Twelve Die in Salvage Ship Blast

Salvage ship, Artiglio, owned by an Italian salvaging company of Genoa, Italy, was shattered by the explosion of gun cotton in the sunken hulk of the cargo boat, Florence H., submerged since the World War, and which the Artiglio had been engaged to remove. The accident occurred on the west coast of Brittany, near the island of Houat. Twelve members of the crew and the captain lost their lives as a result, and seven other members were rushed to the hospitals on the coast. The above picture was taken recently, during salvage operations on the ship Egypt, which was sunk in 1918 with \$5,000,000 in gold bullion. Capt. Quaglia is shown with his officers.

The New Dollar Liner President Hoover

Launched—The new Dollar liner President Hoover was launched at Newport News by Mrs. Herbert Hoover, wife of the President. Mrs. Herbert Hoover, Jr., and Mrs. R. Stanley Dollar, wife of the president of the line, also attended the launching ceremonies. Camera man snapped the boat going down the ways.

Here's a Toothsome Grin

Lookit that smile—and what other sweet young thing could show you a toothsome grin like this at the age of 6 months? Miss Katherine Maryland, 6 months old, of Sacramento, Cal., grits her teeth, chews gum, at the age when most babies are chewing lustily away at teething rings.

No Piker

Following the investigation by the Appellate Division's inquiry into the lower courts of New York, it was disclosed that Louis B. Brodsky, only a judge, on a salary of \$12,000 a year, speculated \$3,500,000 in Wall street, with a loss of more than \$116,000.

Sets Air Record

New record for round-trip transcontinental flight for women is set by Ruth Nichols (above).

German Star

Lissi Arna, pictured here, is going to Hollywood to make German versions of talkies produced in America.

Also a Benedict

Not to be outdone by his companion flyer, Commodore Kingsford-Smith of that famous transoceanic flight in the Southern Cross, J. P. Saul, the Irish air navigator of that historic flight, will join the ranks of the married folks next May, when he is to wed Miss Elizabeth Pridham, formerly of Baltimore and New York and now of London.

ANIMALS MUST BE OFF HIGHWAY

A. W. Otterbein, Iron county agent, has furnished the law relative to animals being permitted to run at large on public highways. He also gives the resolution passed by the county board of supervisors last summer, declaring the same law to be applicable to highways in Iron county. The law is as follows:

(7285) Section 1. The people of the State of Michigan enact, that from and after the year one thousand eight hundred and sixty-seven it shall not be lawful for any cattle, horses, sheep or swine, to run at large in any public highway of this state

(7287) Section 3. It shall be the duty of the overseer of highways to seize and take into his custody and possession any animal forbidden to run at large, which may be running at large in any highway of which he is overseer contrary to the provisions of the foregoing section, and it shall be lawful for any person to seize and take into his custody and possession any animal which may be in any public highway, opposite the land owned or occupied by him, contrary to the provisions of the foregoing section; and it shall be lawful for any person to take into his custody and possession any animal which may be trespassing upon premises owned or occupied by him.

At a meeting of the board of supervisors of Iron county, Michigan, held in the court house in the city of Crystal Falls on the 23rd day of June, A. D. 1930, the following resolution was adopted

"Be it resolved that in accordance with Sec. 8 or Act 185, P. A. of the State of Michigan, for the year 1867, as amended, being Section 7292, Compiled Laws of Michigan for the year 1915, as amended, it is ordered, by the Board of Supervisors of Iron county, Michigan, that all and singular, said act of 185 of P. A. of Michigan for the year 1867, entitled 'An act to prevent animals from running at large on the public highways,' shall apply to and be in effect within said county of Iron, Michigan."

Good Methods Make Good Alfalfa Crop

The use of the latest methods in seeding and growing alfalfa proved profitable for Dorr Perry, a Tuscola county farmer, who harvested 262 bushels of Hardigan alfalfa seed from 34 acres this year and then won first place in the Eastern States class for alfalfa seed at the Chicago Hay and Grain show.

The seed was harvested from three fields, in one of which the stand is five years old. Mr. Perry uses Hardigan, a winter-hardy variety originated at Michigan State college, and he applies lime and fertilizer in preparation for seeding the alfalfa with oats.

Michigan harvested an exceptionally good crop of alfalfa seed this year and samples submitted for certification show that the quality is excellent. The use of home grown seed is recommended by the farms crops department at Michigan State college and Michigan farmers will be able to follow these recommendations this year.

The sample of seed which won the Chicago prize for Mr. Perry will be given a place of honor at the grain show to be held at Michigan State college during Farmers' week, February 2 to 6.

Dainty Blush Is Put Into Pale Cheeks of Peaches by Breeders

Michigan State College pomologists have turned the South Haven Horticultural Experiment Station into a beauty parlor for the Michigan peach.

As a result the trade may look for prettier peaches. The cheeks of certain sallow and sourfaced sorts are to be given a touch of color under the college's breeding program. By crossing the poorly colored South Haven variety with the highly colored J. H. Hale, Stanley Johnston, superintendent of the station has devoted a most promising seedling which seems to combine all the good points of the two varieties and eliminates most of their poor features.

The new seedling develops a blushing fruit of good shipping quality. Mr. Johnston believes it is destined to take its place with the Elberta and J. H. Hale varieties.

One new variety resulting from Hale-South Haven crossing was by far the most outstanding when it came into fruiting.

Fruit Growers Exempt From Paying Borah Tax

County Agricultural Agent Harry J. Lurkens is in receipt of advice from Congressman John C. Ketcham to the effect that fruit growers will not be required to take out a \$10 annual license in compliance with the Borah act that became effective recently.

"Growers who sell or consign only produce grown by themselves, also grower members of co-operatives, are not required to be licensed. No grower who sells only his own produce is required to have a license. It is only when he becomes a purchaser of perishable products for resale that he is required to have a license.

Report New High Record In Test for Tuberculosis

A new high record in the tuberculin testing of cattle is revealed in a report just made public by the U. S. Department of Agriculture which shows that in October 1,320,885 cattle were tested by Federal, State and county veterinarians working co-operatively. In October 3,416 more cattle were tested than in May of this year when the testing reached its previous high total in the cooperative campaign to eradicate tuberculosis, says Dr. A. E. Wright, in charge of bovine tuberculosis eradication for the U. S. Department of Agriculture. It is noteworthy that the reactors in October were 3,709 fewer than the reactors removed in May.

The high record for October was the result largely of active work in the States of Wisconsin, Iowa, Illinois, and New York, in each of which more than 100,000 cattle were tested. The highest number of tests, 158,132, was made in Wisconsin. In Iowa and Illinois there were 133,883 and 133,645 respectively. Slightly more than 1.14 per cent of the total cattle tested in all States during October were classed as reactors, signifying infection with tuberculosis.

