alkaline compound, and sulphuric acid, and is particularly desirable for grasses that have a preference for acid soils, such as the bents and fescues. If ammonium sulphate is applied in summer when the soil has begun to dry out, 1 or 2 pounds to 1,000 square feet is enough. A good way to apply it is to mix it with 2 or 3 times its weight of cotton-seed meal, broadcasting 3 or 4 pounds of the mixture to 1,000 square feet. The cottonseed meal furnishes some nitrogen in an organic form and some slowly available phosphoric acid and potash.

## Silage Fed to All Livestock

Almost any green crop can be made into silage successfully if proper methods are used. With hollow-stemmed plants such as the small cereal grains, care should be taken to expel the air by cutting fine and packing firmly. Some crops like legumes are deficient in the fermentable constituents so desirable in the production of silage that is palatable and possesses good keep qualities. Other crops like the sorghos have so much sugar that unless cut at a mature stage they have a tendency to make silage that is too sour. Silage is suited for feeding to all livestock. Dairy cows need it especially, as its succulence is helpful in producing large quantities of milk. It is a cheap feed for beef cattle. Sheep like it and it is well suited to their needs. Even horses and mules may be fed limited quantities of silage with good results.

## Poultry

### RELATION BETWEEN SOFT SHELLED EGGS AND VITAMIN D

Laying hens kept behind ordinary window glass for a period of four months or more, thus being denied the essential ultra-violet light to supply the vitamin D for lime assimilation, will ordinarily lay thin shelled eggs. It has been a common complaint in the central west that March eggs are easily broken.

Formerly egg buyers attributed the large number of broken eggs received in early spring to rough roads. The real trouble is usually the poor quality of the egg shells. Hens suffering from avian rickets (lack of vitamin D) lay a large percentage of very thin shelled eggs. In studies reported by the Wisconsin station about 28 to 40 per cent of the eggs laid by hens kept in houses with closed windows were cracked or broken, while only 2 per cent were defective that were laid by the hens that were exposed to the direct rays of the sun. Breakage consists in part of paper shell eggs so soft they cannot be removed from the nest.

In a number of instances commercial flocks have been kept behind closed glass windows until symptoms of egg paralysis or rickets have been noticed. When the owner learned the cause he turned the hens out of doors, even in zero weather. This resulted disastrously. On the other hand, similar flocks that were gradually accustomed to the cold were greatly benefited, and suffered no ill effects.

Leghorn hens at the Wisconsin station have been allowed to run out of doors any day at will throughout the winter. They laid well, and seemed to enjoy themselves, even at zero temperatures, when they had a straw pile to scratch in.

One should not get the idea that there is virtue in cold temperatures. The poultry house should be well insulated, well ventilated and dry. But in addition the flock must have ultra-violet light, which can be furnished cheapest by opening the windows or providing an outdoor scratching pen. For some people the opening and closing of the windows during the middle of the day will be too troublesome a task. Under these conditions the heavy laying flock will have to have the vitamin D factor provided by means of a glass substitute that permits the ultra-violet to be transmitted; or fed the vitamin D in their ration in the form of cod-liver oil or similar products rich in the antirachitic factor. The desired result can be arrived at in either of these ways. The essential thing to remember is that the antirachitic vitamin must in some way be supplied or ill effects will result.

### CHICKENS NEED PROTEINS NOW

Eggs are scarce on most farms during the fall and winter because the chickens do not eat enough protein for rapid growth during the summer. An egg, aside from the shell, contains 13.4 per cent protein, while poultry flesh contains 21.5 per cent protein.

A mixture of corn, wheat, and other grains contains only about 10 per cent protein and should be supplemented with a mash containing a high-protein feeds. Proteins from animal sources are generally better than those of vegetable origin.

Meat scrap, fish meal, milk and tankage are good sources of animal protein. Such feeds not only increase egg production, but lower the cost of production.

### CHANGE NOTICED BY UNCLE SAM IN EGG LAYING

Poultrymen, by careful attention to breeding and management of their laying flocks, have effected a definite change in the egg market. According to H. L. Shrader of the United States department of agriculture, this is evident as to both seasonal and annual production.

"The market receipts of fresh laid eggs during the late summer and fall months have been increasing the last few years," he comments. "This means that the pullets are being hatched and are maturing earlier, but it also denotes improved efficiency, because the birds are laying more eggs when prices are highest."

From the standpoint of the consumer this tendency is of definite value. "Already we have noticed," Mr. Shrader says, "that the increased production in the season when eggs were formerly scarce has prevented prices from soaring to extremely high levels."

### GIVE YOUR CHICKS DRY SKIM MILK

Experimental work by state and federal research workers indicates the wisdom of feeding young chickens with a mash containing 40 per cent dry skim milk. This tends to prevent losses from coccidiosis. In general, high vitality is an aid in protecting animals against many parasites. Good feeding builds up an animal's condition.

### Mix Corn When Feeding to Hogs

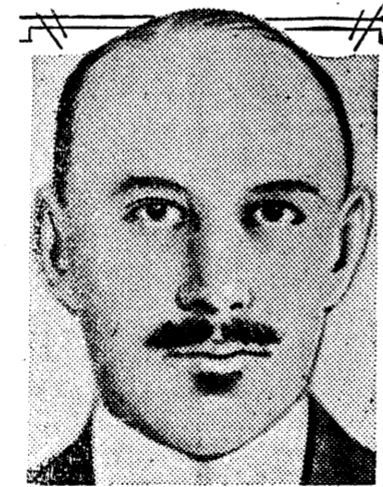

Although corn is one of the best fattening feeds for hogs, it is not an economical fattening ration when fed alone. It takes about 50 per cent more corn to fatten young hogs when they are fattened on corn alone than when they are fattened on corn balanced by some feed rich in protein, such as tankage, fish meal, or soybean meal.

