Protest Use of Highways for Motor Buses

With the opening of the new section highway along the shore of Lake Michigan from South Haven to Benton Harbor, the chamber of commerce of the latter city has entered a protest against the use of any road by motor trucks and motor buses. It was one of the ideas that when that highway was constructed it should be for the accommodation of the growing public; the distance between these two cities was far distant by the road and now an effort is being made to keep the road free from the burden and trouble which cause so much congestion of traffic on other roads. Their protest should do no harm, they are merely warning off those who would enter it. Several notifications have been sent the highways department, that the highway has been used by Mr. Peterson, and the road has been notified that the货源 has been used by Mr. Peterson, and the river is being furnished to operate the highway between St. Joseph and Benton Harbor, and is the only highway that has not been interfered with the Benton Harbor chamber of Commerce and the business men of Benton Harbor and South Haven should take similar steps.

It is important to the citizens of Clearwater and Benton Harbor that the highway continue to operate between the two cities. The speakers have been the only ones to use the highway, where they have had much traffic and the trains have been crowded for the two cities. Although the local newspaper has not interfered with the railroad service, it is now necessary to support the railroad.

The public highway should be kept free of buses and motor traffic because the heavy traffic from the thick vegetation of the automobile industry through Michigan is nil, and what traffic there is should be limited to their use on the new highway.

Will Abandon Railway

The East Jordan & Bay Island road, which connects the East Jordan, Mt. Pleasant, and the new Port Huron, will be abandoned. The railroad has no business on this road, as the track is not needed, and the road is a waste of time and money. The city of East Jordan is working on the abandonment of the track, and will probably file it in the next few days, so that the railroad can be used.

The toll road has always been a profit to the city, and the city should have kept the road open for the benefit of the people.

Resurrection Plant

These plants require care from the time they are planted until the end of the season. They should be watered frequently and kept free from weeds. The plants should be kept evenly spaced, and they should be cut down to the base of the stem. The soil should be kept moist and the plants should be allowed to dry out a little at a time. The plants should be fertilized with a balanced fertilizer every two weeks.

Gold of Ideas for Farmers

A new concrete street and a 30-foot tower with an ornamental sign will be erected by the federal government on the north shore of the Chicago harbor, a letter received by Senator Arthur E. Vandenberg.

Work will start next week, excepting the work of erecting the tower which will be finished later.

The people of Holland, the city of Holland, and shipping interests have petted for a light for the harbor for a long time.

The tower will be placed in the center of the harbor and be 30 feet high.

The light will be a means of communication for the ships and the city of Holland.

The tower will be placed on the north side of the harbor and will be 30 feet high.

The city of Holland will be able to use the tower for light for the harbor.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

The tower will be placed in the center of the harbor and will be 30 feet high.

Forgotten Coal Vein Brings Joy to Unemployed

Almost miraculously coal has been provided for unemployed residents of the Homestead Park district of Monongh, Pa. This is the result of a letter written to the editor by a local resident urging the state to release its coal reserves. The state has agreed to do so and the coal has been distributed to the residents.

As Apostles of Intra and Mirth Met

An urgent request has been made to the mailing list of the Intra and Mirth Society to return all members' letters by the end of the month. The society is trying to maintain its mailing list and has been receiving many complaints from members who have not received their letters.

Grandmother Was Dodging Realities
By E. R. MATHERS

On the way they drive the train and the steamship, and the mule, and the
wagon, and the elephant, and the
horse, and the bicycle, and the
Motorcar, and who do not care
for the indulgence of a horse or a
bicycle, are just as much like the
grandmother as the others.

In the city, the grandmother who
has not suspected the mechanical
revolution is, in a sense, as unpre-
dected as the grandmother of a
thousand years ago. She has not
seen the smoke of a genuine steam
engine, nor the red light of a genuine steam engine.
The first test of the grandmother's
judgment comes when she is ques-
tioned about the railroad, and she
must give her opinion about the
railroad.

Railroad companies have no
need to pay a single cent for

the advertisements the grandmothers
in the city make, and the grandmothers
in the city make no more
money on the railroad than the
grandmothers in the country do.

It will not be long before the
grandmother of the city will be
as keen as the grandmother of the
country, and the grandmother of
the city will be as talkative as the
grandmother of the country.

It is all a matter of opinion, and
the opinion of the grandmother of
the city will be as good as the
opinion of the grandmother of the
country, and the opinion of the
grandmother of the city will be as
good as the opinion of the grand-
mother of the country.

On the train, the grandmother
who has not seen a genuine
steam engine is as much like the
grandmother of the city as the
grandmother who has seen a
genuine steam engine.

These are, of course, mere
speculations, but it is possible
that they are true.

The Steam Engine and the
Grandmother
By E. R. MATHERS

A steam engine is a great deal of
work, and it is not right to try to
understand it.

The steam engine is a great
deal of work, and it is not right to
understand it.

The steam engine is a great
deal of work, and it is not right to
understand it.

The steam engine is a great
deal of work, and it is not right to
understand it.

The steam engine is a great
deal of work, and it is not right to
understand it.

The steam engine is a great
deal of work, and it is not right to
understand it.

The steam engine is a great
deal of work, and it is not right to

LOVE, PREFERRED
THE ROMANCE OF A BUSINESS GIRL
By EDNA ROBB WEBSTER

TUES. OF OCTOBER 25

I'm not so lucky as to have had the chance to travel as much as some of my friends have. I have not had the opportunity to see many places, and the only foreign country I have visited is Canada. But I have always been interested in travel, and I believe it is a great way to broaden one's horizons.

It is no secret that the travel industry is a huge and growing industry. According to the World Travel and Tourism Council, the travel and tourism industry contributed $8.8 trillion to the global economy in 2019, supporting 334 million jobs worldwide. The COVID-19 pandemic has had a significant impact on the industry, with travel restrictions and border closures leading to a sharp decline in business. However, with the vaccination rollouts and the easing of restrictions, there is hope for a rebound in the near future.

In this age of technology and information exchange, travel is no longer just for the wealthy. With the advent of budget airlines, airbnb, and other travel platforms, anyone can now afford to travel and explore the world. The world has become a melting pot of cultures, and travel is a great way to experience and learn about different ways of life.

The pursuit of knowledge and understanding is something that should be encouraged in all of us. Travel is one way to achieve this. It allows us to see things from different perspectives and to understand that there are many different ways to live, work, and think. It is a great way to broaden our horizons and to gain a greater appreciation for the diversity of the world.

In conclusion, travel is an essential part of life. It allows us to see things from different perspectives and to understand that there are many different ways to live, work, and think. It is a great way to broaden our horizons and to gain a greater appreciation for the diversity of the world.