Three States—North Carolina, Maine and Michigan—have completed the tuberculin testing of all cattle, and the extent of the disease in these States is now materially less than 1/2 of 1 per cent of the cattle remaining. Areas in which the numbers of tuberculous cattle does not exceed this small percentage are classified by the U. S. Department of Agriculture as "modified-accredited areas." A total of 1073 counties, or more than 1/3 of the counties in the country, have virtually eradicated bovine tuberculosis. Approximately 400 additional counties are actively engaged in eradication of the disease.

Fertilizing Trees In Fall Is Not Yet An Approved System

Some investigators have endeavored the application of nitrogenous fertilizer to correct the biennial bearing of certain varieties of apples by omitting zers nitrate of soda and sulphate of ammonia in the spring of the crop year. Favorable results seem to follow the application of these commercial fertilizers in both the spring and fall of the off year. It is believed that the spring fertilization in the off year might reduce the carbohydrate content of some fruit spurs and thus prevent many of them from forming blossom buds for the next year's crop. Moreover, it is believed that fall fertilization tends to cause these same spurs to have a higher carbohydrate content the next year and thus form fruit spurs in spite of a crop on the other spurs.

To omit the application of a fertilizer in the spring of the crop year would tend to decrease the set of fruit at least on weak spurs, and this might tend to help correct the heavy bearing during that year on all spurs.

Until more information is obtained regarding the application of fertilizers in the fall, growers should not adopt the practice, except possibly with a few trees in an experimental way. It is much safer to follow the usual practice of early spring fertilization where fertilizer is needed.

Fertilization studies in some regions have shown that it may be desirable to apply a part of the nitrogen in the spring and part in the fall each year. Like the other problem, however, this needs further investigation before growers in all regions should adopt such a practice except in an experimental way.

Boiler Flues Used To Build Bull Pen

A new use for discarded boiler flues has been found by the agricultural engineering department at Michigan State college who advise the use of such material for the construction of safety bull pens.

The two departments supervised the building of 52 pens in the state this year with the intention of showing how such an inclosure could be built at little cost and at the same time insure the owner of the bull against accidental death or injury from attacks by the animal.

The pens may be built of various sorts of material, but it is recommended that the fencing be at least six feet high and that the pen be approximately 30x50 feet in size. An oblong pen is built to give the bull the greatest possible space for exercise with the least amount of fencing.

The use of such pens permits the owners of good herd sires to retain the animals when they would be dangerous if it was necessary to enter an inclosure with the bull. The safety pen makes it unnecessary to ever be on the same side of the fence as the bull.

Grange Votes Against Covert Road Tax Law

A resolution was adopted unanimously at the quarterly meeting of the Monroe county Pamona Grange, held recently in the Frenchtown Grange hall, in which the legislature is asked to abolish the Covert road law. Abutting property owners, according to the Covert act, bear much of the expense of the county roads, it was asserted. It was also suggested that road building be discontinued for two years owing to the present high taxes.

POULTRY

TO CONTROL TUBERCULOSIS

The fact that tuberculosis is much more prevalent in chickens beyond the pullet stage and the further fact that pullets give off very little of the tuberculosis germ form the basis upon which the program for the eradication of avian tuberculosis is founded, said H. R. Smith, national livestock commissioner of Chicago, speaking at the October meeting of the Nebraska Poultry and Egg Association at Lincoln.

A one-year program which calls for the disposal of all birds more than one year old, will do much to eliminate avian tuberculosis, many animal pathologists believe. Even quicker results in elimination of the disease may be obtained if the young chicks are each year placed upon clean ground until time to move them into winter quarters. A thorough cleaning up and disinfecting of the poultry house at that time will add further to control of the disease.

This method of eradication is more practical than applying the tuberculin test and carries with it the further advantage that in most cases the younger birds are the best producers. Trap nesting records from ten states shows that hens lay a third more eggs during the first year of production than during the second year, Mr. Smith declares.

The application of the tuberculin test on certain numbers of flocks demonstrated the fact that the disease often is present without revealing any external characteristics. The indications are that only one out of four flocks reacting to the tuberculin test will display any physical characteristics of the disease. Therefore, since tuberculosis is widely prevalent in the north, central and middle-western states, it may be present in many flocks without the owner being aware of it.

EGGS ARE A SURPLUS CROP

Eggs are a surplus crop. The market price has been lower than profitable. Some producers thought to hold their usual number of hens and cut down the feed cost by turning them out to rustle for themselves. In part, this course was followed through lack of cash to buy feed. It hasn't turned out so well, for the hen that has been hand fed and cared for isn't equal to finding her own board without getting her egg machinery out of order and disturbing the rhythm of her production.

Once she does get used to rustling for her own living, it isn't safe to bring her back to full roppers and abundant scratch grain when the price of eggs starts up without getting her on this full feed slowly. A feast after a famine usually means a molt, and a winter molt is not profitable. Naturally, when the eggs are not paying for the feed bill the feed measure is scantily filled. One hundred hens will consume about twenty pounds of feed, more or less, depending on the flock, the climate and the feeding practice, each day, but the hen factory must be fed whether functioning or not.

"How many hens can I afford to feed as they should be fed until next spring?" is a question the poultryman man well ask himself. The next question will be, "which hens can I afford to keep?" The correct basis for determining the worth of any hen as a layer should be the time of her production as well as the total number of eggs produced. In spring all hens will lay enough eggs to pay for their feed; the rest of the year is what gives them their rank as layers.

Eggs have been too cheap; many flocks have suffered from lack of interest in a product produced on a falling market.

CHICKENS AS FERTILIZERS

The law of the harvest is that we reap more than we sow. Dead chickens make good fertilizer—they also make more dead chickens. Moral: Burn your dead chickens and all other animals, including rats.

One of the by-products of dead chickens is ptomaine poisoning in the birds that eat the flesh, indicated by partial paralysis of the muscles in the beginning, and this partial paralysis followed by complete prostration. The comb of the victim turns black; there is a diarrheal discharge which is frequently bloody. Death comes soon. There is no cure.

Th symptoms of limberneck, caused by the eating of carrion or rotten food, are similar to ptomaine poisoning. The neck hangs limp as the name indicates, but limberneck is caused also by intestinal parasites. Limberneck is curable if taken in time. The treatment is to isolate the affected fowls and give them a good worm remedy, followed by a dose of Epsom salts. All droppings must be burned, and the affected birds given a light, nourishing ration, which includes buttermilk or sour milk, until completely recovered. Seek the cause and remove it. That is the first step in any disease of poultry. Dead animals, decaying food, foul water cause most of the diseases of poultry.

Gazonda: "Did the audience show any feeling when she sang?"

Gazoo: "Yes, about half of them began feeling under the seats for their hats."

