LOCAL BREVITIES

Senior play April 29. Plan to see it.

Mrs. Beck and Henry Fry are home from Florida.

Allen Saye spent Tuesday night with Gerald Rendel.

Mrs. Doe was home from Port Huron for the week end.

Vern Hudson and family were Sunday guests at George Schutt's.

Mrs. Barber of Schoolcraft is visiting her sister, Mrs. O. P. Hudson.

Methodist aid at church basement next Wednesday. Potluck dinner.

Mrs. Pugsley is home from Kalamazoo and plans to be a permanent resident.

The community Aid will meet with Mrs. Earl Newcomb next Wednesday.

Potato growers meeting at Bloomingdale schoolhouse tomorrow afternoon at two.

Ernest Ashley and family of Battle Creek were Sunday guests at Clarence Andre's.

Mr. and Mrs. Lomax and Jimmie of Chicago were Sunday guests at the home of George Lomax.

Sparrow shooters should be very sure they are not robins nor other protected birds and avoid trouble.

The P. N. G. club met with Mrs. Carson Rendel for a pot luck dinner April 12. All enjoyed a good time.

Lawton here tomorrow, will Gobles take another? They will. Better come out and get your money's worth.

Auction sales advertised by the News have attracted good crowds and prices indicate a decided upward trend.

Rev. Andrew B. Lemke, pastor First Congregational church of Bangor will exchange pulpits with Rev. Mann Sunday at the usual hour.

Any automobile driver whose operator's license was issued before January 1, 1928 must get a new one before May 1 or cease driving. Better look yours up if you have not a new one.

News comes from Ann Arbor of the death of John W. French, father of Mrs. C. L. Bennett. Mr. French used to visit here frequently and made many friends who will regret his death.

We note a marked increase in the attention given by our readers to "Dinner Stories" found on our inside pages. The Camera News, poultry and farm columns are also worth your attention.

Sunday guests of Mrs. Mann were Mr. and Mrs. Will Meesley of Jackson, Mrs. Martin Casperson of Muskegon. Mrs. William Birdsell of Muskegon, and A. J. Birdsell of Kalamazoo were Saturday guests.

Arthur Brown was in town yesterday and reports they will pack string beans and fruit here as usual. This company packed a seventh of the entire cherry crop of the United States last year and have sold the entire output. We sure are very proud of our canning company and appreciate their value to the community.

The Overseas Veterans in this vicinity met at the American Legion hall at Paw Paw last Friday evening for the purpose of forming a Veterans of Foreign War Post. John McDonald, local druggist has been assigned the contact veteran for this village. The next meeting will take place on Thursday, April 21 at 7:30 p. m. fast time at the above hall. All overseas veterans in this community are urged to be present.

To the Electors of Van Buren County

I desire to announce that I will be a candidate on the Republican ticket in the Primary Election to be held Sept. 13th 1932, for the office of Judge of Probate to succeed myself.

Merle H. Young

Sour Grapes

The following from the Detroit Times so completely expresses our feelings that we quote:

"It was an exciting war, and this nation rushed into it gleefully.

We SANG "Over There" we sent millions of men and billions of dollars over there.

We were going to make the world safe for democracy. We didn't do that. Democracy was never less safe than it is at this moment. But we made the world very UNSAFE for our individual and national pocketbooks

Europe's nations decided to cut each other's throats, and this nation, silliest of them all, decided to join the merry enterprise, although it was not our war. We did not start it, heaven knows.

We made Europe's business OUR business, and in consequence, OUR business has temporarily gone to smash.

We all realize now that war doesn't pay, especially a war that is not your own. If any do not realize it they will do so before they finish paying taxes."

Eastern Stars Install

At an open meeting Tuesday evening Easter Lily chapter installed the following officers:

Worthy Matron, Georgia Lohrberg
Worthy Patron, Thomas Ketchum
Associate Matron, Elizabeth Upham.

Associate Patron, William Thompson.

Conductress, Nellie Taylor
Associate Conductress, Blanche Wooster.

Secretary, Clara Goble
Treasurer, Bessie Stimpson
Hattie Lohrberg, Chaplain
Grace Connery, Marshal
Fern Wiseley, Organist
Marjorie Graham, Ada
Emma Williams, Ruth
Margaret Everest, Esther
Marian Van Strien, Martha
Olga Andre, Electa
Beulah Thompson, Warder
Earl Newcomb, Sentinel

An enjoyable playlet and refreshments helped to complete an enjoyable evening.

Base Ball

Not in years has Gobles trimmed Lawrence at base ball but they did it Friday by the decisive score of 22 to 3 in 6½ innings.

Despite the one sided score there was some real base ball throughout the game. Several times, what looked like sure scores by both teams were nipped by sensational plays.

Lawrence pitchers were the weak spots and when faced by the local batters all looked alike.

Gobles looks like the best team in years and when Lawrence takes such a beating you may be sure its by a real team.

Lawton comes tomorrow and we guarantee a game worth while.

A small admission fee will be charged to help defray the expense. Lets make it a crowd just once.

Announcement

I will be a candidate for the office of Register of Deeds at the Republican Primary next fall and will appreciate the support of the voters.

Kate Mumbrue

To Voters Of Van Buren County

I wish to announce that I will be a candidate of the Republican Party for renomination to the office of County Clerk for a second term, at the Primary Election to be held on the 13th day of September. Your support will be appreciated.

Earl A. Thomas

Obituary

Charles R. Styles was born in Brooklyn, N. Y. Dec. 22, 1856, and passed away at his home near Bloomingdale April 12, 1932 at the age of 75 years, 3 months and 21 days.

When a young child he moved with his parents to Illinois, where he was left an orphan at an early age. At the age of 17 he came to Paw Paw where he worked for sometime, later coming to Bloomingdale, where he located on what is now known as the Bassett farm. He bought a farm near Breedsville, where he resided 18 years, coming back to Bloomingdale, where he has made his home for the past 25 years.

Joining the M. E. church he has always tried to live a true Christian life, always thoughtful of others and doing as he would like to be done by.

Oct. 10, 1880 he was united in marriage with Nancy Abbott, who died in September, 1923. To this union six children were born, four of whom survive.

He leaves to mourn, his children, 11 grandchildren, 1 great grand child, a brother and nieces, nephews and a host of friends.

Funeral from his home Friday at 2:00 p. m., Rev. Hayes officiating, with burial in Robinson cemetery.

Card of Thanks

We wish to thank the friends and neighbors for the kindness shown us during the sickness and death of our father and brother. Rev. Hayes for his kindly words and the singers also.

SEEK NEW
AUTO RATES

A committee representing Michigan automobile insurance carriers has been designated to analyze the experience and attempt to work out an adequate rate basis, particularly for collision business. The committee is headed by George G. McDan, insurance accountant. Other members are: Walter Otto, Michigan Mutual Liability, Detroit; Vern V. Moulton, Auto-Owners, Lansing; Robert K. Orr, Wolverine, Lansing, and Bruce Laing, Wolverine Mutual Automobile, Dowagiac.

Michigan carriers have been confronted by a peculiar situation for the last two years as the big fire companies affiliated with the National Automobile Underwriters association suspended "conference" schedules in May, 1930, and have been accepting fire, theft and collision business at extremely low rates. The local carriers have lost much of their collision business, it is admitted.

Would Build Light Plant

As a result of the refusal by the Iron Range Light & Power Company to reduce its rates from 20 to 25 per cent due to present business conditions the City Commission at Iron River has decided to submit a \$75,000 bond issue to the voters at the April 4 election. Proceeds would be used to establish a municipal electric light plant and the city hereafter would purchase its current from the Wisconsin-Michigan Power Company and distribute it through the new municipally owned plant.

Cable-Suspended Railroad Dome for World's Fair

This striking display is the east entrance to the Railroad Dome of the Travel and Transport Building for the coming World's Fair at Chicago, Ill. The dome is suspended on cables strung from the tops of the steel towers seen in the picture.

OUT OF STATE TRUCK OWNERS MUST HAVE MICHIGAN LICENSES

Truck owners who reside in other states but who make daily or regular delivery trips into Michigan, must secure Michigan license plates, according to an opinion given the Department of States by the Attorney General's department.

From the Ohio-Indiana border in the lower peninsula and along the Wisconsin border in the upper peninsula, reports have come to the department to the effect that many trucks were operating in Michigan almost daily bearing plates of other states.

Another opinion of interest to owners is to the effect that trucks operating continuously upon private company property do not require license plates and are not required to pay the weight tax. But the plates and tax become necessary if the truck is operated upon a public highway even for very short periods of time.

Opens Dry Ice Plant

A plant with a daily capacity of 150 tons of "dry ice," equal to 1,500 tons of ordinary ice, will be opened April 1 by the Michigan Alkali Company in Wyandotte. "Dry ice" is solid carbon dioxide, a by-product of the company's soda ash manufacture.

Chicago, Ill.

Nine-tenths of Pavement Dollar Goes for Labor

Labor gets \$910, or about nine-tenths, of every \$1,000 received by the contractor in building a concrete pavement, according to a statement issued by Thomas H. MacDonald, chief of the United States bureau of public roads, in testifying recently at the hearing of the senate committee on appropriations.

This statement, resulting from an extensive study of all the costs of building concrete pavement, was a part of Mr. MacDonald's testimony showing the value of road building in providing jobs for the unemployed.

Mr. MacDonald explained: "The fact that so much of the road dollar, from 85 to 90 per cent, goes into labor, either directly or indirectly, is due to the fact that there are no intrinsically valuable materials used in road building."

The data presented by Mr. MacDonald show that of the \$1,000 given to the contractor for building concrete pavements, \$141 is spent directly by him for labor on the job. An additional \$44.70 is spent for labor by him in getting on the job and for other miscellaneous items.

