LOCAL BREVITIES

Editor and Mrs. Wood of Bangor were in town Monday.

Charles Hahn is the new pastor at the Methodist church.

Otis Lohberg is able to be about town again. Looking fine.

Mr. and Mrs. Wayne Douglas will live in the Mrs. Ida Cole house.

The Community Aid will meet with Mrs. Homer Connery next Wednesday.

Mr. and Mrs. Vern Thayer and Mr. and Mrs. Will Lamphere are on an automobile tour to California.

Mr. and Mrs. Andre attended a district meeting of funeral directors at Benton Harbor last Wednesday.

Mr. and Mrs. Martin Tychsen and Marian were called to Bradford, Ill. Monday by the serious illness of Mr. Tychsen's mother.

Walter Hopkins and family Mrs. Verona Lonsbury and Will Edmonds of Kalamazoo spent the week end with Mrs. Alice Sheldon and Mary Edmonds.

Dr. and Mrs. Rolla Chamberlin of McHenry, Ill., were week end guests at Forest Camfield's, and spent Sunday night at Will Ferguson's, returning Monday.

Mrs. Estelle Stevens and daughter, Ethel and sons, Robert and Owen of Detroit were week end guests of their cousins, Mrs. E. W. Myers and Mrs. Loren Rhodes.

Mrs. Ida Cole and Mrs. Al Wauchock entertained at bridge Thursday afternoon, thus creating another enjoyable afternoon for the ladies and late suppers for the men.

The P. N. G. club will have an all day meeting with pot luck dinner at Mrs. Bessie Mahieu's Tuesday, Sept. 22. Members who wish a way to go please meet at Machin store at 10:30.

The Brandywine marsh fire started spreading last Friday and back fring was necessary to save the cottages and surrounding farms.

Born, to Mr. and Mrs. Mark Kesler Saturday, Sept. 12, an 8 pound daughter, Marvel Genevieve. Mark surely wears the smile that won't come off.

Mr. and Mrs. Jay Culp of Grand Rapids and Mrs. Minnie Keller left Sunday for a visit with relatives and friends at Sturgis, Ypsilanti, Flushing and Howe, Ind. They will be at home in about two weeks.

John Luptak had the misfortune to fall from his barn and break his leg. He was hurried to Borgess hospital in the Andre Ambulance and it is hoped he will recover speedily.

First rehearsal last night for the new school band. Indications are that there will be about 40 enrolled in this new venture and we believe this will go on record as one of the outstanding features of the school. A good band is an asset to any organization or community and while the beginning on a band instrument is a decided strain on the home life we feel that no other accomplishment will give more lasting satisfaction to the boys and girls.

Harry Hough, county commissioner of schools, announces a teachers meeting at the high school building, Paw Paw on Saturday, Sept. 19 at 1:30 p. m. fast time. The principal object of this meeting is to receive directions from the worker from Michigan State College who will direct plans for music in our schools this year.

Rumor says that Henry Ford has issued a decree that employees at the Ford plant must have a garden in 1932 to hold their jobs. Charles A. Repp, a large fruit grower, reciprocates in that he proposes to tell his employees that he will discharge everyone that buys Ford cars. Looks like this ultimatum business is going to create complications.

The first all school party last Friday night proved most enjoyable in every detail.

Henry Knowles died at Borgess hospital in Kalamazoo Tuesday, after an extended illness.

Comrade Ed Rogers is attending the National Encampment, G. A. R. at Des Moines, Iowa, this week. We predict he will be in attendance at the final encampment of this organization whose ranks are thinning rapidly.

Many Banks to Re-open Soon

Confidence was voiced Saturday by Rudolph E. Reichert, state commissioner of banking, that several banks closed recently because of "runs" by depositors will re-open soon according to a Detroit newspaper.

"Many of the banks forced to close were in exceptionally good condition," the commissioner said. "Only most extraordinary and persistent demands from depositors could have forced even temporary suspension."

Although the banking department does not venture predictions as to the amounts depositors will receive through liquidation of the closed banks, the reports of its examiners indicate many of these banks will return 100 cents on the dollar and practically none will return less than 75 cents.

Except for a single bank failure many years ago, the average amount received by depositors of state banks closed by order of the department has been 68 per cent of the deposits. This covers the whole history of the state banking system.

The banks closed because of recent runs are in much better condition than those closed because the banking department found them unsound. In many cases the banks recently closed showed no impairment of capital or surplus, while the older cases always involved an impaired condition.

Assuming, however, that the banks recently closed do not pay depositors more than those of former years, the loss to Michigan's depositors this year will amount to less than one and one-half per cent.

The failures have involved three and one-half to four per cent of deposits. Of this percentage at least three-quarters and possibly more of the depositors' money will be returned to them by the receivers or through reorganization or reopening of the banks. This leaves between one and one and one-half per cent as the net loss, all of which is frankly charged to unreasonable demands by panic stricken depositors.

The banking department is able to cite these figures as proof of its contention that deposits in banks are still the safest form of investment. The depositors, it is pointed out, have had the advantage of bank interest, and the interest amounts to more than twice the probable loss.

Had the same money been put into securities, even government bonds, or into real estate or commodities of any sort, the probable loss would have been astoundingly greater, it is urged. While the banks were losing less than one and one-half per cent, and more than making that up in interest paid to depositors, government bonds have fluctuated widely, gilt-edged securities have fallen to less than half of their former value and real estate has suffered all the depreciation of the sort of depression that comes only once or twice in a century.

These facts, department officials believe, are beginning to be realized by the public and are making it easier for the sound banks that were closed because of hysteria to reopen and conduct the business essential to their communities.

We are ready for your job work. Bring it in today.

School Notes

Class officers for Gobles high school have been elected as follows: Seniors: President, Paul Oram; vice president, William Clement; secretary, Gladys Youderian; treasurer, Allan Sage; faculty advisor, E. George Schutt.

Juniors: President, John Oram; vice president, Bernith Minkler; secretary, Bernice Lamphear; treasurer, Roger Camfield; faculty advisor, Wayne Douglas.

Sophomores: President, Robert Curtiss; vice president, Thelma Machin; secretary, Dale Stimpson; treasurer, Melvin Hoskins; faculty advisor, Mrs. Foulk.

Freshmen: President, Marie Smith; vice president, Norton Young; secretary, Corlan Cummins; treasurer, Frank Osmun; faculty advisor, George Walker.

Sunny Day Club

The Sunny Day Club met at the home of Mrs. M. J. Westcott Sept. 10. There were 23 members and 8 visitors present. At noon a lovely dinner was served, after which the business meeting took place, with election of officers, followed by a fine program that was enjoyed by all. There were six plates sent to the sick.

The next meeting will be with Mrs. Anna Johnson Sept. 24 at the Community Building.

Officers elected are: Della Morgan, president; Celia Coffinger, secretary; Alice Simmons, vice president; Rose Stech, reporter.

County's Largest Wedding to be Held at Hartford

Van Buren county's largest wedding was held at Hartford a year ago when 10,000 guests swarmed the grounds of the Van Buren county fair to witness the first public marriage ceremony performed in a beautiful wedding scene.

This year a Paw Paw couple will be the bride and groom at a public wedding on Saturday night, October 3, when a greater number of wedding guests are expected at the "party."

The wedding scene will be arranged this year by the company staging the nightly revue, and will be even more gorgeous than that of a year ago. There will be a greater number of bridesmaids, both Van Buren county girls and members of the revue, and the happy couple will be showered with gifts at the conclusion of the ceremony.

Busy Workers

The annual picnic of the Busy Workers was held at Root's landing, North Lake, Thursday, Sept. 3. Nearly all members with their families were present. A lovely pot luck dinner was served at noon and a fine program enjoyed during the afternoon. After each had fulfilled their duty with the ice cream and cake all left for home feeling the day had been well spent so far as picnics go.

High School Bands at Hartford Fair

High school bands and orchestras which furnished the music during the Van Buren county fair a year ago, are returning for the 1931 fair to be held at Hartford from Sept. 29 to October 3.

The musicians from southwestern Michigan's high schools made a decided "hit" with the fair crowds a year ago, and there has been a popular demand for their return this year.

School exhibits have been made a dominant feature of the fair at Hartford, and in employing the high school bands officials of the fair believe they are encouraging music in the schools, an increasingly popular branch of school work in recent years.

KENDALL

Mr. and Mrs. William Wilcox of Hamilton, Ind. visited Mr. and Mrs. Frank Lewis from Friday to Monday.

Mr. and Mrs. Glen Champion and little son, Marshall called on his mother, Mrs. Aleda Champion Sunday afternoon.

Mr. and Mrs. Barrett and family of Galesburg visited daughter, Mrs. Carrie Young Sunday.

Mrs. Sarah Crosby of Gobles spent several days last week with Mrs. Celestia Lewis, while Mr. Lewis was visiting in Bangor and Watervliet.

Mr. and Mrs. Bert Wheeler of Becker district and Gordon Becker of Kalamazoo visited Mrs. Etta Becker Sunday.

Mr. and Mrs. Henry Young spent a few days visiting their son, Raymond in Allegan.

Born, to Mr. and Mrs. Mark Kesler of Gobles Sept. 12, a daughter. The little lady has been named Marvel Genevieve.

Wm. Hofacker is reported better at this writing.

Mr. and Mrs. Estus Leversee and baby Billy visited Sunday with Mr. and Mrs. Russell Sackett in Kalamazoo.

Mrs. Amelia Odell and the young people of the M. E. church will give a dedication concert Sunday evening, Sept. 20 to christen the new piano which was presented to the church by the Pifer family.

Mr. and Mrs. Henry Waber visited Joe Kane at Bronson hospital Sunday evening.

Anna Ray and Willard Ramsdell of Scotts had a narrow escape Saturday evening while returning from Gobles. Just west of Kendall their car was struck by a Hupmobile bearing an Illinois license and both cars were badly wrecked and had to be sent to garages for repair. Fortunately no one was seriously hurt.