## With 'Nothing' Left

Miss Harriet Camac of New York, who during a tour around the world left her auto in California, her jewels in Honolulu and most of her luggage in Singapore, arrives in London with the minimum of luggage as the first passenger to complete a flight on a commercial plane from India.

## 'Moon Rocket' Isn't

The far-famed "moon rocket" of Professor Robert H. Goddard, above, of Clark university, Worcester, Mass., has developed Yankee conservatism and after years of experiment now has no higher aspirations than the earth's belt of atmosphere.

## Fortune for 'Peaches'

"Peaches" Browning, estranged Cinderella girl of Daddy (Edward A.) Browning, of New York, has won a million or more from him by having her dower rights in valuable real estate of Browning's confirmed by court order. The real estate is worth considerable more than \$2,000,000 and will provide a large income even after Daddy's death.

## BOUNDARY LINE IS NOW BEING MARKED

Down through timberlands and mining ranges along the Wisconsin-Michigan border a party of surveyors is marking for all time the line which separates the two states. At intervals they are placing granite markers to show the boundary line. The markers are, in effect, tombstones raised to Michigan's dead hopes for a court decision that would give her part of the present state of Wisconsin.

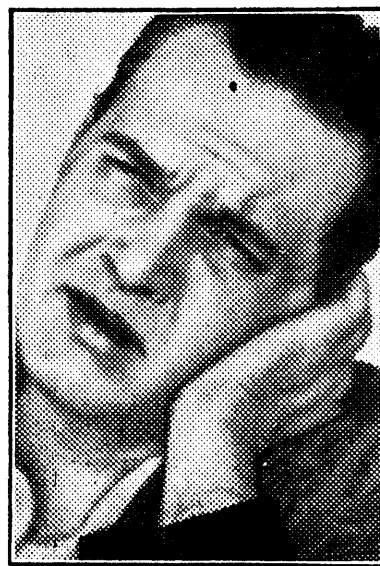

The boundary disputed started way back in 1835 when Michigan made strenuous claim to land on which the city of Toledo now stands. The federal government, to appease belligerent Michigan at the time, offered her that part of the Wisconsin territory which is now the upper peninsula of Michigan. The tract was unattractive then, but Michigan in 1837 reluctantly accepted the peninsula in lieu of the Ohio border tract in order to achieve statehood.

Michigan was awarded all land north of the Montreal river, but Captain Thomas Jefferson Crom of the war department held this line impossible and in 1840 traced another Wisconsin-Michigan boundary line. Crom's line was accepted when Wisconsin became a state in 1846. The variance between the two boundaries involved approximately 1,000 square miles near Lake Superior and certain islands in Green Bay.

When the upper peninsula was opened to lumbering 60 years later and rich mineral deposits and water power possibilities discovered the lower peninsula's apathy disappeared. Michigan then started her now celebrated boundary argument, which finally ended in the United States Supreme Court in 1926 with a decision in favor of Wisconsin. Appointment of a joint commission by the two states to mark the line was the last step in the case.

## Rounds Out 44 Years Of Service for P. M.

Marine Hektor, veteran engineer, has rounded out 44 years of service with the Pere Marquette Railway Co. He began his career as fireman on the old Chicago & West Michigan railroad and after serving in that capacity nearly five years was promoted to the position of engineer. He has piloted engines for nearly 40 years, Hektor figured in only one wreck, in which he was held blameless.

**MOST** people depend on Bayer Aspirin to make short work of headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Bayer Aspirin can bring complete comfort without delay, and without harm; it does not affect the heart. In every package of genuine Bayer Aspirin are proven directions with which everyone should be familiar, for they can spare much needless suffering.

**ASPIRIN**  
Aspirin is the trade mark of Bayer Manufacture of Monaceticacidester of Salicylicacid

## IVAN THE TERRIBLE

## STATE VALUATION SHOWS INCREASE

The assessed valuation of the state of Michigan as determined by the state tax commission subject to review by the state board of equalization amounts to \$8,570,675,000, or an increase over the equalized valuation of 1928 of \$369,236,080.

The figures set by the tax commission represent an increase in value of 23 counties over 1928, a decrease in 48 counties, and increased percentage of the state tax in 7 counties and a decrease in 76 counties.

The recommended valuation as set by the tax commission for review by the state board of equalization in other counties includes the following figures: Clare, \$6,800,000; Clinton, \$36,750,000; Eaton, \$48,020,000; Gladwin, \$8,100,000; Gratiot, \$48,580,000; Ionia, \$43,900,000; Ionia, \$43,900,000; Isabella, \$28,000,000; Jackson, \$146,200,000; Livingston, \$35,000,000; Shiawassee, \$51,000,000.

## Grand Rapids Cannot Sell Exposition Site

No authority is vested in the city commission to accept an offer of \$250,000 cash, made by Harold T. Fletcher, realtor, on behalf of a client, for the west end of Lyon street, which Gustave A. Hendricks is attempting to vacate as a part of a site for a \$3,000,000 furniture exposition building, according to a ruling by City Attorney Ganson Taggart. The attorney contends that property is worth \$500,000 on the basis of Mr. Hendricks' appraisal of his adjoining holdings, but the attorney explained the commission could not accept any price for the property.