The contractor pays mills and quarries \$675, which along with \$139.30 spent by the contractor through other agencies, is distributed so that labor eventually receives another \$724.30, making a total of \$910 received by labor from each \$1,000. This money is expended for wages in mills and quarries, in transportation of materials and equipment in the production of fuel, in the manufacture of supplies and equipment, and so on.

In commenting on the fact that labor receives such a large part of the money required for concrete pavement building, road builders point out that labor benefits as much in high type pavement building, with extensive use of machinery, as in the construction of low type roads where comparatively little machinery is used.

Otsego and Plainwell Ikes May Join Forces

Members of the Izaak Walton league of Otsego have decided to merge with the Plainwell chapter if agreeable with that organization.

It was voted to petition the conservation and drainage departments of Allegan and Barry counties to leave the Gunn lake outlet as at present. Removing the dam would lower the level of the water in the summer to such an extent as to cause unsanitary conditions and detract from resorting pleasure of many cottagers, it was said.

T. A. C. Appoints Bement

Coincident with moving its headquarters from Cleveland to Municipal Airport, Detroit, the Thompson Aeronautical Corporation has appointed Austin F. Bement, Incorporated, Detroit agency, as its advertising counsel.

Thompson Aeronautical maintains sales and service hangars at Chicago, Cleveland, Detroit, Pontiac, Kalamazoo, Bay City and South Bend. It also controls Transamerican Airlines Corporation, operating air mail, express and passenger airlines between the cities mentioned, as well as between other points in the Great Lakes region. Transamerican advertising will also be placed by Bement, Incorporated.

Lip Reading Test Planned in Spring

A lip reading contest sponsored by the Michigan League for the Hard of Hearing will be held in Grand Rapids May 14, under direction of Mrs. Mina P. Drew, chairman of the state organization. Entries will come from Detroit, Flint, Lansing, Kalamazoo, Muskegon and other Michigan cities. Preliminary to the state contest a local contest will be conducted by the Grand Rapids league, May 12.

QUACK RADIUM IS DANGEROUS, SAYS WHEELER

Radium poisoning through treatments given by untrained persons or the indiscriminate use of radio-active waters, emanators, activators and similar appliances may well be a hidden cause of cancer or other serious degenerative diseases which may not appear until years after such appliances or medicines have been discontinued, warns Dr. Carl Vernon Wheeler, director of the pathological laboratories in the University of Michigan.

The danger of radium or radio-active substances when used by inexperienced hands lies in the fact that minute portions of the radium may be absorbed and gradually deposited in the bones or other tissues. Once thus established the radio active substance proceeds with its characteristic physical-chemical activity, emitting minute but powerful radiations which literally bombard all the surrounding tissue. Year in and year out this process goes on unceasingly, since the radium breaks down so slowly that the life time of an individual sees little weakening of its power.

So penetrating and so powerful are the radiations that a quantity of radio-active matter as small as one-hundred thousandth of a gram may cause death years after it was absorbed into the body, Dr. Wheeler points out, so that the careless use of radium or radium appliances, or working in air laden with radio-active dust may produce eventually fatal results if continued for only a relatively short time. Many degenerative diseases of the tissues may be the final sign of the activity, cancer and some types of anemia being commonest, as shown by workers engaged in watch dial painting who pointed their brushes between their lips and by lung cancer among miners in mines where the dust of radio-active ore is breathed regularly. A valuable remedy when under control, radium may be a subtle danger in unskilled hands, Dr. Wheeler declares.

Dogs May Not Be Trained Until Next September

During the period March 15 to within 30 days of the opening of the hunting seasons next fall dogs may not be trained on game birds, rabbits, squirrels, fur bearers and such other animals protected by the state, according to the Department of Conservation.

The new game laws provide that dogs may be trained as late as March 25 when permits are secured from the Department of Conservation. Many such permits were obtained during the past two and a half months, most of them for the purpose of conducting organized field trials.

Until next September dogs may not be trained on wild animals or birds.

Dredging Half Done

Dredging operations in the Saginaw river proper at Saginaw are expected to be completed by July 1. The remainder of the project, including seven miles in the bay, will be completed about Nov. 1, according to Renwick M. Knox, vice president of the Duluth-Superior Dredging Company. The project, which is costing nearly \$1,000,000, is more than 50 per cent completed.

Buys Chelsea Plant

The machinery and equipment of the Towar Rubber Company, Chelsea, Mich., have been purchased by the Rubber Manufacturing Company, a Toledo corporation, which also has obtained a lease on the building. Sponge rubber, wall paper cleaner, stair treads, etc., will be manufactured in the Chelsea plant.

Grand Rapids and Battle Creek Start Building Projects

Two large civic buildings, one in Battle Creek and the other in Grand Rapids, are expected to be under way shortly. Work was to have been started this week in Battle Creek on the W. K. Kellogg civic auditorium and junior high school building, to cost \$500,000. L. J. Laird, Battle Creek, has the general contract. It is estimated that about 300 men will be employed on the construction of the building.

The new building will be of light-colored brick and Indiana limestone, six stories high and facing Van Buren street. The unit to house the junior high school will be three stories. The structure, designed by Albert Kahn, Detroit architect, will include an auditorium seating 2,700. It will have a 283-foot frontage and will be 209 feet deep.

Recent opening of bids for the general contract for the new Grand Rapids civic auditorium revealed the offer of Owen-Ames-Kimball company of that city as the lowest bidder at \$93,000. Of this \$484,000 is the guaranteed maximum construction price and \$45,000 the fee. The City Commission has referred bids to the building committee and the architects for tabulation.

Sub-contracts will add anywhere from \$130,000 to \$700,000 to the Grand Rapids project total. There remains \$1,140,000 out of the original bond issue of \$1,500,000 for the completion of the structure. From this also must come the cost of seats and other equipment. Robinson & Campbell, Grand Rapids architects, designed the building.

Beach at Manistee Will Be Improved

In order to further the development of north side Manistee parks and bathing beaches the North Side Improvement association organized last year has decided to remain active this summer. George L. Kruse has been named president, George Calder and William Lidtke, vice presidents; La Verne Williams, secretary, and John Voigts, treasurer.

Equipping the beach with floodlights to enable the public to use it at night is the feature project for this summer.

GIANT AZTEC BEAN

The above illustration was reproduced from an actual photograph, to show the comparative size of the Giant Aztec Bean with that of the common field or navy bean.

LARGEST OF ALL BEANS

It is a real bean; looks like a field or navy bean except that it is 8 or 9 times as large as the common field bean. The quality of the bean is excellent; very hardy; and probably the most productive bean grown. One plant reports that two years ago he secured four beans, the product of which he replanted last spring, and in the fall harvested 24 pounds of dry beans. The quality of the Giant Aztec Bean is unexcelled both as a green and dry shell bean. Our supply of seed is limited, and the price is high, but now the time to get started with this wonderful bean. 8 beans, 25c; 40 beans, \$1.00; one-fourth lb., \$2.00, postpaid.

Grand Rapids, Michigan

SEEK AIR TOUR DATES

Michigan's 1932 Air Tour will be held during the week of July 10-16 over an itinerary largely centered in the Upper Peninsula, according to Talbert Abrams, Lansing, president of a newly organized permanent tour organization, which will handle all future tours. The fact that Leslie Keffgen, Bay City, state commander of the American Legion, also is an officers of the organization indicates that the legion, which is sponsoring this year's tour, may do so annually.

The tour will start at Detroit and end in Lansing, according to tentative plans. Other cities to be visited in the order named are: Bay City, Alpena, St. Ignace, Sault Ste. Marie, Newberry, Munising, Marquette, Ontonagon, Calumet, Crystal Falls, Iron Mountain, Escanaba, Charlevoix and Houghton Lake.

Non-residents Must Have License to Fish Great Lakes

Signs reminding non-residents of the state that they must now have a non-resident license to fish in the waters of the Great Lakes over which Michigan has control will soon be posted at boat houses and all places along the lakes where fishing is customary.

During past years non-residents needed licenses only to fish in the inland waters. The 1931 legislature made it necessary for non-residents to secure licenses to fish in any Michigan waters.

The fee for a non-resident angler's license is \$4. The license permits fishing for any species of fish in season.

COMFORT for COLICKY BABIES ... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children. It is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

Cast H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

Where Does She Get Her "Pep?"

SHE doesn't look seventy. Nor feel that old. The woman who stimulates her organs can have energy that women half her age will envy!

At middle-age your vital organs begin to slow down. You may not be sick, simply sluggish. But why endure a condition of half-health when there's a stimulant that will stir a stagnant system to new life and energy in a week's time?

This remarkable stimulant is perfectly harmless. It is, in fact, a family doctor's prescription. So, if you're tired of trying every patent medicine that comes along, tell the druggist you want a bottle of Dr. Caldwell's syrup pepsin. Take a bit of this delicious syrup every day or so, until you know by the

way you feel that your lazy liver is again active, and your bowels are poison-free.

Men, women, and children who are run-down, who tire easily, get bilious spells or have frequent headaches, are soon straightened out when they get this prescriptional preparation of pure pepsin, active senna, and fresh laxative herbs. (Syrup pepsin is all the help the bowels need, and you do not form the very bad habit of always taking cathartics.)

Keep a bottle of Dr. Caldwell's syrup pepsin in the house, and take a stimulating spoonful every now and then. It is all that a great many people ever take to keep strong and vigorous, and absolutely constipation.

HEADACHE

A hard day at the office, and a headache homeward bound. All for the want of two little tablets of Bayer Aspirin! Don't be helpless when you suddenly get a headache; carry Bayer Aspirin with you. The pocket tin doesn't take up any room, but what a comfort when it's needed!

