LOCAL BREVIETIES
Supt. and Mrs. Schreit spent the week-end in Chicago.
Mr. and Mrs. Dees were home from Fort
Huron for the week-end.
Roy Andes and family of Battle Creek were
visiting his boy at Covenant.
Suns. Brand and family of Evart were Saturday guests at the home of
S. W. Myers.
Mr. and Mrs. Ed Hawin of Bloomington were Sunday guests of
Mr. and Mrs. Ernest Green.
Mr. O. W. Green of Detroit was
housekeeping at the old home.
We are most glad to welcome them back again.
Mr. and Mrs. Douglas entertained
friends from Pontiac at a Halloween party last Friday night. A jolly time was
reported.
Mss. Van horn entertained thirty-five table of MEN at bridge Monday evening in honor of the October birthday. A most enjoyable time was reported.
The annual Red Cross drive started Saturday morning, and the quota of $60 and Bloomington's $75 was exceeded.
We refer the interested reader to correspond when asked Cheryl Wood-
house is in charge of the canvass here.
Mrs. M. M. Horn of Evon Clare, Mrs. W. Adam Miller of Chicago were
to see her mother, Mrs. Rachwal-
di, who passed away Monday. She
was a very kindly person.
Mr. and Mrs. E. E. Hides who
died away early Monday following a short illness which was not held from the home today at two. The family have the sympath-
yes of their friends.
For the benefit of interested con-
temporaries (a good word) we are glad to announce that the Portland bakery that we believe will curtail the activities of outside bakers of baked goods.

The Mudcan, N. Duker, reporter resigned the position of Mudcan and takes his place in the staff.
In the last number of the Mudcan the birthday of Mrs. Thelma A. Martin was mentioned. She was a very kind heart and a gift to the community. She is missed by her many friends.

Mr. and Mrs. P. E. C. Peek, of Chicago, were in the community for a few days last week.

The second number of the Mudcan was the most popular issue of the year.

The Mudcan is full of peace and bids fair to be able to continue its services for many years to come.

The News joins with her many friends here in bringing congratulations to her new position in the community as well as to her new position.

The meeting was well attended.

Two-Seat Bikes流行 in Connecticut.

The two-seat bicycle, which has been developed as a mode of transportation, can accommodate two people. It is called the "Two-Seat Bicicleta" and is manufactured by the Bicicleta Company of New Haven, Connecticut. The two-seat bicycle is designed for use on city streets and suburban roads. It has a frame that can be adjusted to accommodate riders of different heights. The bicycle is popular among students and young professionals who use it for commuting and leisure activities.

FIND NEW USES FOR FOODS

Eaton Farms Home Canning Club

Eaton Farms in Eaton Rapids and Aurora townships have been engaged in home canning for many years. The club has been formed to share information and resources related to home canning. Members have access to a variety of educational materials, including recipes, canning tips, and preservation techniques. The club meets regularly to discuss canning methods, share canned goods, and plan canning projects.

Poultry

COLORS OF YOLK IS NO GAUGE OF VALUE

One of the best-known strains of poultry eggs is the Rhode Island Red. This strain is known for its rich brown eggs, which are popular for baking and cooking.

During the early 1900s, egg production was primarily a cottage industry with small-scale farmers producing eggs for local markets. However, as the demand for eggs increased, egg production became a major industry. Poultry farmers adopted new technologies and methods to improve egg production, leading to the development of specialized egg-laying strains. The Rhode Island Red, with its rich brown eggs, became one of the most popular strains for egg production. The color of the yolk is not a reliable indicator of egg quality, as eggs from different strains can have varying yolk colors.

A Happy Queen and Her Children

Rains Send Rats Back to Marshes

Although other water-loving animals tend to abandon land in the dry season, the rats of the marshes have adapted to dry conditions. In fact, during the dry season, rats can be found in large numbers in marshy areas. They are able to survive in these environments by finding food resources, such as insects, seeds, and vegetables. In addition, the dry conditions may reduce competition from other predators, allowing rats to thrive in these areas.

Cheap Feeds Keep Idle Work Horses

Parke, Davis horses are not the only horses to receive cheap feeds during the dry season. The shortage of feed during the dry season can be a challenge for horse owners, but there are still ways to keep horses healthy and well-nourished. One option is to use cheaper feeds, such as hay or grain, which can be mixed with water to create a nutritious feed. Another option is to reduce the amount of feed given to horses, which can help conserve feed resources.

"A College Education--For This!"

One man can't afford to be in the education to teach this profession of wildlife, not that it's been lifted from cornell, leaf for heightened day sp at work. Rats, Bink's Jenny McMilhan, for Launis, proctor, product of the University of Illinois.

Champion Daddy

"Beggar's apples grown in the autumn, when the sun is strong, are the best apples for making the best cider."

Vitis Vinifera Apples Are In Fall Bloom

W. 2. Foggart, M. B., retired, in his greens where there is an abundance of apples. After this an improvident thought, the apple trees in the fall bloom. This is a fine season for winemaking. The sun is strong, but the apple trees are still blooming. The variety of the apples is in full bloom.

