PRESERVATION OF WILD LIFE IN NEW U.S. PUBLICATIONS

All national reservation for the protection of wild life are listed, and valuable information regarding each is given, in a publication just issued by the U.S. Department of Agriculture. The publication was prepared by the Bureau of Biological Survey, which administers 82 areas set aside as wildlife monuments, especially for those birds and mammals which have become greatly reduced in numbers or exterminated with which the Government has charge. The work of the bureau is important for the protection of all wild animals and birds.

In the preservation of the wild life of the country, the bureau is endeavoring to protect all species of animals, both large and small, that are beneficial to the country. The bureau is also working on the improvement of the domesticated animals, such as cattle, horses, sheep, and swine, in order to increase their productivity and adapt them to the needs of the country.

Of Water Detective

Alcohol is now being used by the radio station in a method that is "peculiarly adapted for the detection of illegal distillation in the state of Michigan."

On the outskirts of a town in the state, police officers have obtained samples of alcohol from a large vat that contains more than 10,000 gallons of alcohol. The officers have found that the alcohol contains a large amount of water, which is a sign that the vat is being used to produce illegal liquor.

Gold Mine Of Ideas

To the Editor of The Detroit Free Press:

I have one of those friendships that
I have been trying to write about
for some time. It has been a precious
idea, and it has been a comfort to me.

The friendship is one with a person
who is a great thinker, and who has
inspired me in many ways.

I hope you will be able to write
about this friendship in your column.

Sincerely yours,

C. R. Smith