Fatigue will frequently bring on a headache. It lowers the vitality and invites a cold. Take Bayer Aspirin and throw it off! Don't wait until you are miserable. There is nothing in genuine aspirin to hurt the heart or upset the stomach or harm the system in any way. Your doctor will tell you that! Get real aspirin; look for Bayer on the

box. Follow the proven directions to be found inside each genuine Bayer package. They cover colds, sore throat, headache, toothache, neuritis, neuralgia, sciatica, lumbago or rheumatism, muscular pains and other pains and aches for which these tablets are a positive antidote. Keep your pocket tin filled from the bottle of 100 tablets. Every drugstore has Bayer Aspirin in bottles, as well as the familiar little box.

Bought by the hundred the genuine tablets cost very little, indeed. When the tablets are stamped Bayer you know what you are taking. Why experiment with imitations?

BAYER ASPIRIN

CAMERA NEWS

These Husky Navy Lads Are Getting Ready for Contest

There is plenty of work to be done aboard Uncle Sam's fighting vessels, but the crew of the U. S. S. New York find time enough from work to do a bit of training. Here you see the men staring away at the training machine, hoping that they will manage to win the navy rowing championship.

When Students Were Ejected From Coal Fields

Here you see members of the second group of Eastern College students, bent on investigating conditions in the Kentucky coal fields, who were ejected into Tennessee after they had crossed the Kentucky line. At extreme left, the committee, Eleanor Curtis of Columbia, Pauline Daun of New York University and Robert F. Hall, of Columbia.

Indian Made Beaver Protector

In an effort to save the fast-disappearing beaver from extinction, the Canadian government has appointed Grey Owl, an Apache Indian, as an official beaver authority. He is seen in his Manitoba retreat feeding a young beaver as part of his studies of this shy animal.

He's Champion "Stayer" in Legislature

Representative Gilbert N. Haughen, of Iowa, above left, recently broke all records for continuous service in the House of Representatives when he celebrated 33 years and 20 days of service. He is shown above being congratulated by Speaker Garner.

Woolworth Heiress

Miss Barbara Hutton, above, of New York, heiress to the vast Woolworth fortune, was selected as the "Queen" of a recent cruise aboard the Empress of Britain. The passengers voted her the prettiest girl aboard.

Anemia Remedy

An important advance in the treatment of pernicious anemia was seen in the solution recently developed by Dr. William P. Murphy (above) of Harvard. Made from liver, it is 17 times more potent than the meat itself, and more than 7 times as concentrated as any liver extract made.

POTATOE CROP PROFIT DEPENDS ON QUALITY

Announced intentions of the farmers of the United States to increase their potato acreage over the number of acres harvested last year and the heavy stocks of old potatoes which must be marketed between now and the end of this market season make it imperative for Michigan growers to produce a crop of good quality according to the farm crops department at Michigan State college.

Michigan potato growers cannot profitably conduct their business on an in and out basis and plant large acreages in some years and small acreages in others. The crop rotation must be planned to carry a fairly equal acreage of potatoes each year.

The first concern of Michigan growers should be to produce a crop of good quality which can be sold for top prices. The quality can be secured by using good seed treated for disease, planting early to secure mature tubers, proper spraying of the vines to prevent blight and consequent rotting, harvesting early enough to avoid field frost, and grading to take out all undesirable tubers.

Proper planting and harvesting dates add nothing to the cost of the crop and either date may be the single factor which determines the worth of the whole crop. When potatoes are cheap, consumers are more particular about market quality than when potatoes are high in price.

Consumers will not continue to purchase potatoes which are green, discolored, bruised or frosted.

Early Workers Get Best Looking Lawns

Good lawns depend on an early start in seeding new areas or in reseeding the places where the grass has failed in old lawns, according to the soils department at Michigan State college.

The lawn should be raked as soon as the ground dries sufficiently and uneven places should be leveled up by adding new soil. Seeding while the ground is freezing or while there is snow on the ground will not hasten the growth of the lawn.

The grass mixtures recommended by the college men are bluegrass, 50 per cent; Chewings New Zealand fescue, 20 per cent; red top, 20 per cent, and Colonial bent grass, 10 per cent, for all places except shaded spots where rough stalk meadow grass, 40 per cent; Chewings New Zealand fescue, 30 per cent; red top, 20 per cent, and Colonial bent grass, 10 per cent, should be used.

Use 20 to 25 pounds of a high grade fertilizer to each 1,000 square feet of lawn. The recommended analysis are 10-8-6, 10-6-4, or one with similar proportions of plant food. The fertilizer should be mixed with dry sand or other soil to permit its even distribution by broadcasting or with a small hand drill. Always apply fertilizers when the grass is dry and water immediately after the application. Use ammonium sulphate, 5 pounds to 1,000 square feet, to stimulate grass growth later in the season. Do not fertilize during hot-dry weather. Shaded spots need more light applications of ammonium sulphate and lots of water.

Roll the lawn only once. When watering lawns, thoroughly drench the soil and do not water again until the soil is dry. Frequent, light waterings may injure the grass.

Set the cutterbar of the mower at two inches for the first two cuttings and then lower it to one and one-half inches. Cut the grass as often as it gets one-half inch above the cutterbar height.

Backyard Gardens Thrive Under Mulch Of Concrete, Metals

Backyard gardens ultimately may be paved instead of cultivated.

The United States department of agriculture now is experimenting with permanent mulches of concrete, iron, cinders, zinc, aluminum and other substances, which cover the surface of the ground except for a small space where the plants grow.

The experiments, an outgrowth of the successful paper-mulch investigations of recent years, are as yet in their infancy and the department makes no predictions as to their final value. In the tests beans, peas, strawberries and various other small fruits have grown as well under the permanent mulch as with ordinary cultivation.

Blocks a few inches thick and 9 and 12 inches wide cover the ground, with rows 1 1/2 inches wide between them. The permanent mulch conserves moisture and controls weeds. In addition it warms the soil earlier in the season and keeps it warm longer in the fall. Rainfall gets into the ground along the rows between the blocks. The Cinder blocks are covered with asphalt to make them black and absorb more heat, and other materials are painted black.

Soil covered with the blocks since 1928 have continued productive. Government scientists believe it possible that no ill effects will be found, because they know that trees grow successfully under city streets and sidewalks, which constitute a "permanent mulch."

Professor Outlines Transplanting Art

Some prospects of an early and mild spring and the amateur landscape artist fares forth to improve his suburban lot with new nursery stock or young trees uprooted from their native wood. Unfortunately about half the amateur's transplanting efforts will come to nought, however, through lack of knowledge of the fine art of transplanting, says Harlow O. Whittemore, professor of landscape design in the University of Michigan, who gives some hints to reduce the mortality among transplanting shrubs and trees.

Transplanting of a tree or shrub is a major operation in the life of the plant and calls for much the same care given a human being during a surgical operation, Prof. Whittemore states. The tree is adjusted to the soil in which it stands, therefore it is well to keep as much as possible about the roots when digging and moving it, he says. Oaks and hickories may be successfully moved if root pruned for two or three years before the operation. Taking up the tree must be done carefully to preserve the tiny rootlets and root hairs, if these are torn off the eventual death of the tree is more than probable. Any roots torn or bruised in digging up must be pruned off square and clean, allowing the stump to callous over and preventing the entrance and spread of decay. Any tree or shrub not transferred at once to a new site should have its roots surrounded by a generous ball of damp earth, this being especially important with evergreens and others with a resinous sap, which once permitted to harden for lack of water will never soften and return to its duty as life blood of the tree.

Five points must be watched in planting, Prof. Whittemore says, first, don't hold the tree upright and throw dirt around on all sides. This leaves a large air space under the base of the trunk, resulting in later drying out. A conical mound should be made at the center of the hole and the tree set on this, the sides being filled later. Second, spread out the roots, don't leave them "balled up." The earth come mentioned helps in regularly spreading the roots. Third, soak the roots in warm water just before planting; this insures that the roots will quickly start to transfer food from the soil to the plant, watering after planting does not do this as well. Fourth, the soil should be well tamped down all around the roots to insure firmness and good contact for food. Fifth, drainage must be present. If the soil is very heavy or clay, water will collect about the roots, shutting off needed air. If the hole is dug an extra foot deep and a layer of gravel put down this will be avoided, this method being probably better than tile drainage, says Prof. Whittemore.

Finally wind damage must be prevented, he states. Three guy wires, attached well above the first branches and passing through loops of old hose where they circle the trunk, should be used. These may be fastened to stakes or better to "dead men," boards buried underground with the wire looped around them. An unanchored tree is very likely to have its new-set roots worked loose by the wind, or a drying draft of air passed down around the trunk where a space is opened up between trunk and surrounding soft soil. Shrubs, states Prof. Whittemore, should be severely pruned when newly planted, as their light weight and mass of branches makes for serious whipping in a wind.

State Rabbit Body Picks 1932 Officers

Edward Brower of Holland was re-elected secretary-treasurer of the Michigan State Rabbit Breeders' association at the convention held at East Lansing. S. A. Sixma of Muskegon was elected president and D. G. Hutchinson of Saginaw vice president.

The annual breeders banquet was attended by 100 representatives from various branches in the state. Speakers included J. Frank Smith and C. E. Anderson of Chicago and Prof. C. G. Card of Michigan State college. One of the aims advocated was lower production costs.

Light Oat Seed Will Produce Good Yield

Despite the fact much of the 1931 oat crop was of poorer quality than usual, its use for seed will be satisfactory provided it is properly cleaned and graded, the United States department of agriculture says.

Much of the oat crop ripened prematurely because of drought. As a consequence, these oats are of lighter weight per bushel than usual and may not appear to be satisfactory for seed purposes. However, if this seed is thoroughly fanned and graded it should produce a satisfactory crop.

Freezing Point Low In Fertilized Crops

Young fertilized corn plants will withstand 2 or 3 degrees lower temperature without frost injury, according to tests conducted by the United States department of agriculture at the University of Wisconsin.