"That Scotch lad is no tightwad."

"No?"

"No. He just told one of the Siamese twins he'd take her to lunch—if she could get away."

CITIES TAKE TO THE WOODS

Eleven Michigan cities furnish half of all of the thousand of people who annually pitch their tents in state parks during the 1930 season, 22,173 or 50.2 per cent came from the eleven larger cities of the state, Detroit furnishing 24.8 per cent of all the camps.

A chart compiled by the Parks division of the department of conservation, and based on 1930 park registrations shows that 17.9 per cent of the camps were by people from out of the state; 31.9 per cent of people from the smaller cities and villages of Michigan and 50.2 per cent from the larger cities.

The proportion of campers from the larger cities varies consistently with population. The per centages as shown on the chart are: Detroit, 24.8 per cent; Grand Rapids, 5.4 per cent; Flint, 3.93 per cent; Lansing, 3.45 per cent; Saginaw, 4.67 per cent; Jackson, 1.4 per cent; Kalamazoo, 1.2 per cent; Bay City, 3.05 per cent; Pontiac, 1.5 per cent; Battle Creek, 1.06 per cent; Muskegon, 1.34 per cent.

Chicago and Toledo furnish relatively a large percentage of the camps. The chart shows 2.7 per cent of the camps pitched in 1930 from Chicago, and 1.5 per cent from Toledo.

While over a period of five years there has been an enormous increase in the number of people visiting Michigan's state parks, the increase of campers has not been proportionate. The increase in total attendance in 1930 over 1929 was 19 per cent. For the same period the increase in the number of campers represented 3 per cent of the total attendance. In 1930 they represented but 1.7 per cent.

Constantly increasing facilities for bathing and other forms of recreation at the parks account for these figures according to the parks division. Five years ago the parks were but poorly equipped for recreation and campers made up a large proportion of people visiting them. Today the parks have large bath houses, playground equipment, etc., and attract thousands for day-long recreation. It is noticeable that attendance at parks not having water frontage has remained stationary or has decreased in a five-year period while parks having bathing facilities have enjoyed a constantly increasing attendance.

Widen Dixie Highway

Assurance that the Dixie Highway, U.S.10, between Flint and Pontiac, is all to be widened in the near future to 40 feet or more, was given by the state administrative board recently when the highway committee approved a contract for widening to 40 feet of 7.9 miles from Flint to the south line of Genesee county. Julius Porath & Co. of Detroit was awarded the contract, at a bid of \$252,580. Contracts for the remainder of the route have already been awarded.

Resurrection Plant

The Genuine "Rose of Jericho"

These peculiar plants are found among the pines and cedars of Palestine. When you get the plant it will have the appearance of a ball of tightly folded leaflets, dry and dead. Put it in water and it will open up its handsome fern-like foliage, turn green and begin to grow in about twenty minutes. Take it out of the water and it curls up, turns brown and becomes dead again. It is capable of apparently dying and coming to life again repeatedly, and will keep in its dead or dormant state for years and be awakened directly upon being placed in water. It is an interesting, curious and most beautiful house plant with fine fern-like leaves of very agreeable fragrance. If you want a "table fern" that will prove satisfactory under all conditions, don't fail to get one of these marvels of plant life. Grows and thrives in a shallow bowl of water, and is greatly admired by everyone.

The Man of the Hour

IONIA 1931 FAIR TO BE ENLARGED

Fred A. Chapman, secretary of the Ionia Free Fair association, just returned from a meeting of fair secretaries in Chicago, announced recently that the 1931 exposition will be greatly enlarged this year, the Fair association will spend more money for attractions next year than ever before, Chapman said. There will be a change in the night show. "The Awakening," a large stage extravaganza, has been signed. The 40-car show of the Morris-Castle Co. will be a new attraction on the midway. The number of vaudeville acts will be increased to 11.

Builds 75,000 Cars

W. E. Holler, assistant general sales manager of the Chevrolet Motor Company, in a recent address to dealers and bankers of the Cleveland district, said that signs of renewed buying are appearing in many lines. Although he sees no immediate rush of business, he believes the turn of the year will bring definite improvement. He declared that Chevrolet already has increased its employment several thousand men and plans to build 75,000 cars in January, which would necessitate the addition of many more.

Greenville to Have City Skating Rink

The Greenville city council will cooperate with the American Legion post in providing a skating rink. It will be located on the Black athletic field just south of the Union school. The city will furnish the equipment for grading and the water for the rink and will furnish some labor to supplement the volunteer workers promised by the legion.

Plane Service Across Lake Michigan Increases

Winter air travel on the Kohler Aviation Corporation planes across Lake Michigan between Muskegon, Grand Rapids and Milwaukee, has shown a remarkable increase as compared with the same period a year ago.

With the advance of cold weather traffic has maintained an almost even level with the summer average. Quite in contrast to one year ago when a decided slump was noticed, October, 1930, offered a gain of 58 per cent over October, 1929, while November 1930, surpassed the same month last year by 85 per cent.

Express handled so completely eclipses the totals of 1929 that the rise would seem phenomenal. It is explained, however, by the development of a service known as Kohler Air Dispatch. Carrying an average of 10,000 pounds monthly as against a maximum of 500 pounds last year, this air express service has set a unique record of performance.

Operation from the land terminal in Milwaukee, which is in effect for the winter months, has not lessened the importance of its service, or caused material inconvenience to through passengers. By a carefully studied arrangement of airport bus schedules, all through railroad connections are maintained without loss of time.

The Kohler line, by its successful operation of the air service across Lake Michigan from Milwaukee to Muskegon and Grand Rapids, has the distinction of performing the only continuously operated amphibian air line service in the northern half of the United States. Likewise, it is the only route in the country to handle an appreciable volume of express traffic. This is said to be made possible by offering an efficient and speedy service at commercially profitable rates.

Dry Cleaner Sues For Price Cutting

Suit was filed in circuit court recently by Louis J. Hoskyns, Jackson dry cleaner, for \$20,000 damages against seven Jackson dry cleaning concerns which Hoskyns alleges are combined for the purpose of cutting prices and putting him out of business.

Hoskyns sets forth in his declaration that on October 8, Gladys Rice started her establishment, announcing a cut rate in cleaning clothes and that the other defendants were actually doing the work and that the business was without equipment. The plaintiff alleges that his business was greatly affected as the result of the alleged combine.

Trappers May Hold Furs After Season

Deputy Game Warden George W. Kirsheman announces a ruling by the department of conservation that trappers who wish to hold their legally obtained furs for higher prices after the close of the trapping season may do so without a license, provided they report to the department at Lansing, within five days after the close of the season, the number and kind of furs they are holding.

FORD COMPANY BUYS WALPOLE MINE

The Ford company has purchased the Walpole mine, located between the Chapin, Millie and Pewabic mines at Iron Mountain, according to E. G. Kingsford, Ford representative for the Ford company at Iron Mountain.