Mr. Luptak, living west of this village fell from the roof of his barn Friday, smashing his hip. He was taken to one of the Kalamazoo hospitals later that afternoon.

Bayard R. Kingsley of Chicago, who has been spending the summer vacation in Washington, D. C., where his father is at present, has arrived here to spend a few days with his aunt, Mrs. M. K. Waber and cousins. He is hitch hiking his way to Chicago and was fortunate to ride most of his way Monday from Holly to Kendall.

Mrs. Charles Dingman of Comstock came Monday evening to spend the week with her friend, Winifred Heffernon.

WAVERLY

Mrs. A. C. Blakeman visited at Vernon Root's of Kalamazoo the first of last week.

C. Lockman has moved into the house formerly owned by Mrs. Martha Miller.

R. E. Sage visited in Kalamazoo the latter part of last week.

Leon Laws and family of Three Rivers and Mrs. Rippey of Centerville visited at John Russell's Sunday.

A goodly number of the Gleaner class enjoyed a very pleasant evening with Ruth Stoughton last Saturday night.

Ruby and Gertrude Adriance have resumed their work in the Lansing schools and Helen in the schools at Channing.

Bernard Blakeman of Kalamazoo called at the home of his parents Sunday.

Howard Geiger's ball team of Paw Paw will meet with the Covey Hill ball team next Saturday afternoon at 3:30 at Benwire's ball park for a ball game.

We are ready for your job work. Bring it in today.

Obituaries, 25 lines free; all over 25 lines 2 1/2 cents per line will be charged. Cards of Thanks, 50 cents.

Copy for advertising must reach this office not later than Tuesday noon. All that comes in later can be laid one side until the issue of the following week. Copies of the paper, 5c each. Copies of the paper are not included in obituaries or cards of thanks.

Order for Publication

STATE OF MICHIGAN—The Probate Court for the County of Van Buren.

At a session of said Court, held at the Probate Office in the Village of Paw Paw in said County on the 10th day of September, A. D. 1931.

Present: Hon. Merle H. Young, Judge of Probate.

In the Matter of the Estate of Jennie Clement, incompetent.

Bertha Styles and Marie Millman, guardians of said estate, having filed in said court their petition praying for the interest of said estate in said real estate in certain real estate therein described.

It is Ordered, That the 12th day of October, A. D. 1931, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Gobles News, a newspaper printed and circulated in said county.

MERLE H. YOUNG, Judge of Probate.

A true copy. Mamie L. Shaefer, Register of Probate.

Four Towns Have Days at Coming County Fair

Four towns will have their special days at the Van Buren county fair at Hartford this year.

Bangor's day is Wednesday which is also school day. Paw Paw has its day on Thursday, Benton Harbor on Friday and South Haven on Saturday. Each town has its special race on the afternoon speed program, and special features throwing the spotlight upon each town are being arranged.

Notice

The party who camped in my yard for half an hour last Wednesday night (week) around one o'clock and took a fishing tackle box from the lumber pile is known and if he wishes to avoid arrest and penalty he will return the same to where he found it.

Mrs. M. Feely.

Schools are Planning Larger Fair Exhibit

Southwestern Michigan schools, which have annually packed the balcony of the floral hall at the Van Buren county fair at Hartford, will have an enlarged exhibit at the fair to be held from September 29 to October 3.

By giving the schools a prominent place in the annual premium book, the Van Buren county fair has built up over a period of years what state educational authorities say is the most comprehensive school exhibit in Michigan.

It reflects what Young America is doing in the school, from the kindergarten to the manual training, domestic science and other specialized departments of the high school.

Emphasis is laid upon the agricultural work of the schools, and blended with the school department will be the exhibits of the 4-H clubs and other boy and girl groups.

Wednesday, Sept. 30, will be school day at the fair, when a majority of schools in Van Buren county will close and the students will be admitted to the fair all day for 15c.

Hundreds of dollars of the money paid out by the fair in premiums goes to the schools, and a number of schools have promoted special projects with money won at the fair.

Methodist Church

Lillian Mann, Pastor.

CAMERA NEWS

When Thousands Rallied Against Crime

New York citizens, smarting under the wanton killing of two babes by gangland gunplay within a month of each other, joined in a huge rally, 20,000 strong, at Madison Square Garden, against the underworld, which has taken such a toll in human lives, and resolved to smash its menace. Among the speakers who exhorted the throngs to drive gangs from their stronghold were Gen. Smedley Butler of the Marine Corps (left); Bainbridge Colby, former secretary of state (center insert), and Edward Muloney, police commissioner of New York.

Truth Serum Frees Prison Lifer

"Truth serum" is partially responsible for the release of Claud Newton from the Oklahoma state penitentiary at McAlester, after serving only four years of his life term. Newton, claiming he was innocent of the killing of a policeman in Oklahoma City, and insisting he was the victim of mistaken identity, volunteered to take the serum at a peace officers' convention. While under the influence of the drug he maintained his innocence and did likewise on another occasion. Photo shows Newton as he walked from the gates of the prison to meet his mother, who was waiting for him.

Gandhi's Residence in London

This suburban villa in Belsize Park, has been placed at the disposal of Mahatma Gandhi (inset), India's leader, for use during his London visit. It is owned by a rich Indian merchant and is decorated throughout in Indian style.

Imported Talent

Lil Dagover, noted German stage and screen star, and reputed to have the most beautiful back in the world, is shown as she arrived in New York for appearances in American films. She left for Hollywood immediately to begin work on a motion picture.

Retains Swim Title

For the second time Margaret Rayvoit of Philadelphia wins the 10-mile marathon swim at Toronto. Photo shows her just after she completed the swim against a stiff wind, in cold water. The prize is \$5,000.

Prize Dramatist

Elmer Rice, Pulitzer prize play winner, is shown as he returned to New York on the S. S. Ile de France after a tour of Europe. His prize play, "Street Scene," has just been completed as a motion picture.

SHORT SEASON ON WILDFOWL LOOMING

Seriousness of the migratory waterfowl situation resulting from two years of drought conditions on the most important breeding areas is being reflected in a series of official conferences which may further restrict and possibly close the coming waterfowl hunting season.

Although federal regulations governing the shooting of ducks and geese recently were amended to reduce the open season throughout the United States by two weeks this fall and winter still further restriction of the annual kill may be necessary, officials of the United States biological survey state.

Biological survey investigators have brought back discouraging reports of unprecedented drought of lakes and ponds and marshes turned into dusty barrens with no sign of adequate life. They report the almost complete absence of water during the breeding period in the great prairie nesting grounds of southwestern Manitoba, southern Saskatchewan as far north as Saskatoon and Alberta westward to the foothills of the Rocky mountains and northward to the vicinity of Edmonton.

A marked shortage of breeding ducks and young was noted in the great delta region of the Peace and Athabaska rivers. In tours of several thousand miles the investigators saw only a few dozen small broods of young ducks in an area that in normal years has produced many millions of mallards, pintails, redheads, canvasbacks, bluebills and teal.

The shallow prairie sloughs and lakes of the region have disappeared following about 10 years' of reduced rainfall and three seasons of persistent drought, biological survey officials explain, and a far-reaching inquiry sent out by the Canadian government has failed so far to show that the ducks have found other more remote breeding areas.

The severity of the limitations that may be necessary will not be determined definitely, biological survey officials say, until after further conference between the authorities of Canada and of the United States and until more information is received from the nesting grounds. It is apparent, however, that the drought which has caused so much distress and economic loss to farmers and to industry generally also will directly affect the sportsman.

Game officials of North and South Dakota, Minnesota and Montana—states containing the largest nesting area in the United States—and of Manitoba, in conference at Bismarck, N. D., in July passed a resolution which has just been announced after a similar meeting of the game heads of Manitoba, Saskatchewan and Alberta agreed with its recommendations. The latter meeting was held at Edmonton, Alberta.

This resolution urges that the open season for migratory waterfowl be restricted to a continuous period of 30 days; that the daily bag limit be restricted to 10 birds per hunter; that the possession limit be restricted to 20 birds per hunter and that the baiting of grounds be prohibited.

Marl Beds Contain Lime for Acid Soil

Michigan has many thousands of acres of soil which need lime before they will successfully grow alfalfa but the state also has an inexhaustible supply of marl which will correct the acidity of these soils, according to the agricultural engineering department of Michigan State college.

Some of the marl deposits are so shallow and so thickly covered with muck that it is impractical to remove the marl, but many beds have been located where it is possible to remove the marl at low cost. Also every county in the state has at least one marl bed which will supply this soil builder.

The question of using marl or other forms of lime is simply a question of cost. The form to use is the one which the farmer can obtain the cheapest. Sometimes agricultural limestone can be obtained in certain sections more cheaply than marl can be excavated and hauled to the farm. In some localities, the cost of digging and hauling marl is less than the expense of applying limestone.

A practical marl bucket which can be used with a team or a tractor for excavating the material has been perfected by the agricultural department of the college. From 30 to 50 yards of marl can be dug in one day with this type of bucket which is relatively inexpensive.

Upstate Fair Plans Nursery, Aid Station

Tired mothers and their children will have a special department at the Northwestern Michigan fair, which opens Sept. 21 at Traverse City. A nursery is to be erected for their use. It also will serve as a first aid station. W. J. Hobbs will direct the work of this department, aided by Mrs. Pearl Nelson, city nurse, Miss Mildred Compton, city school nurse, and Miss Bertha Brown, county health nurse.

A new exhibition shed is to be provided to house the unusually large calf club showings.

New Pest to Worry Truck Crop Tillers

Add another to the worries of the truck grower.

The vegetable weevil, a new hardy, strong flying insect which has a healthy appetite for a wide variety of common garden crops is spreading in partment of agriculture reports.

