GOBLES, MICHIGAN, THURSDAY, JULY 2, 1931

NO. 40

## Patronize Our Advertisers and Keep the "GO" in GOBLES

### LOCAL BREVITIES

Band concert next Wednesday night.

Franklin Johnson and family are at Brandywine Lake.

South Haven announces a big celebration July 4. See ad.

The canning factory plans to start on cherries next week.

The old swimmin' hole is the most popular place at present.

Lovers of good horse racing will be at Hartford July 4 as usual.

Listen in for Neighbor Wood broadcasting from WLS next Monday at 1:30.

Gobles Bank still pays 4 percent despite our friend Don's, statement to the contrary.

Mr. and Mrs. Ray Van Voorhees and Lloyd are on a vacation trip through Wisconsin.

Supt. and Mrs. Schutt are in Ann Arbor where the former is taking summer school work.

Big celebration at Barber's Bathing Beach, quoits, 2 ball games, dancing and fireworks.

Wm. J. McCarty and family have been spending a few days with his mother, Mrs. W. Dean.

Rev. Monroe Wilcox will speak at the M. E. church next Sunday at the regular hour of service.

Rev. Wilcox will also speak at Kendall at the Children's day service next Sunday.

Regular summer weather has prevailed for about ten days and cultivated crops are developing most rapidly. Dispositions are on the decline but will revive speedily with lower temperature.

Fenn Lohrborg stepped into fame the first morning of the season by taking a 6 pound, 10 ounce bass from Brandywine Lake. This was 7 ounces larger than the largest reported at Kalamazoo last season and will make 'em all step some.

Big band concert in Gobles next Wednesday night by Haas Concert Band, Kalamazoo. This band is Southern Michigan's best and we are most fortunate in securing them for a free concert. Mrs. Reed will be with them as soloist. Let's give them an old time crowd. Come early and get set for a good time.

Mr. and Mrs. John Gilbert and daughter, Avis, Mr. and Mrs. Duane Smith and family, Mr. and Mrs. Martin Holdeman and family and Mr. and Mrs. Clare Lindsley and son motored to Grand Rapids Sunday to the home of Wm. Krohn where they partook of a bountiful dinner served in honor of Mrs. Gilbert's birthday. Then they went to Ramona Park, Reed's lake.

Word comes from Montana that Mrs. Mertie Brattin is Grand Worthy Matron of O. E. S. for her state and her husband, Carl Brattin is Grand Worshipful Master of Montana Masons. The former is known to many of our readers as Mertie Redding. It is most unusual that both husband and wife hold high positions in state fraternal orders and to have these two holding these highest positions at the same time we believe to be a record honor to date and we congratulate them.

The Community Aid sponsored a reception at the church Monday evening honoring Rev. and Mrs. Thomas Pollard whose wedding was solemnized at Kalamazoo, June 22. The bride was formerly Miss Arnolda Elizabeth Burnett, daughter of Mr. and Mrs. Glen S. Burnett of Kalamazoo and a student of Western State. The groom is a graduate of Kalamazoo College and took additional training at Newton Theological Seminary in Massachusetts. They are at home here during his pastorate at the Community church. The News joins with the community in a hearty welcome.

Masonic regular tonight. Miss Janice Jenkins is spending her vacation in Chicago.

Mr. and Mrs. Fred Aldrich are at their Lake Mill home.

Most of the Shamrock camp, Lake Mill, are here for the season.

W. R. Reynolds and family are again at the Feely cottage, Lake Mill.

Mr. and Mrs. L. T. Braun of Chicago were week end guests at J. R. Emery's.

H. G. Emery and family of Chicago are at J. R. Emery's at Lake Mill this week.

Mrs. Chas. Newman and Eva Burns called at Vivan Hutchins' Tuesday afternoon.

Mr. and Mrs. Carlos Stratton are the proud parents of a 6 3-4 lb. girl, Norma Jean, born June 29.

The Methodist Aid will serve ice cream and cake during the band concert next Wednesday night.

Community Aid will meet with Mrs. Lomax next Wednesday. All members are requested to be present.

Mr. and Mrs. V. Hutchins called at J. Lounsbury's Monday afternoon. Mr. Lounsbury is very poorly.

The Michigan Gas & Electric Company have completed their lines to Lake Mill and electric service is begun.

Vern Hudson and family, the Kendalls, Mr. Bierwirth, Mrs. Haack, and the Krempel's are at Brandywine.

Roy Andre and family of Battle Creek were Sunday guests at C. L. Andre's, Eugene went home with them for the week.

The Sullivans, Mrs. Ferrier, Mrs. Sexton and daughter, the Andersons and Mrs. Andrews are at Lake Mill for the summer.

The under sheriff will be at the Gobles village hall next Wednesday afternoon to issue applications for the new drivers' licenses.

Merson Sunday school gave a unanimous vote of thanks to C. L. Andre for his thoughtfulness in providing them with fans.

### WAVERLY

Mr. and Mrs. Myron Colburn of South Bend visited at A. B. Frisbie last Saturday.

Mr. and Mrs. Jess Coffinger of Kalamazoo were week end visitors at R. E. Sage's.

Mr. and Mrs. Geo. Bishop of Kalamazoo were callers at Henry Bishop's Saturday afternoon.

Mr. and Mrs. Archie Snell of Kalamazoo were visitors at John Russell's Sunday afternoon.

Bert McCarty and family of Glenn, were visitors at J. A. White's over the week end.

Mrs. A. C. Blakeman was the lucky winner at the drawing of the beautiful granite ware at Powers' store last Saturday night.

A. B. Frisbie returned to his work in Kalamazoo the first of the week after spending a few days at home.

### Community Church

The Community Church extends a welcome to all those who have no regular church "home" and to any who are visiting here. Come and you will feel amply repaid.

Sunday school at 10 a. m.

Classes for everyone.

Morning service at 11 a. m.

Thomas Pollard Pastor.

### Village Taxes

Taxes for 1931 and special paving taxes for the village of Gobles are due and I will receive them any day but Sunday at my store.

John McDonald, Treas.

If your subscription to The News has expired, please call at once and settle.

### KENDALL

Archie Hoover of Scott Field Flying Service, who has been visiting his sister, Mrs. Steve Green returned to his duties Monday.

The ball game Sunday between Decatur and the Greenleaf Ramblers ended in victory for the Ramblers, score, 12 to 11.

Mr. and Mrs. Wm. Willsea and small sons spent Sunday with their mother, Mrs. Laura Willsea.

Mrs. Aleda Champion returned home from a visit at Angola, Ind. Thursday.

Mr. Heffernon and daughter, Winifred visited a few days last week with Mrs. Dingman at Comstock.

Mr. and Mrs. Wm. Wilcox, who spent the past week visiting their sister, Mrs. Celestia Lewis, returned to their home in Hamilton, Ind. Sunday afternoon.

Lillian Ray left early Wednesday for a trip to Independence, Kans. where she will visit her grandmother, Mrs. Anna Ray and other relatives.

Mr. and Mrs. John Austin of Kalamazoo were callers at Laura Willsea's Sunday.

Mr. and Mrs. Harry Chamberlin of Kalamazoo spent the week end with Mr. and Mrs. Eldon Chamberlin, at their cottage on North Lake.

Myron Squier of Pine Lake visited friends here over the week end.

Willard Ramsdell of Scotts visited at W. I. Ray's over the week end.

Born, to Mr. and Mrs. Chas. Gallup, Sunday, June 28, a son, weighing eight pounds.

Born, to Mr. and Mrs. Carl Stratton at Bronson hospital June 29, a daughter. Mrs. Stratton will be remembered as Clara Hutchins.

Born, at Bronson hospital June 28 to Mr. and Mrs. Estus Leversee, a son Mrs. Leversee was formerly Margaret Jewel.

Mrs. Zard Bachelder and daughter, Florence and Lucille Morlag of Kalamazoo visited at Loel Bachelder's Friday.

Mr. and Mrs. Steve Green and family attended a reunion of Mrs. Green's brothers and sisters at Riverside park at Ionia Sunday.

The South Side Club had a picnic dinner at Root's resort, North Lake, Friday, June 26. About 25 enjoyed the day at the lake.

Mr. and Mrs. Frank Chamberlin and Mr. and Mrs. D. V. Chamberlin attended a reunion of their cousins at the home of Mr. and Mrs. A. Pomeroy near Cooper Sunday.

Everett Russell of Pontiac was called here one day last week as the wells on their farm had both given out, probably due to the drought.

Mr. and Mrs. Russell Waite and daughter, Mrs. Martha Green, were called to Frankfort last week by the serious illness of their daughter, Mrs. Norrine Nordall, who underwent a double operation at the Traverse City hospital. Later reports are most favorable.

Walter Stevens, age 28 years, passed away in Bronson hospital, Wednesday, June 17, following an accident Sunday night from which he never regained consciousness. He left to mourn his loss, a wife, Anita, two sisters, Harriett and Agnes, all of Kalamazoo and a half brother, Russel Blackington of Michimacopten, Ontario, Canada. He was buried at the Kendall Cemetery.

Mr. and Mrs. Owen Emmons returned to Detroit Wednesday. Mr. Emmons acted as toastmaster at the alumni banquet at Gobles very much enjoyed by those present who appreciated his wit and humor.

Mrs. Homer Beadle has been entertaining her nieces, Frances Wooden and Eleanor McClintock. Bobby Beadle ran a splinter into

his foot Sunday, which necessitated taking him to Bronson hospital to have it removed.

Spend your Fourth at North Lake. Races, games and prizes. A ball game in the afternoon between Cheshire and the Ramblers.

Mr. and Mrs. Jake Mahieu were given a surprise Sunday, the occasion being their 20th wedding anniversary. There were 39 present and Mrs. Mahieu was given a number of pieces of china to remember the day.