The mine, which is one of the oldest in the Menominee range, was purchased from John T. Spencer, Sr., and his son, John T. Spencer, Jr. It covers about 300 acres.

The Walpole was opened by the Walpole Iron company and a few years later leased to the Pewabic Mining company. In 1919 the lease expired and the mine has remained inactive ever since.

The ore in the mine is low grade, being mined by the open pit method, the ore coming directly to the surface, then being scooped out with shovels.

Michigan Training District For United States Army

In keeping with the policy of the United States army to maintain direct contact with all members of the organized reserves, Michigan has been designated as a training district. This places the training of all reserve officers in this vicinity under the direction of the Detroit headquarters of the organized reserves rather than the corps area headquarters regular army officer on duty with the organized reserves in Michigan and acting chief of staff on the 85th division; is commander of the Michigan reserve training district. Under Colonel Godson, regular army officers have been assigned as unit instructors at Detroit, Lansing, Kalamazoo, Grand Rapids and Saginaw.

Under the new arrangement, just announced by Major General Frank Arker, corps area commander at Chicago, it will be possible to increase cooperation of the regular army with reserve officers.

Promotion of reserve officers, under the new plan, will be made to vacancies in the district of Michigan rather than in the entire corps area. In this way officers are assured of assignment to units in their immediate vicinity. Promotions are to be made according to seniority among officers eligible for higher rank within the district.

Escapes Life Term For Stealing Rabbit

Harry Bailey, 39 years old, of Owosso, paroled Jackson prison convict, who has twice stood in the shadow of a life term as a fourth offender, recently was sentenced to 30 days in the county jail for the theft of a rabbit, which, it was first believed, would result in life sentence.

After Bailey had waived examination on a charge of breaking and entering the case was sent back to justice court from circuit court for further investigation.

This revealed that the rabbit he stole was in a box and that he did not have to break into any building. The charge was changed to simple larceny and he pleaded guilty.

Michigan Plans for Gasoline Tax Boost

A steadily increasing tendency in gasoline taxes in the United States is indicated in reports to the American Petroleum Institute, which finds that higher levies will be sought in more than a quarter of the 44 states whose legislatures will be in session early in 1931. In addition several cities are considering the imposition of or increase in gasoline taxes, while a diversion of the tax income from highway construction and maintenance to other purposes is noted.

The United States Bureau of Public Roads placed the income from gasoline taxes in the United States for the first six months this year at \$230,600,455, compared with \$175,054,894 in the first half of 1929, and estimates total revenue for 1930 at \$515,000,000 against \$431,000,000 in 1929. Expenditures for state road construction and maintenance totaled \$157,000,000 and for county roads \$45,000,000 in the first six months this year, the bureau estimates, while some \$13,000,000 was diverted to miscellaneous purposes.

District of Columbia, Minnesota, Iowa, Pennsylvania, Wisconsin, Nebraska, Massachusetts, North Carolina, New York, Michigan, West Virginia, Washington, Colorado, Mississippi, South Dakota and Ohio will seek increases in their gasoline taxes. A one-cent increase was made effective in Louisiana on November 27, where the state tax was increased to five cents from four, and the New Orleans city tax on gasoline automatically was lifted to six cents from five, while on December 1st the state tax in New Jersey was raised to three cents from two.

With these increases the gasoline tax schedule shows a six-cent tax in three states, five cents in 10 states, four cents in 17 states, three and a half cents in one state, three cents in 11 states and two cents in six states and District of Columbia. The last named proposes to double the present two-cent tax, and an increase of eight cents, which would make the total tax 12 cents a gallon, has been suggested in Nebraska.

Detroit Line Popular

During its 1930 season, 5,614 persons traveled between Detroit and Cleveland on the Thompson Aeronautical Corporation's Amphibian Line. The figure represents a 92 per cent increase over the number carried in 1929, the first year of the line's operation. During the 1930 season, 97.4 per cent of the scheduled mileage was flown. Service is discontinued during the winter months, but will resume early in the spring of 1931.

Consider Roof Landing

Announcement was made recently by Charles C. Kellogg, postmaster at Detroit, that the city's new \$5,600,000 postoffice and federal building will be so constructed as to allow its roof to be converted into a landing field for mail planes, when aviation reaches the stage permitting planes to make safe landings in closely restricted areas. The possibility also is being considered of having planes drop their mail pouches on the roof.

NEW UNITS FOR HOSPITAL WILL COST \$278,000

Two additional stories will be built at the University hospital for use as tuberculosis surgical units at a cost of \$278,000, rather than at the contemplated figure of \$250,000, Vice President Shirley W. Smith announced after contracts were let. The Otto Misch company of Detroit took the general contract at \$175,463.

Elevators and changes in the present installations will be cared for by the Houghton Elevator company on a \$15,405 contract, and heat, light, ventilation and electrical work will be done by the University buildings and grounds department, \$11,000 being the estimated cost. The remainder of the \$278,000 will be spent for equipment.

The state administrative board originally appropriated \$250,000 for the work, but when bids were asked, \$278,000 was found as the smallest amount for which the work could be done without revising plans. The state board agreed to advance an additional \$14,000 with the University hospital providing the other \$14,000 that was needed.

Work on the new units is to be started immediately, and must be completed by May 29, 1931. Contractors announced that they will employ as much labor as possible from Ann Arbor and will pay the existing wage scales.

The two stories will be built on top of the central portion of the hospital building, the wings to be unaltered. The roof will form the floor of the structure, to avoid unroofing the present building.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Bayer Aspirin. It never fails.

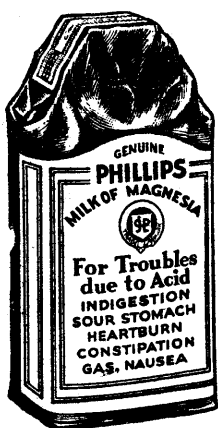

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Bayer Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism. Lumbago. Bayer Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically;

they are always to be relied on for breaking up colds.

Buy the box that says Bayer, and has Genuine printed in red. Genuine Bayer Aspirin doesn't depress the heart. All druggists.

BAYER ASPIRIN

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word *genuine* in red.

GLEAMY WHITE TEETH AND A SWEET BREATH

Try Phillips' Dental Magnesia Tooth-paste just once and see for yourself how white your teeth become. Write for a free ten-day tube. Address The Phillips Co., 170 Varick St., New York, N. Y.

Our Oil Well

Frank Forrester was in Monday with a bottle of oil pumped from the well on his farm that carries a high per cent of gasoline. The well is only about 1400 feet deep but has already produced several barrels of oil and while it is yet too early to determine if it will be a payer, all indications are that it will be.

