If the Parachute Fails to Pass So Does the Student

More than $5,500 loans totaling $18,000 have already been made for the past crop production year from the $50,000,000 authorized by the Federal Emergency Relief Act. For 1932 crop production loans, hook 3,200 have been requested by the department for Secretary Bly the Reconstruction Finance Corporation for 35 states

The program of loans is supervised by the seven regional offices of the organization, with the New York City office being responsible for the northern States.

These offices are located in Washington, D.C., Los Angeles, Chicago, St. Louis, Seattle, Spokane, Salt Lake City, and Dallas. Although detailed figures were not summarized on the regional offices, C. O. Earley, manager of the Reconstruction Finance Corporation office reported that the office had issued $149,402,500 in 1932 to farmers, as opposed to $118,000 last year. Two thousand new loans have been made to four states. These were $141,776 New York, $44,376 Michigan, $32,516 for Georgia, $202,265 for New York and $323,126 for California and $96,695

The number of new loans has been reviewed at the Washington office and an emergency basis. Chief of the Home Farmers Service, which is the regular practice. The weekly phone call is made up of $500 a day each day next week, Mr. Calhoun

Government Beef Sales in Crozg Demand

The "truth-in-beef" movement is growing, the U. S. Department of Agriculture reports. From July to December, 1931, 1,350,840,643 pounds of beef, or an increase of 63,144,658 pounds as compared with the same period in 1930. In January this year, 10,242,800 pounds of beef were graded and chilled, which is 7.14 per cent more than the quantity thus certified in January 1931.

The greatest growth in January was in New York State, with shipments to Wisconsin, Kansas, Missouri, Arkansas, Texas, Oklahoma, and New York City.

The months of January and February are important in the meat markets.

There are several types of blinds and shades that you can use to keep your home comfortable during the summer months. One type of blind is the Roman shade, which is available in a variety of materials and colors, including sheer and opaque fabrics. Roman shades are also energy-efficient, as they can help block out heat and keep your home cool.

A second type of blind is the roller shade, which consists of a roll of fabric or vinyl that is mounted on a rod or a cassette. Roller shades are available in a variety of materials, including sunscreen, blackout, and sheer fabrics, and can be used to block out heat and light, or to allow some light to filter through.

A third type of blind is the vertical blind, which consists of a series of slats that are mounted on a track. Vertical blinds are available in a variety of materials, including wood, vinyl, and aluminum, and can be used to block out heat and light, or to allow some light to filter through.

Roller shades are also energy-efficient, as they can help block out heat and keep your home cool.

In addition to these types of blinds, there are also specialty blinds, such as Privacy Blinds, which are designed to keep out unwanted views from the street, and Sheer Blinds, which are designed to allow some light to filter through.

**Apporters for Spring**

Now is the time to start getting your garden ready for spring. Here are some tips for preparing your garden:

1. **Prepare the soil:** Remove any debris and weeds from the garden bed. Then, dig the soil to a depth of 8-12 inches to break up any compacted areas.

2. **Fertilize the soil:** Apply a balanced fertilizer to the garden bed to provide the plants with the necessary nutrients for growth.

3. **Plant flowers:** Choose a variety of flowers that will bloom throughout the spring and summer months.

4. **Plant vegetables:** Start planting cool-season vegetables, such as lettuce and kale, in the garden bed.

5. **Plant herbs:** Plant a variety of herbs, such as mint and oregano, in the garden bed.

These tips will help you prepare your garden for spring and ensure a successful growing season.