"In time of trial," inquired the speaker, "what brings us the greatest comfort?" "An acquittal," interrupted a man at the back of the hall. —Montreal Star.

## 16 U. P. Airports Under Development

The upper peninsula is developing some 16 landing fields throughout "Hiawathaland," the recent 1,000-mile air tour about the peninsula revealed. None of the fields has been given a rating by the United States Department of Commerce as a modern airport, but most of them have possibilities of being developed into adequate air terminals.

In 1929 there were but two regular landing fields in the peninsula. In one year, this number has been increased to 16. Credit for this expansion is largely due to the efforts of the Upper Peninsula Airways Commission formed by Frank L. Betts, of Menominee, the peninsula's representative on the new Michigan State board of aeronautics, and other air-minded citizens of this northern county.

Starting at the far eastern end of the peninsula, the new municipal airport is being developed by Sault Ste. Marie and Chippewa county. This field comprises 160 acres and lies about one mile and a half south of the Soo business district. Runways consist of an 1,800-foot north and south strip and two 2,000-foot strips running northeast to southwest and southeast to northwest. The field is on a slight elevation.

St. Ignace, down on the Straits of Mackinac, has had to carve its field out of the forest one mile north of the city. It lies just a short distance west of U.S. 2. An east and west runway of 2,200 feet, a north and south runway of 1,800 feet, and a runway southwest to northeast, of 2,400 feet, are included in this field, known as the Wing airport.

Newberry is working on a field five miles south of the town some 2,640 feet square with landing strips in all directions. Located two and one-half miles east of the city, Manistiquette has its field on an elevation between Lake Michigan and U.S. 2. North and south and east and west runways are each 2,200 feet in length.

Blaney airport, some 20 miles northwest of Manistiquette and adjacent to the village of Blaney, is one of the best fields in the peninsula. Runways are 1,340 feet north and south and 1,370 feet east and west. Bear Creek Lodge and a golf course attract air tourists to this field.

Other fields are located near Munising, Marquette-Negaunee-Ishpeming share field at Eagle Mills, L'Anse, Portage Lake at Houghton, Ontonagon, Wakefield, Iron River, Kingsford, Escanaba, and Menominee.

## Northern District Fair Opens September 9

The twenty-second annual Northern District fair, Sept. 9 to 13, promises to be memorable among all the fairs so far staged. The 1929 premium list now is being distributed. There are two new members on the board of directors this year, H. I. Barnum, agricultural agent of Missaukee county, and Dorr Stack, superintendent of Manton Agricultural High school.

New buildings have been erected and the old ones refurbished. Perry F. Powers, who several times has attempted to resign as manager of the fair, again has consented to carry on. He has been its chief supporter since its organization in 1907.

## FIRE HAZARDS GROW WITH TRAVEL INCREASE

Forest fire control in Michigan has become increasingly important because of the higher value constantly being placed on wilderness areas that are serving a large number of people for recreational purposes. With the thousands of acres of wild land in the state opened to travelers, the fire hazard has been materially raised to the point where nothing but an efficient organization can cope with the menace offered by uncontrolled forest fires. Besides the actual monetary loss from such conflagrations, the sight of blazing trees and charred stumps does not encourage visitors to those regions.

Today the Michigan forest fire division is a systematized organization capable of expanding at a moment's notice to deal with extraordinary conditions brought about by extremely hot weather or a series of fires. To maintain at all times a force of fire fighters large enough to handle the worst possible outbreak would require an unnecessary expense on the part of the department, but by the skeleton system which is in use, the expense of an effective fire division is cut to a minimum, says H. J. Andrews, chief of the forest fire division of the conservation department.

The division is in charge of a fire chief, and two assistants. Under the divisional head are two locomotive and two fire inspectors whose work covers the entire state. Then in each of the fifteen districts there is a district warden, who as a rule is largely concerned with law enforcement, and an assistant district fire warden whose main job is forest fires. Other employees in the districts are special fire wardens, emergency fire wardens, fire boss companies, towermen, and keymen. All told, there are approximately 1,000 temporary and permanent employees in the fire division. The majority of these are on duty only when actually called upon to fight fire.

The keymen are residents located at strategic points who can on short notice be depended upon to render assistance in times of extreme danger. It often happens that the place of special fire warden is filled from the ranks of the keymen. Emergency wardens, as their title indicates, have the authority to take charge of fire and fire labor whenever necessary.

Michigan's methods of fighting forest fires have proven their worth time and again, and it is seldom that disastrous forest fires threatening widespread destruction are now reported from this state.

## Consumers Is Given 30-Yr. Franchise By Special Vote

The Consumers Power company was given control of the Ewart power plant under a 30-year franchise by voters at a special election. The vote, cast by a small percentage of the qualified electors of this community, was 215 in favor of granting the franchise and 23 against.

The power company will pay \$40,000 for the system, but also will be given a 10-year franchise for street lighting and operation of the pumping station. The Ewart power plant is 40 years old.

## Industrial Expansion Puts Lansing in the 100,000 Class

Continued industrial expansion and resultant good employment in Lansing are held to have forced the population of the city above 100,000. This is the belief of the McKinley-Reynolds Company, Inc., Lansing, publishers of the city directory. They are about to go to press with their latest compilation of names and addresses, and they estimate that Lansing and East Lansing now have a combined population of 101,875.

