BLOOD PARASITE ATTACKS DUCKS, REPORTS U. S.

"Leucocytozoon americana" may not be more harmful to the average person, but it is no less dangerous to ducks and other waterfowl than the newly discovered blood parasite which attacks wild and domestic ducks. This parasite was the subject of the investigations carried on at the University of Maine by Dr. E. C. O'Leary, assistant profes-
sor of veterinary surgery in the University of Maine, during the summer of last year under the direction of Dr. E. C. O'Leary, assistant profes-
sor of veterinary surgery in the University of Maine.

One hundred and seventy ducks were studied by the scientists. The parasites were made with wild and domestic ducks. The wild ducks were kept in smaller numbers than in past years, and all the domestic ducks were housed in small rooms, the latter part of the year before their capture.

The game farms birds were found to be infected with the parasites, and the domestic ducks, domestic white, black, and brown, were also infected. Twenty-three infected birds were taken from the Maine Farms to Meriden, N. Y., and the domestic ducks were kept in small rooms, and the disease was watched closely after arrival.

Among the birds the disease was found in all the wild ducks, and in the domestic white, black, and brown, and the latter part of the year before their capture.

It was found that infection was very rapid, and that the disease spread very rapidly in the larger numbers. The disease was spread in several days, and the wild ducks were found to be infected with the disease.

In the light of the experimental work done in the past, it is now possible to estimate the extent of the disease. The wild ducks are found to be infected with the disease.

The disease is transmitted from the wild ducks to the domestic ducks. The disease is transmitted from the wild ducks to the domestic ducks. The disease is transmitted from the wild ducks to the domestic ducks.

Dog Beds Set In Counting Game

The best record so far made by Max Barry, the Edwards County, Minn., dog handle, in the hitting game, was on March 10, 1955. His dog was hit by a 25-pound ball, and it made 100 points and held steady on the course.

During another month Max Barry made five or six points only by passing by 25. The log book for the dog handle is kept in the office at the post office.

HOMEMAKERS Win Style Again

The state dairy division of the department reports that the number of home and homesteaders across the state is now at least three times that of normal due to the present world economic depression.

The disease is not present in the center of population areas, but it is present generally over the state. Most of the applications are for homesteads in the states, which have not been submitted, and those which have, contain some cleared land and buildings.

This campaign to support homesteading is an attempt to build up the economy, and to create a home atmosphere. It is a campaign to bring about the building of homes, the improvement of the homesteads, and the home atmosphere of the homesteading community.

Homesteaders in Style Again

The state dairy division of the county division reports that the number of home and homesteaders across the state is now at least three times that of normal due to the present world economic depression.

Copper deposit

A large copper ore Burr, caused by magnetic dip meters, has occupied the attention of a mineral land classification survey headed by H. R. Alsbrock, assistant geologist

Am Asparagus, a major food source, can be grown in a wide range of terrains. For example, it can be cultivated in a variety of soils, including sandy loam and clay loam. Asparagus is a good source of dietary fiber and is rich in vitamins, minerals, and antioxidants. It is also known for its health benefits, such as improving digestion and reducing inflammation.

REBELS FROM RICH BOND DEED

Members of the Battle Creek Real Estate Association, through the generosity of the firm of Bayard, have formed a bond for $500,000 for the purchase of the former Battle Creek institution.

Saginaw Channel Work Will Start in Spring

Work on the deepening of the Saginaw river channel will begin next spring. The work, which is expected to take about six months, will involve the construction of a new channel that will allow larger vessels to navigate the river.

"Wildled Maddocks Bentley's "All-Star" Recipe for Marble Cake

Ingredients:

- 2 cups all-purpose flour
- 1 cup granulated sugar
- 1/2 cup unsalted butter, softened
- 2 large eggs
- 2 teaspoons baking powder
- 1 teaspoon baking soda
- 1/2 teaspoon salt
- 1 cup milk
- 1 teaspoon vanilla extract

Instructions:

1. Preheat the oven to 350°F (175°C).
2. Grease and flour a 9-inch cake pan.
3. In a medium bowl, whisk together the flour, sugar, baking powder, baking soda, and salt.
4. In a separate bowl, beat the butter until creamy, then beat in the eggs one at a time, followed by the milk and vanilla extract.
5. Gradually add the dry ingredients to the wet mixture, stirring until well combined.
6. Pour the batter into the prepared pan and smooth the top.
7. Bake for 30-35 minutes or until a toothpick inserted into the center comes out clean.
8. Cool the cake in the pan for 10 minutes, then remove to a wire rack to cool completely.
9. Serve the cake at room temperature.
Students' Chances of Success Predicted by University Research

Determining whether or not a college candidate is motivated to continue studying and money to acquire a college education, or whether it was better for him to quit, the study shows, is a feeling that can be expressed more accurately than in any other way.

In the main, the study indicates that a student's chances of success in college are determined by his interest in the field of study and his financial ability to support himself and his family.

The study also shows that the financial ability of a college candidate is a significant factor in determining whether or not he will be successful in college.

The study further shows that a student's financial ability is determined by the type of college he attends, the amount of money he has available, and the type of college courses he takes.

The study also shows that the financial ability of a college candidate is determined by the type of college he attends, the amount of money he has available, and the type of college courses he takes.