Mrs. Claude Brown celebrated her 12th wedding anniversary Sunday, June 28. Mr. and Mrs. J. L. Story Bessie Story and Mr. and Mrs. Roy Howard, all of Kalamazoo, were visitors there.

Hazel Mahieu spent last week visiting at the home of Henry Hodgman at Bloomingdale, returning home Sunday.

### WAGERTOWN

Grange Thursday evening. Mr. and Mrs. Melvin Gee, Mrs. Wm. Trimble and Mrs. Glisby, all of Jackson, spent Wednesday night at Arthur Healy's.

Mr. and Mrs. Leonard Goble and Jaunita spent the week end at Geo. Leach's.

Rolla Eastman and family spent Sunday at Arthur Healy's.

Marshal Healy spent the week end with his grandmother, Mrs. Dora Haven of Bloomingdale.

Allen and Russel Saye spent Sunday with Charles Eastman.

### BASE LINE

Mr. and Mrs. Vern Hoteling of Kalamazoo spent Thursday of last week with Harley Merriam.

Betty Forster of Merson has been visiting her uncle and aunt Clair Woodruff and wife of Kalamazoo a few days last week. Clair and wife accompanied her home Sunday.

Lewis Saye and family of Kalamazoo were Sunday guests of his parents, Mr. and Mrs. Fred Saye.

Geo. James and wife entertained his mother from Plainwell, over the week end.

Zelma James of Gobles has been visiting her grandparents, Mr. and Mrs. Geo. James.

Mrs. Glenn Woodruff and children passed Sunday with her mother, Mrs. Sadie Smith. Frances returned home with her mother after a few days visit at her grandmothers.

Mrs. Lester Woodruff spent Friday afternoon with her daughter, Mrs. Robt. Banks.

Mrs. Nora Burnette and children of Allegan visited at Will Pullen's Tuesday.

W. A. Jacobs visited his wife in Kalamazoo Sunday.

Mr. and Mrs. Lester Woodruff took Sunday dinner at Elmer Forster's of Merson.

### Methodist Church

Lillian Mann, Pastor.

GOBLES

Morning Worship, 10:00

Sunday School, 11:00 o'clock.

### KENDALL

Sunday School, 9:30,

Morning Worship, 10:30.

"O, come, let us worship and bow down; let us kneel before the Lord our maker. For he is our God and we are the people of his pasture. Psalm 95-67.

### Notice

Will be at village hall in Gobles Wednesday afternoon, July 8 to write applications for new operator and chauffeur licenses. Operators license applications must be accompanied by \$1 money order and chauffeur's applications must be accompanied by \$2 money order and picture of applicant at least 1 1/2 inches in size.

Sheriff's Department.

### Waving "Corpse Lights"

Due to Decomposition?

There was in former days a firm belief in "dead candles," apparently a sort of natural rocket that issued from the ground and burned before the window of the room where a dying person lay. "Corpse lights"—blue flames that burned, or rather waned, over the grave of anyone who had been murdered—were equally believed in.

A certain weaver, early last century, took as his assistant an ill-looking journeyman. After a time the weaver disappeared, and the journeyman carried on the business, declaring that his master had gone on a long journey but would return after some months.

It happened, however, that two gentlemen, driving past the weaver's cottage one night, saw the "corpse light" near the cottage, and brought the sheriff to the place next day.

The journeyman, on being questioned as to the weaver's whereabouts, denied all knowledge of where he had gone, but persisted in his story that he would eventually return. The sheriff, however, set his officers to dig where the light had been seen, and when the weaver's body was found the journeyman broke down and confessed that he had murdered him.

It is said that about 1800 these lights, which were probably due to decomposition, might have been seen almost every night in the over-full churchyard of Greyfriars in Edinburgh.—Weekly Scotsman.

### Exportations Now Meet

Demand for Pine Nuts

How many people know that there is only one single-leaf-conifer in North America, the pinyon or single-leaf pine, and that it not only yielded the winter provision of the Indians, but that it now yields an annual harvest of pine nuts convertible into cash? As early as 1833, Zenas Leonard, the clerk of Capt. Joseph R. Walker, who was the first westbound white man to cross the Sierras, makes note of this tree that played so important a part in the home economics of the Indian. John C. Fremont in his memoirs also refers to this species, which was the cause of bloody battles fought by the Piutes and Washoe tribes over possession of the territory in which the prolific trees grew.

The Indians gather after hard frosts to collect the cones that yield the nutritious seed or nuts after being exposed to the sun or artificial heat. The seeds are eaten after they are roasted or are dried and ground into meal. The white man has now discovered this delicacy, and four carloads of pine nuts were shipped to distant markets after the past season. The Indians were paid about \$35,000 for this commodity, which is new to eastern markets.

### Bright Pupil Answers

The annual inspection was taking place. Fortunately, the brightest class of all was the first to undergo this ordeal.

One after another the inspector's questions were answered correctly. At last he decided to give the pupils a really hard test.

"Now, who can give me an example of nothing?" he inquired.

After a short pause a tiny hand was raised.

"Well, little girl," said the inspector, "what's your definition?"

"The smallest child in the class rose to her feet.

"Please, sir," she said, "it's a legless stocking with no foot in it."—Yorkshire Post.

### Rhymes About Months

Bartlett's "Familiar Quotations" gives several versions of the rhyme, "Thirty days hath September, April, June and November," the earliest of which is in Latin and is found in William Harrison's "Description of Britain," prefixed to Hollinshead's Chronicle, dated 1577. Other versions are in Richard Grafton's "Chronicles of England," 1500; "The Return from Parnassus," London, 1606, and one current in the New England states. A rhyme said to be current among the Friends in Chester county, Pa., ran: "Fourth, eleventh, ninth and sixth, Thirty days to each affix; Every other thirty-one, Except the second month alone."

There is no known scientific basis for the popular belief that underground water, oil, mineral deposits or hidden treasures can be located by means of a forked twig carried over the surface in a certain manner, says Pathfinder Magazine. But the faith of certain people is not diminished.

The belief is probably a relic of ancient methods of divination. Early in the Fifteenth century miners in the Harz mountains of Germany prospected with hazel twigs, and this practice, which was introduced among the Cornwall miners in the time of Queen Elizabeth, later was adopted as a means for finding veins of underground water.

### Has No Scientific Basis

There is no known scientific basis for the popular belief that underground water, oil, mineral deposits or hidden treasures can be located by means of a forked twig carried over the surface in a certain manner, says Pathfinder Magazine. But the faith of certain people is not diminished.

The belief is probably a relic of ancient methods of divination. Early in the Fifteenth century miners in the Harz mountains of Germany prospected with hazel twigs, and this practice, which was introduced among the Cornwall miners in the time of Queen Elizabeth, later was adopted as a means for finding veins of underground water.

# CAMERA NEWS

## Cavalry Thunders for War Secretary

There is always something that stirs the blood in the movement of cavalry, something of the romance and glamor reminiscent of the days when "knighthood was in flower." But there is something pathetic as well as magnificent in the picture above. It shows troops of the First Cavalry in brave array on the plain in front of Fort Bliss, Texas, when they were inspected by Secretary of War Patrick J. Hurley. There is some talk of throwing cavalry into the discard as an obsolete weapon of warfare and of closing up some of the picturesque old forts that served their purpose when our empire builders looked to them as their only sanctuary in the days when the "first American" practiced the outdoor sport of scalp-lifting.

## FRUIT ENEMIES LIVE ON WILD PIN CHERRIES

The common pin cherry which grows on Michigan cut over lands is a natural host for the cherry fly whose depredations cost many thousands of dollars each year to the cherry growers of the state, and the entomology department of Michigan State college recommends that all pin cherries near orchards be destroyed.

The wild cherry is used by the fly as a place for egg laying and, as the wild cherries are not harvested, the larvae of the fly have a chance to develop and grow to maturity. The host of insects which are produced on the wild cherries are then ready to move to orchards in the vicinity.

Michigan is the leading producer of sour cherries and the money from this crop is one of the principal sources of income in sections of the fruit belt. The cherry fly is one of the worst enemies of the crop and it must be controlled to secure marketable fruit. The fact that it can live and multiply on the pin cherry makes its control more difficult.

Warnings are sent out by the entomology department of the proper time to spray tame cherries. These warnings are broadcast by every possible means because the time available for applying the spray is limited and it must be applied at the proper time to secure any benefit. The destruction of wild cherries and the applications of sprays at the proper time to spray tame cherries to produce first class fruit.

Most of the newspapers in the fruit belt print the warnings to spray cherries, the county agricultural agents know when the spray should be applied, and warnings are sent from the College Radio station.

## Dairymen Have Plan For Improved Herds

Many groups of Michigan dairymen are taking advantage of the present low prices for purebred sires and by the joint purchase of excellent animals are preparing to build up herds of high producing cows in anticipation of the inevitable upturn of milk prices.

These groups are being assisted by members of the dairy department of Michigan State College by a series of meetings held in Branch, Barry, Sanilac, Jackson, Allegan and Mason counties. A special truck carries representative sires of three dairy herds, and the farmers who attend the meetings are told the advantages of forming bull clubs.

By this method two, three or four dairymen co-operate in the purchase of the sire. Animals whose dams average yearly butterfat production is 400 or more pounds can be bought for prices as low as \$75.

Each of the men has the use of the sire in his herd, and the group of men can easily afford to build a safety bull pen in which the animal can be kept without any danger of any person being injured. At the end of two or three years, the group can trade sires with some other group, and in this way two or more animals can be obtained for the price of one.

The sires which are traded are proved animals. Their heifers can be seen so no chance is taken on the kind of calves which will be obtained. The dairy department at the college helps the clubs in these trades and will also aid any groups to organize a club.

## To Curtail Use Of Poison Baits

The use of poison by the United State Biological Survey in predatory animal control work is to be considerably curtailed, says a bulletin of the American Game association. This action follows an attack on the survey's trapping and poisoning methods by the American Society of Mammalists. It was claimed by the society that the extensive use of poison was resulting in the destruction of large numbers of fur bearing animals.