There are now 5,936 more names in the directory than there were one year ago. This means the addition of some 50 pages to the book, which has been growing rapidly in recent years. This year's issue will contain 49,278 names. The estimate of 101,875 is arrived at by multiplying the number of names by the conservative factor of 2 1/4 to indicate the whole number of inhabitants.

The directory publishers report that Lansing has grown steadily, having gained every year, with the exception of one, during the past 28 years. Industrial advantages are being increased annually thus making it possible for Lansing to be one of the fastest growing capital cities in the country. The addition of Durant Motors to the city, with more than 2,000 men on the payroll, the steady going pace of Reo, the rapid climb of the Olds Motor Works, the activity of the Motor Wheel Corporation and the establishment of the Hayes Industries, Inc., in the city, together with many small industries, have brought about the marked increase in Lansing population. The rapid expansion of Michigan State College, at East Lansing, has resulted in marked growth there.

It is now believed that Lansing ranks fourth in the state, being exceeded only by Detroit, Grand Rapids and Flint.

New construction in Lansing, East Lansing and the surrounding platted territory so far this year has an estimated valuation of approximately \$7,000,000. The volume in the city of Lansing alone has passed the \$6,000,000 mark. New construction in the territory for 1929 is expected to pass \$10,000,000.

## Savants Searching For Indian Mounds

Scientists from the University of Michigan have been in Newaygo conducting a survey in an endeavor to locate Indian burial mounds which have not been examined previously.

If a location is made, the mounds will be opened in such a manner as to enable the university workers to read the history of their builders. Several mounds, located near Newaygo last year, were riddled by curiosity seekers before they could be opened properly by representatives of the university. Consequently their value was lost.

It is quite certain other mounds exist along the river near here.

If any county residents know of one or more of these mounds the university representatives desire information concerning them.

## Great Lakes Passenger Boats Carry 20,000,000

Nearly 20,000,000 passengers were carried by the ferries, day excursion steamers and liners sailing the Great Lakes from June, 1927, to June, 1928, according to A. A. Schantz, president of the Detroit & Cleveland Navigation Company.

"The latest report of the United States Steamboat Inspection Service shows that a total of 19,998,249 passengers were carried from the ports on the Great Lakes, Detroit leading with 17,738,378; then Port Huron, 875,164; Chicago, 505,414; Marquette, 440,689; Grand Haven, 238,872; Milwaukee, 102,912 and Duluth, 96,720.

In Detroit the ferry companies carry about 1,000,000 passengers per month.

The figures given only include steams that are required by law to report the number of passengers carried.

## U. S. AIR MAIL POUNDAGE SHOWS 3-FOLD INCREASE

Planes in the air mail service in the first six months this year carried 3,119,361 pounds as against 1,052,975 pounds flown during the same period in 1928, according to the American Air Transport Association.

More than 700,000 pounds were flown in July of this year against 210,957 pounds carried in the same month last year, a gain of 350 per cent. The increase is credited to the extension of the lighted airways permitting planes to fly over the majority of routes between sundown and sunrise; the increased use of aerial service for social correspondence; the adoption by the operators of faster planes with greater carrying capacity, and the opening of the new "night transcontinental" service giving thirty-two-hour mail delivery between the coasts.

"More mail is being flown in the United States than in all Europe combined," the association says. "This world leadership has been brought about jointly by the postoffice department in encouraging the use of the air mail service, and the department of commerce which has steadily increased the length of airways equipped with emergency landing fields, beacons, obstacle lights and other aids to safety."

## Pheasants Are Safe In Manistee County

Official word has been received in an order signed by Director of Conservation George A. Hogarth, stating that Manistee county will be closed to pheasants for one more year from Oct. 25. The Manistee Izaak Walton league agitated for this action.

Conductor: "Madam, you'll have to pay for that boy."

"Old Lady: "But I never have before."

Conductor (hotly): "That don't matter to me. He's over 12 years old, and you'll have to pay his fare or I'll put him off the car."

Old Lady: "Put him off. What do I care? I never saw him before." —Muskogee (Okla.) Daily Phoenix.

## Acidity

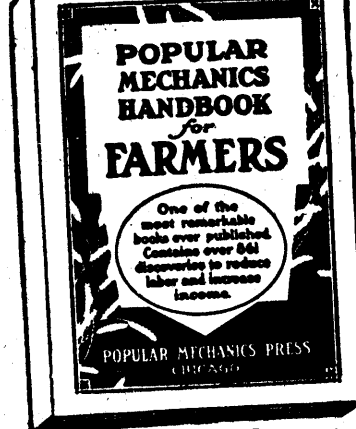

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is expelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drugstore has the genuine, prescription product.

**PHILLIPS Milk of Magnesia**

## Gold Mine of Ideas for Farmers

Here's "the most remarkable book ever published for farmers," says one authority. It is remarkable in the extreme practical nature of its contents, in the wide range of farm subjects covered, in the wealth of illustrations it contains, and in its extremely low price.

## 861 Discoveries

One discovery sometimes makes a fortune. Here are 861 of them, any one of which may be of many dollars value to you. These discoveries may be classified as follows:

- 122 for the farm shop
- 12 on feeding
- 44 on acre, truck, and
- 1 on farm buildings
- 1 on field machinery
- 1 on concrete in the various practical nature of its contents, in the wide range of farm subjects covered, in the wealth of illustrations it contains, and in its extremely low price.
- 1 on orchard work
- 1 on live stock
- 1 on electricity work
- 1 on greenhouse work
- 1 on farm tools
- 1 on garden work
- 1 on poultry
- 1 on the lawn
- 1 on miscellaneous
- 1 on miscellaneous
- 1 on painting, dusting, and trapping

—and every plan has been tested and found to be successful. Most of the articles are illustrated with photographs or drawings. The pictures described are easy to make because of their plain and clear descriptions.