This weevil is a small grayish-brown beetle, about a third of an inch long. It was first found in Stone county, Missouri, in 1922. Since then it has spread to Louisiana, Alabama and Florida, and in 1926 was discovered in the vicinity of San Jose, Cal.

The pest is a hardy flyer and thus makes it difficult to control its spread. Some of the plants which it attacks are turnip, cabbage, carrot, mustard, spinach, beet, chard, radish, potato, tomato, lettuce, onion, parsley, parsnip, checkweed, pigweed, dock and milk thistle. Arsenical poisons will control the insect.

Expensive Farming Without Legumes

The many farmers in the corn belt who are operating with no legumes or with a very small percentage of them in their rotations, may be taxing themselves as much as \$7.50 an acre or more for the "privilege" of farming this way, according to L. B. Miller, associate in soil experiment fields at the University of Illinois. This is revealed in the results of the ten-year period recently ended on the college's Morrow plots, the country's oldest soil experimental grounds.

Under a rotation of corn, oats and clover on one of the Morrow plots, the average annual income a acre was \$22.03. In contrast, the annual acre income under a two-year rotation of corn and oats was only \$14.44, or \$7.59 an acre less than under the three-year rotation containing a legume. There was an even wider difference of \$9.23 in the average annual acre income between the three-year rotation and a system of continuous corn cropping.

Formalin to Preserve Minnows

Minnows can be preserved for a long period for bait purposes through the use of a small quantity of formalin, says a bulletin received by the fish division of the department of conservation from the United States department of agriculture.

Minnows placed in a tightly closed jar containing a solution of one part of formalin to 29 parts of water and kept in a dark place will retain their form and color for a long time, the report says. A few drops of oil of rhodium placed in the jar before the minnows are to be used will remove the odor of the formalin. The oil is also said to be attractive to fish.

The bulletin also makes a suggestion for keeping and rearing worms for bait. "Earthworms multiply by producing eggs which are laid in capsules in the ground. The young become fully grown in four or five months. One method of culture is to sink into the soil in some shady spot a box of suitable size, usually not more than 18 inches deep and of any desirable width. The top of the box should be made hinged, or removable, and placed from 2 to 3 inches below the surface of the surrounding soil.

"This box should be nearly filled with rich, dark loam which should be kept quite moist, but not wet, as too much water will quickly kill earthworms."

The worms may then be collected and placed in this box, and may or may not be covered with a layer of green sod. Molasses spread on one side of a gunny sack, which is then laid on the surface of the ground with the sticky side downward and the back of the bag sprinkled with water has been used successfully as food. Powdered bread crumbs and crumbled hard-boiled eggs have also been used as food.

Best Lawns Are Planted in Fall

Lawns planted in late summer or early fall develop a sod before freezing weather and are able to compete with next spring's weeds much more favorably than when spring sown.

Frequent sprinklings will be necessary after planting in the fall, to keep the grass ahead of the weeds and to assure a good grass stand, but the presence of obnoxious weeds in the lawn should be no cause for discouragement, for most of the weeds are not at all serious and will not persist after mowing begins.

The foundation of most successful lawns is Kentucky blue grass, which when mixed eight parts with one part white clover, forms a good mixture for average conditions on home grounds. When fall planting is impossible, the next best time is early spring, about March, if the ground can be thoroughly prepared.

Good top soil will assure a good sod growth. Three systems of soil improvement proving popular are: The sowing and subsequent plowing under of a soil-improvement crop, such as oats; the working into the soil or addition after sowing of well-rotted manure, peat or other materials of high humus content; and the use of commercial fertilizers.

POULTRY

NEW HEN TEST IS SIMPLER, QUICKER

Michigan poultrymen, who annually blood test their hens, stand to profit from the discovery of a new and simplified test for pullorum disease.

The test has been devised by scientists in the United States department of agriculture which has applied for a public service patent. The new method makes it possible to determine within one or two minutes whether a fowl is infected.

The new test is less complicated and more convenient than the old. It promises to give the poultry industry a more effective means than it has had for reducing one of its most serious losses. It is a modification and simplification of the agglutination tests for pullorum disease which has been in use for several years.

The improved simplified test has been in the course of development for several years. Technically the diagnostic agent is known as an antigen and the method itself is a form of agglutination test so called because when the disease is present in a fowl the bacteria agglutinate, that is, collect in a clump. If, on the other hand, the chicken is healthy no clumping of the bacteria occurs.

Investigations by Hubert Bunyea, Walter J. Hall and M. Dorset, all of the federal bureau of animal industry, are the basis of the new simplified test. Their work showed birds could be tested without elaborate equipment by using only a drop of blood. The most recent improvements on the simplified test have included the addition of a preservative to improve the keeping qualities of the antigen and also the addition of a stain that makes the reaction much more easily seen, especially in poor light.

These improvements were added by Jacob M. Schaffer and Angus Macdonald of the same bureau in cooperation with the other investigators. The use of the stain, a crystal violet dye, has been recognized as a new discovery by the United States patent office which on July 28, 1931, granted a patent to Mr. Schaffer, who in turn assigned it to the secretary of agriculture.

Although the test is designed particularly for quickly determining the presence of the disease, a modified method of taking samples has been developed by which any careful person may collect a drop of blood from each fowl in the flock, placing the drops on a special porous paper, after which the paper may be sent away for testing. The investigations by the department's scientists indicate the new stained and preserved antigen is reliable—and it is hoped it will prove to be of great practical value to the poultry industry, but they do not advocate discarding the older and slower laboratory method until large-scale use of the new test has established beyond question the advantages, which now seem apparent.

Material for making more than 100,000 tests has been distributed to investigators and field workers throughout the United States as a means of checking the reliability of the test under a wide range of field conditions.

COARSE OR FINE MASH

For five years an experiment station has been working on various phases of the problem of fineness of grinding of mash ingredients. One of the best tests is that of palatability.

Using the same ingredients in one test, coarse and finely ground mashes were fed to pens of White Leghorn and Barred Rock layers. For each 100 pounds of coarse mash consumed, the Leghorns ate only 70.2 pounds of the same finely ground mixture. When 20 per cent wheat bran was added, they ate only 47.5 per cent of the mash. The Barred Rocks liked the finely ground mash and the mash containing 20 per cent bran even less than the Leghorns. They ate only 56.4 pounds of the finely ground mash and 23.8 pounds of the bran mash, against 100 pounds of the coarse mash.

In each of the several tests the group of layers getting the coarse mash consumed the most feed and laid 13.6 per cent more eggs. The degree of fineness of mash did not seem to affect the health of the birds or body weight. From the viewpoint of home mixed laying mash feeding, the problem of mixing fine ingredients such as shorts and meat scraps, soy bean meal and so forth and coarsely ground corn, oats and wheat is a real one. The hens pick out the coarser pieces and leave the protein and minerals very largely in the fine materials that remain in the feeder or are wasted. Commercial mashes that are prepared in the form of small pellets or cubes take care of this problem.

To remedy waste in other types of mash it is suggested that mash be fed in shallow, open box feeders, seven or eight inches wide and three or four inches deep inside, with plaster lath nailed on the top edges of the side and projecting inside one inch to prevent waste of feed. The mash is fed daily in approximately the amount they will clean up in twenty-four hours. When this policy is followed no harm is done in having the coarse material picked out since the finer material, richest in protein and minerals, will also be eaten the same day.

"M" GEOLOGIST PLANS POLE TRIP

Prof. Ralph Belknap, University of Michigan geologist, will be one of a group of five scientists to explore north polar regions next year. The expedition will make a thorough study of arctic meteorological and geological phenomena, having its base at Ft. Comber, where the Greely expedition maintained its headquarters 50 years ago.

Other members of the party include Captain Flavel M. Williams, leader of the expedition; Dr. B. W. Currie, University of Saskatchewan physicist; Clarence Kallquist, meteorologist of the United States weather bureau; Lieutenant John Clarkeston, aviation pilot, and Paul C. Oscanyan, radio operator.

The expedition will sail from New York next June and will remain in the arctic regions for two years.

If you are always willing to "take a chance" it is only a question of time until you lose.

Emmet Plans to Take Over Township Roads

Resolutions covering the first 110 miles of township roads to be recommended for county control under the new law which becomes effective April 1, 1932, will be presented before the Emmet county road commission. Emmett's plan to unite the township and county roads is similar to that in other parts of the state. Under the new legislation the county may take over 20 per cent of the township roads the first year. County officials desire to take official action before the next October meeting of the board of supervisors to plan for construction of new roads for next year, as well as for county maintenance of others.

Forest Fires Cost State 200,000 Acres

Without spectacular blazes but with numerous small fires that are gradually raising Michigan's total of burned-over timber lands for the season, the division of field administration of the conservation department reported a total of 2,253 forest fires so far this season with an estimated 200,000 acres burned over.

The upper peninsula has reported 956 fires and the lower peninsula 1,297 fires so far this year.

August 11, 1930, the division reported 1,648 fires with 46,487 acres burned over.

Cuticura Soap

Mother's Favorite for All the Family

Price 5c. Sample free. Address: "Outdoors, Dept. 163, Malden, Mass."

Resurrection Plant

The Genuine "Rose of Jericho"

These peculiar plants are found among the pines and cedars of Palestine. When you get the plant it will have the appearance of a ball of tightly folded leaves, dry and dead. Put it in water and it will open up its handsome fern-like foliage, turn green and begin to grow in about twenty minutes. Take it out of the water and it curls up, turns brown and becomes dead again. It is capable of apparently dying and coming to life again repeatedly, and will keep in its dead or dormant state for years and reawaken directly upon being placed in water. It is an interesting, curious and most beautiful house plant with fine fern-like leaves of very agreeable fragrance. If you want a "table fern" that will prove satisfactory under all conditions, don't fail to get one of these marvels of plant life. Grows and thrives in a shallow bowl of water, and is greatly admired by everyone.