Frank is installing a standard length golf course on the premises, and while we hope the well will prove a profitable one, hope it will not interfere with the completion of the golf course.

Card of Thanks

I wish to thank the O. E. S. for the plate of fruit sent me, also my many friends for the flowers, fruit and cards of greetings received at Christmas time.

Mrs. Orissa Markillie

Resolutions

Resolutions of respect passed by Hudson Lodge No. 325 F. & A. M. on the death of Brother Elmer Baringer, a member of our fraternity.

Whereas, The Supreme Ruler in His wisdom, has seen fit to remove from his field of usefulness and from our Lodge this Brother, and

Whereas, It is becoming to our fraternity to give expression to our feelings of this great loss, and to the high regard in which the Brother was held by the brothers of this fraternity. Therefore Be It

Resolved, That we, the members of Hudson Lodge No. 325 F. & A. M. of Gobles do hereby record our feelings of loss and high appreciation of his noble character, and Be It

Further Resolved, That our charter be draped for a period of thirty days and a copy of these resolutions be spread upon the minutes in this lodge and copies sent to the family of our deceased brother.

Committee.

BASE LINE

Mr. and Mrs. Geo. Bell called on M. Wilmot, Sunday afternoon.

Mr. and Mrs. Otto Walker spent Monday with M. Wilmot and family.

Harley Merriam was unanimously reelected superintendent at the Merson church last Sunday. There were fifty in attendance.

Mr. and Mrs. L. Woodruff entertained 26 friends and relatives at Christmas.

Harley Merriam spent Sunday afternoon with Otto Lewis and family of Otsego.

Will Pullen and family spent Xmas with Jake Eastman and wife of Gobles.

Mr. and Mrs. W. A. Jacobs entertained 12 of their neighbors last Saturday evening and a very pleasant time was had by all.

Mrs. Ray Harper entertained a party of boys and girls Sunday evening. Popcorn and candy were the pleasing features of the evening.

Mr. and Mrs. Lester Woodruff spent Sunday evening with Elmer Foester and family Merson.

WAGERTOWN

Mr. and Mrs. E. V. Wood entertained their children for Christmas dinner.

Frank Reed and family spent Sunday with Mr. and Mrs. Art Smith.

Mr. and Mrs. George Neal spent Sunday with Mr. and Mrs. Joe Holderman.

George Leach, Ethel, Charley and Bernith Eastman spent Thursday afternoon at Wm. Leach's.

Mr. and Mrs. Jacobs spent Friday evening at Geo. Leach's.

Mr. and Mrs. Geo. Bell spent Christmas day at Vernon Healy's.

Mr. and Mrs. Orren Rhoades, Marion Day spent Sunday at John Beeman's.

Junior Beeman is spending the week with Mr. and Mrs. Rhoades.

Rex Brant is spending the week with Bernith Eastman.

Nancy Holderman entertained her friend, Bod Tremmer of Kalamazoo, Sunday.

Mr. and Mrs. Lester Truax, and Mr. and Mrs. Geo. Bell spent Friday evening at John Beeman's.

Mr. and Mrs. Wm Holderman entertained their daughter, Beatrice and husband, Sunday.

Mrs. Cornell and children are spending the week with her parents Mr. and Mrs. Art Smith.

Mr. and Mrs. Leonard Goble, Mr. and Mrs. H. B. Brant and Rex of Kalamazoo, Geo. Leach, Ethel and Charley and Bernith Eastman spent Sunday with Mr. and Mrs. Rolls Eastman.

Mr. Kaats is spending the week with his family.

Busy Workers

(Too late for last week)

The Busy Workers met with Laura Manning, Dec 18. There were 11 members and 4 visitors present. At noon a very tempting dinner was served, to which all did justice. The program consisted of dialogues and miscellaneous readings with each member having a part. The Christmas presents were given out and all enjoyed the gab bag. At a late hour they all departed for home, hoping to meet with Laura again in the near future. One new member was taken in, which was Mrs. Groves. They adjourned to meet with Nellie Merrill Jan. 15. Everybody come. Election of officers.

Mortgage Foreclosure

Notice is hereby given that the mortgage dated May 29th, 1926, given by William Eichler, a widower, as mortgagor to E. I. Barker as mortgagee, covering certain lands described as:

The Southeast Quarter of the Northwest Quarter of Section 7, Town One South, Range Thirteen West, except commencing at the Southwest Corner of same, thence North Forty Rods, thence East Twenty Rods, thence South Forty Rods, thence West Twenty rods to the place of beginning.

Which said mortgage was recorded in the office of the Register of Deeds of Van Buren County on June 17th, 1926, in Liber 122 of Mortgages, page 483, which said mortgage was by assignment dated June 5th, 1929, duly assigned by Cassius T. Barker and Frank W. Barker, Administrators of the Estate of Elbert I. Barker, deceased, to Frank W. Barker, and which said assignment was duly recorded in the Register of Deeds office on June 5th, 1929, in Liber 145 of Mortgages, page 230; will be foreclosed by sale of said premises at the North front door of the Court House in the Village of Paw Paw, Michigan (that being the place of holding the Circuit Court in said County); said sale to be held on the 7th day of February, 1931, at 10 o'clock a. m.

The amount claimed to be due on said mortgage for principal and interest and taxes paid at the date of this notice is the sum of \$314.29, besides costs of foreclosure and attorney fees.

FRANK W. BARKER,
Mortgagee by assignment.

Dated Nov. 10, 1930.
EARL L. BURHANS,
Attorney for mortgagee by assignment.

SUMMER TERM BUDGET OF "M" RAISED \$7,500

A slight expansion of the summer session at the University of Michigan will be made next summer, with the board of regents approving a budget of \$297,587.40 submitted by Dr. Edward H. Kraus, dean of the session, showing an increase of \$7,500.

The physics symposium, which has become one of the outstanding features of the summer session, attracting experts of international reputation, will have two lecturers here next summer, the regents accepting the recommendation of Dean Kraus that two European educators, Dr. Wolfgang Pauli, and Dr. Arnold Sommerfeld, be brought here for the symposium on theoretical physics.

A change in the engineering college curricula was announced when the regents decided to remove foreign languages as a requirement for graduation in the engineering college, beginning next semester, although languages will remain available as elective courses.

Dr. Calvin H. Kauffman, professor of botany and director of the University Herbarium, was placed on the retired list. He has been a faculty member for 30 years, but for the last year has been in poor health. His place will be filled by Dr. Edwin B. Mains, who came here in the fall.

Dr. Reuben Peterson of the University hospital staff submitted his resignation from active duties and was named professor emeritus of obstetrics and gynecology.