Suppose you could live your life 417 times How you could forge ahead of other farmers in a way that would insure you liberty and steady profits! This book enables you to do the next best thing — you may have the experience of 417 lives — experience of successful farmers as told by themselves — briefly, clearly, and reliably. And many of these experiences are illustrated with accurate drawings! Imagine 861 pages, 861 of ideas — 861 crystal clear illustrations. Just think of the value to you!

Just send \$1 and the book will be mailed to you postpaid

 STATE OF MICHIGAN—The Probate Court  
 for the County of Van Buren.  
 At a session of said Court, held at the Probate  
 Office in the Village of Paw Paw in said County,  
 on the 26th day of August A. D. 1929.  
 Present: Hon. Merle H. Young, Judge of Probate.  
 In the Matter of the Estate of Charles Langdon,  
 Deceased.  
 J. R. Daines, Administrator, having filed in  
 said court his petition praying for license to  
 sell the interest of said estate in certain real estate  
 therein described.  
 It is Ordered, That the 23rd day of September A. D.  
 1929, at ten o'clock in the forenoon, at said probate  
 office, be and is hereby appointed for hearing  
 said petition, and that all persons interested  
 in said estate appear before said court, at  
 said time and place, to show cause why a license  
 to sell the interest of said estate in said  
 real estate should not be granted.  
 It is Further Ordered, That public notice  
 thereof be given by publication of a copy of this  
 order, for three successive weeks previous to  
 said day of hearing, in the Gobles News, a  
 newspaper printed and circulated in said county.

A SIX IN THE PRICE RANGE OF THE FOUR

**Remarkable Six-Cylinder Engine**  
 Chevrolet's remarkable six-cylinder engine impresses you most vividly by its sensationally smooth performance. At every speed you enjoy that silent, velvet-like flow of power which is characteristic of the truly fine automobile!

**Beautiful Fisher Bodies**  
 With their low, graceful, sweeping lines and smart silhouette, their ample room for passengers and their sparkling color combinations and rich upholstery—the new Fisher bodies on the Chevrolet Six represent one of Fisher's greatest achievements.

**Outstanding Economy**  
 The new Chevrolet Six is an unusually economical car to operate. Not only does it deliver better than twenty miles to the gallon of gasoline, but its oil economy is equal to, if not actually greater than, that of its famous four-cylinder predecessor.

**Remarkable Dependability**  
 In order to appreciate what outstanding value the Chevrolet Six represents, it is necessary to remember that it is built to the world's highest standards. In design, in materials and in workmanship—it is every inch a quality car!

**Amazing Low Prices**  
 An achievement no less remarkable than the design and quality of the Chevrolet Six is the fact that it is sold at prices so amazingly low! Furthermore, Chevrolet delivered prices include the lowest financing and handling charges available.

## DORMITORY FOR "U" WOMEN TO PROCEED SOON

The erection of the new women's dormitory by the University of Michigan at a cost of \$955,000 on Observatory street is likely to get under way in the next few weeks, as Attorney General Wilbur Brucker has officially approved the legality of the revised contract between the board of regents of the University and Guardian Trust company of Detroit. The structure is to house 450 women students.

The contract now pledges only the prospective rentals from student tenants to meet the annual payments over a period of 50 years. The original contract carried a state guarantee and pledged state funds if the rentals were not sufficient. This clause was vetoed by the attorney general.

It appears now that university authorities are determined to proceed with the dormitory program in spite of official censorship by Gov. Fred W. Green. Attorney General Brucker in his approval made it known that his office was passing only upon the legality of the document and not the principal.

## Ottawa W. C. T. U. Marks 50th Year

The Ottawa county W. C. T. U. held its golden jubilee anniversary in Grand Haven recently at Second Reformed church. About 100 members from the county and several visitors were present.

Miss Margaret J. Bilz of Spring Lake was elected president for the twenty-first consecutive time. Other officers are: Vice president, Mrs. Olla K. Marshall of Coopersville; corresponding secretary, to succeed the late Mrs. Jantha DeMerell of Holland; Mrs. Christine Van Dyke of Holland; recording secretary, Miss Dora Robinson of Lamont; treasurer, Mrs. Julia A. Lillie of Coopersville. Mrs. Lillie has held the office of treasurer the past 20 years.

A banquet was given as a compliment by Grand Haven and Spring Lake members. In the center of the head table was placed a large birthday cake with 50 lighted candles. The cake was in yellow and white.

Mrs. Hattie Bleckink of Holland presided as toastmistress. Miss Post of Holland read a paper from her mother, who was unable to be present. The Zeeland union represented "Our Todays" and "Our Tomorrows" was represented by a group of little folk from Coopersville.

An address was given by Mrs. E. L. Calkins, national lecturer and honorary president for Michigan.

## Missionaries to Return To Duties En Masse

The Reformed Church house has announced the schedule of sailing dates of 24 returning and new missionaries to the orient within the next two months.

Missionaries going to China are: Walter DeVelder, Mrs. A. L. Mathieson, Dr. and Mrs. R. Hofstra, Rev. and Mrs. H. J. Voskuil. Those going to India are: Rev. and Mrs. W. T. Scudder, Mr. and Mrs. Benjamin DeVries, Miss Nellie Scudder.