Questions & Answers

What famous duel was fought at Palisades, N. J.?
Alexander Hamilton-Aaron Burr.

During what war did the British burn the White House?
War of 1812.

The first name of which president of the United States was "Stephen"?
Grover Cleveland's first name was Stephen.

Correctly Speaking — Statements which have no connection with each other should not be embodied in the same sentence.

Factographs

Oklahoma is believed to be the windiest state in the Union.

The University Club of New York City was the first of its kind established in this country. It was organized in 1865.

By international agreement, an ounce of gold is worth \$20.67.

Grasse, France, is the center of the perfume industry.

The city of Wilmington, Del., contains one-half the population of the state.

Advertising via radio is banned in several European countries.

Nome, Alaska, with a present population of less than 2,000, had 40,000 about 30 years ago.

The average daily production of an oil well in the United States is about seven barrels.

Public high schools sometimes are called the People's Universities.

The chewing gum industry dates back to 1860.

MANY HOOSIERS GET MICHIGAN FISH LICENSES

Of 17,183 Michigan non-resident anglers' licenses sold outside the state last year, 10,378 were sold in Indiana, 4,950 in Ohio and 1,465 in Illinois. Wisconsin agents issued 390, according to a report issued by the Department of Conservation.

The bulk of licenses sold in Indiana were issued at Mishawaka, South Bend and Elkhart. Most of the licenses issued in Ohio were sold in Toledo, and Chicago agents sold most of the licenses in Illinois.

Last year the Department of Conservation sold 55,480 non-resident anglers' licenses, of which 38,480 were issued by agents in Michigan.

"There are two sides to every question."

"Yes, and there are two sides to a sheet of fly-paper, but it makes a big difference to the fly which side he chooses."

Ethyl Gas Corporation Enlarges Detroit Unit

The Ethyl Gasoline Corporation, owned jointly by the General Motors Corporation and the Standard Oil Company of New Jersey, is enlarging its fuel testing laboratory in Detroit, located at 718 East Milwaukee avenue. The company also operates an engineering laboratory in Detroit. Enlargement of the Detroit fuel testing unit and construction of a new laboratory in Baton Rouge, La., are part of the company's program of development of its national network of testing and research stations. Other knock-testing laboratories are operated at Kansas City, Mo.; Tulsa, Okla., and Yonkers, N. Y.

The engineering laboratory in Detroit is in charge of Earl Bartholomew, formerly of the Massachusetts Institute of Technology. Thomas Midgely, Jr., discoverer of Ethyl fluid, is a member of the research staff. H. W. Kellogg directs the work of the fuel-testing laboratory in Detroit. Over 100 refineries in the United States and Canada are cooperating with these knock-testing laboratories, and the Ethyl system now tests 20,000 samples a year.

Clare to Make Change To Use Natural Gas

The Gas Corporation of Michigan, owners of a 15-year franchise to furnish gas-for the city of Clare, has announced that natural gas will be turned into the Clare mains soon.

This company asked for a 30-year franchise some time ago and the privilege of furnishing natural or artificial gas, but was voted down at a special election.

A very strenuous campaign preceded the vote. As the company still has 15 years on the old franchise it appears that patrons are to use natural gas regardless of the vote, as the contract simply states gas instead of specifying it as natural or artificial.

95,000 Own S. O. Stock

Figures strikingly illustrating the way in which ownership of great American corporations is passing from the hands of the few into the hands of the many were released recently by the Standard Oil Company of Indiana, which serves the Michigan field.

When this company became a separate organization in 1911 it had 6,078 stockholders, nearly all of whom were residents of New York. Now it is owned by 95,136 stockholders scattered through every state and territory in the United States and several foreign countries. The largest amount of stock held by any one stockholder is only 4.07 per cent of the total and the average of 179 shares per stockholder only .001 per cent of the total. Michigan stockholders number 3,948.

STATE PRISONS CONTAIN 9,506

Michigan's prisons had reached a new peak in population when a total of 9,506 inmates were reported to Ray O. Brundage, commissioner of pardons and paroles.

So congested are the institutions the state again is sending men to the Detroit house of correction in spite of protests from that city, Brundage revealed. At the demand of Detroit, the prison board transferred 636 prisoners from the Detroit house of correction a year ago and agreed only to house women there in the future. Brundage said there are now 103 men and 268 women serving state sentences at the Detroit penal institution.

Jackson prison has 5,576 inmates in comparison to 5,095 a year ago. The Ionia reformatory has 1,924, as compared with 1,908 a year ago, and the Marquette branch prison houses 936, which is an increase of 42. There are 699 inmates at the Ionia hospital for the criminal insane.

Unite Heating Unit Sales

A joint merchandising arrangement has been reached between Silent Automatic Corporation and the Detroit-Michigan Stove Company, it is announced by Walter F. Tant, president of Silent Automatic, following a conference with William T. Barbour, president, and John A. Fry, vice president of the stove company. The arrangement calls for the merchandising by Detroit-Michigan of a complete warm air heating unit consisting of a specially designed warm air furnace and a standard Silent Automatic burner.

This arrangement brings together the two leaders in their respective industries, Silent Automatic being the largest manufacturer of domestic oil burners and Detroit-Michigan Stove Company the largest makers of stoves and furnaces.

Projects Top \$2,000,000

More than \$2,000,000 will have been spent in residence, business, school, highway and harbor construction with the completion of 1931 projects now under way or approved in and adjoining Greater Muskegon. Nearly all of the total is represented by city, state or government construction aggregating \$1,993,000, while an additional \$75,500 is going into residential and private business buildings.

The largest single project is the new north breakwater at the harbor entrance, which will cost approximately \$1,000,000 matching a similar \$1,000,000 expenditure for the south breakwater completed last year.

Nine State Rivers Being Surveyed for Pollution

Complete pollution surveys of sections of nine important southern Michigan river systems now are being carried on by the Michigan stream control commission, it was announced recently by Milton P. Adams, executive secretary and engineer. The surveys are being carried on to obtain data that becomes the basis of recommendations for future acts and orders of the commission.

Oxygen determination, bacterial content and the amount of water flow are among the information obtained by the survey party.

The streams being investigated this summer include: St. Joseph river from Hillsdale to Lake Michigan; Grand river from Jackson to Lake Michigan; Kalamazoo river from Albion to Lake Michigan.

The 1930 work was confined solely to Kalamazoo and Huron rivers.

State Rules Against Dams

An obstruction across a navigable stream may be removed by an individual in order to effect a passage when the removal will not cause a breach of the peace, and any such obstruction may be removed through action brought by the attorney general or by the board of supervisors.

The office of the attorney general, in answer to a request made by the Department of Conservation, has issued an opinion declaring that "a navigable stream is a public highway on which the public have the right to travel."

In several recent instances the conservation department has been asked for advice and action relative to the effectual damming of certain navigable streams by the riparian owners. In one stream in particular, the person owning both sides of the river had blocked passage through damming with trees, brush and stumps. The department was uncertain as to its authority to remove the dam.

The department itself has no authority to remove such dams, the attorney general's opinion declares, but there are other remedies. Any person passing along a navigable stream and encountering such an obstruction may remove enough of it to effect passage without taking legal action. He may not, however, "remove any more of the unlawful obstruction than is necessary to effect his passage."

"An unlawful obstruction of a navigable stream is a public nuisance and the state may abate the same by an action in equity brought by the attorney general," the opinion says, and "the several boards of supervisors may, when authorized to do so by statute, cause the removal of obstructions placed in navigable streams."

The opinion cites several court decisions in which it is said that while the riparian owners own the land under the water to the center of a navigable river and stream, the public may fish in the waters and that "the privilege of navigation upon all waters which are capable of such use in their natural condition, and are accessible without trespassing upon private lands, is a common and paramount right."

Rerouting of US131 Is Good Business, Big Rapids Learns

When US131 was rerouted through the business district of Big Rapids recently, merchants found their business increased as much as 50 per cent. Now they are taking steps to make the change a permanent one. The detour was caused by sewer construction.

NEWLY DESIGNED FRUIT AND VEGETABLE GRADING MACHINES

The Wigginton Grading Machine has been very carefully designed for the greatest benefit to the Fruit Growers at a very low cost to them, will grade very accurately and has a greater capacity for its size and price, will stand more hard usage without injury to the machine than any Grading Machine on the market. We guarantee our Grading Machines to give satisfaction to our customers and if not they can return them and get their money back. We are giving a very liberal discount on our Machines. Write for Catalogue and Price List. The Wigginton Grading Machine Co. Phone 688, Winchester, Va.

FIGURES SHOW C. M. T. C. COSTS

Cost of feeding the 850 C. M. T. C. youths in training at Camp Custer for four weeks during the month of August, amounted to \$17,670.80, figures released today by Lieut. W. S. Keller of the finance department of the camp, reveal. The food consumed at the camp during the four-week period included about six tons of potatoes, over 50,000 bottles of milk, 4,560 eggs, in addition to 600 pounds of meat per single meal. The fruit consumption at the camp aggregated about 25,000 lemons, 18,000 oranges, 10,000 bananas, and 4,560 cantaloupes. In all, 2,928 quarts of ice cream and 1,820 pounds of butter were used. The menus were planned by Captain Hulbert W. Keith.

Black River Bridge Nearing Completion

The new concrete bridge across Black river on US31 will be completed within six weeks. Girders on the northern section have been placed and forms are being made for placing concrete between the steel beams. Approaches to the bridge from both sides will be 40 feet wide and these will be illuminated by boulevard lights. Bids for the approaches will be awarded before the completion of the span.

Building Projects Started at Ionia

Work on the foundation for the new cell block at the Michigan reformatory has been started and the money has been released at Lansing for the proposed new receiving unit at the Ionia state hospital, two state building projects which will total an expenditure of approximately \$600,000.

