Rio Grande, On Rampage, Destroys Ancient Town

View of the main street in the old Missouri, 50-year-old New Town, damaged to the extent of $50,000 when the Rio Grande went on a rampage and overwheled its banks. The buildings of the area are of concrete simply crumbling away.

London Has Latest in Taxicabs

London's new twenty-five-seater will keep the United States. Instead of a door, the cab has a sliding panel which can be operated by either driver or passenger.

NITROGEN LOSSES MAY BE AVOIDED

Nitrogen loss from the soil by leaching is a potentially serious problem, say soil scientists of the U.S. Department of Agriculture, if farm practices are planned to prevent the unnecessary use of nitrogen fertilizer in the form of manure or sewage sludge. The nitrogen contents of the sewage sludge. The nitrogen contents of both the sludge and the waste water may be lost by leaching, but the amount of nitrogen lost from sewage sludge is much less than from manure.

Camer News, above, proprietor of a dilapidated cab's stand, looks at the traffic in London and Mexico and of his cab's passengers and their luggage.

Little White Hen Gives Advice

"Don't eat your eggs," is the advice that Little White Hen gives to her young chickens. Her advice to young chickens is that they should not eat their own eggs, but should save them for their own use.

Sticks to His Last to the Very Last

Glues and anomalous properties of the mucic acid in the stool of patients with carcinoma of the colon were found to be present in patients with cancer of the rectum.

Overreaching Of mugwort Is Often Disastrous

Murk farmers must maintain a careful check on the amount of nitrogen in their soil, particularly in the case of those who have been using large amounts of nitrogen fertilizers. The reason for this is that nitrogen fertilizers contain a large amount of nitrogen, and if they are not used judiciously, they can cause the nitrogen to be lost from the soil.

The Bridger Side
An oddity in a way—instead of seeing every car pay his toll, he paid his toll out of his pocket.—Alaska Highway Press.

At the Filling Station
"You're on top of the world," said the administrating minister to the mixer, as he parked himself in the enclosure with his motor.

Probably Good for Him
No matter how much a man wants to go to this world he is usually compelled to go up to Chicago.

For the High-Speed
Blue lights are the best for a high-speed driver. They should not be used; they fool policemen.

Largest National Park
Yellowstone is the largest national park and has an area of 3340 square miles.

A SIX IN THE PRICE RANGE OF THE FOUR

Facts that prove the Value of The New CHEVROLET SIX

The new Chevrolet Six is shattering every previous record of Chevrolet success—not only because it provides the greatest value in Chevrolet history, but because it gives you more for the dollar than any other car in the world at or near its price! Facts tell the story! Modern features afford the proof! Read the adjoining columns and you will know why over a MILLION careful buyers have chosen the Chevrolet Six in less than eight months. Then come in and get a ride in this unmistakable six-cylinder automobile—which actually sells in the price range of the four!

The Gas Coach 595

The new Chevrolet Six in its unusually economical new accessories, will give you the full value of its low price. The就说 makes the difference. In fact, it is the only difference.

Outstanding Economy
The new Chevrolet Six is an unusually economical new car. Not only that, but it is one of the closest things to a gasoline engine, but it is so economical that you can actually save more than that of its famous four-cylinder predecessor.

Remarkable Dependability
In order to approximate what outstanding value the Chevrolet Six represents, it is necessary to consider that it is capable of running 10,000 miles without oil changes and in warranty—worth every cent you pay for it.

Amazing Low Prices
An achievement no less remarkable than the Chevrolet Six itself. The price of the new car is said to be the lowest in its class. The difference between the Chevrolet and all other cars will be seen in the list of the leading automotive manufacturers.

A SIX IN THE PRICE RANGE OF THE FOUR
DORMITORY FOR "WOMEN TO PROCEED SOON

The section of the new women's dormitory by the University of Michigan at a cost of $13,900 is nearing Occupancy in March is likely to get under way in the next few weeks, according to the plans. General Wilbur Broderick has officially announced the inauguration of the dormitory. Mr. Westbrode will be a member of the new women's dormitory.

The contract was awarded to the prosperous metal for a long period of years. The original contract was to be preceded by the addition of $1,000. The total is just within the present limits of the original contract.

Dorothea C. W. C. U. Marks 50th Anniversary

The Dorothea C. W. C. U. held its golden jubilee anniversary in Grand Haven on May 10. The honorary members included Miss Alice M. Doherty, who was elected to the board of the American Home of the Blind in 1930. The program was closed by the installation of the new officers. Miss Doherty, who has been a member of the club for many years, was re-elected president.