Headed for Japan are: Rev. and Mrs. John L. TeroBrig, Miss F. C. Walvoord, Miss Dora Eringa, Barnard Luben, James A. McAlpine. Those going to Arabia are: Rev. and Mrs. B. D. Hakken, Rev. and Mrs. George Gosse-link, Raymond DeYoung, Miss Charlotte B. Kellien.

Rev. W. J. VanKersen of Holland, member of general synods' deputation commission to visit all the mission fields supported by the Reformed Church in America, will begin his 30,000-mile trip through the orient Sept. 12. He expects to complete the trip in about 10 months.

## Holland Ex-Mayor Has Been on School Board for 33 Years

Ex-Mayor Henry Geerlings of Holland has completed his thirty-third consecutive year as a member of the board of education. He recently was elected for his twelfth term of three years. He also has served as secretary of the board for more than 25 years. During his incumbency the school population and corps of teachers virtually has been doubled and five new schools erected. Miss Anna M. Dehn is the only teacher left on the force since Geerlings' first election.

## Poems That Live

### COMPENSATION

Because I had loved so deeply,  
Because I had loved so long,  
God in His great compassion  
Gave me the gift of song.

Because I have loved so vainly,  
And sung with such faltering breath,  
The Master, in infinite mercy,  
Offers the boon of Death.

—Paul L. Dunbar (1872-1906)

## Enters First Women's Air Derby

Encouraged by her husband's success as an air mail pilot, Mrs. Blanche Wilcox Noyes of Cleveland, decided to become a flyer. She became so proficient that she entered the women's air derby from Santa Monica, Cal., to Cleveland, scene of the national air races.

## METHODISTS TO HOLD SESSIONS IN ANN ARBOR

From Sept. 17 to Sept. 21 more than a thousand people are expected to visit Ann Arbor for the annual meetings of the Methodist Episcopal church. It will be a gathering that will be addressed by some of the notable ministers of the denomination and a few of the laymen.

The sessions will be presided over by Bishop Charles W. Burns, now of St. Paul. Rev. Arthur W. Stalker, pastor of the local Methodist church, has general supervision of the program and Herbert M.W. Slauson, former alderman of the First ward, is chairman of the general committee. The program is now being arranged.

One of the features of the annual conference is the assignment of ministers for the coming year. Michigan is divided into two districts and Ann Arbor and Washtenaw county is included in the Detroit district.

A large number of local Methodists are planning to attend some of the sessions which will be open to the public.

## Ferris Institute Sees Biggest Year in History

The outlook for the coming school year of the Ferris institute is said to be the best in a number of years. In the opinion of Grove Baker, faculty member, the enrollment will be the largest in the history of the school.

## ANN ARBOR WILL TIGHTEN BAN ON STUDENTS AUTOS

Enforcement of the University of Michigan automobile regulation, by which students are permitted to operate cars only under extraordinary circumstances, will be more thorough during the coming year, but investigation of applications for permits will be more searching, it was said.

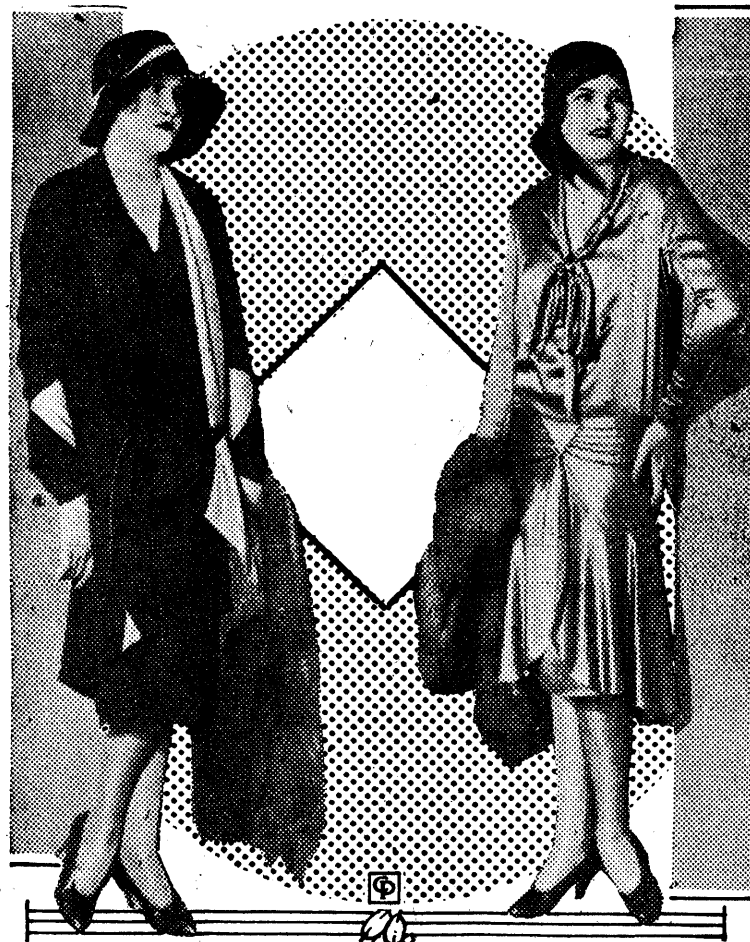

The statement was deemed necessary in view of the fact that many students have been under the impression that a change in administration would bring about relaxation of the rule, and also because of the fact that many undergraduate students who operated cars during the summer session will be forbidden to do so when the regular term opens.