The new cell block will be a duplicate of the spacious and modern block recently completed. The cost of this wing will be slightly under \$300,000, while the new unit at the hospital for the criminal insane may slightly exceed \$300,000.

WART WILT

Removes warts without pain. Does not leave a scar. Contains no caustic or acid. ABSOLUTELY HARMLESS. For sale at your druggist, or AARON SPECIALTY CO. Quincy, Ill.

How to train BABY'S BOWELS

Babies, bottle-fed or breast-fed, with any tendency to be constipated, would thrive if they received daily, half a teaspoonful of this old family doctor's prescription for the bowels.

That is one sure way to train tiny bowels to healthy regularity. To avoid the fretfulness, vomiting, crying, failure to gain, and other ills of constipated babies.

Dr. Caldwell's Syrup Pepsin is good for any baby. For this, you have the word of a famous doctor. Forty-seven years of practice taught him just what babies need to keep their little bowels active, regular; keep little bodies plump and healthy. For Dr. Caldwell specialized in the treatment of women and little ones. He attended over 3500 births without loss of one mother or baby.

CAR OWNERS DEMAND VALUES —not Claims!

GUM-DIPPED CORDS
 Every cord in Firestone tires is gum-dipped. This patented extra process penetrates every cord—coats every fiber with pure liquid rubber. Gum-dipping increases the flexing life of the cords—minimizes internal friction and heat—increases the strength of the tire body—and gives longer tire life. Only Firestone Gum-Dipped Tires have the Extra Value.

TWO EXTRA CORD PLYS UNDER THE TREAD
 This patented construction of Two Extra Cord Plys under the Tread in Firestone Tires insures a stronger bond between Tread and Cord Body—and greater protection against Punctures and Blowouts. This new, improved, all-cord construction eliminates the old-fashioned cross-woven fabric construction used by others.

MOTORISTS are finding the *Greatest Values* in Firestone Gum-Dipped Tires. Ever since Firestone and Firestone Dealers began advertising the true facts about tire quality and construction and actually demonstrating the *Extra Values* in Firestone Gum-Dipped Tires, distributors of special-brand mail-order tires have grown bolder and bolder with misleading claims and comparisons in the desperate effort to interest car-owners.

Car owners bought more Firestone Tires in May, June and July, than in any like period in history. This clearly shows that car owners are interested in Firestone Extra Values and are not interested in comparisons based on an almost obsolete fire size—confusing laboratory analyses—meaningless definitions—impractical challenges with unfair claims of twenty-five per-cent savings—and deceiving price comparisons.

Why risk a tire of unknown manufacture when you can get the *Extra Quality*, *Extra Strength*, and *Extra Safety* of the special patented construction features of Firestone Tires—Gum-Dipping, and Two Extra Cord Plys under the Tread?

You get these *Extra Values*—plus our *Service* and the **DOUBLE GUARANTEE** of Firestone and ourselves—at no more cost!

Drive in today.—We have sections cut from Firestone Tires, special-brand mail-order tires and others.—See the evidence.—Take nothing for granted.—Judge for Yourself.

 The old songs are best because nobody sings them any more.—El Paso Times.

BIG DROP IN RENTS, SURVEY OF U. S. SHOWS

Rents are decreasing in nearly all sections of the nation, a survey reveals. Reports from most cities showed rent reductions ranging from 5 per cent to 50 their rents were unchanged.

Salt Lake City, Utah, and Omaha, Nebr., were the only cities to report rising rents. Salt Lake City reported a 2 per cent increase in residence rents during the last year. House rents in Omaha were rising because of a shortage of residences.

Real estate associations in many cities revealed the depression had caused thousands of jobless families to "double up." Other thousands migrated to the country and smaller towns.

Memphis, Tenn., experienced the greatest declines in rents, with reductions running from 25 to 50 per cent. The higher figure applied to virtually all residences in the negro section.

Landlords appeared to be holding their own in Des Moines, Iowa, Seattle and Philadelphia.

The swiftest decline was in Oklahoma City, where the reduction was 20 per cent in eight months. Less than a year ago there was an acute shortage of dwellings because of an oil boom. Events changed and oil field workers departed.

Knoxville, Tenn., rents slumped from 25 per cent to 40 per cent after the 1929 stock market decline.

Chicago, the nation's second largest city, has seen rents decline 5 per cent to 10 per cent. Boston reported rents \$5 to \$10 lower. Portland, Ore., 5 per cent to 10 per cent; Detroit, \$10 to \$20 reductions on dwellings and flats, with apartment rents down \$10 to \$30; St. Louis, down 20 per cent to 30 per cent; Little Rock, Ark., down 10 per cent to 25 per cent; New Orleans, \$5 to \$25 down except during racing and tourist seasons, Cleveland declining; Dallas, \$10 to \$20 down on apartments; San Francisco down 10 per cent to 15 per cent; Denver, 10 per cent down, and Columbus down 30 per cent to 35 per cent.

Number of Missionaries Will Return to Fields

Dr. and Mrs. Harry Brinkman expect to sail for Beirut this month to serve in the Presbyterian hospital in Teheran, Persia. Brinkman is a native of Fremont and Mrs. Brinkman is from Grand Rapids.

Missionaries on furlough include: Miss Johanna Veenstra from Africa, Mrs. May DePree Thomas from Mesopotamia, Rev. Gerrit D. Van Peursem and family from Arabia, Miss C. Williamina Jongewaard from India, Rev. A. H. Smit and family from China, and Rev. and Mrs. L. P. Dame and Miss Mary C. Van Pelt from the Persian Gulf.

Outgoing missionaries include Mrs. Theodore F. Zwemer and Miss Mary Geogh to India, Rev. and Mrs. Henry P. DePree and two sons, Rev. and Mrs. Claud Pickens and three children and Rev. and Mrs. W. R. Angus to China; Rev. Albert Oltmans, Evelyn, C. Janet and Paul Oltmans to Japan, Rev. A. G. Edwards and family and J. Coert Rylaarsdam to Mesopotamia.

Zeeland Schools Will Stage Fair

The first annual Zeeland school fair will take place Oct. 2 in the high school gymnasium. The fair is sponsored by the Future Farmers of America and is open to all the rural and city pupils who entered the garden and pet clubs last spring. More than 2000 entries are expected. Rural schools will exhibit produce as a school unit. It is planned to stage a small fair in each rural school and let the winners represent the school against other schools at the local fair. The farm animals exhibit is open to all students.

The high school pupils will stage a Smith-Hughes fair at the same time. Twenty-six Smith-Hughes projects are being carried on by the local high school pupils.

In the afternoon the pupils will be guests of the athletic department at the football game between Zeeland and Martin. An informal dinner will be served at the school in the evening with County Agent C. P. Milham and County Demonstration Agent Miss Esther Lott as speakers.

The fair will be staged under the direction of the Future Farmers president, Russell Bouwa, and Otto Pino, high school agricultural instructor.

Odd Fellows and Rebekahs to Hold 4-Day Convention

Petoskey will throw open its homes Oct. 19, 20, 21 and 22 when the state Odd Fellows and Rebekah convention is held there. Approximately 3,000 members are expected.

The new Petoskey High school gymnasium will be used for joint meetings and the school rooms as committee meeting places.

Herbert Fox of Petoskey is general chairman.

Screen Beauties Illustrate Whimsies of Present Mode

1, Marian Marsh costumed in eighteenth century garments; 2, Loretta Young wearing transparent velvet ensemble trimmed with chinchilla; 3, Anita Page displaying chiffon evening frock with silver rhinestones scattered over it.

By Mme. Lisbeth
Some of the whimsies of the present mode are illustrated by these costumes worn by some of our screen actresses—who, by the bye, can afford to indulge in such things much better than some of us who have to think of the practicality of our clothes as well as their beauty and style.

At the extreme left, 1, Marion

Marsh is all dressed up in an elaborate Eighteenth century costume with voluminous skirt, lace ruffles, tiny bows and elaborate powdered wig. A far cry, indeed, to the recent modes of straight skirts and bobbed heads. Not so far away from the feminized fashions of the moment, however.

Two is a modern evening ensemble with long, transparent velvet dress

and short velvet wrap trimmed with chinchilla.

Another charming evening frock is worn by Anita Page, 3. It is fashioned of chiffon with silver rhinestones, giving a scintillating effect scattered over the whole dress. This trimming is emphasized by silver slippers and silver necklace showing crystal ornaments.

TRAINED NURSE FOR ALL U. OF M. DORMITORIES

After a year's highly successful trial, the policy of having a graduate nurse in residence at each of the five dormitories for women at the University of Michigan will be continued, according to the University Health Service.

"When it is realized that about one-quarter of all women on the campus are housed in five large dormitories, the importance of having a competent advisor and caretaker readily available is readily seen as a health and educational measure," states Dr. Margaret Bell of the Health Service. The duties of resident nurse are numerous and varied. She keeps the dormitory director informed of the health of her charges. A major work is disease prevention whenever possible, as well as first aid treatment. At any time she advises and helps students and follows the bed cases. She decides when a doctor should be called, and aids the Health Service with information. Prescribing and diagnosis are left strictly to the doctor, however.

"In most instances the dormitory nurse has been a graduate student in Public Health Nursing, and the personnel has been ideal. Though demands on her time are unlimited and her pay is small, she has been of great service to both student and university doctors," says Dr. Bell.

One Minute Pulpit

And he said, The things which are impossible with men are possible with God.—St. Luke, xviii, 27.

M. S. C. Co-eds Take Scholastic Honors

Co-eds at Michigan State College walked away with scholastic honors last year, according to a report compiled by the registrar's office of the college. Four sororities head the list in the society average, two of which retain first and second placed attained in 1929-30. The average of all women societies tops that of the men, as do the averages of national women organizations, all college women, and non-society women. Both men and women belonging to societies showed a higher scholastic record than independent students.

The college average as a whole shows a gain over the previous year. In 1929-30 the average was 2.253, whereas last year the average was 2.272.