A tract of land in Bryant township, Saginaw county, was accepted as a gift from Clark L. Ring, the area of 160 acres to be used for a reforestation project. The regents likewise accepted an invitation for the university to become a member of the American Committee on International Wild Protection, only two American universities, Harvard and California, now being members.

Four professors were granted leaves of absence. They were Dr. David M. Dennison for the spring semester; Prof. Arthur S. Aiton and Prof. Carter Goodrich for the second semester next year and first semester next fall.

The regents also approved eight degrees, two of them to Ann Arbor students and one to an Ypsilanti student. Those receiving degrees are Clarence A. Traphagen, Ann Arbor, bachelor of science in electrical engineering; Dora Wright of Ann Arbor, bachelor of arts; Benso N. J. Wood of Ypsilanti, bachelor of science in civil engineering; Virginia M. Gies, Detroit, bachelor of arts; Benson J. Wood of sign; W. Lee DeLano, Ortonville, bachelor of science in aeronautical engineering; Dean A. Atkinson, bachelor of science in naval architecture and marine engineering; Sarah L. Keho, Bay City, bachelor of music, and Gladys A. Gray, Union City, bachelor of science.

Ventures With the Varnish Brush

By Helen B. Ames

So many places about the house need varnish protection that it is wise for the homemaker to be well posted on how these jobs should be done. Floors, woodwork and furniture all call for the varnish brush and unless the right type of varnish is used in each case and the right method of brushing is followed, the surface will not appear well nor will the wood last as long as it should.

A varnish that is intended for the furniture will not be serviceable on the floor where a tough and elastic product is needed for protection against foot traffic. And the reverse is true—since floor varnish is unsuitable for articles not subjected to hard usage.

You must also consider, before selecting the product, whether you want a shiny or dull finish, as there are both flat and glossy varnishes. If you prefer, you can get a high polish by rubbing. This requires the hand of an expert, as it takes a good deal of practice to get the desired effect without cutting through the varnish. The varnished used for the rubbed finish should be hard and rather brittle, and the surface of the wood hard and dry. In any case, both the varnish and the room must be warm. The most favorable temperature is about 70 degrees.

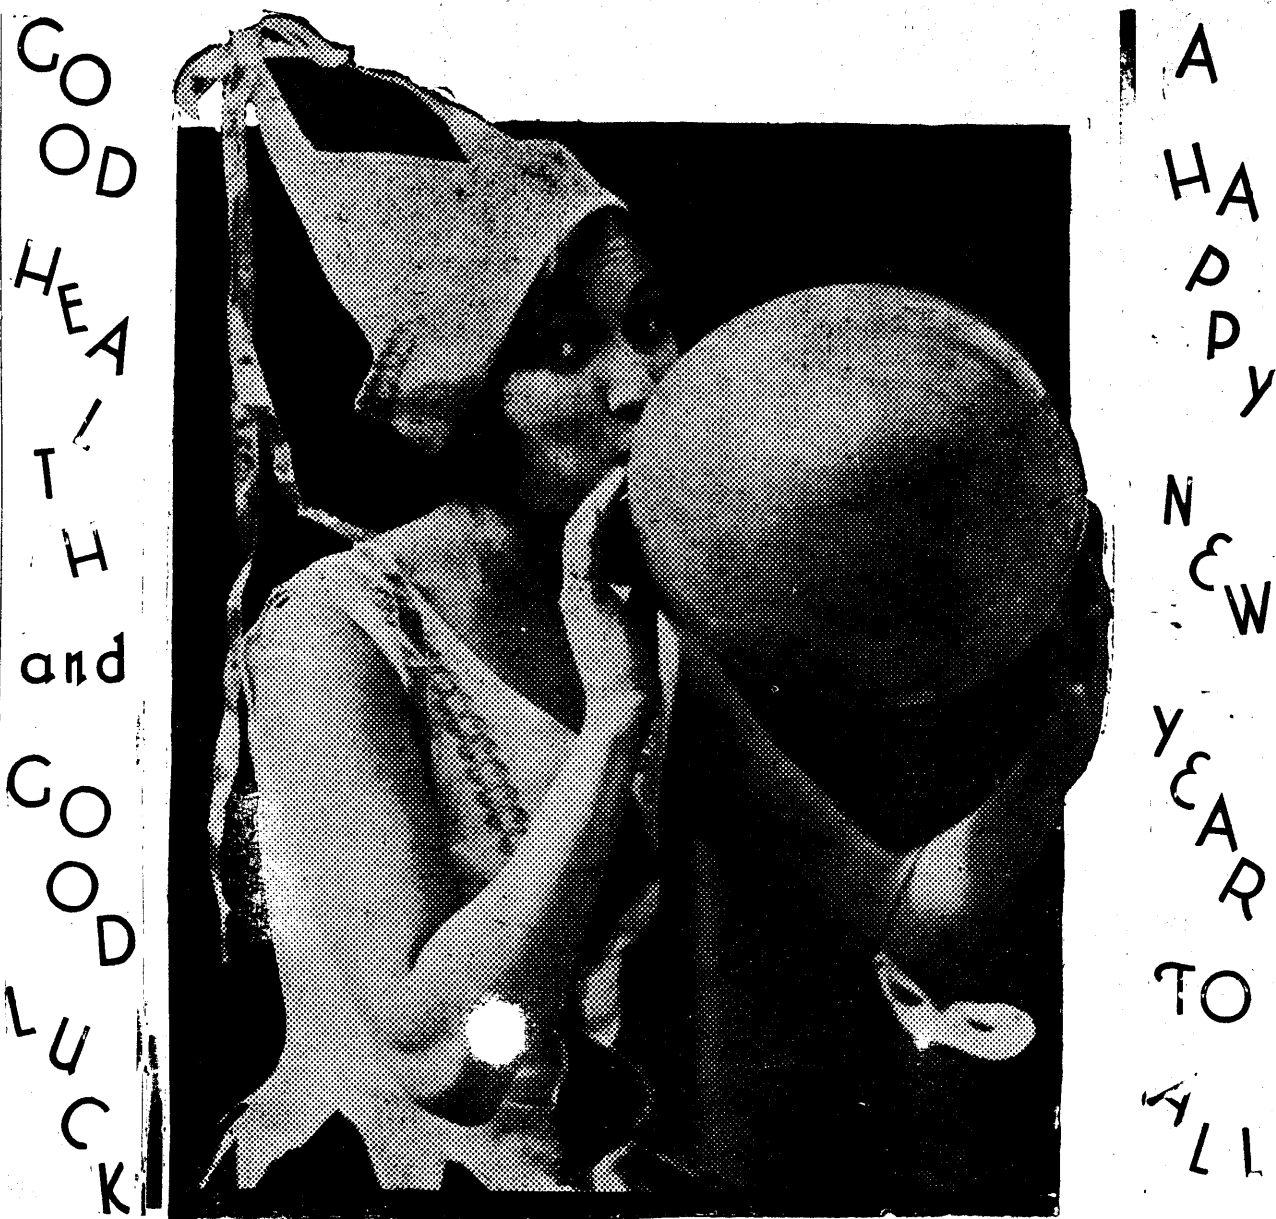

The brush should be full but not dripping and the varnish applied quickly on a small area and first brushed crosswise of the grain of the wood. Then, to even it out, it must be brushed with the grain. Excess varnish should be removed with a fairly dry brush.