All applications for permits will be thoroughly investigated, but those made by students who are residents of Ann Arbor and those who give outside work as the reason for requiring a car will be given closest scrutiny.

## Methodists Plan Vote On Conference Union

An amendment relative to laymen becoming a part of the preachers' annual conference will be voted upon at an electoral conference in connection with the meeting of delegates to the Michigan Laymen Association conference in Kalamazoo Sept. 13.

## Tailored Street Dress Not Easy

The separate street dress developed along tailored lines, while simple in appearance, is the most difficult of all for the average dressmaker, according to Frances Clyne, New York designer. Developed in satin crepe, heavy twilled silk, soft wool or flat crepe, it is very smart for early fall wear. Two Frances Clyne models are pictured: left, a black flat crepe gown with long scarf lined with castor which drapes about the neck and slips through tailored insets at the waistline. The accompanying hat is black felt. The other is a beige satin crepe with touches of tailoring in the fitted hipline and floating overskirt. A fox scarf and brown velvet cloche are the accessories.

## Divorce Rate High in State, Records Show

The old-fashioned idea of preserving marital vows "until death do us part" is rapidly becoming obsolete, records of the state department of health reveal. During 1928 there were more than one-third as many divorces granted as marriages performed.

The records of the department show that there were 37,300 marriages performed in Michigan in 1928 and that during the same period there were 10,615 divorces granted, giving a divorce rate of 3.5 for every 10 marriages.

In 1898—30 years ago—only slightly more than 10 per cent of the marriages came to grief in divorce courts; there were 20,138 couples united and but 1,901 were separated, making a divorce average of 1.06 in each 10 marriages.

Woman's entry into the business world and lack of children are blamed for the condition by Dr. William J. V. Deacon, statistician for the department.

"Too many women are working and have no time for children," the doctor stated. "Without children there is a factor lacking which would tend to prevent divorces. When there is just husband and wife separation is easy. Then, too, the working woman has a sense of independence that the wife of 30 years ago did not have."

"There are also fewer children because married couples refuse to have them until they feel that they can be well provided for and given the increased educational advantages which have become to be regarded as a necessity."

The department's records show that the 1928 birth rate was the lowest since 1906 and at that time the methods of registering was not as complete as it is today. In the past year the birth rate was 21.2 per 1,000 population. This is to be compared with 26.2 just 15 years ago in 1914.

Although there have been fluctuations in the birth rate during the 23-year period since 1906—fluctuations which are blamed on economic conditions—the present downward trend started in 1924 when the rate was 23.2 compared with 25.2 for the previous year.

## HOUSEHOLD HINTS

### MENU HINT

**BREAKFAST**  
Omelette Fresh a.m. Whole Wheat Toast Coffee

**DINNER**  
Veal Pot Roast Boiled Potatoes Creamed Celery Sliced Tomatoes Sliced Peaches Cookies Coffee

**SUPPER**  
Leftover Boiled Potatoes Browned in Butter  
Vegetable Salad Banana Pudding Tea

### Recipes

**Veal Pot Roast**—Take a four-pound rump roast of veal, wash and dry, rub with lemon, salt and pepper, brown in bacon fat, cover with hot water and boil very slowly until tender. An onion and stick of celery added make a nice flavor. Serve with thickened gravy.

**Banana Pudding**—Scald two cups of milk in double boiler. Sift one-third cup cornstarch and one-half teaspoon salt with one-fourth cup sugar twice or three times, then stir into the hot milk. Continue to stir until the mixture thickens, then cover and let cook fifteen minutes. Beat yolks of two eggs, add two tablespoons sugar and beat again. Stir into the hot pudding. Peel, scrape and slice four bananas into a pudding dish, squeeze over them the juice of a lemon, then pour onto hot pudding. Beat the whites of two eggs very light, beat in four tablespoons of sugar to spread over the pudding. Dredge with granulated sugar and bake in slow oven for ten or fifteen minutes, until meringue is delicately colored.

### SUGGESTIONS

#### When Weather is Torrid

When collars wilt and people begin to insist that "It isn't the heat, it's the humidity," then is the time for a warm bath, or several warm baths, if you want to keep cool. They needn't be of long duration. Just slip in for a moment, lather away the perspiration on your body, and step out again. Or if you prefer a shower, stand under the spray, apply a liberal coating of soap, and let the water run until you feel clean and cool. In either case it will require less energy to turn the tap than to engage in vigorous fanning or in futile conversation concerning the weather.

Paradoxical though it may seem, cold baths are only cooling as long as you remain immersed in them. For more lasting results it is better to regulate the water so that it is just a little warmer than body heat. Soap all over with a creamy lather, then let the water run cooler until it is just a little less than body heat. Resist the temptation to let it become icy cold. The result of icy cold water is to stimulate all the nerve centers and to generate heat in the blood stream. When you step out of a cold tub in warm weather, your rub down will induce perspiration. The warm bath cools, cleanses and leaves the body acclimated to the outside air.

As a rule it is logical to bathe when you get up in the morning or before going to bed at night. But in summer bathing twice or three times a day is not too much.

## The World and All

By CHARLES B. DRISCOLL

### LOOKING AT PARIS

The Church of Sacre Coeur stands romantically upon the summit of the Mount of Martyrs. Its white spires are clearly visible from the busy streets of the retail business sections. You are drawn toward that hilltop by the beckoning fingers that are the finials of those spires.