The first four places in the society averages are held by Sigma Kappa, Alpha Chi Omega, Alpha Phi and Sesame sororities. Sigma Kappa tops the list with a 2.735 average.

Grand Haven High Will Draw Pupils For Classes Only

As a result of the crowded condition of the Grand Haven high school it has been decided to have pupils in the upper classes do their studying at home and go to school to attend classes only. The enrollment shows 610 pupils or nearly 59 more than a year ago. The building was designed for 400.

An extra teacher has been hired to assist the 19 regular teachers and the six part-time teachers. The increased enrollment, according to Glen Olsen, principal, is due to more rural pupils and the unemployment situation.

Judge: "Before I pronounce sentence, have you anything to say?"
Ex-Barber: "Yes, your honor; I'd like to shave the prosecuting attorney just once more."

Household Hints

MENU HINT

Fruit Cup
Lamb Chops Potatoes
Baked Squash with Tomatoes
Sliced Cucumbers
Apple Pie Tea

Recipes

Fruit Cup—Peel peaches, cut in small pieces, add powdered sugar to taste. Remove seeds and rind from cantaloupe, and also cut in small pieces. Wash raisins and cut in halves. Raisins should be seedless, of good quality, moist and plump. Mix all together and pile into sherbet glasses with a little of the peach juice in the bottom of glasses, and chill. Before serving place a spoonful of whipped cream on top and garnish with either chopped nuts, maraschino cherry or candied orange peel.

Baked Squash with Tomatoes—Cut one small or one-half medium squash (about three pounds) and sprinkle with salt and pepper. Slice one onion thin, add two cups tomatoes and two tablespoons butter and pour into squash. Place in a pan and bake until squash and onions are tender, from one and one-half to two hours. Serve right from the shell. Serves six.

SUGGESTIONS

Apple Marmalade

Five pounds sugar, two and one-half cups water, five pounds apples, two oranges, two lemons. Heat sugar and water together until sugar is dissolved. Slice oranges and apples rather thin and add the juice of lemons. Add to syrup and boil very slowly until thick, about an hour and a quarter. Turn into sterile glasses and seal at once.

Cold Cocoa

When making hot cocoa or chocolate for the kiddies' breakfast prepare enough extra so that it may be placed in bottles and put in the ice box for their lunch or between meals.

Cause of Tears

Tears on meringue are caused by removing it from the oven before completely cooked. The eggs have liquified and the meringue settled flat. If a meringue is cooked too fast it will toughen, wrinkle, shrink and liquify. Too slow an oven causes the same results.

Potato Pancakes

Pare and soak three large potatoes in cold water to cover over night. In the morning drain, dry and grate them in a bowl, then add one-half cup of flour sifted with one teaspoon of baking powder, one-half teaspoon of salt and a few grains of pepper. Add one well beaten egg and milk enough to make a batter. It will require very little milk. Cook on a hot, well-greased griddle as other griddle cakes. Serve with apple sauce or apple jelly, as liked.

To Remove Scorch Stains From White Linen

Lay in bright sun.
Fresh fish can be much more easily scaled if boiling water is poured over it and allowed to stand for a few seconds.

The Parent Problem

By GARRY C. MYERS, PH. D.

TIE CHILD IN HARNESS FOR SAFETY

By Garry C. Myers, Ph. D.

Some while ago I advised against tying a toddler to punish him. There may be some exceptions. If you improvise a harness for the child of two or three and were to drive him with you to the grocer's, both of you might be happy. If, moreover, you took him with you in a rowboat, you would be sensible to have him tethered by a rope as a means of safety in emergency. But he would not, of course, consider such as punishments.

There is a place for tying younger children, so long as tying is not interpreted by him as a form of penalty. The child beginning to stand and climb may not be safe in a high chair or a baby carriage unless well secured by some stout device. A mere strap about the child's waist is hardly safe, for he easily can slip out of it. There should be straps over his shoulders. Anyone can easily improvise a harness which will be dependable. It can be made of cloth. Good ones can be bought. Be sure they are strong.

The child from eight months to a year or more may, when put outside for a nap, climb up and fall out of his crib or carriage, be so interested in looking around as not to go to sleep. The right kind of harness which will hold him down when applied before he has acquired the habit of getting up will make him remain in a prone position without resistance from him. The important thing is to take measures

early enough before he develops the habit of getting up when tucked away for a nap. A good, vigorous spank might work, but for the child of this age it may not be advisable as a means of keeping him down. In the first place, with him all bundled up, his bare bottom is hard to get at; and in the second place he will pretty readily respond unemotionally to means of holding him down if applied early enough. On the other hand, nothing may be better than a good spank to keep the toddler from getting up after being tucked away or sent to neither will they stay up on their bed. Children in motion won't sleep, soles.

Pinning fast the nighties or blankets of the child under six or eight months may prove workable, but it has obvious dangers. The important thing is that the child is made secure and cannot get up, and that he grows used to being held down early enough not to be stirred into rage by such a means.

Always work for good results with the least amount of annoyance and the greatest comfort to the child; but by all means get results.

I shall be glad to answer, in these columns, questions addressed to me in care of this paper, provided these questions seem to be of general interest.

If you have a question you would like to have answered personally, write me, enclosing a self-addressed stamped envelope.

Gladys Glad on Beauty

AMERICA'S FOREMOST BEAUTY

SOFT RINSE ELIMINATES HAIR SNARLS

By Gladys Glad

"Dear Miss Glad: I always give my hair the best of care, as it is really my only asset. It is thick and glossy, and I'm very proud of it. However, whenever I shampoo my hair, it snarls and tangles so badly that I have a lot of difficulty in combing it. Moreover, I sometimes lose my patience and pull out a lot of the tangled hairs with my comb. Is there anything I can do about this?" M. A. F.

I would suggest first of all that you use one of the softening rinses on your hair after you shampoo it. The vinegar rinse is excellent for this purpose. Make a solution of half a glassful of cider vinegar and a quart of water, and use it as the final rinse after the shampoo. When your hair has dried, brush it first with a flexible-bristled brush. This should remove a great many of the snarls. Then comb the hair with a wide-toothed comb to eliminate any remaining tangles.

"Dear Miss Glad: I've been following the dieting and exercising instructions outlined in your booklet on 'The New Figure' for about two weeks and thus far have had the most satisfactory results. You see, I've not only gained 14 pounds already, but I also feel in much better health. However, a friend told me that I should not do any exercising as it would keep me from gaining. She says that exercise is bad for thin people. Is she correct in this?" Inez A.

In my opinion, your friend is anything but correct in her statements. For exercise is just as essential for the individual who is attempting to gain

weight as it is for the one who is attempting to lose weight. Of course, too strenuous exercise is not advisable for the thin individual, as it may prove too exhausting. But slow, rhythmic exercise helps to increase weight, as it makes the tissues active and healthy. Moreover, it stimulates the circulation, enables the blood to carry nourishment to every part of the body, and causes the development of firm muscle in the starved tissues. Follow my course exactly as it is outlined, exercises included, if you wish to continue to gain weight.

"Dear Miss Glad: I have an excellent set of even, white teeth, and it is my intention to keep them in their present attractive condition until, perhaps, they fall out with age. I am very careful in the cleansing of them, and always procure a new tooth brush every three months. However, how should one treat a new tooth brush before using it? Some cleansing procedure is essential, is it not?" "Mae E."

It is indeed essential that a new tooth brush be cleansed and disinfected before it is used on the teeth. A simple but effective procedure is to scrub the new brush with soap and hot water, and then to permit it to soap over night in a strong solution of cold salt water. You should also disinfect your tooth brush after each time that you use it, you know. An oxygen-producing medium is best for this purpose. The simplest method is to wash the brush with soap and water after you use it, rinse it, sprinkle salt on it, and permit it to dry. The salt will not only sterilize the brush, but will also help to keep the bristles stiff.

All of Us

My Minister
He Preaches, I Have Not Heard Him
He Is Truly a Minister

He is my friend. I am his. We get along extremely well together.

We do not always agree. Our backgrounds are so very different. Our racial strains are far apart. He lived in the East when he was young. I have lived in the West. He went to schools that were quite unlike the ones that I attended. He is a minister and believes certain things that are not a part of me. I am a newspaperman and some of my ideas and beliefs are strange to him. He does not quite understand why I believe what I do, I do not know exactly how his mind works.

But we do not argue. He does not abuse me because I differ. I do not abuse him because he does not agree with me. . . . If we were not friends, we might. But, being friends, we do not. I do not believe we ever shall.

He preaches, but I have never heard him preach. On Sundays he talks to a congregation, but I have yet to be part of those who sit and listen. It would not embarrass him, but somehow I have not gone to hear him. . . . He reads what I write, however, and that's an unfair advantage. But I get more from him than he gets from me.

He is my minister. He ministers to me by the way he endures his life. I have watched, I have suffered with him. He has suffered agonies I am afraid I could not bear. He has

braced himself to meet awful shocks, heart-tearing losses, and he has come through them as strong a man as he was before. . . . He has a faith and he lives by it. I have watched him do so. He does not, like weaker men, abandon his faith when he needs it most. But his faith, a deep and true part of himself, has held him on his feet when he might have crumpled to the earth. I have seen him. I know how he lives. I envy him. I am proud of his friendship, and yet I am humble, too, in its presence.

He is my friend and he is truly my minister. Because every true friend that man or woman has ministers to the heart and rescues it from the deep and companions it on the dark ways and preserves whatever faith, be it dim or splendid, that it cherishes.

My friend is like that.

300 Cadillac Girls Employed by Roach

About 300 women and girls are employed at the receiving station of the W. R. Roach Canning Co. here where wax beans are being delivered daily by the tons. There are 100 contract bean growers in this district who are hauling their crop to the station. The women and girls are employed to snip the beans preparatory to canning at the Scottville plants.