The careful worker will watch out for runs, sags or wrinkles as the varnishing proceeds, so that these imperfections can be corrected before hardening. The best way to rub them down after they have hardened is to use a wet cloth which has been wiped over a piece of soap and then dipped in a little dry pumice. This will not spoil the smooth surface of the varnish film, as the soap makes a paste of the gritty pumice.

Figuring Net Profit

Neighbor (looking over the garden fence): "Have your bees done well this year, Brown?"

Brown: "Well, they haven't given much honey, but they've twice stung peddlers rapping at the door."

TO FORM CHURCH CONFERENCE HERE

Preliminary steps have been taken for formation of a conference of Christian Reformed church consistories of Grand Rapids and vicinity and organization is to be perfected shortly.

Rev. M. Arnoys, formerly of Dutton and now of East Leonard Street Christian Reformed church of Grand Rapids, is a sponsor and leader in the consistorial union plan. It will be informal in nature with meetings regularly held twice a year. Special meetings will be arranged on call.

The conference will not be an authoritative voice of the church, but merely a union of ministers and church officers in a discussion and conference program.

At present there is no such general organization of Christian Reformed churches in the city as the boundaries of Classis Grand Rapids East and Grand Rapids West each include some of the city churches. Classis, however, differs from the new organization in that it is an authoritative body.

Women of Fennville Will Rebuild Club

An adjuster for the fire insurance company in which the Fennville Woman's club held its insurance, adjusted the loss on its property which burned Nov. 28. The entire loss was allowed for the library, which the club placed at \$400. The building and library was allowed to total \$2,300. Insurance to the extent of \$3,000 was carried on the building and contents. Rebuilding will start as early in the spring as weather will permit.

Household Hints

DELICIOUS MEAT PIE

2 C. diced, cooked meat (left over)
4 potatoes diced, left overs may be used
2 Carrots diced (left overs may be used)
2 C. gravy or cream sauce
1 tsp. Worcestershire Sauce
¼ tsp. of pepper
Salt to taste
2 onions, diced
Cook gently together the potatoes, meat, carrots, gravy, Worcestershire sauce and seasonings. Brown the onion in a bit of butter and add to the mixture. Pour into a baking dish and cover with small biscuits or with one sheet of biscuit dough made from your favorite recipe. Bake in a 50-degree oven twelve to fifteen minutes until the biscuits are done. The carrots may be left out or celery may be added (1/3 cupful, diced) and your pie will be well flavored and interesting.

CRUST FOR TOP

4 C. flour
4 level tsp. Calumet Baking Powder
6 level tbsp. butter or lard
1½ C. milk
1 level tsp. salt
Sift flour once, then measure, add salt and baking powder and sift three times, rub shortening in with fork or spoon, add milk, mix lightly, turn out on a well floured board and roll or pat one inch thick. Place on top of meat.

Not in Her Contract

"Jump, lady, jump!" shouted the firemen, holding the life net, to the movie star, who stood at the sixth-story window with the flames raging behind her.

"I'll do nothing of the sort," she shouted back. "Tell the director to send my double here this instant."

Mothercraft

By Mrs. J. S. Goward

MOVING DAY, NATIONAL MENACE

It has now become a popular custom to move every year or two, or at the expiration of one's lease. The walls have to be painted—and that's always such a messy job. Simpler to move out into freshly clean apartment and save oneself some inconvenience.

That's the trouble with the present generation. Always thinking of convenience, though moving, to be sure, is by no means a cinch of a job. But there we are again, making a fetish out of "convenience," even to the extent of using up twice the time and double the energy.

And at what a cost to the children. For it is they who are the losers. Their parents have not even had the courtesy to take them into consideration. It was time to move. Everybody was doing it. So they, too, pulled up stakes and moved on.

That Secure Feeling

Equally as important as supplying food and shelter for our young, is to provide a sense of security, a feeling that this is my home, this my school, these my friends, and this our community.

There can be no such feeling when the child belongs to a family of nomads, who every October 1 or May 15 feels duty bound to move into a new apartment.

Each child is entitled to a permanent home, particularly during the formative early years of life. Only in this way is it possible for him to make the necessary adjustments to his surroundings.

To break up the home and plant him in a new environment is very confusing. If he has just begun to attend school he must be taken away from "his" school and placed in another among strange children. Most repeaters are new pupils. They are not so stupid as timid, because self-conscious and lonely for old familiar faces.

Children are not very adaptable to change. And we mustn't try to force it upon them by moving often and from one neighborhood to another, out of one school and into another.

If economic conditions demand a change either for better or for worse quarters, an effort should be made to keep the child within the same community. Don't take everything away from him at a single stroke.

Children do have a faculty for making friends, but even so it sometimes takes a long time to find a group or particular pal to whom they can easily adjust themselves.

Home, Sweet Home!

Our moral make-up has its roots in loyalty. And the child who has a home and family to supply a stable, dependable background can't help but have a sense of loyalty.

This trait is always acquired in the home, where it is nurtured, and from where it branches off to other children, to one's class, school and nation. It makes a child a useful social unit, who in turn has a fair chance to grow up properly adjusted, "belonging" as it were, and therefore capable of displaying a lively interest in human and national relationships.

Such a home then, except for a few holidays and short vacation, is the only place in the world for him to be, as it provides the best opportunities for his welfare. It is a mistake to take him on long trips that tire him unnecessarily and carry him away from everything he understands. It is a waste of money to take him to foreign countries. Better to leave him at home in the care of a capable nurse, where he can feel happy and secure, then close to his traveling parents, lost, alone and homeless.

Our Country Day By Day

By ANNE BYRON

In accordance with the mercantilist doctrines of about 1730, the colonial governments, as well as that of Great Britain, thought it necessary to regulate trade and industry by legislation, and consequently practically every one of the colonies passed laws providing for bounties or duties.

As the production of domestic cloth was especially desired, seven of the colonies offered bounties to stimulate the growth of wool and linen and their manufacture into cloth.

Massachusetts, for instance, in 1640, ordered a general bounty of 25 per cent, on cloth production "for the encouragement of the manufacture," but repealed it three years later on account of the heavy drain on the Treasury. Bounties were also offered for the production of silk, paper, iron and firearms by the various colonial governments and of vines, indigo, cochineal, silk and hemp by the London Society of Arts and Manufactures.