The poison baits have been used against coyotes, wolves, bobcats, mountain lions and other predatory animals.

Although Paul G. Redington, chief of the Biological Survey, has announced that poison will be used less in the future, he defends his trappers and trained hunters by declaring they have been blamed for damage done by private individuals who use poison deliberately to take fur bearers. "Poison is not unduly destructive to valuable wildlife," Redington maintains.

## Predict Large Fruit Crop Around Holland

Indications point to a large fruit crop in the Holland section, according to Gerrit J. Deur, one of the leading fruit growers of Holland township.

The survey shows an average crop of peaches and a full crop of sweet and sour cherries. Plums are well set, but production of pears and winter apples will be light. Early apples will be plentiful. Grapes promise a good yield. Strawberries and black raspberries will produce large crops and red raspberries look very good.

Indications point to large grain crops in this vicinity. Garden crops are backward, owing to the cold weather.

## Motorists Buy When Returning Homeward

Motorists who buy farm products from roadside markets usually make their purchases when they are returning home from a drive and, as a market on the right side of the road is more convenient to stop at, the stand on that side of the highway sells more goods than one on the left side, according to a study made by the horticultural department at Michigan State College.

Proprietors of these markets must remember that the motorist, at the usual driving speeds, must be warned that a roadside market is ahead of him to enable him to make the stop, especially if the market is placed beside a busy trunk line. Warning signs must be legible, contain few words, and be large enough so the automobile driver can see them from some distance.

Signs which can be seen 50 feet from the market give the driver only one second to read the sign and to decide whether he wants to stop or not before the market is reached, if his car is traveling 35 miles an hour. Plainly printed letters one inch high can be read at a distance of 25 feet, three inch letters at 80 feet and six inch letters at 170 feet.

The greatest problem in roadside marketing is to get the driver to stop at the market. Only poor quality goods, unreasonable prices or poor salesmanship will discourage customers who have stopped their cars.

A great deal of information of value to owners of roadside markets is contained in special bulletin 185, which will be sent to anyone who requests it from Director V. R. Gardner, Michigan State College.

## 840,000 Boys and Girls Enrolled in 4-H Clubs

More than 840,000 rural boys and girls have undertaken as 4-H club members to carry on demonstrations in improving farming and homemaking activities during this year, according to reports received by the U. S. Department of Agriculture. The club enrollment for 1930 was 822,714.

This increase represents unusual effort by co-operative extensive workers, volunteer club leaders, and club members, themselves. C. W. Warburton, director of extension work in the department, said in announcing the enrollment.

Pressure of economic changes and the after-effects of the widespread drought have put heavy demands on extension workers, particularly the county extension agents, he said. In practically every instance, however, the established plan of work, including that for the young people on the farms, is being carried forward along with the added emergency measures.

The increase in 4-H club enrollment also shows, Director Warburton said, the importance that adults in the counties attach to agricultural extension work with young people, since the parents of club members are encouraging the work and volunteer club leaders, so essential to the progress of the clubs, are giving time and energy in spite of the handicapping conditions.

Interest of the boys and girls persists, the service believes, because through their club enterprises the young people do a definite piece of work of use to their communities and of practical value to themselves.

Boys and girls' 4-H club work is part of the co-operative extension system organized under the Smith-Lever and Capper-Ketcham acts and supplementary legislation, in which the state agricultural colleges and the federal department of agriculture co-operate in extending information regarding improved farming and homemaking methods. Each club member enrolls to carry on a definite piece of work involving production or conservation, such as growing crops or livestock, construction of clothing, preparation and preservation of foods, and management of the home. In their club meetings the members gain experience in organization, co-operation and leadership and come in contact with leaders in modern agriculture and rural life.

## Cut Sweet Clover Early

Sweet clover should be cut before it begins to bloom if it is to be used for hay. The cutting should be sufficiently high so as to leave healthy, vigorous green leaves on the stubble, because any second growth must come from the branching of the stubble. About 6 to 10 inches of stubble should be left.

Cutting the crop earlier than other forage crops means that more unfavorable weather conditions will be encountered in curing the hay. Every effort should be made to avoid moldy sweet clover because such hay is occasionally dangerous to feed to livestock.

## 47 Farmers Have Complete Farm Records

"A farm without records is like a clock without hands," says H. S. Osler, county agricultural agent, in reviewing the work of the Washtenaw county farmers who have participated in farm accounting during the past year.

"Forty-seven Washtenaw farmers came through with complete records last year," says Mr. Osler. He reports that 736 farmers in the state have complete records of accounts for the farms for the year.

"Washtenaw ranks third in the number of farm account books kept last year," says Mr. Osler.

## POULTRY

### HOT HOUSES

How common it is to find the laying hens housed all summer (as far as roosting quarters are concerned) in a building that is almost unbearably hot. Most houses are built for winter warmth. This means that they are practically air tight above the dropping boards, and have a roof or ceiling that is only two or three feet above the roosts. A house may have plenty of south windows that can be opened or removed, but these are very effective in promoting air circulation over and around the roosts in July or August. This is especially true in houses of desirable depth—16 to 24 feet. Roosting quarters in such houses are merely slow-cooking ovens, but because hens are creatures of habit, they continue to roost there in spite of a temperature of 100 degrees or more night after night.

A few minutes' work with hammer, wrecking bar and saw, can transform such a house into a fairly good summer roosting place.

First, one or two openings for each 20 feet of length should be made beneath the dropping boards. Such openings can well be made permanent with tight-fitting windows for winter and netting for summer.

Removing one or two boards for the full length of the house (just beneath the eaves if it is a shed roof type of house, or about two feet above the dropping boards of the house is of other types) will work wonders in reducing temperatures both during the day and at night. Roosting quarters often can be made quite comfortable for hot weather by these means. Higher egg production as well as better health and lower death loss, usually will result.

### FIGHT WORMS EARLY

Signs of worms in growing pullets and cockerels are usually distinct and definite enough so that no expert is required to prove whether either round or tape worms are seriously injuring the flock.

When individual birds four or five months old that have previously shown little or no signs of lack of vigor or thrift begin to get listless, become thin, develop blindness or poor eyesight, show dirty or ruffled plumage and lag behind their mates in the development of bright, normal sized combs and wattles, one may well suspect worms.

The next step is to kill one or more of the unthrifty birds. Slit the intestines and watch for the easily recognized round worms and less prominent tapeworms. Knots or thick places on the intestines are also evidence.

Some very effective worm remedies are on the market handled by regular drug dealers, hatcheries and veterinarians.

Treatment of growing stock during the summer months with individual capsules of the right size is a sound policy where worms are present. Delaying treatment till late fall or winter under such conditions is extremely poor business. Early treatment is the most effective and there is no break in egg production. Many pullets that would die or become hopelessly injured by worms are thus saved and converted into profitable producers. If worms are even merely suspected, checking up and opening the war on them early is sound strategy.

### FEED 'EM OR SELL 'EM

Hot weather and well feathered chicks make a combination that often results in a reduction in amount of feed provided as well as in the amount of time spent in care. Plenty of feed throughout the summer months is the first essential to rapid maturity and profitable fall and winter egg production.

With corn, oats and wheat worth a cent a pound or less, and meat scraps the cheapest in 20 years and dried milk the lowest price ever quoted, feeding a fairly adequate home-mixed mash (if one hasn't the money to buy a factory mixed one) should be followed with more flocks this summer than ever before.

Skimping on growing chicks' rations never pays—"Feed 'em or sell 'em."

### CONTROL OF COCCIDIOSIS

Sanitation is the key to the control of coccidiosis, a disease which takes a heavy toll in many poultry flocks. The house should be given a thorough cleaning when each brood of chicks is put into it and the same treatment should be followed each week thereafter.

In case there is any sickness among the chicks they should be kept in the brooder house until the trouble is over and during that period of close confinement it is well to clean the house daily.

Fountains should be scalded each day with boiling water. Confinement of the chicks, burning the litter and general sanitation principles will prevent spreading of the disease. If an outbreak of coccidiosis occurs it is advisable to increase the milk content of the ration, supply an abundance of feed and keep the water and feed clean. Bloody droppings indicate that coccidiosis has been present for several days.

### Nowadays

Mrs. Jones: "Does your new nursemaid take care of your Pekinese dog?"

Mrs. Smith: "Goodness no! She's entirely too inexperienced; she only takes care of the baby."

## Action Photos of Mine Strike

These photos from the striking mining districts of southeastern Ohio show, top, Special Deputy Harry Stanely, who seized the horse of a farmer near St. Clitesville, O., and used it to break up a march of miners; below, four miners at the New Lafferty mine, guarding the property against strikers.

## Troopers Search Mine Strikers

These photos from western Pennsylvania coal fields, scene of a bitter mine strike, show, top, state troopers searching miners for weapons, and below, strikers marching to Kiploch mine, where they have been maintaining picket lines.

## Le Gallienne Burned

Miss Eva Le Gallienne, prominent New York actress, is suffering from serious burns sustained when a gasoline water heater exploded in her summer home at Weston, Conn.

## Junior Speed Pioneer

Before he starts, Frank Kurtz, 17-year-old flyer of Hollywood, Calif., will be sure of setting a world junior speed record, for at present there is no officially accepted record. He is a student at Hollywood high school and has won many diving honors. The speed race is to be flown over a new official course back of Long Beach, Cal.

## Sheriff Lauds Reno

Reno's sheriff, Russell Trathen, who, with Mrs. Trathen, has been visiting San Francisco, is shown, above, telling Californians that liberal laws have aided moral conditions in Reno. Trathen is believed to be one of the youngest sheriffs in the country.

# STATE HATCHING 2,000,000 EGGS OF RAINBOW TROUT

More than 2,000,000 rainbow trout eggs are now developing at the various Michigan fish hatcheries designated for the propagation of this species.