The Common Touch

By F. K. Glew

No matter how far we may go in this life

To gather some fortune and fame;
There's little achievement for any of us,
Unless there's real good in our name.

The man of position ne'er gets very far,
Unless he oft finds it worth while
To speak with a kindliness straight from
his heart,

To let those he meets see his smile.

The greater the man, the greater the deed;

He may come from the bench or the plow,
If his thinking is straight and his heart
is of gold

He's the greatest man living right now.

WEEK OF SEPTEMBER

The early part of the week of September 20th will be taken up in the most parts of Michigan with weather changes adjusting themselves between the tail end of one storm and the beginning of another.

The low temperatures predicted for the end of last week will be moderating during Monday or Tuesday in most counties as the result of an approaching low pressure.

Storm action at this time of year will be rather uncertain and this particular storm will be no exception. The low pressure expected in the west at the beginning of this week will move slowly eastward so as to reach Michigan about Tuesday or Wednesday.

Just before the middle of the week temperatures will be normal and rising. In fact, by Wednesday and not later than Thursday we look for very warm temperatures for the season in Michigan. Accompanying these conditions there will be general storms of rain and some unusually strong wind storms. Gales on the Great Lakes during the middle to end of this week will endanger shipping and inland, growing crops will be in danger as well as other farm material that might be loose or weak in structure.

In all probability temperatures will remain moderate to warm throughout the balance of the week. Unsettled to stormy weather will predominate throughout most of the week in Michigan except at the very beginning and again about Friday. The week closes with moderate temperatures and unsettled to rainy weather.

The bean harvest, corn cutting and grain seeding in the various Michigan counties will be somewhat hindered during this week as a result of the expected rains. Pastures and meadows will be in fair condition.

Dinner Stories

The Fact Is Established.

The witness was certainly no chicken, and the young barrister thought it would be to his advantage to get her rattled.

"And now, madam," he said, "I must ask a personal question. How old are you?"

"Young man," she replied, "it isn't more than an hour since the judge there objected to hearsay evidence. And I don't remember being born, all I know of it is hearsay."

Raising the Ante.

The captain of a small trading vessel wanted to land some contraband at a certain port. Approaching the customs officer he said: "Joe, if I put a ten-shilling note over each eye, could you see?"

"I could not," said Joe. "And if I had one in me mouth I couldn't speak."

Consolidated School Issue.

"Now," said the caller, "that you have a consolidated school and higher branches of learning you ought to buy your children an encyclopedia."

"Buy them an encyclopedia?" was the reply. "I'll be hanged if I do. What are we paying taxes on a school bus for?"

The Installment Idea.

"Have you heard the installment idea of marriage?"

"No; what is it?"

"A girl told her lover she wouldn't marry him until he had a thousand dollars. When he came back a week after with thirty-five dollars, she blushed and said: 'Well, I guess that's near enough.'"

Fifth Baby.

An Irishman in New York started what promised to be a large family. A baby came every year for four years and then no more. A friend said one day: "Pat, why is it your wife presents you with no more kiddies?"

"I don't want any more," says Pat; "they say that every fifth baby in New York is a Jew."

Don't Specify.

"Thanks, very much," said the vicar, as little Tommy handed up his offering for the harvest festival. "I must call 'round this afternoon and thank your mother for these eight beautiful apples."

"P-please, sir," stammered Tommy, "would you m-mind thanking her for t-twelve apples?"

Gone To the Druggists, Hey?

Uncle Hiram: "Only a week ago Josiah's son married a cooking school graduate, and now he has run off and left her."

Aunt Matilda: "Perhaps it was something he ate, Hiram."

In Feather-Bed Lane.

Fred: "Your car is six months old and yet hasn't a scratch on it. How do you manage to preserve its finish, old man?"

Ted: "Quite simple, I make it a rule always to park between new cars."

LOVE, PREFERRED

THE ROMANCE OF A BUSINESS GIRL

By EDNA ROBB WEBSTER

Copyright 1934, General Press Association

READ THIS FIRST:

Mary Vaughn is private secretary to Ronald K. Foster, an investment banker of Wall Street. She supports her family mother, twin brothers and a younger sister, Bonnie, who dislikes work and is the spoiled beauty of the family. Mary has always cared for her and given her the best of everything, until she wants to attract Dick Baldwin, the debonair young man whom Mary loves. Martin Frazier, who is Foster's wealthiest client, has persisted in asking Mary to go about with him, until her employer asks her to be nice to him on business principles. Frazier puzzles her with his affectionately courteous attitude. On the way home from a Greenwich Village studio party with some of Dick's famous friends, they have an understanding that as soon as he has reached a certain goal in business they will make more definite plans. Mary is so tired the next evening that she is glad to go home early from the office, planning for a quiet evening, only to find that Bonnie has suddenly decided to give a big party, so Mary assists her mother with the task of making it a success. Bonnie learns that Mary has met an "arty" group, and she wants to know the story. Frazier tells Mary the next day that he is going south for a month, and asks her to dine with him the following evening. Mary had resolved not to go out with Frazier again, but decided to work late on Friday night, so she suggests that Dick take Bonnie to the game instead, and they can stop for her at the office, afterward. When she gets into the car with them, she feels like an intruder with Bonnie sitting between her and Dick. When they get home, Bonnie suggests that Mary should fix them all a lunch.

(NOW GO ON WITH THE STORY)

"Bonnie is going with us to the Duchon's on Sunday evening," he told her, filling the cups and serving the girls. "She will like it, won't she, Mary? You liked the crowd."

"And how! She hasn't talked about anything else all week." Bonnie took a plate with a crisp three-decked sandwich and curled up in a deep chair to enjoy herself. "Think of meeting all those swanky people—like Dachiti and Ashley. You're an old dear to take me, Dick," she smiled with gratitude.

"I'm glad you are going with us," Mary said, without enthusiasm. She couldn't seem to be enthusiastic about anything tonight. She ate part of her sandwich with little appetite, while Bonnie and Dick ate with zest. Dick had two cups of coffee and the plate of cake was cleared away.

Finally when it was so late that Dick's departure was imperative and Bonnie surmised that he would like to have a few minutes with Mary, she took her leave.

Laying her little hand in Dick's and smiling up at him with the touching, guileless face of a child, she cooed: "This has been just about the nicest evening I ever had, Dick. I don't get to go many places, staying away out here all the time. Mom and Mary won't let me commute to the city."

"I should say not—a kid like you," he agreed with concern. Bonnie was two years younger than Mary. "Well I've enjoyed it just as much as you have, Bonnie. We'll do it again, too."

Bonnie clapped her hands, delightedly. When she had gone upstairs, Dick said, "Darned cute little kid, that sister of yours. But helpless as a baby. Never think you were sisters." Of which the last somewhat reassured Mary.

Momentarily, she thought of the contrast in their lives: long, idle days for Bonnie, long nights to rest or the next day to make up for the hours when she was out; early, tedious, wearing trips to the city every day for Mary; swift, exacting, demanding hours of business; short restless nights. She was the man of the family at home and the office wife at business. Neither of them thought they could get along without her.

Mary said, with a tinge of motherly pride and anxiety, "Yes, I can't remember when I wasn't protecting Bonnie. Quarrelsome children, strange dogs, bumps and dangers when we were little; and now—life. Dick, I don't know whether we should take her to the Duchon's or not," dubiously.

"Why not?" with consternation. "Aren't they all respectable people?"

"Oh, yes!" quickly. "It is just that one thing like that leads to another. As Willa says, others—outsiders—drop in that you don't like especially, sometimes. You've just said yourself that Bonnie is helpless as a baby. We don't like her to get started going to New York."

"Oh, well, with you and me—she can take care of herself; don't worry as far as that goes. I don't fancy that she likes your rigid chaperonage any too well, anyway, does she?"

"Perhaps not, at times. But people don't know always what is best for them."

"No, it seems not. Anyway, we hate to face the facts, usually." He looked at her soberly, as if trying to decide something.

Mary thought he seemed so far away from her tonight, and that it was a very long time since he had held her in his arms. She was sitting on the couch alone, but he made no offer to come and sit beside her. She smiled at him, attempting to recapture their camaraderie. But it was a wistful, weary smile—not the eager, spontane-

ous one that he had said made her beautiful. There were little lines of fatigue around her mouth and eyes. He knew she looked tired, but he thought that rankled within him, dulled his pity and concern. She could spare an evening for Martin Frazier, but she broke a date with him to work, and palmed him off on her sister. Well, the substitute had been a pleasant one.

It never occurred to Mary to tell Dick about going out with Frazier as a special favor to her boss and as a final farewell to that important business client. Instead, she said, "I am sorry about tonight, Dick."

"Well, you couldn't help it, could you?" His tone surprised her.

"Why, no, Mr. Foster left tonight for Washington and we had—"

"I know," impatiently. "I don't suppose you will be working on Sunday."

She thought he was joking. "Rather not. What is more, I am going to get some rest tomorrow so I'll have more pep, and be better company. I feel like a rag tonight."

A hint for him to leave, he wondered unreasonably. "Then I'd better run along, and let you turn in."

"Oh, don't hurry away because of me," regretfully.

"I always get a laugh out of them."

"Well, it's late enough. It's a long drive back, alone," he smiled with something of this usual manner. "I hope you get some rest. You need it."

He kissed her, perfunctorily. And Mary crept into bed, even more puzzled at his strange attitude than she had been over Frazier's unexpected consideration for her.

If Martin Frazier had puzzled Mary, that quixotic gentleman was no less puzzled at himself. He was not a man given to analysis, yet he found himself pondering upon his strange attachment for Mary. New fancies—what were they? Ardor that cooled and visions that faded. But Mary had been more than a fancy. Ever since that balmy day in the spring when he had been admitted to her office and she had looked up at him with something like the majestic poise of the forest primeval in her thoughtful eyes, and alert intelligence on her face, she had caught his fancy. That wasn't all that attracted him. There were other things, as time passed: her enchanting voice, her pleasant manner that held a perfect balance of friendliness and aloof dignity, her keen intelligence—others that he could not define. Added to that, her continued indifference to his advances fired his spirit of conquest.