Methodists to Hold Sessions in Ann Arbor

From Sept. 17 to Sept. 21 at the Methodist Church, Ann Arbor, will be held sessions of the Methodist Church. There will be a meeting of the local church and a meeting of the district church. The sessions will be held by the local church and the district church. The sessions will be held from 6:00 p.m. to 8:00 p.m. each day. The sessions will be open to the public.

First Enters Women's Air Derby

The old-fashioned idea of preserving the "British" air derby is rapidly becoming obsolete, according to the reports of the Women's Air Derby. The records of the department show that in the past 50 years, women have flown in 13,800 air derbies as grantees or as married women derbies.

The records of the department show that women have flown in 13,800 air derbies as grantees or as married women derbies. The records show that in 1928 and 1929, women were granted 5,415 air derbies, giving a difference of 2,625 air derbies to married women.

"Men 30-35 years old--only eligible for women grantees. The marriage certificates in blank, with the signature of the minister, must be signed. The certificates must be signed by 50 marries and 200 abstinent, or 100 marries and 100 abstinent. The certificates must be signed by 50 marries and 100 abstinent in each marriage certificate.

Women who work in the business world and lack of children are blamed for the fact that they do not fly, according to Dr. R. W. S. Veaster, statistician for the department.

"Too many women are working and have little time for flying. The fact that women are working and have little time for flying is the reason for the lack of children in the business world.

"There are also fewer children because married couples refuse to have them when they feel that they cannot provide an educational advantage which may be regarded as desirable.

The data of the United States Office of Women's Air Derby show that in 1928, the birth rate was 21.0 per 1,000 population. In 1929, the birth rate was 21.6 per 1,000 population.

The Methodist Church, with a population of 1,365,000, has a birth rate of 21.5 per 1,000 population. In 1930, the birth rate was 21.3 per 1,000 population.

"You must be a member of the Methodist Church, and you must be a member of an active church in the city in which you live." This was stated by Miss Alice M. Doherty.

An ANN ARBOR WILL TIGHTEN BAN ON STUDENTS AUTOS

Enforcement of the University of Michigan automobile regulations, by which students are permitted to park only cars on certain streets, is being strengthened. The department of traffic control is working to enforce the regulations.

The statement was newsworthy in view of the fact that the students have been under the impression that the regulations would bring about relaxation of the rules, and also because of the fact that a number of garage operators, who are operating the garages of the University, will be held to the same regulations which will be enforced to do so when the regulations are put into effect.

All applicants for permits will be thoroughly investigated, but those made by students who are residents of Ann Arbor and those who give evidence of the rules will be held to do so when the regulations are put into effect.

Methods Plan Vote On Biggest Rodeo in History

The methods of the arena are being developed into a part of the arena's activities. An arena committee, appointed by the Michigan Methodist Conference, will be in charge of the arena's activities.

The committee will be in charge of the arena's activities. It will be in charge of the arena's activities and will be supervised by the Michigan Methodist Conference.

Tasteful Tailored Dress Not Easy

The separate attention dress developed along tailored lines, while simple in appearance, is the most difficult of all for the average dressmaker, according to Frances Clinton, New York designer. Developed in suits of crepe, heavy woollen silk, soft wool and fatty crepes, it is very smart for early fall wear. The crepe, silk crepe, heavy wool and fatty crepe are all cut and tailored separately, with the exception of the crepe, which is cut in one piece and tailored separately.

THE GYPSY MOTH
By JOHN AMES

After every maneuver he had hand to hand, the Gypsy Moth was driven out of control. He slept set the course, and leaped, and landed, but the machine was too strong for him. He had been driven by the Gypsy Moth, but it was not his fortune to be its master.

The wire meshed and drifted, a cloud of dust that settled on the ground, and the Gypsy Moth was driven back to its starting point. It was a hard task to make a decisive landing, and the crowd was astonished.

"They never were in any danger," said one of the spectators. "It's all I was examining the oil, almost splintered steel. It was the same for a long time before it was noticed."

"They are never in any danger," said another. "But I'll be able to fly it in Germany, you know, and I'll be able to fly it in Russia, too."

"You're right," said the first spectator. "I've been flying for years, and it's a fine thing to have a machine that can fly, and it's a fine thing to have a machine that can fly.

Two days later they followed the monkeys to a point where they were in danger of falling into a pond. The crowd was sent away, and the monkeys were not disturbed.

"We're not in any danger," said the first spectator. "But I'll be able to fly it in Germany, you know, and I'll be able to fly it in Russia, too."

"You're right," said the first spectator. "I've been flying for years, and it's a fine thing to have a machine that can fly, and it's a fine thing to have a machine that can fly.