So I went up hill and, of course, began at once to meet the neighbors from back home. Wherever I go I meet someone who was a neighbor of mine in Wichita, Omaha, St. Paul, Cleveland or Yonkers. This time I met Abbe Loubiere, pastor of the splendid church of Montmartre. He wasn't a neighbor, exactly, but he hadn't spoken a dozen words before he said, "Oh, so you are from Kansas! I know some Kansas people." Then I remembered. This was the man who gave the famous castle to Pearl Hussey, to whose home I used to deliver appers in Wichita, when I was a student.

"Yes," he said, "I gave the castle to the lady from Wirhita. The title of countess goes with the castle, according to ancient French custom. I wanted to do some little thing in memory of the American soldiers, with whom I served in the war. So

I gave her the castle to establish a school for American girls studying music in France."

So here was verification of one of the most romantic stories I ever wrote. I have written several times about this Kansas woman who happened to be looking over Sacre Coeur and fell into conversation with its aged pastor. I have told how he said, "o you like castles? Yes? You may have one. It is mine, inherited, and I do not want it. If you can arrange to establish in the castle a school in memory of the American soldiers who died for France, it is yours." When I have written the tale, I have not expected my readers to believe it, because it sounded so fictitious. Such things don't happen in real life.

But now I expect you to believe it. I talked to the old abbe myself, and he assured me that it was all true.

So I stood on the steps of Sacre Coeur as the great bell boomed the Angelus, and looked down upon Paris, stretching largely away toward the Seine, across it, and out toward the bordering forests.

"It is a city of romance," I said, as I entered my taxi. And the driver, thinking he had been addressed, replied, "Yes, sir. Where to?"

## How to Achieve Beauty

By MME. HELENA RUBINSTEIN

### By Madame Rubinstein

The skin is a living organism, changing constantly. Old cells die and new ones take their place, and these new cells can be coaxed into glowing loveliness if you will but give them the proper care.

There are three fundamental principles underlying all skin care, and if you will observe these three principles you can preserve the youth and enhance the beauty of your skin at no great expense of time, effort or money.

The first fundamental is to thoroughly cleanse and lubricate the skin daily. If your skin is normal or slightly oily, you may safely wash it every day, but—if you do wash it with soap and warm water, or even with a washing preparation that has been scientifically prepared to cleanse without drying out the natural oil—you should still use a good cream at least once a day to lubricate the skin, to keep it soft and supple. And remember, a well lubricated skin never cracks into lines and wrinkles! If you have one of those thin, delicate and dry skins, then be a bit sparing with soap and water! Wash your face—yes—but not more than two or three times a week. And depend upon your cleansing cream for daily cleansing and lubricating.

The second basic principle of skin care is to clear and animate the skin; keep the circulation flowing briskly so that the blood supply can

nourish the skin tissue, and, at the same time, carry off impurities that would otherwise cause the skin to look muddy. A sluggish circulation can never make a beautiful skin!

And the third fundamental to a lovely skin is daily toning and bracing. The tissues must be toned, the muscles braced if you would keep the firm, finely chiseled contour of youth. Gentle patting will help—with the back of the hand beneath the chin—very gently for the young woman—a really brisk patting if you are developing a double chin—then a light-fingered patting upward and outward on the cheeks, following the expression lines, to exercise those muscles and make them strong enough to withstand the constant pull downward—the pull of gravity, habit and age is down, you know—and the muscles of our faces feel that gravity pull just as an apple, tossed into the air is pulled downward! So pat gently—to firm and strengthen the muscles—and upward and outward ALWAYS!

For clearing and animating the skin and for toning and bracing it, you will need especially prepared creams and lotions, scientifically compounded to actively benefit the skin—not merely to smooth and soften it. When, for instance, you use the right cream to clear and animate your skin, you can actually feel a tingle the minute you smooth the cream on.

## Serve Their Governors

Left, Mrs. C. M. Smith; right, Miss Frances Perkins; inset, Mrs. Esther M. Andrews.

### By LILIAN CAMPBELL

Three states, New York, Massachusetts and California, have women members of the governors' official families.

In New York, Mrs. C. B. Smith, by virtue of her office as chairman of the state civil service commission, is a member of the council of Governor Franklin D. Roosevelt. Mrs. Smith is a former newspaper woman.

Miss Frances Perkins, as head of the state department of labor, also is a member of Governor Roosevelt's cabinet. She had previously served as a member of the state industrial commission, and is an expert on workingmen's compensation laws and on working conditions for women in factories.

Mrs. Esther M. Andrews of Brookline, Mass., is the first woman member of the governor's council of her state. She was first appointed by Governor Fuller to fill the vacancy in the council caused by the death of Charles Sumner Smith of Lincoln, Mass. She was elected in November, 1928. The Massachusetts council is composed of

eight members with unusual powers to check upon the actions of the governor in state expenditures, appointments, clemency and other matters of state.

In California, Mrs. Anna L. Saylor, director of the state department of social welfare, is the only feminine member of the governor's council.

### The "Know How" Costs

The plant in the small town had broke down and the man in charge was at a loss to know what to do, so an expert was called in. He looked it over carefully, then took a hammer and gently tapped on a certain place and it started up. Within a few days a bill for \$250 was received from him. The board of directors requested an itemized bill before they would pay and received the following: "Tapping with hammer, \$1; knowing where to tap, \$249; total, \$250."

Father: "Do you believe in dreams?"

Offspring: "Nay, nay, old topper."

Father: "Then I won't have to get that roadster."