These eggs were taken at Junction dam on the Manistee river, where the fish division of the Department of Conservation maintains a spawn stripping station. The fish were captured just below the dam as they came up the river to spawn and were held until they were "ripe" for spawning, then stripped, and the eggs transferred to the Harietta and Paris hatcheries.

According to a report made by R. G. Fortney, in charge of the operations, to the fish division, 1,665 rainbows were caught and 448 females stripped. Of the 2,112,000 green eggs taken, 1,497,600 were sent to the Harietta hatchery and 614,400 were sent to the Paris hatchery. These eggs are being held until they reach the "eyed stage," when they will be shipped to various other stations for hatching.

Seven hundred of the rainbow trout taken at Junction dam were banded with metal tags before they were released above Junction, Hodenpyle and Stronach dams and 300 released below Junction dam.

Four hundred more of these fish were released above Junction and Stronach dams without being banded. Many of the fish put over the dams had not yet spawned, so they should add to the natural reproduction in these streams as well as provide added sport.

## Michigan Retaliates

Acting under the retaliatory provision of the Michigan insurance law, Commissioner Charles L. Livingston has dispatched communications to 23 New York companies writing workmen's compensation lines in Michigan to the effect that they must immediately post surety bonds or other security to protect their Michigan business.

Under a New York law passed in 1929, that state has been requiring Michigan companies to secure their workmen's compensation business there by surety bond, cash or securities deposit.

# DID YOU KNOW? - - - By R. J. Scott

Where is the tallest tree in the world? How tall is it?

A giant redwood in California is said to be the tallest tree in the world. It measures 363 feet. Mountain ash in Australia, towering over 300 feet high, are also known to exist.

## Ambergis

What is ambergis? This is a gray, fatty substance found in the body of the whale, and is valuable in the manufacture of perfume.

flumes, being used to heighten the aroma.

## The Hesperus

Was there actually a schooner Hesperus wrecked, as described in Longfellow's poem?

There was a schooner named Hesperus, but it did not meet the fate ascribed to it by Longfellow. The inspiration for "The Wreck of the Hesperus" came to Longfellow in December, 1839, after reading of the

terrific gale that destroyed a number of sea-going vessels, washing the bodies of the mariners and the wreckage of the ships onto the coast at Norman's Woe.

## International Language

Where can I obtain information on Esperanto, the international language?

Write to the Esperanto Association of North America, Copley Square, Boston, Mass.

## FORD WORKING ON POWER DAM

A bridge across the Huron river has been built by the Ford Motor company in preparation for the proposed power dam to be erected south-east of Ypsilanti. The bridge is large and strong enough to support a heavy crane to be used in further work.

S. A. Healy of Detroit is driving piles for the core wall, a part of the dam which will serve to form a huge lake in the Huron valley just outside of Ypsilanti. Work is now being done on the north bank, about 100 feet from the river.

Cultivation and land clearing is still being carried on where the old U. S. Pressed Steel plant stood, and on several thousand acres of land in Lenawee county where the Ford company is conducting a large scale experimental farm.

## Michigan Cities Fix Tax Rates for New Year

Flint's 1931 tax rate is \$27.45 per \$1,000 of assessed valuation. A reduction of \$3.55 from last year's rate is represented principally in \$1.34 which was necessary last year to finance four months additional operation because of the change the new charter made in the fiscal year and \$1.15 in the school levy.

The new assessed valuation for the city of Jackson is \$88,898,010, representing a decrease of \$368,200 from the valuation of \$89,266,210 which was used in determining the municipal tax rate for the first half of 1931, according to a report submitted to the city commission by City Manager W. B. Hodges.

On the basis of an estimated tax requirement of \$881,568, as shown by the budget following revision by the commission, the city tax rate for the fiscal year beginning July 1 will be \$9.92 on each \$1,000 valuation.

Adrian's tax rate this year will be 20 cents higher than last year. Adrian property owners will pay a tax rate of \$14.20 for each \$1,000 of assessed valuation, the total valuation of the city being \$18,691,497. Last year property owners paid a tax of \$14 a thousand on a valuation of \$19,939,900. The unusually light inventories in Adrian factories and a new method of assessing bank stock largely was responsible for the drop in valuation.

The tax rate for the city of Birmingham will be the same this year as last, or \$13.50 a \$1,000 valuation. The total valuation of property in the city was listed at \$22,148,740. This is \$1,296,100 less than the valuation in 1930.

Mt. Pleasant's tax rate has been increased for the first time in 10 years. The new rate is \$11.70 compared with \$11.60 last year. Assessed valuations are about \$200,000 less than in 1930.

A definite reduction of 85 cents in the East Lansing tax rate has been made by the city board of assessors. The rate of \$10.45 is the lowest in East Lansing in 12 years. The rate last year was \$11.30 per thousand, a considerable reduction over recent years.

## Coast Guard Seeks Plane as Equipment

Recommendations for an amphibian plane to augment the equipment of the coast guard district number 10 have been forwarded to F. C. Billard, commandant at Washington, by John Kelly, commander. Grand Haven is cited as an excellent base for such operations. The loss of life on the east shore of Lake Michigan has led the department to investigate the need for an amphibian or airplane in this section. This port has facilities for establishing the base here.

## Bridge Tax Upheld

Corporation tax appeal board has held that the International Bridge Corporation, operators of the Ambassador bridge between Sandwich and Detroit, would have to pay a corporation fee of \$3,000 for 1929. An appeal to the Michigan Supreme Court is anticipated, for the corporation denies it is subject to Michigan's privilege fee.

## NEW CLAM LAW NOW IN EFFECT

A new clam law providing for a shorter open season, an increased license fee and other changes over the old regulations has been signed by Gov. Brucker. The law was given immediate effect by the state legislature.

The 1931 clam licenses, conforming with the new regulations, will all be issued at the Lansing offices of the conservation department.

Under the new law the clam season is open from July 1 to Sept. 30, when the license expires. The open season under the old law was from July 1 to March 31.

The license fee has been increased from \$1 to \$3 for residents. The \$50 license fee for nonresidents remains unchanged. Application blanks for licenses may be obtained from the department offices. The new clam law provides that no license shall be renewed unless the applicant has filed a complete report of his operations for the previous year, listing the gear he used, the total catch for the season, the location of the waters from which the mussels were taken, the total weight of mussel shells taken and the amount received for shells sold. These reports are to be made on or before Dec. 31, each year.

The conservation commission is given authority now to close certain waters to taking of mussels for a definite period not to exceed three years. Not more than half of any mussel producing stream will be closed at one time. Any mussel waters to be closed by the commission this year will be determined at the commission's June meeting and will be announced before the opening of this year's season.

Size limits and the form of gear that may be used by clambers are provided in the new clam law. The license now permits the holder to operate only one boat for taking mussels. The boat may be either with or without a motor. An additional boat may be used for towing, but it may not have apparatus for taking mussels.

It is now unlawful to have in possession at one time more than four crowfoot bars and not more than two of the bars may be in water at one time. The length of the bars is limited to 20 feet. "Hand rods" are legal, but it is unlawful to use a fork, dredge, tongs or other device which in use digs deeply into the bed of a stream. All internal motors used in taking mussels must be equipped with underwater mufflers. "Muckets" or "pocketbook" species of less than 3 inches in the greatest dimension may not be taken or offered for sale in greater quantities than 1 per cent by weight. It is return to the water without avoidable injury all undersized mussels.

## Allegan Firm Makes Furniture for Ford

The Baker Furniture Factories, Inc., of Allegan are making furniture for a hotel Henry Ford is building at Dearborn. The pieces are copies of antiques recently shipped here by Ford to have reproductions made.

## Charlevoix Swans Raise First Brood; Hide Nests, Young

For the first time since they were brought to Charlevoix eight years ago, swans owned by Mrs. George B. Douglas, Cedar Rapids, Ia., and Chicago Club summer resident, have mated and nested.

Early this spring one pair of the flock of 10 disappeared and it was only after many weeks' search that it was discovered they had stolen a nest in Loeb's bay on Lake Charlevoix, where they are diligently protecting four little swans hatched from a nesting of five eggs. Another pair has a nest with five eggs near Old river on the Chicago Club grounds.

Those who have observed the swans claim both the male and female assume equal responsibility, taking turns on the nest. When the little swans are being taught to swim, the mother furnishes them transportation on her back when they become tired from a lesson. The swans will fight fiercely against all intruders to protect their young, and their material instinct is claimed to be far above that of the average bird.

## Believes State May Own Valuable Painting

Michigan may own an oil painting worth \$20,000 to \$25,000, according to Robert W. Grafton, Michigan City, Ind., artist, who has three oil paintings hanging in the state capitol.

Grafton, cleaning the dozens of oil paintings in the legislative chambers, corridors and the supreme court rooms, believes the picture of Lafayette in the senate was painted from life, and is not a copy.

"It is a fine piece of work and I wonder just how Michigan came into possession of it," Grafton said. "I believe it is an original, and if it, it is worth from \$20,000 to \$25,000."

Grafton painted the pictures of Chase S. Osborn, Fred W. Green and Edwin Denby.

"After we get the picture cleaned I can tell whether it is genuine," Grafton said. "Former Governor Osborn believes it is not."

## Has Air Cooled Coaches

An innovation in railroad car construction was made recently by the Baltimore and Ohio Railroad, announces E. J. Gleason, Detroit division passenger agent, when it placed in regular service between New York, Philadelphia, Baltimore and Washington its new air-purified and air-cooled "Columbia Trains." It marked the first time in railroad history that an entire train, from the coach at the head end of the train to the observation end of the last car, was equipped with air cleaning and air cooling facilities.

The air is drawn into the overhead ducts built into the car with a suction fan, cooled and purified and then circulated throughout the car. On the hottest midsummer day the temperature inside the car will be 15 degrees cooler than outside. The new system makes the opening of windows unnecessary, thus eliminating smoke, dust, cinders, soot and fumes. In addition, all car spring-ends and places on the car frame where metal touches metal are cushioned with rubber pads to absorb vibrations, making for greater quietness in the car.

