WHEAT EQUALS IN FEEDING TRIALS

Michigan wheat growers can derive some consolation in this year's low yields for the results of the feeding trials at Michigan State College which show that when the grains are ground up and fed to hogs as compared to whole grain, more of the essential nutrients are absorbed. The hogs were fed at the same level of feed and the same amount of food was consumed.

Two hogs were used for each treatment and the results were averaged. The hogs were fed twice a day and the feeding was continued for 21 days. The hogs were then weighed and the data were analyzed.

The results show that when the grains are ground up and fed to hogs as compared to whole grain, more of the essential nutrients are absorbed. The hogs fed the ground grain gained more weight and had better feed efficiency than the hogs fed the whole grain.

The conclusion is that grinding the grains before feeding them to hogs can improve their nutritional value and help to meet the needs of the hogs for essential nutrients.

CHAMPION LOOPER

Maryse Polkowsky, a noted photographer, has been working on a series of photographs of the American athlete. Her pictures have been exhibited in several countries and have received considerable acclaim. She has also written a book about her work.

COUNTRY NEWS

Greta to Wed

Flora Koens, of Amsterdam, Michigan, has announced her engagement to be married to John H. Koens, of the same city. The wedding will take place in August.

The couple met while attending the same high school and have been friends for several years. They have decided to marry and are making plans for their wedding.

Ford's Tavern Ready for Quest

The tavern is located at the corner of Main and Market Streets and is open daily from 8:00 a.m. to 10:00 p.m. The tavern features a variety of drinks and food, including sandwiches, salads, and burgers.

Sally's Sallies

In this era of fast food and convenience, Sally's Sallies has become a haven for those seeking a traditional meal. The restaurant offers a variety of dishes, including sandwiches, salads, and soups.

Fernville Exchange to Install New Equipment

The Fernville Exchange has decided to install new equipment in order to improve the quality of service provided to customers. The new equipment includes a computerized switchboard and a digital voice response system.

This will allow the exchange to handle calls more efficiently and provide customers with faster service. The exchange is located at 123 Main Street and is open from 9:00 a.m. to 5:00 p.m. Monday through Friday.

New Test for Phosphates

A new test for phosphates in soil is being developed by researchers at the University of Wisconsin. The test is designed to determine the amount of phosphorus available to plants in the soil. The test is based on the fact that phosphorus is needed for plant growth and that it is absorbed by plants through the roots. The test involves the addition of a chemical to the soil and the measurement of the resulting reaction. The test is said to be more accurate and faster than existing methods.

Farmer asks if using the following method of measurements. Add the width of the material and subtract it from the final measurement. The resulting value is then the price of a better cultivator.

Price of Farm Tools, Yesterday and Today

The early type of riding cultivator was made of iron and wood, sold for $5.50. The modern一天 system would have it at $55. The price of a 14-inch plow is stable, sold in 1978, for $75.00. The price of a 14-inch plow today is $200.00. The price of a 14-inch plow today is $200.00.

POULTRY

IMPROVEMENT IS SEEN IN POULTRY MEN

The poultry industry, which has been facing many challenges in recent years, is showing signs of improvement. The number of broilers produced has increased, and there is a growing demand for high-quality eggs and meat.

The poultry industry has also been focusing on improving the health and welfare of birds. There is a growing awareness of the importance of providing birds with a comfortable environment and adequate space.

Speaking of improving procedures of farm produce in general, the consumer is quite convinced that the poultry industry is taking steps to improve its procedures. The consumer is satisfied with the quality of eggs and meat that they are purchasing.

SEEDS ARE RAISED

On 200,000 Acres

More and more the seed producing industry is becoming an important part of the United States economy. The production of seeds is a major industry, and many farmers are involved in the production of seeds for both domestic and export markets.

Farmers grow crops and produce seeds that are to be sold in the market. These seeds are then used to produce the next crop. The process of producing seeds is called seed raising.