The explanation of this effect is that the fertilizer increases the salt concentration of the juice or sap of the plant, thereby lowering the freezing point. Similar effects have been observed on potatoes.

POULTRY

B. W. D. ERADICATION WORK

Various attempts have been made in various states to clean out B. W. D. by organized work in flock testing, but it is evident that complete victory cannot come without complete cooperation of all who sell hatching eggs, breeding stock or chicks.

Rhode Island is starting about the flock testing work in a new way. The Agricultural College has inaugurated what is known as "testing circles," covering areas containing 10,000 to 15,000 birds with a tester assigned to each circle. The plate or rapid method is used by which the samples are drawn in the morning and run through at the farm in the afternoon. The reactors are removed and duplicate samples are taken and chick-tested by the agglutination method.

One test not being sufficient to clean up a flock, this work is repeated twice within suitable periods to catch lingering reactors. For about 15 cents a bird a flock can be so tested four times, which cleans up B. W. D. effectually, according to repeated experimental work. It would seem worthwhile for other areas to adopt similar aggressive work against this scourge of poultry, the profit-reducing effect of which is not confined to chick mortality.

NO TIME TO QUIT

"Do I dare spend any money for chicks this year, with egg prices so low and the prospect of low prices for market poultry?" asks a farm poultry woman who usually buys 300 to 350 chicks from which to have 100 laying pullets during the winter, and the rest for market and home use.

It is imprudent for farm poultry keepers to let present price conditions deter them from raising the number of chicks for which they have room and equipment to raise them right. Poultry prices last year were such, in relation to feed prices, that properly managed flocks brought a very good profit. Even egg prices, low as they have been, were still high enough for good layers to be profitable. No one can definitely forecast prices this year, but the conditions as to storage holdings and other factors point to better things next fall.

EGG-EATING

Egg-eating often becomes a serious problem both as to loss of eggs and soiling of others. While it is sometimes due to hunger for the animal protein or lime contained in egg and shell, it often becomes a problem in properly fed flocks because the fowls develop an appetite for raw eggs, regardless of what else they have to eat.

Darkened nests is one remedy in that case, but this is not always practical. As a rule only a few hens ever learn how to break sound-shelled eggs, though the whole flock may rally to help eat them. Setting a watch to catch the egg-breakers is therefore one of the best methods of stopping the habit. Eliminating from the flock layers of thin-shelled eggs is another aid.

Some hens learn to break eggs with the point of the beak, in which case cutting off the point of the upper mandible is all that is necessary. Others learn that vigorous scratching in nests produces a feast. These hens had better be disposed of. As a "cure" vinegar in the drinking water has been recommended and is harmless in any event. We cannot vouch for the "cure," but give it for what it may be worth, but suggest the discovery and elimination of the cause as the wisest thing.

LIGHT THE BROODER HOUSE

Lights in the brooder house, especially on dark, cloudy days and early in the season, to lengthen the feeding day will promote more rapid growth.

If electric lights are not available, an ordinary lantern or lamp will provide enough light to permit chicks to see where they are going. Chicks often wander away from the brooder heat, collect in close groups or actually pile up. These things occur more in darkness than in light. This is sufficient reason for using lights, at least while chicks are young and unfeathered.

Select Good Hogs

That there is a wide variation in the average rate of gains of pigs from different litters fed under identical conditions is indicated in the results obtained at the Minnesota experiment station in the national record of performance project.

The highest average daily gain per heat, collect in close groups or actually 1.20 pounds in the tests last year. At these rates the fastest gaining pigs will reach 225 pounds and be ready for market 37 days earlier than the slower gaining ones.

The amount of feed required to produce 100 pounds of gain varied 52 pounds from the highest to the lowest. Likewise these tests show that there is considerable variation in the carcass values of pigs from different litters.

The record of performance test shows that there is an opportunity to select and develop strains of hogs which show feed costs and high carcass values.

Mother: "Will you please keep quiet, son? My head is just about to split."
Small Boy: "If I keep quiet, can I see it split?"

Announcing TO MOTORISTS

Now you have the opportunity of saving 50% on your lubricating oil cost. This is a special offer which closes May 15, 1932.

New PENN-DIX MOTOR OIL

100%
Pennsylvania Oil

This is the regular Penn-Dix Motor Oil that has been sold at Dixie stations for the past five years at thirty cents per quart. It is the highest quality Pennsylvania oil obtainable for which we are the licensed distributors in Michigan under permit No. 709 issued by the Pennsylvania Grade Crude Oil Association.

Special
Thirty Day Offer

This is a special offer for thirty days only. During that time coupon books will be sold at our stations and by special salesmen. The coupons are good at any of our Dixie stations as long as they last. Here's an opportunity to save on the lubricating cost of your car by buying a coupon book now.

Twenty Quart Coupon Books at 15c per Quart

This Price Available Only Through Purchase of Coupon Books

In buying Penn-Dix Coupon Books you sacrifice nothing. You get station service on a quart or two or a complete change of oil. The same free draining and refilling services goes with coupons as with a cash purchase. Also you get the grade and quality of oil recommended for your particular make and model of car at the season of the year when coupons are presented.

Please Remember—Coupons will be available for thirty days only, but they will be redeemed at any of our stations as long as the coupons last.

Mortgage Sale

Notice is hereby given that the mortgage dated December 13, 1930, given by Sarah Polakow to Elizabeth Wilkins and William Wilkins on the following described property, to-wit: "The North 110 acres of the Northeast quarter, the north 32 acres of the south 37 acres of that part of the northwest quarter lying east of highway, also the north half of the northeast quarter of the southeast quarter of section 24, Town three South range 14 West, Paw Paw township, Van Buren County, Michigan, which mortgage was recorded in the office of the Register of Deeds for Van Buren County, Michigan, on December 13, 1930, in Liber 150 of Mortgages on pages 425-6, will be foreclosed by a sale of the premises at the north front door of the Court House in the Village of Paw Paw, Michigan, on the 29th day of April, 1932, at 10 o'clock in the forenoon. Installments of interest due June 13, 1931 and December 13, 1931 are due and unpaid and have remained unpaid for more than 30 days after maturity and the mortgagors elect to declare the entire amount of principal and interest

unpaid to be now due and payable and hereby foreclose for the whole thereof amounting to \$2500.00 principal and \$195.31 interest or a total of \$2695.31, besides costs of foreclosure and attorney fees.

Dated January 25, 1932.
WILLIAM WILKINS and
ELIZABETH WILKINS,
Mortgagees.
W. J. Barnard,

Mortgage Foreclosure

NOTICE IS HEREBY GIVEN, that the mortgage dated March 24th, 1927, given by Ethelyn Holdeman, as mortgagor, to Joseph Pelong, as mortgagee, covering the land described as:

The Southeast Quarter (SE $\frac{1}{4}$) of Section Northeast Quarter (NE $\frac{1}{4}$) of Section Two (2), Town One (1) South, Range Fourteen (14) West, Van Buren County, Michigan, which mortgage was recorded in the office of the Register of Deeds of Van Buren County, on March 25, 1927, in liber 122

of mortgages, page 603, will be foreclosed by sale of said premises, at the north front door of the Court House, in the Village of Paw Paw, Michigan, (that being the place of holding the Circuit Court in said County), said sale to be held on the 25th day of June, 1932, at ten o'clock in the forenoon of that day.

The amount claimed to be due on said mortgage, for principal, interest and taxes paid, at the date of this notice, is the sum of Eight Hundred Fifty-five and 20-100 Dollars (\$855.20), besides costs of foreclosure and attorney's fees.

DATED, March 29th, 1932
JOSEPH PELONG,
Mortgagee.

DAVID ANDERSON,
Attorney for Mortgagee,
Business Address, Paw Paw, Michigan

Mortgage Foreclosure

NOTICE IS HEREBY GIVEN, that the mortgage dated October 25, 1926, given by J. A. Harris and Blanche Harris, his wife, as mortgagors, to FIRST STATE BANK, of Gobles, Michigan, a Michigan corporation, mortgagee, covering the land

described as:
The south sixty (60) acres of the east half (E $\frac{1}{2}$) of the Southeast quarter (SE $\frac{1}{4}$) of Section Three (3), Town Two (2) South, Range Fourteen (14) West, Van Buren County, Michigan; which mortgage was recorded in the office of the Register of Deeds of Van Buren County, on October 29th, 1926, in liber 122 of Mortgages, page 534, will be foreclosed by a sale of said premises, at the north front door of the Court House, in the Village of Paw Paw, Michigan, (that being the place of holding the Circuit Court in said County), said sale to be held on the 2nd day of July, 1932, at ten o'clock in the forenoon of that day.

The amount claimed to be due on said mortgage, for principal and interest, at the date of this notice is the sum of \$2,477.11, besides costs of foreclosure and attorney's fees.

Novelists' Woes Begin

With Characters' Names

Selecting names for characters in novels, writes W. B. Holland in the Miami Herald, has long been a troublesome task. This is especially true when the moniker is to be given to a villain. There is danger of a libel suit if the name of a real individual happens to be selected, as he can sue for damages and set up the claim that he has been held up to shame and ridicule.

There have been so many of these suits in England that parliament has amended the libel laws so that the author who can prove that he did not know of the existence of the individual who had the same name as his imaginary character can offer this as a defense and avoid being mulcted. The numerous suits brought in England account for the unusual names often found in English novels.

This precaution, however, is not always sufficient. When Mark Twain and Charles Dudley Warner were writing "The Gilded Age" they devised the name of Col. Mulberry Sellers for one of the characters. They were greatly surprised when a real Mulberry Sellers appeared and demanded redress. He did not feel flattered at all in being pictured as a visionary chap who was always devising schemes to make money. No scheme ever worked, but Colonel Sellers insisted "there's millions in it."