On the other hand, import or export duties were imposed by the colonial legislatures in nearly every colony in addition to those levied by England.

These were sometimes for revenue purposes simply; sometimes for sumptuary, retaliatory, or protective purposes. No consistent or permanent policy was followed in these tariffs, and they were as frequently directed against neighboring colonies as against foreign nations.

Your Handwriting And What It Tells

By JANET WINTON

"Dear Janet Winton: This is the second time I have written to you, and, in the meantime, I have tried to check some of my faults. I hope I've been successful. I have a question to ask, and if it is within your knowledge to answer it, will you please? Do you think there is any chance of my handwriting ever improving?—P. W."

There is always a chance. But unless you yourself improve, your script will always be the same topsy-turvy one that it now is, no matter if you practice writing by the hour.

What your handwriting and character lack is stability. You are impulsive, thoughtless, forgetful of promises and rude. Weak "t" crossings

It is going to be hard, I know, to follow out these suggestions for changing your script.

In the first place, you must count ten every time you feel a cross word or a fib. And count slowly, to give yourself a chance to collect your wits. Once you have collected them, it will be easy to think before speaking. Soon you will discover that you are less inclined to jump to conclusions, that you are more polite and that the other fellow is more willing to listen to reason.

When it has become a habit for you to think and to be considerate of others, you will also notice a marked change in your handwriting. But not before.

"Dear Janet Winton: I read in a graphology book that full loops show morbidity. Full loops always look so jolly to me. I don't see how a morbid person could stand making them so—unless he does it deliberately, to help him cheer up.

"HARRIET W."

From my experience with persons and scripts, I have found that the average full loop writer usually has a disposition to go with the loops. That is, he is generally happy-go-lucky and capable of deriving great joy from the simple, every-day things of life. He is rarely a student and often lazy. He is versatile—a veritable jack-of-all trades.

*you know
it will you.*

shows an absence of decision. You are weak, devoid of self-control, easily influenced and easily tempted.

And that you are inclined to fabricate your way out of trouble is the baseline of the writing. Notice how each letter seeks its own level.

Beauty by RUTH CORBY

HOLIDAY BEAUTY HINTS

Nobody wants to be a calamity howler at this season of the year, but some one must drop lady shoppers a word of warning. It is the post office authorities who urge you to do your shopping early, and that is sound beauty advice! About this time of the year you begin to notice the drawn faces and tired eyes of women; their complexions seem to get sallow, and their hair is apt to be any old way. There is hardly a happy, smiling face left.

It is a lovely custom to celebrate such holidays as Thanksgiving, Christmas and New Year's by parties and gatherings of your friends and family. It wouldn't seem like a celebration unless there were lots of good things to eat. But just the same, the aftermath of holiday entertaining or enjoyment is rather hard on beauty unless a few precautions are taken. And the first of these is, Don't eat too much. Rich sauces and gravies can be declined, and if you have an irresistible desire for turkey, don't eat much dessert. You will feel better and have a better time and certainly you will look much more charming than if you throw common sense to the winds entirely.

For the shopper there are a few precautions to be observed. The most important is to give yourself enough time.

Try this treatment when you come home after a hard day: Cold cream the face well and dissolve two table-spoonfuls of Epsom salts in a pint of hot water, and two more in a pint of ice water. Start with the hot water and dab it on the face several times; then use the cold water, alternating the two for about fifteen minutes. Then spread a thin film of nourishing cream over the face and lie down for twenty minutes with your feet higher than your head.

All this takes about half an hour, and you will get up feeling so splendid that you'll never know you've been shopping.

The eyes are especially tired at this time of the year, because we work and read longer under electric lights. They are also very much affected by lack of sleep and the nervous strain of shopping. A daily bath in boric acid and water is a simple precaution that guards the brightness of the eyes. At night, rub a bit of skin food or wrinkle cream under the lower lids, and leave it on while you sleep. This will feed the tissues and help the muscles to relax.

Cooking Hints

If you are going to cook a holiday dinner for your family, prepare it as much as possible the night before. Dessert, the ingredients of a salad, and stuffing can all be made long before the time they are needed. Get some one to help you set the table, either one of the children or some one whom you have invited to share the fun. While you are in the kitchen cover your face with cold cream, so that it will not become scorched and flushed from bending over the stove. When the meal is ready, wipe off the cream with a piece of cotton, soaked in witch hazel. Then apply your make-up, and you will look as fresh as if you had twenty maids.

POTATOES WITH EGGS

3 pts. of seasoned mashed potatoes
6 eggs
1 can of peas, creamed and seasoned

In a flat baking dish arrange the mashed potatoes as a border. Pour the peas in the center. Make six nests in the potatoes and drop in the eggs. Bake in a 400-degree oven until the eggs are done. This is a very pretty dish and is appetizing as well. It may be garnished beautifully with parsley, strips of pimento, or grated cheese.

Shot That Failed

First Classman (inspecting plebe): "What are you doing with your socks on wrong side out?"

Plebe: "My feet got hot and I turned the hose on them."

From the American Poultry Journal

"Looking at our farm poultry today, December, 1930, it is as profitable as any of our other farming operations and far more profitable than most of them. Nevertheless, we know that a great many farm flocks are being culled closely and that there are probably fewer layers in the country now than there have been for two years or more.

"As next fall approaches and the country comes out of the present business depression, we are surely going to be confronted with a bigger demand for eggs, made possible by hundreds of thousands of men again earning wages and buying an increasing number of eggs and other foods. These are the main reasons why eggs will reach higher prices during next winter.

"While the above conditions may be responsible for a feeling of security in planning for our pullet crop, there is one note of caution. High average quality in the EGG PRODUCTION BREEDING of the chicks we buy should be an important consideration this year."

This is good sound reasoning from one of the oldest poultry journals in America. We believe this is the year to buy chicks. Feed prices are lower, our chick prices are lower and there is every prospect for higher egg prices next fall.

HOW'S BUSINESS

Said the little red rooster, "Gosh all
hemlock, things are tough.
Seems that worms are getting scarcer
and I cannot find enough.

What's become of all those fat ones
is a mystery to me.
There were thousands through that
rainy spell, but now where can
they be?"

He turned then to the old black hen
and said, "Its worse with you,
For you're not only hungry, but
must be tired too.

I rested while I watch for worms, so
I feel fairly perk.

But how are you? Without worms
too? And after all that work?"

The old black hen hopped to her
perch and dropped her eyes to sleep
And murmured in a drowsy tone,
"Young man bear this and weep;
I'm full of worms and happy, for
I've dined both long and well,
The worms are there as always—but
I HAD TO DIG LIKE H—"

**Milk is Cheap
but
So are Feeds**

You cannot afford to neglect your
stock at the present price of either
feed or milk.