Heretofore, girls who had struck his fancy—and many who had not—had vied for his attentions. It irked his vanity that she resisted him, at the same time that it stimulated his pride to continue the quest. Then, to his delight and amazement, she had capitulated. So he had laid out his campaign. He was a man who planned his action, and acted on the plan, according to the girl. But the first evening with Mary left him wondering. The second evening bewildered him. Having left her and driving back to New York, he attempted to adjust his thoughts and impressions. He recalled his spontaneous invitation to her to go south with him, and her cryptic refusal—and regretted it. For him it had been such a natural thing to suggest without thinking seriously of her reaction.

Even then, he admitted to himself that that was not the way he wanted Mary. He admitted that he would have been wholly surprised, had she accepted the suggestion.

Then what, how, why did he want her? It suddenly dawned upon him that he wanted her as the average man

wants the one woman he loves in all the world—for his mate. To love and cherish and protect. The idea frightened him a little. It was so alien to any idea or thought he had had about any woman.

Sweet little thing, he thought, tenderly. He hated himself for what she must be thinking of him. She was no fool. Sensible, brave, generous little thing. Carrying so many burdens alone. She hadn't said much about her private affairs. But he could guess much. She had no father—two younger brothers and a sister—a modest duplex apartment over in Jersey—

Hang it all! This was a new thing to him—something else again. Just when you thought you had your life all formed and regulated—it played a joke on you. This was no little disturbance in his tranquil scheme of things.

CHAPTER XXIII

Thinking over the situation for the next two days, Martin Frazier decided to carry out his first plans for going south. He needed time to think. This thing that had happened to him appalled, awed him. Either he should run away from it or decide how to cope with it. It was for a lifetime or

that was elusive and alluring at the same time. "How about lunch with me before you start home?"

"I'm not going home until late. Mr. Foster is out of the city and I'm swamped with work. I'm having a bite sent up from the Savarin."

He was keenly disappointed. The impulse of asking her to lunch had been a sudden idea. He was loathe to leave her, now that he was there with her.

"Next month, then. Don't forget, dear, that we are going to have some happy times when I come back."

"We'll see—if you do come back." She honestly thought that she was being as sincere as he was. She didn't think for a moment that she would be going out with him when he returned; but neither did she think he was very serious in his plans for coming back. Why should he? He had no obligations in New York. Telegraph and cable provided almost instantaneous connection with his broker. Why should he leave the balmy, golden comfort of the tropics to return to New York at the beginning of the long winter? It would be spring probably before he again strolled into her office.

Somehow—she could not tell why—she felt just a little sorry for him when he left her. He held her hand for a long moment, then bent down and kissed it—not the back of it, but the palm. As if he wanted her to hold and treasure it. He had so much, and yet seemed to have so little, she thought. So alone. But then, he would have scorned her pity, she reminded herself. He could have anything he wanted, if he chose to get it. Why pity him?

Which would have surprised Frazier not a little—that he could have anything he wanted if he chose to get it. He was not at all sure of that when he left her.

He said quietly, "This is not goodbye, ma chere. I won't say it. Only farewell."

"Bon voyage, and a nice vacation," she wished him. "But you are always on vacation."

"And yet never a vacation," he said with strange and sudden wisdom. "How can one have a vacation if he never works?" And Mary with her weary rushing to and fro and her heavy responsibilities, almost pitied him.

So he was gone, leaving the kiss in her upturned palm; and she thought, whimsically, that she didn't know what to do with it. She stood for a moment looking at her hand—then she lifted it to her lips and blew upon it lightly, as if she blew a feather out into space. Then, with a deprecating gesture of her arm, she returned to work. For her, the incident was closed.

Sunday was a repetition of the former occasion of Dick's dining with the family. Bonnie entertained him while Mary worked with her mother in the kitchen. He had greeted her warmly enough upon his arrival, Mary thought, with relief. The old sparkle and admiration were in his eyes, and he kept her hand in his for longer than a casual greeting.

"You're looking better," he told her with sincere relief. "You weren't yourself the other night, were you?"

So that was it! It had been her mood that upset him. She resolved that never again would she allow her manner to reflect her personal feelings. Her breast was light with a sense of renewed freedom as she returned to her task of salad making. Mrs. Vaughn noted her sudden buoyancy of spirit and was grateful that whatever had been wrong for Mary, was now righted.

"I'm not so sure I like to have Bonnie going to the city with you two," Mom confided. "Of course, Dick's friends are all right. It's not that. But—why should she, anyway? Those people are all much too old for Bonnie."

"I know it," Mary agreed. "It was Dick's idea, I suppose. And she's crazy to go. Let her go this once, and I'll take care of her."

"You'll bring her home, right with you?"

"Of course," Mary promised, thinking that there would be no sweet hour of driving home with him alone, resting in the embracing curve of his arm. It seemed a long time since she had done that. This was the first time in her whole life that she had resented sharing anything she had with Bonnie, or even giving it to her, outright. At times, the thought made her feel guilty and ashamed. Then came reassurance in the thought that there were some things in life that you could share with no one, however generous you were willing to be. One of those things was the man you loved.

Bonnie was showing snapshots to Dick, sitting close beside him on the couch, her face almost touching his as they bent to look closely at the same picture. She had some very ravishing ones of herself that a professional finisher had made of her for advertising use. And there were some rather old ones of Mary that the twins had made with a dollar kodak they had won as a prize for selling magazine subscriptions.

The boys had insisted upon taking Mary's picture first and she had run out into the back yard on a Sunday morning, wearing an old house frock. One of them was so blurred from the moving of the kodak that her features were double and yet indiscernible, another was made with the camera tipped so that she looked smaller from her feet up. Altogether they were the twins' first attempts at photography; and Mary was sentimental about things and people she loved.

Dick and Bonnie were convulsed with laughter over them when Mary went in to announce dinner.

"Oh, Bonnie! those terrible pictures," she cried with sudden reproof, stung with hurt pride. She also saw the pictures of Bonnie that provided such an unfavorable contrast.

Dick looked at her quickly, puzzled at her critical tone. "Why, they're just funny," he said. "No one would even know they were you, really."

Bonnie added, "They're good as a comedy, I think. I always get a laugh over the amateurish photographs many times herself, and with others. It wasn't that. She had a wholesome sense of humor that never failed her. But this was different."

(To be continued.)

U. W. No. 1012—9-14-1931

Opportunity Adlets

Get your farm now in eastern Taylor County. Good land, low price, easy terms. Near large markets over the roads. Write owner, Paul Rued, Interwald, Wis.

BOWLES WHERE QUALITY COUNTS

Here we are with Another Drop in Poultry Feed Prices

All mixed right here by us Manamar Mash 16 p. c., \$2 per cwt

Open Formula 1000 Corn Meal 320 Bran 320 Middlings 100 Darling's Meat Scrap 60 Alfalfa Meal

This shows you a saving of 25c per cwt, over advertised prices, due eliminating all but one profit for mixing and serving. Manamar bought of local Farm Bureau Agency and mixed here right in plain sight of everyone. Why pay more? Why pay for all these extra selling and mixing charges?

Our "Make 'Em Lay" Laying Mash containing Darling's Meat Scraps, Oat Flour, Corn Meal, Flour Middlings, Soft Winter Bran and Salt.

at \$1.65 per cwt. 20 p. c. protein is some mash. Try a sack today.

Our "Egg Producer" Laying Mash containing Corn Meal, Flour Middlings, Soft Winter Bran, Oat Flour, Pea Green Alfalfa Meal, Darling's Meat Scraps, Dried Milk, Bone Meal and Salt at \$1.90 per cwt. is a good laying mash as can be produced Use Egg Producer and you'll be more than satisfied it produces.

Our "MAKE 'EM GROW" GROWING MASH is the best we can manufacture, \$2 per sack, has a large number of boosters.

CHECKERBOARD LAY CHOW LAYING MASH. You know what Purina quality is and look at this price, \$2.15

Wheat, Cracked Corn, Barley and Oats Scratch Feed, \$1.20 Darling's Meat Scraps \$2.25 per cwt.

If you want to make your own formula bring in what grain you have, get it ground and let us supply you with what you lack and mix up your mash. It costs very little for this service and you will then be using your own corn, wheat and oats.

Golden Sheaf Flour 40c per Sack Michigan Soft Winter Bran 90c per cwt.

We want Cotton Mash Bags. Bring in your cotton bags and exchange them for feed.

The Gobleville Milling Co. W. J. Davis, Mgr.

Both Phones Gobles, Michigan

Here's just what a large number of you poultrymen have been looking for

The New Purina Grain Supplement 32 per cent Laying Mash

which is made especially to meet the needs of poultrymen who have their own wheat, corn and oats or any two of them.

It is the concentrated egg white and shell forming material which your own grain is lacking in. It makes possible the most profitable feeding of the MAXIMUM amount of your own grown grain in your own egg mash.

We suggest you use 300 lbs of your own wheat, corn or oats (or 300 lbs of whichever of these three grains you have) in the ratio of 300 lbs of your own grain to 100 lbs of this PURINA GRAIN SUPPLEMENT 32 per cent grain laying mash.

Oats, wheat, corn after being ground figure approximately \$1 per cwt.

300 lbs of your own ground grain at \$1 per cwt \$3.00

100 lbs of Purina 42 per cent Egg Supplement \$2.70

Cost of mixing 5c per cwt for 400 lbs \$2.00

Cost of 400 lbs mixed up \$5.90

Cost per cwt. less than \$1.50 for a first class egg producing laying mash, using 75 per cent of your own product.

GOBLEVILLE MILLING CO.