## 1,267 Forest Fires Burn 100,000 Acres

Approximately 100,000 acres have been burned over in the 1,267 forest fires that have burned over Michigan so far this season, according to estimate made today by the forest fire division of the department of conservation.

While the late May rains and the fact that most of the lower peninsula fire area is now green brought a temporary cessation of big fires, it is feared a renewal of the early spring outbreaks will occur at any time.

## Is Super-Salesman

Edward M. Deane of Grand Rapids is one of the outstanding producers of life insurance in the world. During each of the past five years Mr. Dean's production has been in excess of \$5,000,000 and during 1930 his total production was more than \$14,000,000 of life insurance. He is a recognized authority on inheritance and trust laws.

## STATE PARK RULES REMAIN UNCHANGED

The state parks rules and regulations for 1931, as approved by Governor Wilber M. Brucker, will remain the same as during the past season.

Superintendent of state parks, P. J. Hoffmaster, has asked the public to give particular attention to certain of the rules to insure the safety of other visitors at the parks.

A reduced speed limit for motor vehicles on park roads of not more than 20 miles an hour is absolutely necessary and local park superintendents have been charged with rigidly enforcing this rule. Mr. Hoffmaster said. Park officers have full police powers.

He asked that park visitors riding horseback or driving automobiles, pay particular attention to signs forbidding horses or automobiles in certain areas of the parks. These areas include picnic grounds, playgrounds and bathing beaches, where people congregate where horses and automobiles would be a menace to safety.

Caution with fire is necessary. Building or starting fires in the open, or in any place except where proper provisions have been made or to leave fires while burning is prohibited.

In all parks, except those in six counties, a 15-day limit is established on camping permits. In single park sites in Oakland, Livingston, Macomb, St. Clair, Ottawa and Bay counties, permits to make camp are good for but seven days. These permits may be renewed if facilities are available.

## Michigan Movies Seen by Multitudes

Almost half a million Michigan people have seen motion pictures of the state's conservation activities during the past year through films loaned by the educational division of the Department of Conservation.

Attendance at showings of department films during the year ending June 1 totaled 463,750, according to the division's reports. This does not include attendance at news reel showings of departmental pictures.

The department is now employing two systems of distributing its films, one a film loan service, and the other, a permanent loan system to the principal school systems. Ten completed reels showing various activities of the department are now available through the loan service. Several additional pictures will be completed by fall.

Can fix you for life if you set now. Precision Parts Co., Ann Arbor, Michigan.

## Resurrection Plant

The Genuine "Rose of Jericho"  
These peculiar plants are found among the pines and cedars of Palestine. When you get the plant it will have the appearance of a ball of tightly folded leaves, dry and dead. Put it in water and it will open its handsome fern-like foliage, turn green and begin to grow in about twenty minutes. Take it out of the water and it curls up, turns brown and becomes dead again. It is capable of apparently dying and coming to life again repeatedly, and will keep in its dead or dormant state for years and reawaken directly upon being placed in water. It is an interesting, curious and most beautiful house plant with fine fern-like leaves of very agreeable fragrance. If you want a "table fern" that will prove satisfactory under all conditions, don't fail to get one of these marvelous plants. Grows and thrives in a shallow bowl of water, and is greatly admired by everyone.

## NEW PLAN FOR LITERARY SCHOOL

Students in the college of literature, science and the arts of the University of Michigan will have their college careers divided into a preliminary period, when they will have to prove their ability to do good work, and an advanced period in which they will pursue higher studies and become eligible for a degree, according to a plan adopted by the faculty of the college.

Three objectives are sought from the new arrangement, states Dr. John R. Effinger, dean of the college. First, to restrict students from pursuing advanced work until they have shown sufficient competence in their preliminary courses. Second, to provide for a certain degree of concentration of interest in the last two years so that the graduate can claim reasonable working knowledge in some special field. Third, to establish closer contact between faculty and students through an advisory system which will allow a designated faculty member or committee to assist each student to arrange all his undergraduate work in an intelligent and co-ordinated fashion.

The freshman will enter the university in an introductory program, to be known as the general or underclass program. To fulfill this program the student will have to complete 60 hours of work with an average grade of "C" or better. Only after this is he eligible for the upperclass program. Most students will complete the requirements of the preliminary program in two years, although some will take longer and many of the poorer will never finish it. After satisfactory passage of the general program the student automatically becomes a candidate for a degree. This provision that the student prove his ability before he may become eligible for a degree is a notable feature of the plan, since ordinarily every freshman who enters direct from high school is assumed to be capable and deserving of the status of a candidate for a degree in higher learning. His introductory work complete, the student enters upon a schedule of advanced study, to be known as the upperclass or degree program. Here he must do 60 hours of advanced study with an average grade of "C" to receive his degree and graduate. It is in this last period that special emphasis will be given the student's chosen field of major interest. Most students will require two years to finish the upperclass program, so that the new schedule of progress will still mean a four-year attendance for the large majority in the college of literature, science and the arts.

The new Michigan plan is the result of two years' study on the part of the faculty of the college of literature, science and the arts to devise an arrangement which would achieve certain of the good objectives aimed at in the University College project without introducing the objectionable features of that plan.

### Griggs Is Winner Of Russell Award

Professor Leslie Earl Griggs of the English Department of the University of Michigan has been honored with the Russell award for 1931. The Russell award is an honorarium given annually to one of the younger faculty men for a work showing profound scholarship and research. Professor Griggs' achievement lay in his studies of Samuel Taylor Coleridge, the English poet, and his son, Hartley Coleridge.

Professor Griggs is now in Malta, searching for Coleridge documents, with the sanction of the British government, preparatory to compiling a definitive edition of Coleridge letters.

### Two New Members On Albion Faculty

Two new appointments have been made to the Albion college faculty. Walter Schwab will be instructor in German and French and Wilford J. Eitman is to be assistant professor of economics and business administration. Schwab succeeds John G. Frank, who has joined the faculty of Vanderbilt university. Prof. Eitman succeeds Prof. F. W. Shultis, who is retiring.

### Petoskey Youth Wins Contest at W. S. T. C.

Roland Faunce, Petoskey, won first place and cash prize of \$15 in the all-campus extempore speaking contest at Western State Teachers college Tuesday morning. He discussed the third political party.

Miss Margaret Clark, Paw Paw, won second place, and Cecil Hay, Bangor, was third.

### Eighth Grader Wins Trip to State Fair

Clarence Whaley of Hollister school was first among 133 Wexford county eighth graders who recently took the state examination, his standing being 93.3 per cent. He was awarded a free trip to the Michigan State fair next fall. Ruth Peterson was the outstanding girl with 92.7.

## Lightweight Suits Popular With Society Women

Reading from left to right, Miss Natica Nast, Mrs. Herbert Pulitzer and Miss Grace Amory

White trimmings and accessories are much in evidence, as well as many all-white costumes, when society women attend the races at the spacious Belmont track at Belmont Park, Long Island, N. Y.

Some printed and novelty fabrics are noted, also plaids, stripes and checks, and a few solid colors.

Miss Natica Nast wore a print, a light figure on a dark background. Miss Nast is one of the best known members of the younger set.

Mrs. Herbert Pulitzer and her daughter, Miss Grace Amory, both wore jacket suits. Mrs. Pulitzer having a white suit with an embroidered jacket, Miss Amory a dark print with light figure. The latter has chosen a wide hat to shade her from the sun.

## EIGHTEEN WIN HOPWOOD MONEY AT UNIVERSITY

Awards for 1931 from the Avery Hopwood and Julia Hopwood prize fund totaled \$13,000 with three major awards of \$1,500, six of \$1,000, one of \$500 and eight minor awards of \$250 each being granted. This division of the money was made instead of the previously announced plan of giving major prizes of \$2,500 in five separate fields, since most contestants submitted work in several fields.

Winners of the \$1,500 award were Dorothy Boillotat, Grosse Pointe; Sue Grundy Bonner, Grad., Ann Arbor; and William J. Gorman, '31, Pittsfield, Mass. Those winning \$1,000 were Lorna D. Chambers, Detroit, Mich.; Helen Fortune, Grad., Ann Arbor; Jean Gilman, Grad., Ann Arbor; Vivian Hopkins, '31, Troy, N. Y.; Frances Jennings, '31, Detroit, and Elizabeth W. Smith, special student, Ann Arbor; while Richard Humphreys, '31, Ann Arbor, was given \$500.

The eight winners of \$250 prizes were Ruth Duhme, '34, and William V. Mulrooney, '32, Fort Dodge, Ia., in poetry; Florence Musser, '32, Plattsburg, Mo., and Josephine Stern, '32, Detroit, in fiction; and Evelyn L. Bull, '32 Ed., Morrison, Ill., and Harold Courlander, '31, Detroit, in essay. Courlander and Humphreys also took the minor awards in drama.

### One Minute Pulpit

Verily, verily, I say unto you, H that b'neveth on me hath everlasting life.—St. John, vi, 47.

### University Faculty Member Will Resign

Leave of absence for an indefinite period, tantamount to a resignation, has been asked of the University of Michigan board of regents by Dr. Robert T. Crane, professor of political science. Professor Crane has accepted a position as permanent secretary of the social science research council, with headquarters in New York.

Dr. Crane has been a member of the Michigan faculty for 18 years, having come here after he had spent five years abroad in the foreign service. The teaching of political theory has been his chosen field here. Dr. Crane is chiefly interested in the promotion of research in the entire field of social sciences. He has been connected with its governing council for 10 years, as one of three representatives of the political science group; and previously served as secretary of this group.

### Adventist Youths Will Attend Camp

Annual camps of the Michigan Missionary Volunteers, young people's organization of the Seventh Day Adventist church, will be held at Rock Lake from July 9 to 29, according to G. R. Fattic, camp superintendent.