Claim Persimmon Tree

Native of New England

It is not generally known that the persimmon tree is a native of New England, having been found apparently wild in Rhode Island and Connecticut. It is much better known and more beautiful down south, where it is an orchard tree.

Unfortunately it is not hardy enough around Boston to produce the fruit, although it is fairly common here and prized for its leafage and flowers. It is looked upon as one of the most promising of American native trees as a subject for experimentation and improvement.

"The wood of the American persimmon is hard and close grained, and the so-called heartwood, which is so slow in forming that a hundred years may pass before it is definitely developed, becomes almost black in old individuals," says J. G. Black in the Arnold Arboretum bulletin. "It is from trees of this genus, which is known to include from 175 to 200 named species, that the ebony of commerce is derived, particularly from the variety found in Indian and Ceylon and in the Dutch East Indies."

The persimmon in the north, here in America, often passes unnoticed among many other trees of different families, but with somewhat similar foliage. The bark is dark gray or brown tinged with red, and is deeply divided into thick, square plates.—Boston Globe.

The "Cosmic Ray"

Since 1902 it has been known that the air is being traversed by a form of radiation capable of discharging an electroscope and having a greater penetrating power than X-rays. This radiation is capable of penetrating a lead block 16 feet thick. Experiments with balloons indicate that it comes from outer space, and it has been found that its intensity is independent of the solar or sidereal time and of the latitude of the observer, and that therefore it does not come from the sun or any particular region among the stars. The term applied to this radiation by Millikan is, cosmic rays. (Its wave length is about 0.00001 Angstrom.) Doctor Millikan has suggested that these rays originate in the depths of space by the transformation of radiation back into atoms.

Lady's Erudite "How-d'y-Do"

At a literary tea party, D. H. Lawrence took me across the room to introduce me to his wife, who, interrupting her conversation with another woman, beamed at me very largely and said: "What do you make of life?"

"Come, come," said her husband. Our discussion continued for several hours. Lawrence's idea of immortal life was not something which would start after death, but a living reality within us going on even now, all the time, though intermittently clouded over by the illusion of time.—William Gerhardt in the Saturday Review.

WEEK OF APRIL 24
(Michigan No. 896)

The week of April 24th is expected to open with moderating temperatures in the most parts of the state as a result of lowering barometer and southerly winds. During the early days of this week we look for sharp barometric changes, strong winds and some rather heavy rains.

During the middle days of this week temperatures will be falling so that minimum readings about this time will fall below freezing during the night and early morning hours.

Cloudy and threatening weather beginning about Thursday and lasting over the balance of the week will be the result of another storm center we expect to cross over or near the state of Michigan at the end of this week. Thunder showers and warm weather will be the general rule.

Temperature extremes will be more marked during the last half of this week than during the early part. In fact, we look for more or less fluctuation of thermometer readings from now on and during the first decade of May. With all these ups and downs we look for a general downward trend of the temperature from the present time until near the end of next month.

Save the Flowers.

Hundreds of motorists throughout the state are discouraging the most cheerful sign man has that spring is here. This omen is the budding flowers seen in wood and field. The motorist plucks them, leaves the ground trampled and then even lets the blossoms wilt and die in the heat of the car. This practice, says Herbert Durand, botanist and author, must stop or there will be no wild flowers in America. It behooves all of us to control our selfishness and think as the poet Wordsworth:

"And tis my faith that every flower
Enjoys the air it breathes."

Stinson Leads Industry

Stinson Aircraft Corporation, division of the Cord Corporation, built and sold nearly 53 per cent of all cabin monoplanes manufactured in the United States during 1931, according to figures of the United States Department of Commerce.

The department places the total number of cabin monoplanes of all sizes at 338 for the year. Of this number Stinson produced 179 or 52.9 per cent. A total of 154 four-passenger cabin monoplanes were built during the year of which Stinson produced 139 or 90.2 per cent. Of the 58 multi-motored monoplanes reported by the department a total of 40 or 68.9 per cent were Stinson-built.

Dinner Stories

And Casey Did.

An Irish drill-sergeant was instructing some recruits in the mysteries of marching movements, and found great difficulty in getting a countryman of his to halt when the command was given. After explaining and illustrating several times, he approached the recruit, sized him up silently for a couple of minutes, and then demanded his name.

"Casey, sor," was the reply.

"Well, Casey, did ye iver drive a mule?"

"Yis, sor."

"An' what did ye say whin ye wanted him t' stop?"

"Whoa," replied Casey.

The sergeant turned away and immediately put his squad in motion. After they had advanced a dozen paces he bawled out at the top of his voice: "Squad halt! Whoa, Casey!"

Fire Water

"Now," said the super-salesman, "this instrument turns blue if the liquor is bad—green if it's good."

"Sorry, but I'm color blind," apologized the prospect. "Got anything with a gong on it?"

MAD LAUGHTER

A THRILLING MYSTERY STORY + by MILES BURTON

"In the heart of the Mendips," replied Dick. "I had intended to put in a couple of days with the hounds—I rather enjoy a stonewall country for a change—but I was recalled sooner than I expected."

"The Mendips? Indeed!" exclaimed Dr. Weatherleigh with considerable interest. "That is one of the tracts which I have always promised myself to explore some day. From the antiquarian point of view, the Mendips are of the greatest interest. The caves in that locality have yielded abundant traces of Paleolithic man, and, as you are possibly aware, lead has been worked there from the earliest times. Why some years ago, a pig of lead was found near Charter-House-on-Mendips, bearing an inscription of the first century A. D."

Alison hastened to interrupt what threatened to develop into a lecture on early inscriptions. "By the way, Dick, did you ever find anything about that telegram you rang me up about the other night?" she asked.

For an instant Dick hesitated. He had never mentioned to Alison the existence of the Funny Toff and he had no intention of doing so now. Alison, misunderstanding his hesitation, laughed merrily. "It's all right," she assured him. "Father and I have no secrets from one another. At least, I haven't from him. He may from me, I've never pried into his lurid past. I told him about the telegram."

"It seems rather an extraordinary thing," remarked Dr. Weatherleigh. "But like most extraordinary things, capable of simple explanation, no doubt."

The delay had given Dick time to think. "No, I never found out who sent it," he replied unconcernedly. "Some wag, no doubt. I expect he saw the announcement of our engagement in the papers and thought a practical joke of this kind a good way of celebrating it. No doubt, he'll be hugely delighted when he knows it succeeded."

"Well, we'll do our best to make up to you for the curtailment of your stay in Somersetshire," said Dr. Weatherleigh. "The place is at your disposal, and Alison will show you where to find what you want."

CHAPTER XXXIV

Dick soon learnt the routine of the house. Dr. Weatherleigh was an early riser, and was in the habit of going round the estate and giving orders before breakfast. That meal disposed of, he disappeared into his study, a most comfortable room, surrounded by glass-fronted shelves full of priceless antiques, until the dressing gong rang, only emerging for lunch and tea. But then, he declared, his day's work was finished. After dinner he would drink a few glasses of vintage port, and then for preference, adjourn to the billiard room, where both he and Alison proved themselves remarkably expert with a cue.

On the third day of Dick's stay at Lestrige Hall, Dr. Weatherleigh came down to dinner with a worried expression on his face, and was unusually silent during the meal. Alison said nothing until he had consumed his second glass of port. Then, when her father's expression had begun to re-assume its accustomed serenity, she asked her question. "What's the matter, Father? Out with it. Has one of your treasures turned out to be a forgery? One might expect anything after that Glozel affair."

Dr. Weatherleigh's features relaxed into a smile. "Nothing so serious as that, my dear," he replied. "Nothing at all, in fact, except that I am foolish enough to be annoyed by trifles. William came to see me this evening and told me that he thought I ought to know that a policeman has been hanging about the place for the last couple of days. William asked him for his reasons this afternoon and the man merely said that those were his orders. I am very much afraid that there must be a suspicious character in the neighborhood. I am always nervous about what Alison calls my treasures. Some of them are certainly valuable, but hardly so, one would imagine, to the ordinary thief."

Alison laughed. "Oh, if that's all, father dear, I don't think you need worry. After all, it's no great inconvenience to have a policeman about the place. But how fortunate that I managed to get engaged to Dick! Otherwise you'd be thinking that the policeman had replaced the postman in my youthful affections. I'm going into the billiard room to practice a few shots. Don't be too long, you two."

As soon as she had left the room, Dick turned to see his host. "Look here, Doctor," he said, "I feel most apologetic about this policeman. I'm afraid that I am the cause of his hanging about the place."

Dr. Weatherleigh looked at him in amazement. "You, Dick," he exclaimed. "Why, is anything wrong?"

"No, there's nothing wrong," replied Dick with a smile. "But I'm afraid that, in the eyes of the law, I'm a suspicious person."

"Really, Dick," said Dr. Weatherleigh in amazement. "But in what

way can such a situation have come about?"

"I'll tell you the whole story if you wish," said Dick after a pause, "but it's all such a muddle that, if you don't mind, I'd almost rather wait until I see daylight. Perhaps I've taken too much upon myself—I seem to have made a mess all round—." He was silent. Dr. Weatherleigh said nothing. In sudden panic, Dick shot out: "I say, you don't think I am hiding anything—disgraceful, do you? I mean, I'm asking you to trust me, I know, and—"

Dr. Weatherleigh came up to him and laid a hand on his shoulder.

"Dick," he said, "I may seem an old man wrapped up in his hobby, but I assure you I am seldom wrong in my judgment of a man. You don't have to tell me anything. Whatever

his host busily engaged in writing letters, which he immediately put aside on Dick's entrance. "Well, Dick, my boy, have you had a good day?" he asked cheerfully.

"Not at all bad, until now," replied Dick. "But I've just had a wire from Conway, the Assistant Commissioner. I'd like you to have a look at it, Doctor."

