WILL YOU MARRY ME?

Because, in my opinion, you are the person I love most. I've known about it for a long time, but I didn't want to rush you into marriage. I think that when you're ready, you'll say yes. So I'm asking you, will you marry me?

Yours forever,

POULTRY

FEATHER PICKING

‘What causes feather picking and what can be done about it, is a question, especially after large groups of chickens are forming into flocks in the laying line,’” said Mrs. Albert M. Lamont, poultry editor for the Canadian Poultry Magazine.

“ Feather picking is a disease which occurs when the bird becomes frightened and begins to pick at its feathers. It may be due to several causes, such as changes in lighting or in some cases due to the fact that the bird is not getting enough food.

“ Some shade is necessary for the bird, but it should not be too bright. The bird should be able to see its own reflection in the cage. The cage should be kept clean and dry, and the floor should be covered with clean straw or hay.

“ The bird should be allowed to have its own food and water, and the water should be clean and fresh. The bird should be allowed to have its own dust bath, and the dust should be kept clean and dry.

“ The bird should be allowed to have its own exercise, and the exercise should be varied. The bird should be allowed to have its own company, and the company should be varied. The bird should be allowed to have its own shade, and the shade should be varied.

“ The bird should be allowed to have its own room, and the room should be clean and dry. The bird should be allowed to have its own food, and the food should be clean and fresh. The bird should be allowed to have its own water, and the water should be clean and fresh.

DIRTY HANDS

When Bill, David first extended an invitation to have Bill over for dinner he was a little surprised. He had never even met him before! But he decided to accept and see what would happen. The dinner turned out to be wonderful! Bill cooked some delicious chicken and they had a great time talking about their lives. Bill even gave him a recipe for his favorite dessert which was so good that they didn’t get any leftovers.

It is always safe to plan to buy a half dozen eggs, because they are not only nutritious but also economical. Eggs can be cooked in many ways, such as boiling, baking, frying, or scrambling. Eggs are a good source of protein, a vital nutrient for overall health.

An interesting new fruit called the "Roseline" is growing in the Peruvian forests, produced in South America, and is often eaten with the ordinary lemon. Because it has a unique flavor, the fruit is now often called the "Lemonline".

Many families are still interested in the "shaker" method of cooking in the South Pacific, especially during the rainy season. "Shaker" is an old-fashioned term which refers to the practice of rolling hot coals over the food to cook it evenly. This method is popular because it can be used with any type of food.

The result has been gathered through research work done by Professor Mollie Janzen, textiles expert, at the University of California. The report clearly shows that the "shaker" method is superior to other cooking methods, such as boiling or roasting.

Some may dispute the fact that there is no "correct" method of cooking food. However, in most cases, the "shaker" method is the best choice. It is simple, easy to use, and produces delicious results.

As much as the ability to conform, "shaker" is a sign of open-mindedness and flexibility. With this ability to "shaker", Bill's family personality has been set and his character is well defined. When he iconically writes, it is good to know that he is self-confident, honest, and straightforward.