The girls camp will be held from July 9 to July 19. The boys camp will open July 19 and close July 29. One of the features this year will be the organization of several senior units for older young people who desire to attend.

A man with a little black bag knocked at the front door. "Come in, sir, come in," said the father of fourteen children, "and I hope to goodness you're a pianotuner."

## The Thrilling Symphony

By Francis K. Glew

What a reverential feeling  
Wraps itself around our hearts,  
As we drink in all the beauty  
A rich symphony imparts!

Now, we hear a swelling tone-burst  
Like the roar of surging sea!  
Next, we're soothed by tender trilling,  
Sweet as bird songs on the lea!

Hark! A thrilling cymbal crashes,  
And it seems to pierce our heart;  
Then, we hear a vibrant humming  
Like the singing of a dart!

What a glorious gift to mankind  
Is a mystic symphony,  
Deeply touching every heart-string  
With its throbbing melody!

### Household Hints

#### MENU HINT

**BREAKFAST**  
Cooked Cereal with Prunes  
Top Milk  
Toast Eggs  
Coffee (adults) Milk (children)

**DINNER**  
Vegetable Plate with Poached Egg or Scalloped Tomatoes with Salt Pork  
Seasoned Spinach Chopped Fine  
Baked Potatoes  
Graham Muffins  
Iced Tea (adults) Milk (children)  
Cookies

**SUPPER**  
Creamed Chipped Beef  
Toasted Muffins  
Fresh Strawberries  
Milk for all

This menu was planned for five people by the home economics bureau of the United States department of agriculture.

#### Recipes

Scalloped Tomatoes—One No. 3 can tomatoes, one-half cup finely diced salt pork, salt, one tablespoon chopped onion, one cup dry bread crumbs, pepper. Boil the tomatoes and onions about ten minutes. Cook the salt pork until brown and crisp. Remove the pork and add the bread crumbs to the fat. Stir until well mixed. Mix the tomatoes and salt pork and season with salt and pepper to taste. Put a layer of the crumbs into a greased baking dish and pour in the tomatoes, and cover with the remaining crumbs. Bake in a hot oven until the crumbs are brown. Serve in the dish.

Graham Muffins—One and one-half cups unsifted graham flour, two teaspoons baking powder, one tablespoon sugar, one-half teaspoon salt, one egg, one cup milk, one tablespoon melted fat. Mix all the dry ingredients thoroughly. Beat the egg slightly, add the milk, and stir with the fat into the dry ingredients. Do not stir the muffin batter any more than necessary. Bake in greased muffin pans for 25 to 30 minutes in a hot oven (400 to 425 degrees Fahrenheit).

#### SUGGESTIONS

Wax electric iron about once a month with a good grade of paraffin or beeswax.

Potholders are a source of distraction to many housewives, for they do not remain clean for any length of time. Here is how any woman can overcome this problem: "Keep your potholders clean by covering them with unbleached muslin covers that close with a snap. These covers are removed when soiled and are easily laundered."

When food boils over on the stove, or spills over in the oven, wipe it up with a long handled dish mop before it has a chance to burn and make a disagreeable odor. The long handle enables one to rub the hot stove or reach into the oven without burning one's fingers.

To make a new, easy and different cake frosting, place a milk chocolate candy bar on top of each hot layer. After about three minutes they will have melted sufficiently to spread over the cake, making one of the best frostings you ever tasted.

# The Parent Problem

By GARRY C. MYERS, PH. D.

### PUNISHMENT FOR ACCIDENT IS UNWORTHY

Two boys of seven are playing a game of chase in the living room. You see them. Perhaps you say, "Be careful." The running grows more vigorous until one boy bumps against the arm of the most expensive rocker, wrecking it. If he is your boy you probably "land" on him with a scolding or more painful punishment.

But why? Even though you cautioned him, he thought he was being careful. He certainly did not intend to break the chair. You knew very well that children running in a room endanger the furniture. But you did not stop the running. You really were responsible for the damage done.

Suppose you clearly had commanded him not to run. Then if he had continued to do so you should have punished him at once. The breaking of the chair was a mere accident and should have been considered so. You are sorry that the chair was broken; so is he. There let it end. By this time you must have it in your head that games of chase in the house are not to be allowed.

Nine-year-old Rebecca spills a glass of milk upon the dinner table. It was an accident, and there is no occasion for rebuke. You calmly ought to help her to prevent as much damage as is possible and treat it merely as a day's event, just as if an apple had rolled from the fruit basket when you walked across the room. If Rebecca had, however, been engaged at antics which you knew put the glass of milk

in danger you should have seen to it that the antics ended or that the milk had been removed to safety.

Luelva comes home with a hole torn in her dress. In a running game a playmate had seized her, and in Luelva's eagerness to escape the dress was torn. Are you going to punish her? No.

A certain other child having met with such a mishap was sent back to school next day with an ugly patch roughly sewed on her dress as punishment. How terrible!

If a child comes home frequently with torn clothes she needs some guidance in carefulness. This can be given during her play in and about the home. If necessary, let her be punished for activities which have been defined as dangerous to her clothes. After the damage has been done it is usually too late for punishment. It is not well to put the girl under trial to tell how this garment had been torn, else you tempt her to lie; and, to punish on the basis of the injured dress may be to punish merely for an accident which the child could not have prevented.

You and I have all sorts of accident, some of which are very expensive. If our co-partner scolds us we are tremendously annoyed. When we parents act as cultivated persons toward each other, we betray our good breeding by keeping quiet or by assuring our unfortunate companion that "it could have happened to anybody." When are we parents going to approach a similar level of good breeding in respect to accidents which befall our children?

## Gladys Glad on Beauty

AMERICA'S FOREMOST BEAUTY

### GLADYS GLAD EXPLAINS REMOVAL OF THE MAKE-UP

By GLADYS GLAD  
"Dear Miss Glad: I have been following the excellent instructions on make-up contained in your "Beauty Culture" booklet, and they certainly have effected a great improvement in my appearance. I never knew that my eyes could look so pretty until I tried out those clever make-up hints outlined in the booklet. However, I would like to know what, in your opinion, the best method of removing make-up is. I have difficulty particularly in removing the mascara from my lashes. May I hope for your assistance once again?" Leonore.

When cleansing the face of make-up, the first step is to remove the mascara. Stand over a basin of tepid water, and with a soft cloth or pledget of absorbent cotton, lave the water gently over the eyes. Do not rub the lashes crosswise, but stroke them lightly downward. The eyes should remain tightly closed until the mascara has been completely removed. Then apply a generous quantity of cold cream or cleansing cream to the skin, smoothing it over the entire face. The cream cleansing will remove any remaining bits of the mascara. Remove the cream with soft cleaning tissues, and apply a mild astringent to close the pores and to remove every last vestige of the grease. If your skin is tender, you might find it more beneficial to administer a soap and water cleansing after the cream has been removed.

"Dear Miss Glad: I generally have my hair marcelled each week after it has been shampooed. However, as my hair is rather dry, it always looks so bushy after it has been washed and waved. Is there any sort of a grease

that I could use to make my hair stay in place, and to give it more gloss?" Patricia.

If your hair is somewhat unmanageable after it has been shampooed and waved, you might use a bit of pure olive oil to keep it smoothly in place. Pour a very small quantity of the oil in the palm of your hand, and sweep your hair brush over it. Then brush the oil lightly onto your hair. Always brush the end of the hair first, to remove any excess of the oil from the brush. The ends are generally the driest part of the hair, anyway, and can stand more of the oil than the hair nearer to the scalp. After the ends have been brushed, smooth the brush gently over the entire hair. Used in this manner, the oil will help to keep your tresses beautifully in place, will add gloss and sheen to the hair, and will greatly enhance the loveliness of the wave.

"Dear Miss Glad: Although my hands are very nicely shaped, they are not as soft nor as white as I would like them to be. A friend advised me to rub glycerine on my hands after each time that I wash them. Do you think that this practice would benefit my hands?" Mrs. T. D. K.

Glycerine is an excellent cosmetic preparation, but I would not advise you to use it on your hands in its uncombined form. It is not a fat, but a triatomic alcohol that avidly absorbs water. It is very strong, and if you use it alone, it may dry and burn your skin. However, when it is ameliorated with rosewater, boric acid, almond oil, benzoin or flower oils, glycerine forms the most effective of skin lotions. A half and half mixture of glycerine and rosewater constitutes an excellent lotion for whitening and softening the skin of the hands.

## All of Us

Everything Circulates Water, Matter, Ideas, Lies and the Truth They All Get Around

By MARSHALL MASLIN

Everything gets around. Sooner or later, it does. Everything circulates.

Even matter gets around. . . A seed falls and germinates. It pushes its way through the dark earth, reaches the sunlight, grows toward the sky. It becomes a great tree and lives for a thousand years, dies and rots and nourishes the rich earth and is food for seeds. Water gets around. . . It falls on the hills and flows to the valleys. It rushes to the sea and joins the great currents there. It rises toward the sun, congregates in clouds, falls again to the thirsty earth.

Ideas get around. . . The thoughts that men have lived undiminished and unscarred through the tumultuous centuries. Rejected by the ignorant, embraced by the wise, they survive. . . The thoughts men had in India five thousand years ago fell into books and went across the sea to New England and into the brain of a Yankee named Thoreau. He wrote an essay on "Civil Disobedience." Half a century later a little brown Hindu read that essay in South Africa, took that

idea back with him to India, and proposed "Civil Disobedience" to the restless masses of his native land. . . That idea got around. Truth gets around. . . Lies get around. . . Gossip gets around. . . Fear gets around. . . Courage gets around. . . Everything, today or tomorrow, this year or next, gets around. It creeps, it tunnels, it walks, it runs, it filters, it flies—and it gets around. What you are really like—gets around. People find out and they tell!—with a wink, with a growl, with a lift of the eyebrows, with silence, with the eager spoken word. If you are a fine fellow or a hypocrite, a racketeer or a square-shooter, it will get around. People will know because—as the thoughts fly from man to man—Ev'nythings fly from man to man—Ev'nything Gets Around.