He handed the telegram to Dr. Weatherleigh, who frowned as he read it. "Under the circumstances, I am afraid that you have no option but to comply," he said. "I trust that it does not imply some fresh complication in that ridiculous matter of the rubies. I suppose, by the way, that there is no doubt that the telegram is genuine? You have been recalled to London before on false pretenses, I seem to remember."

"Yes, I know him," he said.

happens, however odd a position you find yourself in, never be afraid that I shall doubt you. And I am sure Alison won't either."

"Thank you," said Dick, deeply moved. "Well, if you'd like it in tabloid form, I am suspected by one Inspector Pollard of the C. I. D. of pinching the Maharajah's rubies from that fellow Ibbotson—you've seen the burglary in the papers?" Dr. Weatherleigh nodded. "I know you won't let what I say go any further than this room," Dick went on, and gave a rough outline of what had happened from the time of his visit to the Margate Jetty to his last interview with the Assistant Commissioner.

"Well," said Dr. Weatherleigh at the end of the recital, "all I can say is that you have certainly been living in a world of alarms and it's a good thing you're well out of trouble down here. Please stay as long as you feel inclined, but remember, too, that we shall both of us understand if you feel the need to get back into the danger zone. We shall ask no questions, but simply pray that you may come through safe and sound."

Alison came impatiently into the room.

"I thought you were never coming," she complained, "and here you sit looking as solemn as owls. So jolly for me!"

"Deal gently with us, my dear," her father pleaded. They followed her to the billiard room, where Dr. Weatherleigh proceeded to deal most urgently with his daughter as his opponent!

For the next ten days Dick led a peaceful and uneventful life at Lestrige Hall, hunting or shooting during the day-time and spending very comfortable evenings in the company of Dr. Weatherleigh and his daughter. The policeman still hovered in the background, and his presence had become a standing joke between Dick and his host. It was evident that Pollard's suspicions were not yet allayed.

Then, one evening, just after Dick had returned from a not unprofitable afternoon with his gun, an expedition upon which Alison had accompanied him, a telegram arrived, addressed to him. He tore it open with a feeling of annoyance, resentful of anything that should encroach upon the even tenor of his life. "Should be glad if you would come and see me as soon as possible, Conway," he read.

Alison was upstairs changing and Dick, after a moment's hesitation, decided to seek Dr. Weatherleigh's advice. He entered his study, to find

"I'll ring up Conway and make sure," replied Dick. "He's always in his office at this time."

Dick put his call through and returned to the study. "It's genuine enough," he reported. "Conway says that he wants to see me most particularly. I told him that I would catch the first train tomorrow morning."

"Well, there is no help for it," said Dr. Weatherleigh with a sigh. "We must resign ourselves to losing you for the moment, but you will come back here as soon as your business with the Assistant Commissioner is completed?"

"I will come back as soon as I can," Dr. Weatherleigh, Dick replied. "I shall have to spend a night or two in London, as I have a few matters of business which must be attended to. But I assure you that I will return to Lestrige Hall as soon as I can."

CHAPTER XXXV

Dick traveled up to London next day. He was fully determined that he would not again commit the error of undertaking any independent investigation. He had failed rather conspicuously once already, and there seemed no reason to suppose that he would be successful at a second attempt.

He entered Sir Edric's room with a smile, and sat down in a chair beside the Assistant Commissioner's desk. Sir Edric looked tired and worried, but greeted Dick with his accustomed cheerfulness. It's very good of you to come up so promptly, Dick," he said. "I hated to call you away, but I think it possible that you may be able to help me."

"I gather that I am not to be arrested for the theft of the Maharajah's jewels?" replied Dick with a smile.

"No, you seem to be cleared on that charge," said Sir Edric. "Your theory of the door-knob seems to be correct. We failed to find your fingerprints in the house of Creek Street, and the experts have come to the conclusion that the impression on the door-knob was made some days before Pollard found it. Even he is prepared to admit your innocence, rather reluctantly, though, I'm afraid. What weighs most with him is that another crime has been committed, while you were safely at Lestrige Hall."

"He took good care that I shouldn't leave there without his knowledge," commented Dick. "Dr. Weatherleigh was quite disturbed at the continued presence of the village policeman. But what's this new crime? Has

our old friend the Funny Toff been exercising the brains of the police once more?"

"He has, and that is what I wanted to talk to you about," replied Sir Edric. "I'll describe his latest exploit to you, as far as we know it at present. In the first place, do you know Hatton Garden? It is a street running northwards from Holborn Circus, at the corner of Gamage's, roughly parallel to the Farringdon Road."

"I think I've been there once," said Dick. "It didn't strike me as being a particularly enlivening thoroughfare."

"It isn't," agreed Sir Edric. "I spent yesterday morning there, and I know. It is, however, as you probably know, the home of wholesale jewelers, diamond merchants and people like that. Amongst these are Seccombe & Armitage, a firm of diamond merchants, whose premises are at the corner of Hatton Garden and Ely Street, on the left-hand side as you go up."

"Now, next door to this place, in Ely Street, is a rather ramshackle sort of building, with a yard behind it. This building has been divided up. The ground floor is a tobacconist's shop and the three upper floors are used as work-rooms by different people. The yard, which is reached through a gateway leading on to Ely street, is barely more than fifty feet square, and is surrounded by high walls, one of which is the back wall of Seccombe & Armitage's place. Do you follow the layout of the place?"

"Sufficiently well, I think, replied Dick. "What is the yard used for?"

"I'm coming to that. Before the tobacconist took the ground floor, it was occupied by a grocer, who used the yard to keep a couple of vans in. After he left, the yard was unused for some years. It isn't big enough to be of much use to anybody. But, about six months ago, the owners of the building were approached by a concern calling themselves the All-England Haulage Company. These people explained that they had a contract which would last for a year, and which involved their garaging a lorry in that part of London. The yard would suit them very well for this purpose, provided that they were allowed to put up a corrugated iron shelter on one side of it, and to dig an inspection pit, to allow of access to the underneath of the lorry. They offered a tempting rent for a year, to be paid in advance. After some bargaining, their offer was accepted, and since, the rent was paid at once, no inquiries were made as to the status of the company."

The shelter and pit were duly completed, and the lorry commenced to use the yard. It was fairly regular in its movements. Usually the driver came for it about eight o'clock in the morning, drove it away, and returned about six at night. Sometimes, however, it would not go out, or, having returned, would remain in the garage for a day or two. It was an ordinary open lorry, but it usually had a tarpaulin cover over it.

"So much for the yard and lorry. Now we come to Seccombe & Armitage's place, which is a fairly new building. Seccombe & Armitage occupy the ground floor and basement only; the upper floors are let out as offices. The ground floor is used for ordinary business purposes, show-rooms and so forth. Half of the basement has been converted into a strong-room, lined with steel, and with a door which would defy a charge of dynamite. In the strong-room are a number of safes of various sizes, in which different varieties of stones are kept. A night watchman is employed in the building, who patrols the basement and ground floor at intervals, without, of course, actually entering the strong-room, to which only Mr. Armitage, the head of the firm, has the key."

"Yesterday morning, the lorry drove out of the yard as usual, a little before eight. Mr. Armitage arrived in his office soon after half-past nine and a little before ten went down to the strong-room to fetch a parcel of stones. When he had opened the door, he was confronted with a gaping hole in the side of the strong-room, and found that two of the safes, weighing about half a ton each, and containing stones worth many thousands of pounds, had completely vanished."

"We were informed at once, and Pollard went to investigate. The hole in the wall was about five feet square. The brickwork of the wall had been cut away, brick by brick, and the steel had been cut through with an oxy-acetylene flame. He went through the hole, and found himself in a sort of cavern, at the bottom of which lay the pieces of steel which had been cut out. The roof of the cavern consisted of wooden planks. He removed these climbed out, and found himself in the yard."

"By jove, that shows the hand of the Funny Toff clearly enough!" exclaimed Dick. "So well thought out, and yet so simple. Of course the lorry brought in a gang of men every evening, hidden beneath the tarpaulin. By night, they excavated the inspection pit, until they reached the wall of the basement, the earth being carried away by the lorry in the morning. Then they attacked the brick-work, and finally, when they were all ready, they cut out the steel work with their flame. Nobody could possibly see them, with the cover on the inspection pit and probably the lorry standing over it as well."

"Yes, that's about how they set to work," agreed Sir Edric. "I went down and had a look at the place. They must have rolled the safes out

through the opening, and then hoisted them out of the pit into the lorry. You can see where they fixed a tackle to one of the beams supporting the shelter. Oh, it was all carefully thought out, right enough!"

"You're after the lorry, I suppose?" suggested Dick. "I expect you know its number? And what about the two safes? They'll have to take them somewhere where they can be broken open."

"Pollard has that in hand now," replied Sir Edric. "We've got the number of the lorry all right, LC 7280. We rang up the county Council, and found that the owners of those numbers were the All-England Haulage Company, of 57 Ely Street. That is the address of the tobacconist. The driver of the lorry had made arrangements with him to call for any letters addressed there to the company. I need hardly say that no such company exists."

Sir Edric paused. "There's just one clue," he continued after a short interval. "A month or two ago, a water main happened to burst at the corner of Hatton Garden and Ely Street. It caused a bit of a flood before the water could be turned off, and one of the news agencies sent a man to take a photograph of it. The tobacconist, who was standing at the door of his shop saw the photographer, and subsequently bought a copy of the photograph from the news agency. It shows him standing there, and he's so proud of it that he has hung it in his shop."

"Very enterprising of him," commented Dick. "But I don't see that that it's much of a clue."

"Wait a bit," replied Sir Edric. "At the very moment that the photograph was taken, the lorry was coming out of the yard. The driver apparently did not notice the photographer; he was looking over the side of the lorry to see that it cleared the gateway. The result is that we have an excellent picture of the front of the lorry, and of the profile of the driver."