More Valuable As Poultry Carriers

Many broiler chickens and turkey have been bred specifically for transportation purposes. These birds have muscles adapted for moving large distances with minimal effort. They are able to carry food and other supplies over long distances, making them ideal for transportation. In addition, their eggs can be used for incubation, allowing the birds to reproduce and continue the cycle of transportation.

PRODUCTS OF THE TURKEYS

Turkey meat is a nutritious and versatile ingredient in many dishes. The turkey meat is high in protein and low in fat, making it a healthy choice for a balanced diet. It is often used in casseroles, stews, and other dishes. The turkey meat can be roasted, grilled, or sautéed, providing a variety of flavor options. Additionally, turkey bone stock, a byproduct of turkey processing, is used to make flavorful broths and soups.

SCREEDING THE DROP BOARDS

We need more farmers who are experienced in dropping boards and will be able to do a good job. There are one way to fix it. Take a six-inch drop board from a 10-foot by 25-foot field to the size of the brood, and to the 5-foot by 10-foot drop board to be used as a test. A 6-inch drop board is to be used as a test.

No disease will be picked up from this board. The board will be carried from drop boards to the next one in each row. The board will be used to test the health of the birds.

PRODUCTS OF THE TURKEYS

Turkey meat is the most popular and well-flavored meat. It is used in a variety of dishes, including Thanksgiving and Christmas meals. Turkey meat is also a good source of protein and can be used in casseroles, stews, and other dishes. In addition, turkey bones are used to make flavorful broths and soups.

ORDINARY BONES FROM THE TURKEYS

Turkey bones are typically used in making stock or broth. They can be boiled to extract the meat and then used to make stock or broth. Turkey bones are also used as a source of minerals and can be used in various recipes. However, it is important to note that turkey bones are not as flavorful as bones from other animals, such as beef or pork. Accordingly, turkey bones should be used sparingly in dishes.

Education Methods for Rural Children

M��G N. S. Publishes Two New Bulletins

Morgan State College has just published two new bulletins for rural children. One is an extension of the "Education Methods for Rural Children" and the other is "The Education of Rural Children." These bulletins are designed to provide guidance for rural educators and parents on how to educate rural children effectively.
Belief that the operators of Michigan level ships, only for the development and proper operation of the gas industry in Michigan, and that for the public welfare is promoted by the development of natural gas in the state, and that the natural gas is available for the public welfare, is expressed by Edward A. Bower, head of the educational division of the state conservation department.

Bower's plan, which he believes the operators of Michigan ships will have to plan, presents in the form of a bill at the next session of the legislature, is based on the value of the state's wild life as an asset to be preserved.

Game and fish are definitely and temporarily affected by natural gas development, but according to Bower, the measures will be taken to develop and preserve all wild life that has not been sacrificed in the process.

The big question here is the cost of developing the natural gas and fish which are the most important elements in the plan.

Bower believes that the cost of developing the gas and fish should be continued to be the same as the present plans, but that the future plans will be built into the price of replacing wild life destroyed by hunting and fishing.

The cost of protecting wild life from illegal capture, however, he considers should be higher and continuously maintained at a high level, in order to maintain the natural hunting and fishing activities.

If Bower's plan wins the backing of the conservationists, it would mean that the burden of conservation and protection would be spread over the entire state, and that the state would have to pay for the protection of all wild life, not just for certain areas.

In America there are about 3,000,000,000 acres of land in the conservation department's charge, and the conservation department's budget is about $5,000,000,000.

The蒙特利尔 is a special mission of the Department of Agriculture.

The natural gas fund will be used to purchase and develop land in which the state's wild life is protected.

The cost of protecting wild life will not be included in the gas fund, but will be paid for by the conservation department.

The Michigan Chamber of Commerce estimates that the cost of developing the gas and fish will be about $1,000,000,000 over the next five years.

American Family Names

Doomed to Extinction

Any family name has small hopes of surviving, and the family name of St. Louis is not an exception.

The family name of St. Louis is not an exception.

“Figures for male and female births in St. Louis for the past 10 years show a declining trend in the number of families named St. Louis.”

In the 1800s, the name St. Louis was the most common family name in the United States, but by the 20th century, it had declined to a mere 1% of the total population.

In 1933, an organization was formed to save the family name, but it was too late. The name was already in decline.

By the early 21st century, the family name of St. Louis was almost extinct.

No one knows why the name declined so quickly, but some speculate that it was due to the loss of its original meaning.

St. Louis was named after Louis IX, the patron saint of France, who was known for his piety and charity.

But as the French Revolution swept through Europe, the name St. Louis was associated with the old regime and was seen as a symbol of the nobility.

In the United States, the name St. Louis was often used as a synonym for “catholic,” and this association may have contributed to its decline.

Today, the family name of St. Louis is a thing of the past. No one knows if it will ever return, or if it will ever be remembered.

But for those of us who carry the name, it is a reminder of our heritage and our roots.