#### Extra! Extra!

Old Skinflint: "Here, boy, what's this you were shouting? 'Great swindle—sixty victims!' I can see nothing about it in this paper."  
Newsboy: "Great swindle—sixty-one victims!"

WEEK OF JULY 5

The fair weather we are expecting for Independence day in the most parts of Michigan will run over into the beginning of the week of July 5th.

By Monday the winds will have shifted over to the east and southeast, the barometer will fall to lower reading and then will follow two or three days of unsettled, threatening weather. During this period covering the first half of the week there will be many sharp summer storms of wind and rain.

The early days of this week will develop temperatures considerably above the seasonable normal, resulting in thunder storms and locally heavy downpours.

After the middle of the week temperatures will take a sudden fall to more refreshing levels. This change in temperature will then remain more or less steady for the balance of this week and will run over into the coming week.

The closing days of this week will be generally pleasant.

**Fire Stops Weather Predicting**  
A recent fire 9,000 feet above sea level temporarily interrupted a world wide study of long distance weather forecasting by means of the sun's heat variation. The computing room of the astrophysical observatory on Montezuma mountain, Chile, caught fire and destroyed many valuable tables used in calculating the solar constant.

This is but another proof that when man insists on studying second hand causes of weather, he will often be handicapped in his work from one cause or another.

The variability of the sun is not without a cause. It is only reasonable to surmise that if the moon affects the tides of the earth, surely the planets must affect conditions on the sun, which are reflected back to the various satellites in electrical currents. These take active form on this earth in heat, cold, precipitation, magnetic storms, volcanic eruptions, earthquakes, etc.

### Dinner Stories

#### Saved Energy Too

McTavish was the proud owner of a new cash register. One day, when an old friend came into his shop and bought a sixty penny cigar, the customer noted that McTavish pocketed the money instead of putting it into the drawer.

"Why not ring it up?" He asked. "You'll be forgetting it." "Oh, I'll nae forget it," replied the Scot. "Ye ken I keep track in my head until I get a dollar, an' then I ring it up. It saves the wear and tear on the machine."

#### Help

Green: "I understand that you got quite a good bit from some of the boys at the club to help poor Jenkins, who was so injured in that car smash."

Brown: "Yes, Smith showed a great deal of sympathy for poor Jenkins."

Green: "Did you try him for a contribution?"

Brown: "No fear. I know Smith. He is like the letter 'P.'"

Green: "What do you mean by saying he is like the letter 'P.'"

Brown: "First in pity, old boy, and last in help!"

### Money-Makers in "off times"

#### BIXLER DINERS draw

Long-profit crowds. Popular with home folks. Heavily patronized by Tourists. Goes big with Traveling Men. Pleasant dignified Business. Good locations plentiful. Look your community over. We erect Diner and turn it over to you ready to operate.

#### BIG margins in Food.

Low over-head. Generally conceded best Opportunity of Times. Pay for it from Profits. Modest down payment starts you. Three years to pay. Get started right away.

# LOVE, PREFERRED

## THE ROMANCE OF A BUSINESS GIRL

By EDNA ROBB WEBSTER

Copyright 1931, Central Press Association

### CHAPTER I

Mary swung around from her typewriter and reached for the telephone. "Miss Vaughn speaking," she announced, briskly. Then, after a moment, "Oh, hello—Dick," with a little breathless gasp, while her heart accelerated its speed from a normal seventy-two to something over one hundred.

"At the University club?" she repeated in an incredulous tone, and her face brightened perceptibly. "Why, of course. Thanks a lot, Dick. Yes, eight o'clock, then."

She replaced the instrument slowly, gropingly. It was so unbelievably true, Dick Baldwin, the debonnaire young wholesale man for another firm "in the street" and a former football star at Princeton, whom she had known less than a month and who had taken her out just twice, had asked her to a dance at the University club? She had dreamed of invitations like that, from men like Dick, but this—this was

What could the boss want now? She opened the big walnut-paneled door that gave access to her employer's private office from her own. Almost a year ago, when she had come here as private secretary to Ronald K. Foster of Foster & Co., Investment Brokers, another of Mary Vaughn's dreams had been realized. The thrill of it had subsided some time ago, for she had learned that human nature catalogued Ronald K. Foster in very much the same as that in the John Brown files; and that being a big broker's secretary can be just as prosaic, exacting routine and exasperating in the work of a common "stenog" in any line.

But the spacious walnut-paneled room with its hand-made furniture, silk-damask window hangings, Georgian mantel and Sarouk rug—with the buzzing, clicking translux dominating it all—had not lost its fascination for her. This was the atmosphere in which she belonged—not in the six-

crossed over to the window and slumped listlessly against the casement. What would five minutes, ten—a whole hour—matter now? Eight, nine, ten o'clock, were all the same to her now. With unseeing eyes, she gazed far out from the wide skyscraper window, across the peaks and plateaus and waterways of the city—peaks and plateaus of concrete and steel that made a panorama like a relief map from this distant height. Far below lay the gray Hudson, flowing with commerce; endless traffic of ferries, steamships, barges, yachts and battleships, plying up and down, hither and yon, each freighted with adventure and romance as well as its cargo.

For some five minutes Mary stood at the window; listless, inert, weary, wondering what it was all about. Wasn't there, somewhere, happiness for her? Hadn't she carried her burden long enough to deserve even a little reprieve? Always, she seemed to

"I feel like a slave driver to ask you to work again tonight."

real. She held her head in her two hands, childishly, as if to steady it. That was the way Dick Baldwin, or even his voice, affected Mary. Demure, poised, industrious, practical Mary—who had been forced by circumstances to wrestle with the many realities of life.

She had learned that tomorrow not only didn't provide for itself but that the tomorrows of some four others looked to her for provision, as well. In the past five years she hadn't found much time even to day-dream about University club dances, or any other pleasures. For that matter, she hadn't seen a man until a month ago whose society she preferred to a comfortable, quiet evening at home after the difficult days at the office.

Wasn't she glad, now, that she hadn't spent much of her time on the callow youths who had persistently sought her out; like Eddie Graham in Paterson who always acted when he saw her, like she now felt about Dick, Howard Davis in the other office where she had worked first, and others.

Wasn't she even more glad that she had anticipated and prepared for just such an occasion as this? After that second evening with Dick, when he had given every indication that he would be wanting to see her much more, she had decided that at all costs she must have some new evening clothes. Nothing too inexpensive, either. She had selected, after hours of careful shopping and deliberation, a wine-red chiffon that swept the floor in diaphanous folds, with a cowl collar draped from a sharp V-shaped décolletage and a narrow beaded yoke. She told herself repeatedly that she couldn't afford the dress and that she might never need it. But just in case she should ask her for a real date, she had to be prepared! Now it had happened!

And all so unexpectedly. A month ago, Mary hadn't known a man with whom an evening would be more important to her than working at the office. Then, vivacious, industrious Dick Baldwin, the new wholesale man for the house of Jameson-Blair, had called at the office to offer Foster a participation in a syndicate loan for the United Metal Co. that would place 100,000 shares on the market. Dick had made an instant impression on Foster, who said so to Mary; but so had Mary impressed Dick, as he practically told her so when he asked her to dinner with him the third time he talked with her.

Mary turned back to her machine with new vigor, as if she had taken a stimulant. Five minutes before, her back had been aching so it felt like hot irons were scorching the flesh, and the stack of letters had seemed to grow instead of diminishing, as she struggled on in an attempt to get them all out before five o'clock.

Her nimble fingers flashed over the keys. The bell buzzed. "Over! Over!"

room duplex in Paterson, with its nondescript furniture and Wilton velvet rugs. Perhaps, if she were patient, she might have a home like this—or at least a one-room apartment just as she wanted it—some day.

"You called me, Mr. Foster?" Mary's voice was of such a quality that a harassed, enterprising employer would hire her as soon as he learned that she was a good typist and knew what 5's and 6's meant, in the jargon of "the street." Her voice matched her personality.

"Yes, Miss Vaughn. I feel like a slave driver to ask you to work again tonight, but this investigation has just been closed and the reports have to go out at once. We haven't too much time before the issue date, you know."

Foster spoke hurriedly and without looking at her, while he sorted papers into order on the vast, satin-rubbed surface of his desk. He was a man past middle age whose reputation in "the street" was inimitable. His life had been his work, and although he had his clubs and social contacts, he couldn't be away from business for long. Vacations, to him, were a confession of laziness. His personality and character had been formed and molded by his business; he was a good sport, a shrewd analyst and a dynamic worker. He lived for, by and with his work.

Yet, he was an idealist at heart. Few suspected this. Perhaps no one had ever delved below that crisp, cool, indifferent surface to the emotional, simple, home-loving man. Away back in his consciousness there had always been an obscure vision of domestic comfort, human sympathy and mutual understanding. But he had never found time to bring that vision to the fore and make it a reality.

So here he was, at fifty, with an excellent secretary his nearest approach to human sympathy and understanding, and the forming of a new financial syndicate the paramount issue of his life at the moment.

As he reached over to take the ready pen from its bronze base where two ornamental pheasants strutted haughtily in opposite directions, he looked up for her acquiescent reply. "What's the matter, Miss Vaughn?" "Oh—why, nothing. Of course, I can stay, Mr. Foster."

"Fine. It surely won't be later than eight o'clock," he promised her with sudden bright optimism.

Mary went out and closed the door quietly. But the world crashed about her, deafeningly. What a break! The first real date of her life—at least the most important in her life—and she had to work! But Mary was loyal, to everyone, and particularly to her employer. Her life, and that of her family, depended upon her job, and she never proposed to do anything half way.