"Heaven shows its mercies, even on the police, it seems," remarked Dick. "I don't know that it will help you much with the lorry. One lorry is very much like another, you know, especially if they are of well-known makes. And as for the driver, well, I expect he'll make himself scarce for a bit."

"Yes, I know all that," replied Sir Edric impatiently. "I've learnt at least the elements of common sense since I've been sitting in this chair. But I'm pretty sure that the Funny Toff arranged this show and that therefore the driver is one of his regular agents. I don't want to make inquiries in Wapping, for the Funny Toff will almost certainly get to hear of it if I do. If he thought that the driver had been recognized, he would either hide him where he shouldn't find him, or knock him on the head, whichever he found more convenient. In either case, we shouldn't be any forrader. But there's just a chance that you have run across him during your visits to that salubrious neighborhood. Here's the photograph. Have a look at him."

Dick took the photograph and studied it intently. "Yes, I know him," he said quietly. "As a matter of fact, I owe him a drink. He stood me a double gine in the Margate Jetty that evening."

CHAPTER XXXVI

"Good man!" exclaimed Sir Edric. "It was a pretty long shot, sending for you like that, but it came off, after all. That establishes one thing, at least, that the robbery was carried out by the gang you got in touch with. Since they put you in touch with the Funny Toff, it is almost certain that he was at the bottom of it. If we can only trace the lorry of the driver, we shall be on his tracks."

"Yes," replied Dick doubtfully. "That's true enough as far as it goes, but, from our experience of the Funny Toff, it's pretty safe to guess that he has taken precautions against the lorry or the man being traced. I shouldn't wonder if the next thing you found wasn't the 'wretched man's' body. He seems to have a short way with anybody who's likely to give him away. Besides, time's getting on. This happened yesterday morning, you tell me?"

"I know," agreed Sir Edric. "I am hoping every moment that we may hear something."

"There is nothing to prevent your hoping, I suppose," remarked Dick. "But I tell you what, Conway: I'm immensely interested in that lorry. It's all Lombard Street to a China orange that it is the one from which Inspector Brooks' body was thrown out. I don't suppose that the Funny Toff keeps a fleet of them."

"I expect that you're right," replied Sir Edric. "But I don't see that that helps us much. The constable at Brentbridge said that he wouldn't recognize the lorry that passed him. He was too much dazzled by its headlights to get a good look at it. We don't know where the Brentbridge lorry came from, nor where it went to."

"It's a pretty safe guess that it changed its number somewhere on the road, and went to Ely Street, where its driver locked it up all safe and comfy," said Dick. "As to where it came from, that's a different matter. But at the moment, as I quite realize, the interesting question is where it is now."

(To be continued)

INTERNATIONAL
LAW SYMPOSIUM
AT UNIVERSITY

On the campus of the University of Michigan this summer there will be conducted the first symposium sponsored by the Carnegie Endowment for International Peace, for the purpose of encouraging and improving the teaching of international law in the smaller colleges of this country.

Fifty delegates from a like number of colleges have been appointed to attend the intensive program lasting from June 27 to July 28. A busy month of round table discussions, seminars and lectures is planned for the visiting educators, according to Professor Jesse S. Reeves of the university. In order that the group may be kept together and to encourage discussion the men will reside in two campus fraternity houses, while the women will be housed in a campus dormitory.

The following courses and distinguished instructors are announced: The Classics of International Law by James Brown Scott, president of the American Society of International Law; Bibliography of International Law, International Law and the Constitution, Codification of the Law with Regard to Territorial Waters and the Competence of the Courts with Regard to Foreign States by Grafton Wilson, professor of international law in Harvard university.

Fundamental Conceptions of International Law with Special Reference to Diplomatic Privileges and Immunities by Jesse S. Reeves, W. W. Cook, professor of American institutions in the University of Michigan; Interpretation and Application of International Law in Anglo-American Countries by Edwin A. Dickinson, professor of law in the University of Michigan; and Modern Sources of International Law by George A. Finch, managing editor of the American Journal of International Law. Public lectures on topics related to the symposium will also be given.

Opinion of Alumni
Valued at U. of M.

A shift of alumni loyalty from the administration to fraternities because of the economic burdens placed on fraternities by deferred rushing would call for reconsideration of the plan, in the opinion of Dr. Richard R. Smith of Grand Rapids, regent of the University of Michigan.

Regent Smith, questioned following meeting of the regents at Ann Arbor, said that to jeopardize the spirit of alumni loyalty would be a mistake and that if deferred rushing should cause such action, the whole plan should be reconsidered.

Fraternities on the campus are bitterly opposed to the deferred rushing plan put into effect last September by the University and are seeking to bring alumni to their side in the fight.

Painter, Ex-Olivet
Student, Honored

Ezra Winters, New York City, famous American painter, former student of Olivet college, has been designated to execute the great mural in the main lobby and foyer of the International music hall, the world's largest theater now being built in Rockefeller Center.

The mural is 60 feet long by 30 feet wide, and the theme will be based on an American version of the request for eternal youth. Instead of Ponce de Leon's search for youth Winters will portray an Indian legend of Oregon.

The honorary degree of LL.D. was conferred on Winters by Olivet college in 1923 when he attended the eighty-first anniversary of the founding of the college.

Hikes Seven Miles
Daily, Tops Class

Miss Cora Timmer is valedictorian of Ellsworth High school seniors this year with an average of 95.16. Miss Henrietta Rubingh is salutatorian with an average of 92.78. The two girls lead a class of 10 pupils, whose average is 87.41.

Miss Timmer is the daughter of Mr. and Mrs. H. J. Timmer and lives three and a half miles south of town. She has walked this distance every day. Her attendance record shows only three and a half days' absence in the last three terms. She has two brothers and one sister who also were valedictorians of their class in their respective senior years.

Miss Rubingh is the daughter of Mr. and Mrs. George Rubingh and lives one mile south of town.

Village Decides
Not to Pay Taxes

The Cass city council has voted to eliminate the collection of a village tax for the year 1932. The village had \$19,503.36 in the treasury on March 1. While the village has bonds amounting to \$11,000 still unpaid for paving Main street, these can be paid only at the rate of \$1,000 a year on the principal so there is enough now on hand for normal village expenses for a few years to come.

Fur Sleeves With Fur Draping

Copyright, 1932, by Fairchild

At the left, an evening gown of rather stiff white satin has a tiny self jacket with a narrow Ascot scarf collar and little barrel sleeves of fine mink. The seaming on the skirt is interesting. Dull satin in an oyster-white cast is used for the gown at the left, with graceful draping mounting toward the left side. The gown is untrimmed.

Speaking of Style

By IRENE VAIL

New York—White accessories with colored evening dresses even with highly colored ones, are a new note. Several stunning costumes have also been noted that combined white accessories and a white top with a high black skirt. There is, for instance, a model in heavy crepe with the skirt black, the top white. This costume has been worn with either black or white accessories, but is smarter with the white ones. With a black or colored costume, white satin or crepe slippers, white glove gloves and a white pearl-studded handbag are chic—also a white chiffon handkerchief, pearl necklace and earrings. Gardenias may usually be added with impunity, but their position is important. They are relied on to accent the high waistline.

Gray and brown together—there's the unusual for you. It is smart, though, and very French. Later on, one will see the combination worked out in linen, a material in which it is particularly fetching. There will be dresses of one color, with sleeves of

another. Some of these sleeves will be attached to a guimpe instead of to the dress—a practical idea, you must admit. Schiaparelli buttons on some of her sleeves, the buttons and buttonholes following the line of the armhole. It's a tricky idea—very young, too.

There is no longer any surprise element in the separate jacket, except when it is in an unusual color or design, as, for instance, the brown jacket with the gray dress, or a printed jacket with a plain dress. When prints are used for jackets, they are inclined to be small in design, but the printed coat may be much more spectacular.

There is a new electric moth ball to combat our enemy, the moth and family. This is a copper ball attached to a long cord, the ball containing a chemical cake. When plugged into an electric outlets, vapor fumes are generated. These warm vapors are said to penetrate garments, hangings and carpets, and to leave crystal deposits upon everything within a radius of 15 feet, but not to stain.

Reformed Churches
Have Near Monopoly
In City of Holland

Although Holland's church life is represented in 10 denominations, approximately 80 per cent of its entire population is affiliated with the Reformed and Christian Reformed denominations. The Reformed Church of America is represented by eight churches and the Christian Reformed Church in America by six. The significant fact, however, is that the two denominations represent virtually the entire strength.

Statistics compiled from the annual report of the Chicago synod show that a total number of communicants and baptized noncommunicants connected with the Reformed Church in America is 5,969. Figures taken from the annual yearbook of the Christian Reformed Church in America credit that denomination with 5,726.

Home Making

Should the wall paper be faded however, the patch should undergo a quick fading process to bring its shade down to match the walls. This can be accomplished by setting the patch out in the sun to fade before pasting it over the soiled place on the wall.

Why is a "milk-fed" chicken better than a "corn-fed" bird? The fat in the former is distributed through the muscle tissue, while in the latter it is just beneath the skin, and will melt during cooking, leaving the chicken somewhat dry.

A broiler should be treated in the same manner as chops or a steak. It should be broiled or pan fried for the best results. The reason for this is that unless such a young chicken is cooked quickly and with dry heat, it is overcooked and practically all of its flavorful tenderness lost.

Muffins and Biscuits Are
Good for Any Meal

Of all the possible foods for breakfast, none are so appetizing and satisfying as light, flaky biscuits with crisp, brown crusts or nutty flavored brown muffins. Either biscuits or muffins with chopped fruits or nuts added are welcomed at breakfast, luncheon or afternoon tea either as bread or, when sweetened and made more elaborate with the addition of fruits, to take the place of cake or other desserts. For variety they may be baked in rings or on a hot griddle.