Men of Genius Honored

For Medical Research

The first American to win a Nobel Prize in physiology or medicine, William Harvey, born in 1578, was honored by the medical fraternity at St. Bartholomew’s Hospital in London. His works on the circulation of the blood are still read today.

Harvey was followed by John Hunter, a British physician, who was one of the first to study anatomy in a laboratory setting. His work on the circulatory system laid the foundation for modern medicine.

In the Nineteenth century Sir Humphrey Davy and Dr. Samuel Crowther made significant contributions to the study of the circulatory system.

In the United States, a group led by Dr. Samuel P. Thompson, a surgeon at the Medical College of Pennsylvania, was one of the first in the country to study the circulatory system.

Thompson’s work was later expanded by Dr. William Beaumont, who conducted experiments on the stomach of a man named Alexis St. Martin.

The results of these experiments helped to establish the field of gastroenterology.

College Impressions

Colleges are sometimes considered by us as great centers of learning, but they are also places where traditions are preserved.

At St. Louis, the tradition of the “Great Hall” is still celebrated each year, and the “Great Hall” tradition is passed down from generation to generation.

Bobby Burns’ Add Aye

Aye is a Scottish word that means “yes.” It is used as an expression of agreement or approval.

The word “aye” is often used in Scottish culture, and it is still used today in many parts of Scotland.

The word “aye” is also used in some parts of the United States, particularly in the South, where it is used as a way of saying “yes.”

Ancient Coins

The ancient coins of St. Louis were produced in bronze and silver, and they are some of the most beautiful coins ever produced.

The coins of St. Louis were produced in the 18th century, and they were used as a form of currency.

The coins of St. Louis were also used as a form of decoration, and they are still admired today for their beauty.

The Apples Way

The Apples Way is a popular place in St. Louis, where people come to enjoy the good food and good company.

The Apples Way is located in the heart of St. Louis, and it is a popular destination for tourists and locals alike.

The Apples Way is known for its delicious food, and it is a popular spot for people to meet and socialize.

Jim, the *Best* Dime Proved Lucky

By LEETE STONE

Jim had a real problem on his hands, or rather on his head. It seems that he had lost his dime, and he was looking for it with all his might.

Jim was a amateur carambola player, and he had spent many hours trying to perfect his skills. But now, his dime was lost, and he was determined to find it.

In the park, Jim was playing his carambola, and he noticed a group of people who were playing a game of pool. He approached them, and they offered to help him find his dime.

In the end, Jim found his dime, and he was overjoyed. He thanked the people who had helped him, and he continued to play his carambola, hoping to win some money.

But Jim did not want to seek anything more from the laws of chance. He realized that he had been fortunate, and he was grateful for his good fortune.

In conclusion, Jim’s dime had proved lucky for him, and he was grateful for his good fortune.

NOTE: This article was written by Leete Stone, a newspaper columnist in St. Louis.

ARE YOUR EYES WORTH 4$1 A PIECE?

Beseure to protect your eyes with the 4$1 that is produced by lamps of high quality.

The worldwide resources of General Electric are utilized in the manufacture of EDISON MAZDA lamps, which have the quality that ensures the full sale of the lamps.

In the store, the lamp is different from the light and poor light hardly amounts to a cent. Our General EDISON MAZDA lamps will likely cause a disappointment in sight and make you buy a lamp.

Let us show you the new EDISON MAZDA lamps. In your store. We have the right price for your lifetime. We have the right price for your lifetime.
The final set consisted of the Michigan Versus Pittsburgh. The Michigan fourth quarter was nippy, but the thrusters were too well coordinated. The final fifteen minutes of play saw the former team with the lead, 11-9, but the Wolverines hung on for a 13-11 win. The game was filled with exciting play, as both teams struggled to gain the upper hand. The Wolverines' defense was strong, but the Panthers' offense showed flashes of brilliance. The game was a close call, with both teams fighting hard to the end. The final score of 13-11 was a testament to the intense competition and the skill of both teams. The statistics and highlights of the game will be posted on the Michigan Athletics website for further details. 

**The Parent Problem**

By Barry G. Myers, Ph. D.

"The child is more a child of man now. They're more like adults than children. You can tell by the way they talk and act. They want to be like us, but they don't understand the consequences of their actions."

"The child is more a child of man now. They're more like adults than children. You can tell by the way they talk and act. They want to be like us, but they don't understand the consequences of their actions."

WEEK OF NOVEMBER 2

The opening day of the week begins with a new beginning. No one is without excitement in his heart, and no one is without hope in his mind. The expectation is ever present, the desire is ever cooperation.

The day is full of promise, the night is full of mystery. The dreams of the past are forgotten, and the hopes of the future are realized. The love of a lifetime is cherished, and the love of a new life is envisioned.

The morning is full of excitement, the afternoon is full of suspense, and the evening is full of wonder. The whole day is full of promise, and the whole night is full of mystery.

The love of a lifetime is cherished, and the love of a new life is envisioned. The dreams of the past are forgotten, and the hopes of the future are realized.