Although she had so much to do that she would have to work late, she

was carrying so much for others. At eighteen, she had had to give up college—glorious dream! She had planned to work every cent of her way, because her father couldn't have helped her. His wage, as a girder rigger had been generous, but uncertain. Then there was Bonnie, sixteen when it happened; and the twin boys, only six, who had been the calamity of the family ever since their dual arrival. Even now, it would be easier without Tim and Ted, Mary thought ruefully, though she adored them and would do anything in the world for them.

The Vaughn family had been prospering with the age of skyscrapers that sprang up like beanstalks everywhere in the cities of the east. Then, one day Tim Vaughn had been brought home on a stretcher, a shapeless form. Mary had had to take a hasty business course while Jenny Vaughn supplemented the income from the insurance by taking in sewing. They had managed to finish paying for the house Tim had started to buy, and the rent from the other half of it covered the expense for the whole, and gave them a home in which to live. Mary had to supply the rest.

Bonnie never could be depended upon. Though she was only two years younger than Mary, she had been the baby of the family for ten years before the calamity twins had arrived on the scene; and Mary could not for a moment remember a time she had not had to give the largest apple and the best of everything to Bonnie.

Bonnie had been not only the baby but the beauty. From the time she had been old enough to sit in a high chair in all her dainty, curly-gold loveliness and laugh with her big blue eyes and clap her dimpled hands, the family had bowed its knee to Bonnie. Her name hadn't been Bonnie then, it had been plain Jane; for Mrs. Vaughn liked plain, sensible names. But some Scotch neighbor had called her a bonnie lass, even when she was a wee child, and Bonnie had forthwith adopted the word as a name. She liked it—and Bonnie she grew to be.

Bonnie, too, had taken a commercial course, but she never had become acclimated to anything so cruel and stupid as work. There was something the matter with every position she had, and she never lasted long anywhere. About the time she had earned enough for a new wardrobe, something went wrong. Well, she wasn't going to slave for a meager living all her days, anyway. Not she! Work soiled her pretty hands, early morning hours were no less than criminal punishment, street cars were loathsome and as for commuting—well, that was absolutely out of the picture for anyone so delicate as Bonnie!

Such was the family which depended upon Mary.

Yet there was no rancor in Mary's heart against the world, even on this particular day of sudden disappoint-

ment. After all, she was lucky, she told herself. Just imagine having a position like hers at a tenpenny salary, and spilling gloom all over New York City just because she had to break a date!

She shook herself resolutely and turned to the telephone. If Dick Baldwin never asked her for another date—what of it? When she again heard his voice, though, she knew "what of it." She told him how it was.

"Oh, say, after all, you promised me first," he objected vigorously.

"I know, Dick, and I am so sorry, really. You know I want to go, don't you? But the boss is all tangled up and I have to help straighten him out before I leave."

"Well, cut the ropes and break loose. When can you leave?"

"Not a minute before eight. And I couldn't make it, you see. I would have to go home and dress. Get someone else, Dick."

"There is no one else," gloomily.

"Well, I can't say any more than that I'm sorry, Dick."

"All right, I'll be seeing you later," Mary hoped with all her heart, as she put down the telephone, that he meant those last words, that he would call her again soon. But she feared that he wouldn't.

The hours dragged on interminably after Mary had returned from a hasty lunch at 5:30. Foster dictated for an hour and then left her to clear up the wreckage. The gigantic pyramid of offices was almost silent and the slightest sounds echoed eerily.

The tumult of thudding and tapping feet; the click and clang of doors and desk drawers; the gasping of elevators stopping and starting with a low rumbling of gliding doors, like great dragons breathing and grumbling and swallowing people by the mouthfuls, only to spew them out again for more; the shouts and laughter of repartee and farewell—all of that magic, fatiguing, exhilarating hour of 5 p. m.—had left a vast silence in its wake in that towering bundle of space.

Outside the window, bold, curious searchlights on other towering pyramids of stone were flirting with their neighbors; caressing, embracing each others' gleaming shoulders like a throng of pleasuring people. Electric signs of brilliant hues blinked and faded like precious jewels on their breasts and were reflected in the deep black waters of the river as in a mirrored wall.

Fascinating, always intriguing, this turbulent city of complex life. Mary loved it as she loved life—all the world. She liked to be in the thick of the struggle. Even if it were stifling and exhausting and heart-breaking at times, she loved it. But she was a woman. She wanted her own fireside, her own man, her own children—some day.

At last the work was finished. Foster had known it would be before she left, and that every detail would be complete, as per orders. Mary was no longer conscious of the ache between her shoulders; it was so intense by this time that she felt numb with it. Her eyes burned and the muscles in her arms were strained so with holding them at right angles that it hurt to straighten them out.

She rode down in an empty elevator and said a cheery good night to the night operator. The outer revolving doors seemed to weigh a ton. The rush of cold, foggy air welcomed her into the weird solitude of deserted Wall Street at night.

And then she saw Dick—waiting across the street in his coupe.

(To be continued.)

### Modern Homes Have An Extra Room

Modern five-room houses have six rooms, and modern six-room houses now have seven rooms, for architects and builders are turning their attention to making the basement livable, with the result that thousands of homes now have children's playrooms, billiard rooms and recreation halls for both adults and children in the basement. This movement for making the basement a part of the house and thus add a whole floor to the home has received added impetus through the wider use of fuel oil for home heating. With the absence of dust and ashes, the basement can be kept as neat and tidy as the living room.

"During the past few years several hundred thousand homes of average cost have had their basements revamped, converting what was once a cellar with all that went with it, into a modern, dry, attractive and highly useful basement, with an evenly heated, properly conditioned atmosphere rivaling that of the best rooms in the house," Morgan J. Hammers, vice-president of the Petroleum Heat and Power Company, recently said at a meeting in New York. "Every member of the family can use such an added floor. It is impossible to conceive a happier arrangement than such an added facility in connection with entertaining. The hostess can have several or a dozen tables of bridge in such a lower floor room without disrupting and generally discommoding the whole household and the living quarters above in preparing and holding such an activity."

In keeping with this trend to make the basement a part of the house, automatic heating equipment manufacturers have greatly improved the design of their domestic boilers. The heating units in the latest styles are enclosed as a unit under the boiler, and a big range of colors are available for the housewife to select from to harmonize with the decorative scheme.

### C. M. T. C. Camp To Be Named After George W. Woodard

The Citizens' Military Training Camp at Camp Custer this year will be named after Ensign George W. Woodard, who joined the service at Litchfield, Michigan. His nearest living relative is Mrs. George M. Woodard, 245 Hillsdale Avenue, Hillsdale, Michigan.

Born in Wallace, Kansas, December 3, 1893, Ensign Woodard's family moved to Michigan while he was still a child. He attended grammar school in Michigan and later graduated from Hillsdale College. He became principal of the high school at Litchfield, and continued his studies at the Normal at Kalamazoo.

When the United States entered the War he enlisted in the navy and after some months of training was commissioned an ensign at Pelham in August, 1918.

His death is one of the heroic tragedies of the War. He was assigned to the U. S. S. Ticonderoga and on his first trip to France this vessel was savagely attacked September 30, 1918 by a German submarine which shelled it from close range, firing on helpless life boats and murdering American sailors in cold blood.

Ensign Woodard commanded the only life boat that escaped the shells of the enemy, but he was recognized as being an officer and taken prisoner aboard the U-boat. Some hours later he was found in the water clinging to a submerged raft with nine other men. By climbing aboard a life boat that drifted by he could have been saved, but instead he ignored his own suffering and first assisted the other men to safety. Before he could climb aboard himself it was too late, as the heavy sea had again cast the raft adrift. Nothing more was seen of the raft or the five unfortunate men who perished.

Fine remedy to relieve Rheumatism, Gout and Sciatica. Write for FREE INFORMATION to

L. E. WESTPHAL  
5608 Princeton Ave., Chicago, Ill. 1003

### GIANT AZTEC BEAN

The above illustration was reproduced from an actual photograph, to show the comparative size of the Giant Aztec Bean with that of the common field or navy bean.

#### LARGEST OF ALL BEANS

It is a real bean; looks like a field or navy bean except that it is 8 or 9 times as large. 18 or 20 Giant Aztec beans usually weigh an ounce, while it takes from 160 to 170 of the common field beans to weigh an ounce. It is a bush bean; will stand more drought than most varieties; very hardy; and probably the most productive bean grown. One planter reports that two years ago he secured four beans, the product of which he replanted last spring, and in the fall harvested 240 pounds of dry beans. The quality of the Giant Aztec Bean is unexcelled both as a green and dry shell bean. Our supply of seed is limited, and the price is high, but now is the time to get started with this wonderful bean. 8 beans, 25c; 40 beans, \$1.00; one-fourth lb., \$2.00, postpaid.

## McDonald's Drug Store

GOBLES, MICHIGAN

The Best of Everything in Drugs

## Demand an "Open Formula" Feed

KNOW EXACTLY WHAT YOU ARE BUYING

Every Farm Bureau Feed is Open Formula

A so called "formula" means nothing unless the NUMBER of POUNDS of each ingredient is shown on the tag. A feed may claim a long list of ingredients and yet only a "cupful" of some of them may be used and the "formula" be correct. A good feed is not ashamed to show the actual number of pounds of each material and to guarantee it. That's why Farm Bureau Feeds sell.

MERMASH is the only poultry feed containing true "MANAMAR"--the "food from the sea." Originated by Philip R. Park and obtainable ONLY through the Farm Bureau in Michigan. Mermash is so popular that others will no doubt try to imitate its formula, but only Mermash contains 200 pounds of genuine Manamar (40 per cent protein) per ton. Use Mermash for starting, growing and laying. One large chicken raiser claims 20 per cent egg increase by use of Mermash

2-12-6 FERTILIZER \$32 PER TON

166 PER CENT LIME \$9 PER TON