Let us begin with biscuits. The marmalade biscuits are delicious for breakfasts when the family enjoys something sweet and delicately flavored to begin the day. They are equally good, split, buttered and served hot with a cup of tea for light afternoon refreshments. Here is the recipe:

Sift together two cups flour, four teaspoons baking powder and one-half teaspoon salt. Add two heaping tablespoons shortening and cut into the dry mixture with a fork. Mix one-third cup of milk, one well beaten egg and one-third of a cup of marmalade. Add to the first mixture, stirring lightly just enough to mix. Turn onto a well floured board and pat into a sheet one-half inch thick. Cut into tiny biscuits and bake in a hot oven for about ten minutes. A small amount of grated orange peel, or a little additional marmalade may be spread on top of the biscuits before baking if you wish.

For the corn meal muffins, sift together one cup corn meal, three-fourths cup flour, three teaspoons baking powder and two tablespoons sugar. Add one-third teaspoon soda to one cup sour milk and stir until dissolved, beat an egg and add to the milk. Add four tablespoons melted shortening and mix thoroughly with the dry ingredients. Bake in well greased muffin tins in a moderate oven for about twenty minutes. Toward the end of the period increase the heat slightly so the muffins will brown evenly and lightly.

Bran muffins are delicious and will be enjoyed by most families. Make more than you think will be eaten at breakfast, split them and serve for the children's luncheon or spread them with butter and jam and slip into their lunch baskets.

Mix together three-fourths of a cup of bran, one and one-fourth cups white or graham flour, one-half teaspoon salt and four teaspoons baking powder. Add a well beaten egg, three-fourths of a cup of milk, four tablespoons melted shortening and three tablespoons of molasses or sugar. Last of all stir in three-fourths of a cup of chopped dates or raisins. The batter should not be too thick, if it appears heavy add a little more milk. Fill greased muffin tins half full and bake in a hot oven for about fifteen minutes.

The dinner menus should be built around one hot dish, a protein, to continue the general outline for planning meals for the average family of five, which was begun recently by nutrition specialists at Michigan State college. This dish may consist of meat, eggs, beans or peas, or cereal and cheese. The accompanying articles are practically the same in all cases.

A meat stew with vegetables and dumplings would be an excellent choice on a low cost menu. The adults and older boy will be given generous servings, the girl of 6 to 8 will have a small amount of meat, a large serving of vegetables and bread or potato in place of the dumplings, as they are rather difficult to digest. The younger member of the family will be given some of the vegetables, mashed with a fork, no meat, and no dumpling.

Though from a nutritional viewpoint it would not be necessary to add another vegetable, a salad or a cooked vegetable might be included for variety. Bread and butter should be provided in ample quantities. A dessert, such as baked apple, cornstarch pudding, junket or custard could be served to all the family. The dessert should be only slightly sweetened for the smallest child, but may be made more palatable by the addition of raisins, more sugar, or a very few nut meats for the older persons.

The menu for lunch or supper will be discussed next week, which will suggest the general outline of an inexpensive meal for a family of five, including a man, a woman, a boy of 14-18, a girl of 6-8, and a boy or girl of 1-2 years of age.

Sure, Many Thanks

Eddie: "Thank you for the presents you sent to me, Mrs. Jones." Mrs. Jones: "Oh, they were nothing to thank me for." Eddie: "That's what I thought, but mother told me to thank you all the same."

You and Your Child

By JANE HERBERT GOWARD

A MATTER OF MANAGEMENT

When Mrs. Haines dropped around to see her neighbor, Mrs. Cole, she found her sitting on the porch sewing.

"Come in and have a seat," said Mrs. Cole, putting her sewing aside. Mrs. Haines had hesitated in the doorway. The purpose of her mission was to borrow salt, and as she came to the door it struck her suddenly that yesterday she had come for the very same article.

Mrs. Haines came in. She decided to forget about the salt for the moment. She commented on the weather first. Then she remarked less formally, "You don't know how good it feels to be sitting. Would you believe it—this is the first time I have sat down today and it is 2:30. How do you do it?"

Mrs. Cole faltered. She didn't know what to say. "I get an early start," she said, adding as an afterthought, "thanks to June. She is up at 6:30 every morning like clockwork and so am I."

"I'm up early too. But I never get anywhere. It seems the more I do, the less is done." She held her head.

"Mom-mey," a child's treble called. "Mom-mey."

Mrs. Cole excused herself and went to the stairs. "What is it, June?" she inquired, knowing quite well that the child having heard their voices had decided that her rest period was over.

"I want a drink," came the answer. "There is still some water in your glass from the first drink. You will find it on the little table beside the bed. Go to sleep, dear."

When Mrs. Cole settled down in her chair on the porch again, remembering to shut the door this time, Mrs. Haines turned to her smilingly. "Hadn't you better leave the door open, Mrs. Cole?" she suggested. "If

I know children, there's sure to be another emergency call soon."

Mrs. Cole sat down. "I'll open it later, after she has had a chance to fall asleep," she said. Mrs. Haines was doubtful. She cocked her head to one side and listened. She would have liked to be able to announce, "There she is again! I told you so." But June's mother took up the conversation quite casually, inquiring about the baby and about David, who is of her own little girl's age.

"Their grandmother is looking after them," Mrs. Haines replied. Then remembering the salt, she said, "I wonder if I could borrow a little salt again," adding apologetically, "I don't know why I never can remember to order."

When Mrs. Cole came back from the kitchen with the salt, her neighbor was in a thoughtful mood. "It is so restful here," she said, as she leaned back in the chair. "My four children sure run me ragged. I wish David was as easy to manage as your June. His daily rest period is my most active time of the day. Up and down, up and down the steps I go. If it isn't a drink, then he is too cold or too warm." She paused. "Instead of my managing him he manages me."

Just then Mrs. Cole's children came trooping in from school.

"The door was open so we came the front way," Mary, the eldest, said, while Robert, age seven, grinned.

A baby's cry rent the air and Mrs. Haines started to her feet nervously. "They've waked the baby," she said. "I can't seem to trust my children out of my sight."

She slammed the door and was gone. The house shook for a brief second, then all was quiet again. Mrs. Cole's children laughed. And there was June at the head of the stairs. "Time to get up?" she inquired. Her mother nodded.

Your Handwriting—
and What It Tells

By JANET WINTON

SCRIPT CONTAINS TELLTALE
DETAILS

"Dear Janet Winton: Is there any significance attached to the use of dashes in place of periods—also the crossing of "t" in this manner: last (with a downward stroke)?"

Dashes have a way of creeping into such varied styles of script that the character analyst must examine the script itself for an explanation. In

strain upon your nature. In other words, you do not express yourself as freely as you have a need to—the dash punctuation marks to the contrary, notwithstanding. And that is why "t" with a down dashing bar finds its way into your handwriting. This is the "t" of impatience and irritability. Its spasmodic introduction into your hand, shows that you have your moments. When you have stood your fill, the lid blows off and there you are in steaming rage.

When this style of "t" is the only

Also The crossing of t
This manner: "last."

an active hand like our own, the dash is employed in place of dot to facilitate speed in writing. If other signs concur, dash punctuation marks may indicate a sense of the dramatic or a love of color and design. In more conventionalized scripts, the dash may reveal that there is a restless urge under the staid and sober front.

The better to understand the nature of the dash in its application as a punctuation substitute, take a pen and paper and do a little experimentation. Write a line of periods and then a row of short lines. See how much longer it takes to write the dots.

There can be no doubt of the fact, after making this simple experiment, that the period calls for concentrated effort. The smaller muscles of the hand are called into action. And for anyone whose natural tendency it is to swing out freely, at attention which the full stop of making a period requires, means greater restraint and hence a greater strain on the nervous system. No wonder another form is sought.

There are signs of grace of manner in the gracious curves of initial and terminal strokes. These show a love of harmony, too. From the size of the writing and from closed "o" and "d" and "s," I gather that you are more tactful than tolerant. That is, you appear to condone more than you actually do.

This habit naturally imposes a style used in a given hand, then it is certain that such a writer's approach is anything but friendly. There will be no combination of curved strokes, as in your hand. The script will most likely be disorderly as to size and slant. And as uniformity reflects conformity or the ability thereof, it is easy to deduce that such a writer will be pessimistic, negative in attitude and of a morbid turn.

The restraining influence in your impulsive hand is reflected in "d." This letter is not alone undersized, but appears with a pinched loop, a sign of shrewdness in practical matters. Thus I gather that you are probably calculating in your choice of friends. You must repeatedly ask yourself the question, "Are they worthwhile?" And as other persons may be helpful in the many aspects of our daily lives, you should have business friends and social friends and friends who are convenient when there is a favor to ask, each circle complete in itself and bearing no relationship to another.

As you have a head for details from the small script, it is not necessary for you to be particularly clever in dealing with the various sides of your life. You have the tact and you have the memory. You do not have to be forgiving, as you rarely give others the chance to be indebted to you.

Girls' Conference
Will Open July 9

A program is being formulated for the girls' conference July 9 to 16, the first of a series of annual conferences to be held at Pine lodge next summer.

The following will be faculty leaders: Mrs. Abraham DeYoung; Coach J. H. L. Schouten, Hope college; Mrs. Corey Poest, Zealand; Mrs. John A. Dykstra and Mrs. Cornelius Muller, Grand Rapids; Miss Sue Weddell, New York city.

Faculty members and girls who attended Pine lodge conferences in past years will attend the annual meeting and dinner Friday evening in First Reformed church, Kalamazoo.

As Economy Measure

East Lansing—Abandonment of plans for celebration of the seventy-first anniversary of the founding of Michigan State College this spring are announced by President Robert S. Shaw. The move was made to economize in college administration and is in accordance with economic measures being proposed in other State institutions and departments.

The celebration was to have taken place at the time of the annual commencement in June.

While the celebration, as planned, was not an elaborate one, it involved expenditure of funds.