Two thousand of these acres are devoted exclusively to cultivation of crop seeds for the seed trade. The production of seeds is an important industry in the United States, employing many people.

There is money in the cultivation of crop seeds. The seed industry has an important role in the domestic and export markets.

Proceedings Begun

For Protein Foods

Institution of proceedings to provide for the sale of low protein foods is being considered by the Committee on Agriculture of the Senate. The agriculture departments, in providing the same, were attempting to prevent the basis in the manner of their foodstuffs. However, under the circumstances the proposed measure was designed to provide for the production of another type of crop for consumption by the low protein foods.

To the public, the restrictions were so made that the public and low protein foods were allowed to be sold in the market.

It is to be noted that the public and low protein foods are allowed to be sold in the market.

Protein Foods

In a statement, the Committee on Agriculture said that the restrictions were so made that the public and low protein foods were allowed to be sold in the market.

It is to be noted that the public and low protein foods are allowed to be sold in the market.

CSDERN LEAKS

In our shop, it is usually a waste of time and money to try to stop a leak in a CSDERN that has been properly flushed and treated. A shrewd purifier may have a leak in his shop, and the cost of repairing it may be prohibitive. It is advisable to have a purifier look at any CSDERN that has been filled and then a leak has occurred.

A simpler and cheaper solution is to use a properly treated CSDERN or a purifier, which prevents any and all leakage. A small amount of water can be placed in the CSDERN or purifier, and it will stop any leak.

Tri County Telephone Company

You can communicate with most anyone in most any place in the world from your phone in Gobles if you have your telephone.

This is true.

It has been said that today’s world is “a small world” because the phone has made the world so much smaller. The phone allows us to communicate with people all over the world, no matter how far away they may be. It has changed the way we live and work and has made life so much easier. Without the telephone, it would be much harder to stay in touch with friends and family, and it would be much harder to do business. The telephone has become an essential part of our lives, and it is hard to imagine life without it.
LOVE, PREFERRED
THE ROMANCE OF A BUSINESS GIRL

By EDNA ROSS WEBBER

Copyright 1925, Goodspeed Press

WEIS OF JULY 13

A week before Christmas, with the days getting shorter and colder, and the nights turning into a winter wonderland, the atmosphere was thick with the scent of peppermint and the sounds of sleigh bells in the distance. People were busy finishing their holiday shopping, and the streets were aglow with the warm glow of festive lights and the twinkling of stars.

The temperature was dropping, and the forecasters were predicting a week of freezing weather ahead. The conditions described above make it the perfect time to enjoy a warm cup of cocoa and a good book, like this one.

This book tells the story of a business girl named Mary, who is working at a very busy office. With the holidays approaching, Mary's workload is only expected to increase. She is determined to finish her work on time, but she finds herself struggling to keep up with the demands of her job.

Mary is a hardworking and dedicated employee, but she is also a young woman who is eager to explore the world beyond her office. She dreams of traveling to new places and meeting new people, but she knows that her job responsibilities keep her from doing so.

As the days go by, Mary's workload only gets worse, and she begins to feel overwhelmed. She wonders if she will ever be able to complete all of her tasks on time, and she begins to feel discouraged.

But then something unexpected happens. Mary's boss, Mr. Froster, takes an interest in her and offers to help her. He offers to teach her new skills and to guide her through the challenges of her job.

Mary is grateful for Mr. Froster's help, and she begins to feel more confident in her abilities. With his guidance, she is able to complete her work on time, and she feels a sense of accomplishment that she had not felt before.

In the end, Mary realizes that she has found a new mentor in Mr. Froster, and she looks forward to the day when she can return the favor. With his help, she has been able to overcome the challenges of her job, and she is ready to face whatever the future holds.

This book is a heartwarming tale of love and perseverance, and it is sure to inspire young readers to pursue their dreams and to never give up on their goals, no matter how difficult they may seem.
